PROGRAMMING INTERVIEWS EXPOSED

CODING YOUR WAY THROUGH THE INTERVIEW

John Wiley & Sons Ace technical interviews with smart preparation Programming Interviews Exposed is the programmer's ideal first choice for technical interview preparation. Updated to reflect changing techniques and trends, this new fourth edition provides insider guidance on the unique interview process that today's programmers face. Online coding contests are being used to screen candidate pools of thousands, take-home projects have become commonplace, and employers are even evaluating a candidate's public code repositories at GitHub—and with competition becoming increasingly fierce, programmers need to shape themselves into the ideal candidate well in advance of the interview. This book doesn't just give you a collection of questions and answers, it walks you through the process of coming up with the solution so you learn the skills and techniques to shine on whatever problems you're given. This edition combines a thoroughly revised basis in classic questions involving fundamental data structures and algorithms with problems and step-by-step procedures for new topics including probability, data science, statistics, and machine learning which will help you fully prepare for whatever comes your way. Learn what the interviewer needs to hear to move you forward in the process Adopt an effective approach to phone screens with non-technical recruiters Examine common interview problems and tests with expert explanations Be ready to demonstrate your skills verbally, in contests, on GitHub, and more Technical jobs require the skillset, but you won't get hired unless you are able to effectively and efficiently demonstrate that skillset under pressure, in competition with hundreds of others with the same background. Programming Interviews Exposed teaches you the interview skills you need to stand out as the best applicant to help you get the job you want.

THE INTERVIEW EXPERT

CRACKING THE PM CAREER

Careercup Product management is a big role, and this a big book. From the authors of the best-selling Cracking the PM Interview comes the comprehensive guide to the skills, frameworks, and practices to become a great product manager. It will help you level-up your skills and career from your first product management role through product leadership. You'll learn how to: * Design high-quality products that delight users and solve people's needs. * Run and deliver your projects quickly, smoothly, and effectively. * Create product visions and strategies to set direction and optimize for long-term impact. * Lead people and influence without authority. * Manage people, develop great PMs, build great teams, and create great product organizations. * Manage your career so you can translate your efforts into the recognition you deserve. This book will teach you the reliable frameworks and best practices that improve your chances of shipping a successful product. The frameworks won't transform you into a great product manager overnight or guarantee that your products never fail, but they'll help you avoid the most common problems and give you the structure to start experimenting, reflecting, and improving. Topics include: * Getting Started: the product life cycle; the first 90 days * Product Skills: user research; A/B tests; problem solving frameworks; systems thinking; product discovery; design sprints; ethical product design; technical terms and concepts; product documentation (specs and PRDs) * Execution Skills: agile project management; minimum viable products (MVPs); incremental development; product launches; time management; overcoming obstacles * Strategic Skills: product vision; strategy; roadmaps; goals and OKRs * Leadership Skills: growth mindset; ownership mentality; influencing without authority; stakeholder management; collaboration; communication; inspiring a team; mentoring; working with designers, engineers, and executives * People Management Skills: becoming a people manager; being a member of the leadership team; reviewing work; holding people accountable; coaching and development; recruiting and interviewing; product processes; organizational structures * Careers: career ladders; career goals; partnering with your manager; picking the right team; negotiations; networking; handling bad situations; career options beyond PM
