U.S. Department of Transportation's Traffic Safety Summit II

Final Report

Prosecutors, defense attorneys, judges, and highway safety professionals from around the country met in 1991 for Traffic Safety Summit II. The Summit produced 188 recommendations on all aspects of the prosecution and adjudication of traffic offenses. To assist in implementing these recommendations, then Secretary of Transportation Skinner appointed an Implementation Group, composed of the Summit working group moderators. This report describes the Implementation Group's accomplishments during its two year charter. The Implementation Group prioritized the recommendations. The highest priority recommendations fell into four major areas: training and education, records, assessment and treatment, and legislation.

Quality aspects in institutional translation

Language Science Press The purpose of this volume is to explore key issues, approaches and challenges to quality in institutional translation by confronting academics' and practitioners' perspectives. What the reader will find in this book is an interplay of two approaches: academic contributions providing the conceptual and theoretical background for discussing quality on the one hand, and chapters exploring selected aspects of quality and case studies from both academics and practitioners on the other. Our aim is to present these two approaches as a breeding ground for testing one vis-à-vis the other. This book studies institutional translation mostly through the lens of the European Union (EU) reality, and, more specifically, of EU institutions and bodies, due to the unprecedented scale of their multilingual operations and the legal and political importance of translation. Thus, it is concerned with the supranational (international) level, deliberately leaving national and other contexts aside. Quality in supranational institutions is explored both in terms of translation processes and their products - the translated texts.

Improving the Quality of Health Care for Mental and Substance-Use Conditions

National Academies Press Each year, more than 33 million Americans receive health care for mental or substance-use conditions, or both. Together, mental and substance-use illnesses are the leading cause of death and disability for women, the highest for men ages 15-44, and the second highest for all men. Effective treatments exist, but services are frequently fragmented and, as with general health care, there are barriers that prevent many from receiving these treatments as designed or at all. The consequences of this are serious—for these individuals and their families; their employers and the workforce; for the nation's economy; as well as the education, welfare, and justice systems. *Improving the Quality of Health Care for Mental and Substance-Use Conditions* examines the distinctive characteristics of health care for mental and substance-use conditions, including payment, benefit coverage, and regulatory issues, as well as health care organization and delivery issues. This new volume in the Quality Chasm series puts forth an agenda for improving the quality of this care based on this analysis. Patients and their families, primary health care providers, specialty mental health and substance-use treatment providers, health care organizations, health plans, purchasers of group health care, and all involved in health care for mental and substance-use conditions will benefit from this guide to achieving better care.

Practicing Social Justice in Libraries

[Taylor & Francis](#) *Practicing Social Justice in Libraries* provides practical strategies, tools, and resources to library and information workers and students who wish to drive change in their classrooms, institutions, and communities and incorporate social justice into their everyday practice. With contributions from a diverse group of librarians, who have experience working in different types of institutions and roles, the book showcases the actions information professionals, largely from historically marginalized groups, are taking to create a more socially responsible environment for themselves and their communities. The chapters reflect on personal experiences, best practices for

programming, professional development, effective collaboration, building inclusive community partnerships, anti-racist practices in the classroom, and organizational culture. Exploring how and why library workers are incorporating anti-racist and anti-oppressive work within their everyday roles, the book demonstrates that library workers are increasingly sending messages of protest and advocating for equity, justice, and social change. Highlighting their experiences of marginalization and exclusion, contributors also reflect upon the impact social justice work has on their mental health, careers, and personal lives. *Practicing Social Justice in Libraries* is essential reading for library and information workers and students who are searching for practical ways to implement more inclusive practices into their work
