WAR AND REVOLUTION

THE UNITED STATES AND RUSSIA, 1914-1921

The third volume in Saul's history of U.S.-Russian relations looks at events surrounding America's entry into the

European conflict and its encouragement of continued Russian participation, even in the face of domestic unrest. Saul (history, Russian and East European studies, U. of Kansas) draws on military and diplomatic archives in both countries to provide detailed accounts of the activities of consular, diplomatic, and military staffs as well as American businessmen, Red Cross volunteers, and journalists who were working in Russia. His previous diplomatic histories, *Distant friends* and *Concord and conflict*, cover events from the 18th and 19th centuries. c. Book News Inc.

THE ILLUSTRATED HISTORY OF WORLD WAR TWO

AN AUTHORITATIVE AND DETAILED ACCOUNT OF THE MILITARY AND POLITICAL EVENTS OF THE SECOND WORLD WAR

Southwater Pub From the first shots fired at a Polish naval base in the morning of 1 September 1939 to the total victory of the Allies over the Germans and the Japanese surrender in 1945, this immense global military conflict was the most brutal in human history and affected the lives of millions of civilians and soldiers. This insightful book discusses each specific phase of the European and Pacific Wars, with an introductory chapter on the causes of the war and its aftermath and long-term legacy. The chapters follow the war's battles and campaigns, and there are special feature boxes on key personalities and areas of significant interest alongside detailed maps and battle plans to show how the conflict progressed. The aftermath of World War One, Hitler's Operation Barbarossa, the rapid advance of the Nazi forces across Europe, the Battle of Britain, Pearl Harbor through to the surrender of Germany, are all discussed in detail, as are accounts of the battles in North Africa and the war in the Pacific. The harrowing history of World War Two is retold here in an expert but accessible way, supplemented with over 350 evocative photographs, maps and battle plans, making this a fascinating reference book for both general and specialist readers.

SERVICE FAMILIES ACCOMMODATION

The Stationery Office The Ministry of Defence (MOD) has over 50,000 properties across the United Kingdom, providing housing for around 42,000 Service personnel and their families. A survey has revealed that, while 52 per cent of Service families feel their accommodation is in a good condition, 31 per cent are dissatisfied with the condition of their property. The MOD is currently undertaking a programme to upgrade Service family accommodation. In the last two years it has upgraded some 1,700 properties and will continue upgrading an average of 800 per year. At the current rate of upgrade, it would take some 20 years before all properties reached condition 1 (the highest of four standards). Each year there are over 20,000 Service family moves. Families were satisfied with the move out process, but less satisfied when moving in to a new property, with complaints about the state of carpets, the general condition, the standard of cleaning. Usually the accommodation is not seen before moving in, and personal family circumstances could be taken more into account when accommodation is allocated. The repairs service, run on a single contract in England and Wales, also came in for criticism from families. The MOD's provision of housing reflects better value for money than renting from the open market, but the current housing stock has been acquired over many years and in many cases is in the wrong location to meet demand. There is a shortage of properties for larger families. But the MOD also has 9,170 vacant properties. This is 18 per cent of its housing stock (against a target of 10 per cent), and vacant properties cost an average £4,200 each per year.

MILITARY POWER, THE STATE, AND THE PEOPLE

ABC-CLIO Details the state of Russian military power from 1762-1825 in light of the military at large, the government, and the peoples of Russia. Several chapters discuss impacts of the military and their funding on agriculture and industry, other peoples, and countries as well as cost against the Russians themselves.

MILITARY IDENTITIES

THE REGIMENTAL SYSTEM, THE BRITISH ARMY, AND THE BRITISH PEOPLE C.1870-2000

Oxford University Press Based upon a combination of official papers, private papers and personal reminiscences, and upon research in the National Archives, regimental museums and collections, and other depositories, this book challenges the assumptions of both the exponents and detractors of the regimental system. The author shows that there was not one, but several, regimental systems and he demonstrates that localized recruiting was usually a failure. Many regiments were never able to draw more than a small proportion of their recruits from their own districts. He shows that regimental loyalties were not a primordial force; regimental authorities had to create them and in the late nineteenth century they manufactured new traditions with gusto, whilst in both world wars regimental postings quickly broke down and regiments had to take recruits from wherever they could find them. French also argues that the notion that the British army was bad at fighting big battles because the regimental system created a parochial military culture is facile.

MACMILLAN, KENNEDY AND THE CUBAN MISSILE CRISIS

POLITICAL, MILITARY AND INTELLIGENCE ASPECTS

Springer In October 1962, the world went to the brink of Armageddon. This study provides a new archive-based account of the Cuban missile crisis, providing the first detailed and authoritative account from the British perspective. The book draws upon new British and US archival material and recent scholarship in the west and the former USSR. The diplomatic, military and intelligence dimensions of British policy are scrutinised. New material is presented and existing interpretations of UK-US relations at this crucial moment are reassessed. The book contributes a new aspect to the literature on the Cuban missile crisis, by exploring where the views of Washington and its closest ally converged and diverged.

