The Checklist Manifesto How To Get Things Right Profile Books Today we find ourselves in possession of stupendous know-how, which we willingly place in the hands of the most highly skilled people. But avoidable failures are common, and the reason is simple: the volume and complexity of our knowledge has exceeded our ability to consistently deliver it - correctly, safely or efficiently. In this groundbreaking book, Atul Gawande makes a compelling argument for the checklist, which he believes to be the most promising method available in surmounting failure. Whether you're following a recipe, investing millions of dollars in a company or building a skyscraper, the checklist is an essential tool in virtually every area of our lives, and Gawande explains how breaking down complex, high pressure tasks into small steps can radically improve everything from airline safety to heart surgery survival rates. Fascinating and enlightening, The Checklist Manifesto shows how the simplest of ideas could transform how we operate in almost any field. COLLECTED WORKS OF ATUL GAWANDE The Checklist Manifesto + Better + Being Mortal + Complications The Checklist Manifesto How to Get Things Right Summary & Analysis of The Checklist Manifesto By Atul Gawande How to Get Things Right Independently Published SYNOPSIS: Drawing from his experience as a general surgeon, Atul Gawande's The Checklist Manifesto (2009) reveals startling evidence on how using a simple checklist can significantly reduce human error in complex professions such as aviation, engineering and medicine. ABOUT AUTHOR: Atul Gawande is a general surgeon at Brigham and Women's Hospital in Boston, Massachusetts, and a professor of surgery at Harvard Medical School. As well as writing for the New York Times, he is also author of Better and Complications, the latter of which was a National Book Award finalist. In 2010, Gawande was named one of the world's 100 most influential thinkers by TIME magazine. DISCLAIMER: This book is a SUMMARY. Making Healthcare Safe The Story of the Patient Safety Movement Springer Nature This unique and engaging open access title provides a compelling and ground-breaking account of the patient safety movement in the United States, told from the perspective of one of its most prominent leaders, and arguably the movement's founder, Lucian L. Leape, MD. Covering the growth of the field from the late 1980s to 2015, Dr. Leape details the developments, actors, organizations, research, and policy-making activities that marked the evolution and major advances of patient safety in this time span. In addition, and perhaps most importantly, this book not only comprehensively details how and why human and systems errors too often occur in the process of providing health care, it also promotes an in-depth understanding of the principles and practices of patient safety, including how they were influenced by today's modern safety sciences and systems theory and design. Indeed, the book emphasizes how the growing awareness of systems-design thinking and the self-education and commitment to improving patient safety, by not only Dr. Leape but a wide range of other clinicians and health executives from both the private and public sectors, all converged to drive forward the patient safety movement in the US. Making Healthcare Safe is divided into four parts: I. In the Beginning describes the research and theory that defined patient safety and the early initiatives to enhance it. II. Institutional Responses tells the stories of the efforts of the major organizations that began to apply the new concepts and make patient safety a reality. Most of these stories have not been previously told, so this account becomes their histories as well. III. Getting to Work provides in-depth analyses of four key issues that cut across disciplinary lines impacting patient safety which required special attention. IV. Creating a Culture of Safety looks to the future, marshalling the best thinking about what it will take to achieve the safe care we all deserve. Captivatingly written with an "insider's" tone and a major contribution to the clinical literature, this title will be of immense value to health care professionals, to students in a range of academic disciplines, to medical trainees, to health administrators, to policymakers and even to lay readers with an interest in patient safety and in the critical quest to create safe care. Is it You, Me, Or Adult A.D.D.? Stopping the Roller Coaster when Someone You Love Has Attention Deficit Disorder 1201 Alarm Press Presents a guide to maintaining a relationship with an adult diagnosed with the disorder, with information on the basics, challenges, and options for treatment. The Checklist Manifesto - Summarized for Busy People How to Get Things Right: Based on the Book by Atul Gawande Goldmine Reads This book summary and analysis was created for individuals who want to extract the essential contents and are too busy to go through the full version. This book is not intended to replace the original book. Instead, we highly encourage you to buy the full version. How powerful and influential can a checklist be? Atul Gawande's book, The Checklist Manifesto introduces the checklist: a modified solution to help professionals absorb and master how they execute certain essential tasks that define their responsibilities in their respective industries. Present-day roles in the industry are more intricate in nature, prompting more rigorous training and technology at a more advanced level. However, training and technological advancement are simply not always sufficient. Gawande's alternative and simplistic solution is based