TAKE A HIKE

A GUIDE TO THE LESSER KNOWN AND OFTEN MORE CHALLENGING TRAILS IN THE GOLD COUNTRY

WILD

AN ELEMENTAL JOURNEY

Penguin UK Jay Griffiths describes an extraordinary odyssey, courageous and sometimes dangerous, to wildernesses of earth and ice, water and fire. A poetic consideration of the tender connection between human society and wild lands, Wild is by turns funny, touching and harrowing. It is also a journey into that greatest of uncharted lands — wild mind — as Griffiths explores the words and meanings which shape our ideas and our experience of our own wildness. Part travelogue, part manifesto, this is a one-of-a-kind book from a one-of-a-kind author.

BOUND TO BE FREE

EVANGELICAL CATHOLIC ENGAGEMENTS IN ECCLESIOLOGY, ETHICS, AND ECUMENISM

Wm. B. Eerdmans Publishing "Bound to Be Free" explores the scriptural concepts of church ("ekklesia"), freedom ("eleutheria"), and truthful speech ("parrhesia"), showing not only that the proper meanings of three concepts interpenetrate one another but also that rending them asunder lies at the root of Christian division today. According to Reinhard Hutter, the crucial interrelationship of these three

concepts has long been obscured by ongoing church division. Separated from each other, many Christians assume that freedom can be maintained and truthful speech preserved only at the cost of unity. Others assume that Christian unity can be attained only if freedom and truthful speech are narrowly circumscribed in their proper exercise. Christian division issues from the all too familiar individualistic accounts of church, freedom, and speech that have haunted modernity and clouded the proclamation of the gospel. This book shows that here, at the beginning of the twenty-first century, it is imperative that Christians attend to this crucial interrelationship and its source in the God of the gospel. Hutter discusses the meaning, role, and importance of each concept in turn, engaging along the way a wide range of classical and contemporary voices in theology, philosophy, and culture that reveal in different ways how church, freedom, and truthful speech support one another. "Bound to Be Free" is a groundbreaking work that challenges common approaches to ecumenism and points a fruitful new course ahead.

TRAIL, FAS LIGAND, TNF AND TLR3 IN CANCER

Springer This volume provides the current understanding of death receptor's/TLR3 signaling regulation in cancer. Death receptors, including TRAIL-R1, TRAIL-R2, Fas and TNF-R1, owing to their ability to trigger apoptosis and to contribute to the elimination of cancer cells by the immune system have been considered, to variable extent, as important therapeutic targets for cancer therapy. But an increasing body of evidence suggests that some of these receptors may also contribute to tumorigenesis, or that new players such as TLR3 may be targeted for cancer therapy due to their ability to behave like death receptors.

STRENGTHENING FORENSIC SCIENCE IN THE UNITED STATES

A PATH FORWARD

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new

government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

PRINCIPALS OF INCLUSION

Dr. Griffiths' Principals of Inclusion is both a practical, realistic blueprint and an inspiring call to action for accelerating schools/school systems in their search to optimize all students' potential (inclusion). In an information age and an increasingly interconnected Global Village, no student's potential can afford to be wasted, especially by exclusionary educational practices/traditions (either conscious or unconscious). Dr. Griffiths writes clearly, using universal metaphors/tactics applicable to all educational situations.

COMMUNITIES IN ACTION

PATHWAYS TO HEALTH EQUITY

National Academies Press *In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.*

THE TRIANGLE-FREE PROCESS AND THE RAMSEY NUMBER $R(3,k)$

American Mathematical Soc. *The areas of Ramsey theory and random graphs have been closely linked ever since Erdős's famous proof in 1947 that the "diagonal" Ramsey numbers $R(k)$ grow exponentially in k . In the early 1990s, the triangle-free process was introduced as a model which might potentially provide good lower bounds for the "off-diagonal" Ramsey numbers $R(3,k)$. In this model, edges of K_n are introduced one-by-one at random and added to the graph if they do not create a triangle; the resulting final (random) graph is denoted $G_{n,\Delta}$. In 2009, Bohman succeeded in following this process for a positive fraction of its duration, and thus obtained a second proof of Kim's celebrated result that $R(3,k) = \Theta(k^2/\log k)$. In this paper the authors improve the results of both Bohman and Kim and follow the triangle-free process all the way to its asymptotic end.*