CHURCHILL AND HITLER

ESSAYS ON THE POLITICAL-MILITARY DIRECTION OF TOTAL WAR

Psychology Press This collection of essays examines the development of Churchill and Hitler as strategic leaders and analyses in particular the impact of their formative years on their leadership styles, 'operational codes', views on civil-military relations, and approaches to the conduct of war at the strategic, operational and tactical levels. In the end, how well these two leaders mastered the political-military direction of the Clausewitzian trinity determined the outcome of the most total war in history. Ultimately, victory depended on the calculated use of all the means of national power - military, political, psychological and economic - to achieve the national end. As these essays demonstrate, it was Churchill who best understood that calculation.

OUR FRIEND THE ENEMY

A DETAILED ACCOUNT OF ANZAC FROM BOTH SIDES OF THE WIRE

Simon and Schuster **Our Friend the Enemy** is the first detailed history of the Gallipoli campaign at Anzac since Charles Bean's **Official History**. Viewed from both sides of the wire and described in first-hand accounts. Australian Captain Herbert Layh recounted that as they approached the beach on 25 April that, once we were behind cover the Turks turned their .. [fire] on us, and gave us a lively 10 minutes. A poor chap next to me was hit three times. He begged me to shoot him, but luckily for him a fourth bullet got him and put him out of his pain. Later that day, Sergeant Charles Saunders, a New Zealand engineer, described his first taste of battle, The Turks were entrenched some 50-100 yards from the edge of the face of the gully and their machine guns swept the edges. Line after line of our men went up, some lines didn't take two paces over the crest when down they went to a man and on came another line. Gunner Recep Trudal of the Turkish 27th Regiment wrote of the fierce Turkish counter-attack on 19 May designed to push the Anzac's back into the sea, It started at morning prayer call time, and then it went on and on, never stopped. You know there was no break for eating or anything ... Attack was our command. That was what the Pasha said. Once he says "Attack", you attack, and you either die or you survive.

APPRAISAL AND EVALUATION IN CENTRAL GOVERNMENT : TREASURY GUIDANCE

Stationery Office This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

SUPPLYING THE BRITISH ARMY IN THE FIRST WORLD WAR

Pen and Sword Napoleon famously said that an army marches on its stomach, but it also marches in its boots and its uniforms, carrying or driving its weapons and other equipment, and all this material has to be ordered from headquarters, produced and delivered. Janet Macdonald's detailed and scholarly new study explains how this enormously complex task of organization and labor was carried out by the British army during the First World War. She describes the personnel who performed these tasks, from the government and military command in London to those who handled the items in the field. They were responsible for clothing, accommodation, medicine, transport, hand weapons, armament and communications - a vast logistical network that had evolved to keep millions of men in the field. This meticulously researched account of this important subject - one which has hitherto been neglected by military historians - will be essential reading and reference for anyone who is interested in the modern British army, in particular in its organization and performance in the First World War.

THE SECOND INDOCHINA WAR

A CONCISE POLITICAL AND MILITARY HISTORY

Rowman & Littlefield Publishers Now in a thoroughly revised edition, this influential book offers a concise history of the "Vietnam War" as seen by all sides, not just from the American perspective. Retaining its invaluable account of the strategies, perspectives, and internal politics of the Vietnamese Communists based on research in primary documents and interviews in Saigon and Hanoi, this completely updated and expanded edition incorporates the avalanche of documentation and secondary literature in both English and Vietnamese that has appeared over the past two decades. Distinguished scholar William S. Turley traces the conflict from its origins in the colonial period to its aftermath and shows how the local, national, regional, and global layers of conflict blended into a single event of great complexity. He takes a refreshingly objective look at contentious issues and concludes with a penetrating assessment of the claims, justifications, and "lessons" that scholars, statesmen, and strategists have advanced since the war's end. More information is available on the author's website.

A FULL AND CORRECT ACCOUNT OF THE MILITARY OCCURRENCES OF THE LATE WAR BETWEEN GREAT BRITAIN AND THE UNITED STATES OF AMERICA - VOLUME 2