on a checklist that was originally introduced by the American Air Force. This checklist served as a guide to help pilots in maneuvering sophisticated types of aircrafts. Modified into an innovative checklist that suits modern-day industries and professions, it became an effective tool that equipped doctors and nurses worldwide in delivering quick, complete and professional response to all types of accidents and calamities. Aside from the healthcare industry, Gawande's checklist eventually benefitted businesses such as skyscraper construction and investment banking, along with life-saving protocols involved in disaster response procedures. From Austria to Michigan, real-life accounts of how the checklist has been tremendously helpful are disclosed. These accounts include how an emergency checklist was a key factor in saving a drowning patient who had been submerged underwater for approximately 30 minutes; as well how a cleanliness checklist implemented in intensive care units was instrumental in eradicating a life-threatening infection commonly contracted in hospitals. Gawande, a public health researcher, surgeon and writer, further explains the way checklists trigger urgent and outstanding progress especially in professions where time, precision and efficiency are crucial. The struggle is over for the hardworking workforce of today's industries. The Checklist Manifesto is the perfect book for people striving to reach the level of competence needed in executing the undertakings that come with their job. Intrigued by the hidden influence that checklists possess? Waste no more time and grab a copy of this book now! In 2010, Gawande was named one of the world's 100 most influential thinkers by TIME magazine. INTRODUCTION. Progress in human understanding has become increasingly complex and overwhelming. Imagine being treated for a heart attack in the 1950s. Medical knowledge of what caused heart problems was so sparse back then that you'd simply be prescribed pain relief and bed rest. Oh, and if you wanted to puff on those cigarettes during your recovery, that was fine too. Fortunately, human knowledge has greatly expanded since then. As little as 60 years ago, doctors were fairly clueless about click to obtain a copy. The Youngest Science Notes of a Medicine-Watcher Penguin From the 1920s when he watched his father,

a general practitioner who made housecalls and wrote his prescriptions in Latin, to his days in medical school and beyond, Lewis Thomas saw medicine evolve from an art into a sophisticated science. The Youngest Science is Dr. Thomas's account of his life in the medical profession and an inquiry into what medicine is all about--the youngest science, but one rich in possibility and promise. He chronicles his training in Boston and New York, his war career in the South Pacific, his most impassioned research projects, his work as an administrator in hospitals and medical schools, and even his experiences as a patient. Along the way, Thomas explores the complex relationships between research and practice, between words and meanings, between human error and human accomplishment, More than a magnificent autobiography, The Youngest Science is also a celebration and a warning--about the nature of medicine and about the future life of our planet. The Checklist Manifesto Japanese edition of Dr. Atul Gawande's Checklist Manifesto: How to Get Things Right. Chock full of examples of checklist successes of people working in aviation, high-stakes investors, and architects, Dr. Gawande presents the simple and effective solution of not making fatal mistakes in the complexities of the modern environment by simply making a checklist. In Japanese. Distributed by Tsai Fong Books, Inc. Summary of The Checklist Manifesto Atul Gawande - How to Get Things Right ::::::::::: DISCLAIMER:::::::::::: All of our books are intended as companions' to, not replacement for, the original titles. In 2010, Gawande was named one of the world's 100 most influential thinkers by TIME magazine:::::::::::: INTRODUCTION:::::::::::: Progress in human understanding has become increasingly complex and overwhelming. Imagine being treated for a heart attack in the 1950s. Medical knowledge of what caused heart problems was so sparse back then that you'd simply be prescribed pain relief and bed rest. Oh, and if you wanted to puff on those cigarettes during your recovery, that was fine too. Fortunately, human knowledge has greatly expanded since then. As little as 60 years ago, doctors were fairly clueless about treating heart attacks, whereas today we have numerous methods of doing so, including blood pressure medications, cardiac catheters and even open-heart surgery. We also have a whole host of ways to prevent heart problems in the first place, from cholesterol-lowering drugs to increased exercise. However, in complex areas like medicine, our broad knowledge base has become a double-edged sword. According to the World Health Organization, we have now defined over 13,000 syndromes, diseases and injuries. Add to that the thousands of drugs and procedures available to treat patients and we see that no one doctor or medical team can possibly master all the medical knowledge we have accumulated. This leaves us with a problem of ineptitude. That is, we are struggling to consistently remember, organize and apply the right knowledge in the right way. Surgeons and nurses alike are under immense pressure to master the latest medical technology, deal with multiple patients at once, and carry out the vast number of steps needed to perform complicated medical procedures with precision. As they are doing this, they must simultaneously cope with the unexpected reactions and outcomes that occur when dealing with sick people. Clearly a new kind of tool is needed if we are to make use of our vast medical knowledge and avoid potentially fatal human errors. Progress in human understanding has become increasingly c