GYNECOLOGIC ONCOLOGY

Springer Science & Business Media In recent years, there have been major advances in the treatment of patients with gynecologic malignancies. Perhaps the biggest advances have been in the area of ovarian cancer. Gynecologic Oncology focuses primarily upon this malignancy. This volume discusses cytoreductive surgery; screening for ovarian cancer; chemotherapy; new chemotherapeutic drugs; the controversy regarding the role of high-dose chemotherapy in gynecologic cancers; the hereditary basis for gynecologic malignancies; molecular genetics; molecular biology and new biologic therapies. Other topics covered are the treatment of all stages of cervical cancer, including radiotherapy. In addition, a chapter on advances in the pathology of gynecologic cancers is included. The advances made in the treatment of gynecologic malignancies are due, in part, to the clinical studies performed by many of the contributors to this volume. Clinical advances have been the result of multidisciplinary approaches which involve molecular biologists, pathologists, radiation therapists, surgeons and chemotherapists. Future advances will continue to rely upon collaborative interaction among these different disciplines.

THE DEEPEST GRAVE

FIONA GRIFFITHS CRIME THRILLER SERIES

Orion 'I love Fiona Griffiths' Sharon Bolton A crime from the past. A murder from the future. DS Fiona Griffiths is bored. It's been months since she had a good corpse. Then she gets news; not just of a murder, but of a decapitation, and one committed with an antique sword no less. All that, and, a murder scene laid out like a gruesome crossword clue. Gaynor Charteris was an archaeologist excavating a nearby iron-age site. Genial, respected, well-liked, it was hard to see why anyone would want to kill her. But as Fiona starts to investigate, she finds evidence of a crime that seems to have its origins in King Arthur's greatest battle - a crime so bizarre that getting her superiors to take it seriously is going to be her toughest job. Especially since the crime hasn't yet been committed. Praise for the Fiona Griffiths mystery series: 'Compelling and claustrophobic. Without a doubt, Fiona Griffiths is one of crime's most memorable heroines' Sarah Hilary 'Compelling...a new crime talent to treasure' Daily Mail 'In a word - brilliant. One of the most enjoyable crime novels I've read in a while' James Oswald 'Gritty, compelling...a procedural unlike any other you are likely to read this year' USA Today 'Gripping...Fiona Griffiths kept me hooked to the last page and left me hungry for more' Rachel Abbott Fans of Angela Marsons, Peter James and Ann Cleeves will be gripped by the other titles in the Fiona Griffiths mystery series: 1. Talking to the Dead 2. Love Story, With Murders 3. The Strange Death of Fiona Griffiths 4. This Thing of Darkness 5. The Dead House 6. The Deepest Grave (coming soon!) If you're looking for a crime thriller series to keep you hooked, then go no further: you've just found it. ** Each Fiona Griffiths thriller can be read as a standalone or in series order **

THE ARCHITECT

MATTHEW FONTAINE MAURY, FATHER OF OCEANOGRAPHY

A BIOGRAPHY, 1806-1873

McFarland In becoming "a useful man" on the maritime stage, Matthew Fontaine Maury focused on the ills of a clique-ridden Navy, charted sea lanes and bested Great Britain's admiralty in securing the fastest, safest routes to India and Australia. He helped bind the Old and New worlds with the laying of the transatlantic cable, forcefully advocated Southern rights in a troubled union, and preached Manifest Destiny from the Arctic to Cape Horn. And he revolutionized warfare in perfecting electronically detonated mines. Maury's eagerness to go to the public on the questions of the day riled powerful men in business and politics, and the U.S.,

Confederate and Royal navies. He more than once ran afoul of Jefferson Davis and Stephen R. Mallory, secretary of the Confederate States Navy. But through the political, social and scientific struggles of his time, Maury had his share of powerful allies, like President John Tyler.
