# The Ultimate Guide to Fast Recovery from Food, Alcohol, Drug and Sex Problems Without Sacrificing Your Lifestyle

*What is the scariest thing you can think of? For me, it was overdosing at 27 years old in my friend's basement. Knocked out cold, alone, helpless and at death's door, it was the culmination of a decade-long battle against my desires and addictions. In the time leading up to this, I had been reckless towards not only the people around me, but myself and my body. The addictions that had me imprisoned stemmed from simple issues like overeating on a daily basis to more extreme problems like abusing drugs in the search for that next high. By the time I left high school, I was already addicted to alcohol, food and drugs - sex completed the full cycle soon enough. I was a hundred pounds overweight. I underperformed at work and at home. I spent my days on a high or planning the next one. I had lost all hope in myself and my future. I was a nobody living in an empty body. I took down my mirror because I couldn't bear to look at the stranger that I saw within its depths. I was killing myself, yet I could not bring myself to stop the rut. I made resolutions to quit on a daily basis. I hated what was happening to me, yet could not stop it. Things came to a head when I came within a whisker of death a few weeks after my 27th birthday. That near-death experience saved my life, and gave me a new chance to fight off my addictions. I fought a winning battle and I stand here, almost three decades later, an expert in addiction recovery. I was one of the lucky ones; many people get killed or fail to live due to their addictions. Addictions are something we all neglect till they become too powerful to ignore. Many people wish away their addiction until it becomes too strong, that it becomes their life and truth. I combined my personal experience during my decade of hell and two decades of professional work helping addicts, to produce "Death to Addiction". In this book you will learn: All about your brain and why it yearns for that next 'hit' How to spot a new and upcoming addiction from a mile away The one MAIN reason your addictions occur Why you might be addicted to alcohol without even knowing How drugs are a world of downward spirals How an eating addiction can sneak up out of nowhere Why sex addiction is more than what happens in bed How to turn into the master of yourself and perfect self-discipline The amazing benefits of healthy relationships The two superpowers I used to end hundreds of people's addictions Why meditation and mindfulness are the secret weapons to success The #1 surefire way to putting death to your addiction And so much more... Everyone has their fair share of addictions but nearly 90% of people with them, have no idea what to do about them. So, they clear some space for the addictions to exist. People simply choose to live with them and act like they are not there, when in reality, addictions are the biggest reason why they live their entire life asking themselves, "what if?" ## Families Bereaved by Alcohol or Drugs

## Research on Experiences, Coping and Support

**Routledge** *Individuals bereaved by the drug- or alcohol-related death of a family member represent a sizeable group worldwide. Families Bereaved by Alcohol or Drugs is the long-awaited result of an important and ambitious research project into the experiences commonly encountered by members of this stigmatized and vulnerable group. Based on focus groups with the practitioners and service personnel who support grieving relatives following the loss of a loved one to alcohol or drugs, as well as interviews with the largest qualitative sample of adults bereaved by substance use that has been reported to date, this much-needed contribution to research on addiction and bereavement identifies four major reasons why grief following this tragic kind of death is particularly difficult. By examining the experiences of a wide range of stakeholders, including practitioners and policymakers in health, social care and the criminal justice system, the research contained within this book underscores the large number of organizations that play a role in the implementation of official procedure following a drug- or alcohol-related death and identifies significant gaps in the system that bereaved individuals must negotiate. Grounded in extensive and rigorous academic research, Families Bereaved by Alcohol or Drugs is essential reading for academics, researchers and postgraduate students in the fields of mental health and addiction, social work and social studies, psychology, family studies and bereavement. The book should also be of interest to anyone with a professional interest in bereavement or substance use.*

