**THE NEC4 ENGINEERING AND CONSTRUCTION CONTRACT**

---

**A COMMENTARY**

---

*John Wiley & Sons The authoritative guide to the NEC4 Engineering and Construction Contract The New Engineering Contract (NEC) is one of the leading standard forms of contract for major construction and infrastructure projects. The latest edition of the contract (NEC4) is now a suite of contracts widely used in the UK, Australia, Hong Kong, South Africa, Ireland, and New Zealand. This timely and important book provides a detailed commentary on the latest edition of the main NEC4 Engineering and Construction Contract (NEC4 ECC) form. It explains how the contract is intended to operate and examines each clause to consider its application and legal interpretation. It also draws upon the author's highly successful third edition of the book covering the previous contract. It identifies and comments on the changes between the current and previous version of the form. After a brief introduction to the new edition of the form, The NEC4 Engineering and Construction Contract offers in-depth chapters covering everything from main options and secondary option clauses to risk assurances and NEC 4 family contracts. In between, readers will learn about general core clauses, the obligations and responsibilities of the contractor, testing and defects, payments, compensation events, and much more. Covers the latest version of the NEC Engineering and Construction Contract, the leading standard form contract for major construction projects Examines the new contract clause by clause and compares it with the previous edition Previous editions were widely acknowledged as detailed and fair analyses of the NEC contracts Written by a highly regarded contracts commentator, experienced arbitrator, and adjudicator The NEC4 Engineering and Construction Contract: A Commentary is an excellent book for construction industry professionals working for clients, employers, main contractors, project managers, subcontractors, and specialist contractors.*

## **ATOMIC DAYS**

---

---

## **THE UNTOLD STORY OF THE MOST TOXIC PLACE IN AMERICA**

---

*Haymarket Books Once home to the United States's largest plutonium production site, the Hanford Nuclear Reservation in Washington state is laced with 56 million gallons of radioactive waste. The threat of an explosive accident at Hanford is all too real—an event that could be more catastrophic than Chernobyl. The EPA designated Hanford the most toxic place in America; it is also the most expensive environmental clean-up job the world has ever seen, with a \$677 billion price tag that keeps growing. Huge underground tanks, well past their life expectancy and full of boiling radioactive gunk, are leaking, infecting groundwater supplies and threatening the Columbia River. Whistleblowers, worried that the worst is ahead, are now speaking out, begging to be heard and hoping their pleas help bring attention to the dire situation at Hanford. Aside from a few feisty community groups and handful of Indigenous activists, there is very little public scrutiny of the clean-up process, which is managed by the Department of Energy and carried out by contractors with shoddy track records, like Bechtel. In the context of renewed support for atomic power as a means of combating climate change, Atomic Days provides a much-needed refutation of the myths of nuclear technology—from weapons to electricity—and shines a spotlight on the ravages of Hanford and its threat to communities, workers and the global environment.*

*Arcadia Publishing Marinship was a World War II shipyard built by the W.A. Bechtel Company to fulfill an urgent need for cargo ships to support soldiers all over the world. Sausalito was selected as the site for its unused railroad capacity and access*

---

---

to a deepwater channel and the Golden Gate Bridge. In March 1942, the shipyard was built on the site of the railroad maintenance yard and adjacent vacant mudflats, with the first ship being launched in September. At the time of its peak operation, there were as many as 20,000 workers. Workers were recruited from local resources at first but eventually a more widespread recruitment brought people from the Midwest and the South. These new workers, including minorities and women, enabled Marinship to become a leader in the integrated workforce phenomenon. As the war in Europe was won, fewer ships were needed. The Marinship labor force was reduced by about half until the victory in Japan, when ships were no longer needed. Marinship was soon taken over by the US Army Corps of Engineers, which disposed of what it did not need for its operations and currently maintains several buildings to facilitate its regional operations.

---

#### **BECHTEL AND THE MEN WHO BUILT THE WORLD**

---

*Simon and Schuster* The tale of the Bechtel family dynasty is a classic American business story. It begins with Warren A. 'Dad' Bechtel, who led a consortium that constructed the Hoover Dam. From that auspicious start, the family and its eponymous company would go on to 'build the world,' from the construction of airports in Hong Kong and Doha, to pipelines and tunnels in Alaska and Europe, to mining and energy operations around the globe. Today Bechtel is one of the largest privately held corporations in the world, enriched and empowered by a long history of government contracts and the privatization of public works, made possible by an unprecedented revolving door between its San Francisco headquarters and Washington

#### **SAVE MOZAMBIQUE'S ELEPHANT COAST:RECREAT**

---

*iUniverse* The author meets entrepreneur Jim on a 1988 North Pole adventure, discover they are both Africa enthusiasts. Returning from a waspish over the Andes pipeline experience in 1995, Jim recruits him for Africa to produce a feasibility study to obtain a 40,000 acre Indian Ocean look-alike San Francisco Peninsula development offered personally by Mozambique's President. The project goes through several near death experiences, end up an inimitable world class international tourist destination project. Jim has the largest wildlife refuge development by private enterprise on record, a 914 Sq Mi wildlife ecotourism development which safeguards the UN's botanically diverse region. But Jim fails to develop it, dies in 1999. The author now targets recruiting a billionaire or Disney to fund expanding to 4000 Sq Mi to connect to the nearby 38,500 Sq Mi worlds' largest wildlife refuge, to provide range to save 5000 Kruger elephants slated for mercy killing for overgrazing.

## **MANAGING COMPLEX OUTSOURCED PROJECTS**

---

---

*Wolters Kluwer The ever-changing world of outsourcing demands that project managers be adept at team building, meeting management, group-based problem solving and conflict management. Managing Complex Outsourced Projects provides a comprehensive review of what it takes to successfully manage outsourced projects resulting in improved performance and reduced expenses. Author Gregory A. Garrett discusses the concept of Integrated Project Management (IPM), which is the discipline of ensuring that appropriate practices, tools and techniques are implemented by all parties involved in the outsourcing process. In Managing Complex Outsourced Projects, you'll find more than 400 tips and best practices, over 40 forms and more than 20 case studies that depict how the most successful companies effectively manage outsourced complex projects.*
