THE ROUTLEDGE COMPANION TO ACCOUNTING EDUCATION

Routledge Many enquiries into the state of accounting education/training, undertaken in several countries over the past 40 years, have warned that it must change if it is to be made more relevant to students, to the accounting profession, and to stakeholders in the wider community. This book's over-riding aim is to provide a comprehensive and authoritative source of reference which defines the domain of accounting education/training, and which provides a critical overview of the state of this domain (including emerging and cutting edge issues) as a foundation for facilitating improved accounting education/training scholarship and research in order to enhance the educational base of accounting practice. The Routledge Companion to Accounting Education highlights the key drivers of change - whether in the field of practice on the one hand (e.g. increased regulation, globalisation, risk, and complexity), or from developments in the academy on the other (e.g. pressures to embed technology within the classroom, or to meet accreditation criteria) on the other. Thirty chapters, written by leading scholars from around the world, are grouped into seven themed sections which focus on different facets of their respective themes - including student, curriculum, pedagogic, and assessment considerations.

PERSONAL TRANSFERABLE SKILLS IN ACCOUNTING EDUCATION

Routledge The development of generic skills (often referred to as 'soft skills') in accounting education has been a focus of discussion and debate for several decades. During this time employers and professional bodies have urged accounting educators to consider and develop curricula which provide for the development and assessment of these skills. In addition, there has been criticism of the quality of accounting graduates and their ability to operate effectively in a global economy. Embedding generic skills in the accounting curriculum has been acknowledged as an appropriate means of addressing the need to provide 'knowledge professionals' to meet the needs of a global business environment. Personal Transferable Skills in Accounting Education illustrates how generic skills are being embedded and evaluated in the accounting curriculum by academics from a range of perspectives. Each chapter provides an account of how the challenge of incorporating generic skills in the accounting curriculum within particular educational environments has been addressed. The challenges involved in generic skills development in higher education have not been limited to the accounting discipline. This book provides examples which potentially inform a wide range of discipline areas. Academics will benefit from reading the experiences of incorporating generic skills in the accounting curriculum from across the globe. This book was originally published as a themed issue of Accounting Education: an international journal.

A FINANCIAL HISTORY OF MODERN U.S. CORPORATE SCANDALS

FROM ENRON TO REFORM

Routledge A definitive new reference on the major failures of American corporate governance at the start of the 21st century. Tracing the market boom and bust that preceded Enron's collapse, as well as the aftermath of that failure, the book chronicles the meltdown in the telecom sector that gave rise to accounting scandals globally. Featuring expert analysis of the Sarbanes-Oxley legislation that was adopted in response to these scandals, the author also investigates the remarkable market recovery that followed the scandals. An exhaustive guide to the collapse of the Enron Corporation and other financial scandals that erupted in the wake of the market downturn of 2000, this book is an essential resource for students, teachers and professionals in corporate governance, finance, and law.

THE INTERFACE OF ACCOUNTING EDUCATION AND PROFESSIONAL TRAINING

Routledge Over many decades the global development of professional accounting education programmes has been undertaken by higher education institutions, professional accounting bodies, and employers. These institutions have sometimes co-operated and sometimes been in conflict over the education and/or training of future accounting professionals. These ongoing problems of linkage and closure between academic accounting education and professional training have new currency because of pressures from students and employers to move accounting preparation onto a more efficient, economic and practical basis. The Interface of Accounting Education and Professional Training explores current elements of the interface between the academic education and professional training of accountants in Australia, New Zealand, South Africa and the UK. It argues for a reassessment of the considerations and requirements for developing professional accounting programs which can make a student: capable of being an accountant (the academy); ready to be an accountant (the workplace); and professional in being an accountant (the professional bodies). This book was originally published as a special issue of Accounting Education: An International Journal.