## Mike My Brother: A Chronological and Poetic Look At: Addiction Depression Endurance Death

**Archway Publishing** *One man's journey though his reality of life which is mirrored in millions of Americans. Both addict and non-addict will benefit from Mike's inspiring words. His poetry was found by his sister ten years after his death. The words were moving, compelling and inspired his sister, Sharon, to put his collection of thoughts into a manuscript. Many subjects Mike covered were life experiences: love lost and found, addiction, depression, relationships, mother and fatherhood, ageing and his own personal demons that led him to the extreme. Mike's words were touching, thought-provoking, heartbreaking and ultimately tragic! The book portrays the other side of an addict. The saying "don't judge a book by its cover," has one meaning ... to go beyond what you see. For the non-addict look past the addiction. Look into the eyes of an addict, which will reveal the pain in their soul. Give yourself an opportunity to get to know the person. Do not judge him/her because you have no idea the roads they've travelled. For the addict, don't sell yourself short. Believe in yourself! Give yourself permission to fulfill your dreams. You too can have an exciting future. If you don't re-evaluate your future today, you may find yourself mimicking Mike. Any journey begins and ends with you.*

## Love and Death

## An Existential Theory of Addiction

**Xlibris Corporation** *Philosopher Ross Reed, Ph.D., refers to an eclectic array of thinkers in Love and Death: an Existential Theory of Addiction in particular, existential philosophers Soren Kierkegaard (1813-1855) and Jean-Paul Sartre (1905-1980). According to Dr. Reed, addiction is usually the result of existential or life conditions rather than underlying physiological problems. Therefore, it may involve not only drugs or alcohol but also relationships, belief systems, activities, and even emotional states. Anything that can serve to deflect one's consciousness from reflectively apprehending the task of becoming oneself can serve as an object of addiction. If the object is another person, one might ask whether in fact addiction can masquerade as love. Is it possible to believe that you are in love with someone when in fact you are merely addicted to him or her? In this creative and provocative work, Reed argues that Sartre's theory of love is in fact a theory of addiction.*

## The Poetry of Erotic Love, Addiction and Death

**Page Publishing, Inc** My poems are written in different rhyme schemes and vary from romantic to erotic to addictive poetry, and there are poems about death. Addiction can take many forms--drugs, food, and even people. I use metaphor to describe some of my poetry. Much is about new found love and optimism, as well as lost love or requited love. I trust you will enjoy the poetry of D. J. Reynolds for years to come.

## Codependency: The Love That Kills

*Codependency kills. It sacrifices the mind, body and soul of one for the "love" of another. Codependency destroys one's intrapersonal relationship (the relationship with self). It manifests as an emotional stronghold that feeds on the self-esteem of those who look to others for self-validation. Referred to as a "love" addiction, the relationship centers around enabling the destructive behaviors of an addict. Codependency is an unhealthy coping mechanism that is found in the family relationship. In personal relationships it manifests as an unhealthy dependence on a loved one. While this dependence satiates their sensual desires and needs, it creates an emotional void that stifles their own personal growth. In this book, I share my very personal story.*

## When a Child Dies from Drugs

## Practical Help for Parents in Bereavement

**Xlibris Corporation** "When a Child Dies From Drugs" is written by parents to help other parents who are experiencing the ultimate tragedy of their child's death from drugs or alcohol - parents who find themselves isolated in a fathomless dark void wondering whether they will ever resurface into the real world again. This book offers strength, practical advice and an aid in grief recovery for parents and families, gleaned not only from personal experiences but also from meeting with many parents through their out-reach program, "G.R.A.S.P." (Grief Recovery After Substance Passing) Subjects covered range from the emotional trauma of learning of the child's demise and on through the guilt, denial, anger, "what-if's" and, finally, acceptance and to suggestions of how to cope daily and into a future which will never be the same. It is also illuminating to all those who know someone who has lost a loved one through drugs -What to say and do? What NOT to say and do? There is advice here for those who want to support families in grief. With personal insights this book is very much like friends reaching out to friends in compassion and kindness - friends who understand because, quite simply, the writers continue to be on the same journey as those they will comfort.

From Psychiatrists, to the children of the mandated members of the classes, their input is considered and the books HAVE to reach them. If this material offends you, find another group.