Andrews UK Limited Volume 2 of 2. I must confess I know little, if anything, about the War of 1812 with the USA, which is the subject of this book. For anybody else in the same boat, who wants to learn about it, this 1000-page account will go a long way towards remedying that lack of knowledge. It is a contemporary account, published a few years after the war, which officially ended in December 1814 though hostilities dragged on. As you might expect, the prose is flowery, written at a time when authors were not inclined to simply call a spade a shovel, but rather tended to elaborate with wordy sentences. That said, it is a very comprehensive account with great attention to detail, beginning with the causes for the war during which an American invasion of Canada was sharply seen off. There are numerous appendices containing official correspondence, the wording of the Peace Treaty drawn up in Ghent in December 1814 (though hostilities did not cease for a two or three months) and casualty figures for various engagements. Battle honours awarded to the British forces engaged included Detroit, Niagara, Miami and Queenstown, but on the other hand James is severely critical of what he calls the misbehaviour in action of two British regiments, the 44th and 21st Foot, described as "the two worst disciplined corps on the field at New Orleans." The problem for the British was the threat from Napoleon, and it wasn't till the Spring of 1814, after his fall, that they were able to reinforce significantly their naval and military forces; nevertheless they were certainly pleased to see the end of the war. It was during this conflict that Washington was taken and the Capitol burned - and that reminds me of a story an American officer colleague told me. He was attending a military conference chaired by US colonel and at some point the British representative, also a colonel, was proving difficult. Eventually the exasperated chairman thumped the table saying: "What can you expect from the guys who burned Washington!" The British officer replied: "Really? I know we did Joan of Arc but I didn't know we did George as well!" Evidently I was not alone in my ignorance.

UNCOVERING WAYS OF WAR

U.S. INTELLIGENCE AND FOREIGN MILITARY INNOVATION, 1918-1941

Cornell University Press Using formerly classified sources - in particular, the reports of military attaches and other diplomat-officers - Thomas G. Mahnken sheds light on the shadowy world of U.S. intelligence gathering, tracing how America learned of military developments in Japan, Germany, and Great Britain in the period between the two world wars. The interwar period witnessed both a considerable shift in the balance of power in Europe and Asia and the emergence of new ways of war, such as carrier aviation, amphibious operations, and combined-arms armored warfare. American attempts to follow these developments, Mahnken says, illustrate the problems that intelligence organizations face in their efforts to bridge the gulf between prewar expectations and wartime reality. He finds three reasons for intelligence's relative lack of success: intelligence agencies are more inclined to monitor established weapons systems than to search for new ones; their attention is more likely to focus on technology and doctrine already demonstrated in combat; and they have more success identifying innovation in areas their own country is testing.

SOVIET STRATEGIC THOUGHT, 1917-91

MIT Press During the Cold War, Westerners were obsessed with the military policies of the Soviet Union. Until the demise of the Soviet Union, however, few details of Moscow's thinking on military matters were available. In this book, Andrei Kokoshin reveals how Soviet military theorists developed and debated the concepts that provided the basis for the Kremlin's defense policies. Drawing on Soviet-era archives and unpublished materials, he sheds light on this important chapter in the history of Russia and the world. The book covers three main themes: the relationship between politics and military strategy in the Soviet Union; how the Soviet political and military leadership assessed threats to Soviet security, the nature of future wars, and methods of warfare; and the relationship between offense and defense in Soviet military strategy. Kokoshin places the strategic concepts behind Moscow's military policies in the context of internal and international struggles for power, and assesses the future role of military power in Russia's national security strategy.

IMAGINING WAR

FRENCH AND BRITISH MILITARY DOCTRINE BETWEEN THE WARS

In this innovative theoretical book, Elizabeth Kier uses a cultural approach to take issue with the conventional wisdom that military organizations inherently prefer offensive doctrines. Kier argues instead that a military's culture affects its choices between offensive and defensive military doctrines. Drawing on organizational theory, she demonstrates that military organizations differ in their worldview and the proper conduct of their mission. It is this organizational culture that shapes how the military responds to constraints, such as terms of conscription set by civilian policymakers. In richly detailed case studies, Kier examines doctrinal developments in France and Great Britain during the interwar period. She tests her cultural argument against the two most powerful alternative explanations and illustrates that neither the functional needs of military organizations nor the structural demands of the international system can explain doctrinal choice. She also reveals as a myth the argument that the lessons of World War I explain the defensive doctrines in World War II. *Imagining War* addresses two important debates. It tackles a central debate in security studies: the origins of military doctrine. And by showing the power of a cultural approach, it offers an alternative to the prevailing rationalist explanations of international politics.

FROM SHELL SHOCK TO COMBAT STRESS

A COMPARATIVE HISTORY OF MILITARY PSYCHIATRY

Leiden University Press War confronts a soldier with extreme situations. Deeply shocking events are followed by periods of inactivity and boredom. Not everyone is equally able to cope with such experiences. Armed conflicts produce not only deaths and injuries but mental breakdowns as well. The field of military psychiatry was founded at the beginning of this century for the purpose of patching up psychologically wounded soldiers. This book presents a history of this field. The first part provides a historical survey of the conduct of war, with an emphasis on front-line experiences and the psychological pressures typical of various combat situations. The second part deals with military psychiatry itself: what kinds of problems did the soldiers have, how were they diagnosed by psychiatrists, and which therapies were used? An analysis of the relation between civil and military psychiatry shows that, contrary to a commonly held view, the phenomenon of war has not led to important innovations in the area of therapy.
