Impact Mathematics Algebra and More Strengthening Forensic Science in the United States A Path Forward National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. Fraud Investigation Reports in Practice Convenience and Corporate Crime Taylor & Francis Investigation reports are written by fraud examiners after completion of internal reviews in client organizations when

there was suspicion of financial wrongdoing. Fraud examiners are expected to answer questions regarding what happened, when it happened, how it happened, and why. This book presents a number of case studies of investigation reports by fraud examiners, offering a framework for studying the report as well as insights into convenience of fraud. The case studies, including KPMG and PwC, focus on two important subjects. First, convenience themes are identified for each case. Themes derive from the theory of convenience, where fraud is a result of financial motives, organizational opportunities, and personal willingness for deviant behaviors. Second, review maturity is identified for each case. Review maturity derives from a stages-of-growth model, where the investigation is assigned a level of maturity based on explicit criteria. The book provides useful insights towards approaching fraud examinations to enable better understanding of the rational explanations for corporate fraud. The book is framed from the perspective of private policing, which contextualizes how investigation reports are examined. This book is a valuable resource for scholars and upper-level students researching and studying auditing and investigation work in the corporate and public sectors. Business and management as well as criminal justice scholars and students will learn from the case studies how to frame a white-collar crime incident by application of convenience theory and how to evaluate a completed internal investigation by fraud examiners. Providing a practical learning experience, this volume presents fifty structured clinical scenarios. Each case is based on a clinical situation that pulls together the key pathological, radiological, and clinical aspects of a condition. Questions and answers highlight diagnostic avenues and provide an effective way of testing assimilation of the material. Students can set their own level of challenge and build their clinical understanding by delving into a cluster of cases covering related topics, or instead emphasize one of the five main themes: symptoms, signs, investigations, treatment, and overall management. Ample illustrations supplement the text, which blends typical clinical case presentations with narrative-style and imaging-based cases.
