Ornithology, Evolution, and Philosophy The Life and Science of Ernst Mayr 1904-2005 *Springer Science & Business Media* This book is the first detailed biography of Ernst Mayr. He was an 'architect' of the Synthetic Theory of Evolution, and the greatest evolutionary biologist since Charles Darwin, influential historian and philosopher of biology, outstanding taxonomist and ornithologist, and naturalist. He is one of the most widely known biologists of the 20th century. Mayr used the theories of natural selection and population thinking as theoretical models within the framework of historical biological studies. He was the first to emphasize the role of biopopulations, thereby pointing out the basic difference between 'population thinking' and typological essentialism. **10 in One Study Package for CBSE Biology Class 11 with 3 Sample Papers** *Disha Publications* **10 in ONE CBSE Study Package Biology class 11 with 3 Sample Papers** is another innovative initiative from Disha Publication. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC. Promoting Thoughtful and Socially Responsible Behavior in the Early Childhood Years Rowman & Littlefield This book for teachers and parents makes an important case for the need for developing moral behavior in young children. It offers effective tools for teaching children to weigh decisions in the face of potential consequences, examine rationales for their choices, study the effects of their choices on others.

Biology of Rove Beetles (Staphylinidae) Life History, Evolution, Ecology and Distribution Springer Rove beetles (Staphylinidae) are common elements of the soil biota, living in the litter and deeper soil layers. Although they are one of the most diverse and speciose groups of insects, no comprehensive books on their general evolution and ecology are as yet available. This book fills that gap, discussing significant aspects and active research examples in the fields of phylogeny and systematics, ecology and conservation, and reproduction and development. The combination of review chapters and case studies provides an excellent introduction to the biology of rove beetles and enables readers to become familiar with active research fields in this megadiverse group of beetles. Offering easy access to these fields, it also demonstrates how staphylinids are used as bioindicators in applied ecosystem research, including that concerning conservation issues. Experienced scientists and beginners alike find the diversity of subjects covered intriguing and inspiring for continuing and starting their own research. The book is intended for students and researchers in biology and zoology (entomology), including morphologists, ecologists, soil scientists, evolutionary biologists, paleontologists, biogeographers, taxonomists and systematists.

Animals, Gods and Humans Changing Attitudes to Animals in Greek, Roman and Early Christian Thought Routledge Consulting a wide range of key texts and source material, *Animals, Gods and Humans* covers 800 years and provides a detailed analysis of early Christian attitudes to, and the position of, animals in Greek and Roman life and thought. Both the pagan and Christian conceptions of animals are rich and multilayered, and Ingvild Sælid Gilhus expertly examines the dominant themes and developments in the conception of animals. Including study of: biographies of figures such as Apollonius of Tyana; natural history; the New Testament via Gnostic texts; the church fathers; and from pagan and Christian criticism of animal sacrifice, to the acts of martyrs, the source material and detailed analysis included in this volume make it a veritable feast of information for all classicists.

ISC Biology Book I for Class XI S. Chand Publishing Well-labelled illustrations, diagrams, tables, figures and experiments have been given to support the text, wherever necessary.