Human Error in Medicine CRC Press This edited collection of articles addresses aspects of medical care in which human error is associated with unanticipated adverse outcomes. For the purposes of this book, human error encompasses mismanagement of medical care due to: * inadequacies or ambiguity in the design of a medical device or institutional setting for the delivery of medical care; * inappropriate responses to antagonistic environmental conditions such as crowding and excessive clutter in institutional settings, extremes in weather, or lack of power and water in a home or field setting; * cognitive errors of omission and commission precipitated by inadequate information and/or situational factors -- stress, fatigue, excessive cognitive workload. The first to address the subject of human error in medicine, this book considers the topic from a problem oriented, systems perspective; that is, human error is considered not as the source of the problem, but as a flag indicating that a problem exists. The focus is on the identification of the factors within the system in which an error occurs that contribute to the problem of human error. As those factors are identified, efforts to alleviate them can be instituted and reduce the likelihood of error in medical care. Human error occurs in all aspects of human activity and can have particularly grave consequences when it occurs in medicine. Nearly everyone at some point in life will be the recipient of medical care and has the possibility of experiencing the consequences of medical error. The consideration of human error in medicine is important because of the number of people that are affected, the problems incurred by such error, and the societal impact of such problems. The cost of those consequences to the individuals involved in medical error, both in the health care providers' concern and the patients' emotional and physical pain, the cost of care to alleviate the consequences of the error, and the cost to society in dollars and in lost personal contributions, mandates consideration of ways to reduce the likelihood of human error in medicine. The chapters were written by leaders in a variety of fields, including psychology, medicine, engineering, cognitive science, human factors, gerontology, and nursing. Their experience was gained through actual hands-on provision of medical care and/or research into factors contributing to error in such care. Because of the experience of the chapter authors, their systematic consideration of the issues in this book affords the reader an insightful, applied approach to human error in medicine -- an approach fortified by academic discipline. The Cross of Redemption Uncollected Writings Vintage A treasury of essays, articles and reviews by the late author of Giovanni's Room includes pieces that explore such topics as religious fundamentalism, Russian literature and the possibility of an African-American president. This analysis is meant as a supplement to, and not a replacement for, The Checklist Manifesto. **Summary - The Checklist Manifesto By Atul Gawande - How to Get Things Right Createspace Independent Publishing Platform The Checklist Manifesto: How to Get Things Right -- A Complete Summary!** The Checklist Manifesto, written by Atul Gawande, explains how maintaining a checklist is vital for managing complexity in medicine, business, and other fields. Although the idea of a checklist is quite simple, it has profound implications for high performance, disaster avoidance, and team dynamics. Back in 2006, Gawande worked with the World Health Organization to find an effective way to reduce preventable errors in the high-stakes world of surgery. Through his research, he discovered that many mistakes which occur during surgeries can be prevented. Creating a checklist seemed like a promising answer to the problem. This prompted Gawande to begin a journey to understand how other industries such as aviation, building construction, and financial investing use checklists to minimize errors and increase their performance. Through his thorough research, Gawande discovered that making a checklist is more challenging than it seemed. However, a properly organized checklist can create better teamwork, empower employees, and even improve organizational structure. **Here Is A Preview Of What You Will Get:** - In The Checklist Manifesto, you will get a summarized version of the book. - In The Checklist Manifesto, you will find the book analyzed to further strengthen your knowledge. - In The Checklist Manifesto, you will get some fun multiple choice quizzes, along with answers to help you learn about the book. Get a copy, and learn everything about The Checklist Manifesto . **Why We Do what We Do The Dynamics of Personal Autonomy Putnam Adult Argues that human motivation is driven more by autonomy than a system of rewards and punishments, and offers insight into how to promote learning by instilling freedom-based practices Every Patient Tells a Story Medical Mysteries and the Art of Diagnosis Harmony A riveting exploration of the most difficult and important part of what doctors do, by Yale School of Medicine physician Dr. Lisa Sanders, author of the monthly New York Times Magazine column "Diagnosis," the inspiration for the hit Fox TV series House, M.D. "The experience of being ill can be like waking up in a foreign country. Life, as you formerly knew it, is on hold while you travel through this other world as unknown as it is unexpected. When I see patients in the hospital or in my office who are suddenly, surprisingly ill, what they really want to know is, 'What is wrong with me?' They want a road map that will help them manage their new surroundings. The ability to give this unnerving and unfamiliar place a name, to know it—on some level—restores a measure of control, independent of whether or not that diagnosis comes attached to a cure. Because, even today, a diagnosis is frequently all a good doctor has to offer." A healthy young man suddenly loses his memory—making him unable to remember the events of each passing hour. Two patients diagnosed with Lyme disease improve after antibiotic treatment—only to have their symptoms mysteriously return. A young woman lies dying in the ICU—bleeding, jaundiced, incoherent—and none of her doctors know what is killing her. In Every Patient Tells a Story, Dr. Lisa Sanders takes us bedside to witness the process of solving these and other diagnostic dilemmas, providing a firsthand account of the expertise and intuition that lead a doctor to make the right diagnosis. Never in human history have doctors had the knowledge, the tools, and the skills that they have today to diagnose illness and disease. And yet mistakes are made, diagnoses missed, symptoms or tests misunderstood. In this high-tech world of modern medicine, Sanders shows us that knowledge, while essential, is not sufficient to unravel the complexities of illness. She presents an unflinching look inside the detective story that marks nearly every illness—the diagnosis—revealing the combination of uncertainty and intrigue that doctors face when confronting patients who are sick or dying. Through dramatic stories of patients with baffling symptoms, Sanders portrays the absolute necessity and surprising difficulties of getting the patient's story, the challenges of the physical exam, the pitfalls of doctor-to-doctor communication, the vagaries of tests, and the near calamity of diagnostic errors. In Every Patient Tells a Story, Dr. Sanders chronicles the real-life drama of doctors solving these difficult medical mysteries that not only illustrate the art and science of diagnosis, but often save the patients' lives. **Essential Prosperity The Fourteen Most Important Books on Wealth and Riches Ever Written St. Martin's Essentials The ultimate collection of books for life-changing wealth and success. Man Thinketh by James Allen - Science of Getting Rich by Wallace Wattles - The Game of Life by Florence Scovel Shinn - The Golden Key by Emmet Fox - The Go-Getter by Peter B. Kyne - How to Live on 24 Hours a Day by Arnold Bennett - Acres of Diamonds by Russell Conwell - Creative Mind and Success by Ernest Holmes - The Secret of Success by William Walker Atkinson - The Life Power and How to Use It by Elizabeth Towne - Prosperity by Annie Rix Miltz These experts speak from every background—from self-help and spirituality to finance and business—each of them sharing the secrets to building life changing wealth and prosperity. Check List Your Guide to Get Things Right In his latest bestseller, Atul Gawande shows what the simple idea of the checklist reveals about the complexity of our lives and how we can deal with it. The modern world has given us stupendous know-how. Yet avoidable failures continue to plague us in health care, government, the law, the financial industry—in almost every realm of organized activity. And the reason is simple: the volume and complexity of knowledge today has exceeded our ability as individuals to properly deliver it to people—consistently, correctly, safely. We train longer, specialize more, use ever-advancing technologies, and still we fail. Atul Gawande makes a compelling argument that we can do better, using the simplest of methods: the checklist. In riveting stories, he reveals what checklists can do, what they can't, and how they could bring about striking improvements in a variety of fields, from medicine and disaster recovery to professions and businesses of all kinds. And the insights are making a difference. Already, a simple surgical checklist from the World Health Organization designed by following the ideas described here has been adopted in more than twenty countries as a standard for care and has been heralded as "the biggest clinical invention in thirty years" (The Independent).

Summary: the Checklist Manifesto How to Get Things Right The Checklist Manifesto: How to Get Things Right by Atul Gawande | Book Summary | Abbey Beathan (Disclaimer: This is NOT the original book. If you're looking for the original book, search this link: <http://amzn.to/2GxjsPb>) An essential read for any individual working to do things the right way. With the unstoppable technological growth and the constant evolution and optimization of any given process, every activity has gained more complexity. Everyday, it is becoming harder and harder to keep up with complicated procedures and it's normal to feel overwhelmed, but what can we do to address this? Checklists, an old but gold method. Checklists were invented long ago, but they are still used. They were created out of necessity to execute the extremely complicated process of flying military aircraft but they still have a lot of relevance. And that's because checklists have evolved as well with the passing of time. Gawande with his medical experience demonstrate how even surgeons tasked to do complex surgeries use checklists to aid them during the procedure and it has reduced the rate of fatalities by more than a third. There are a lot of proof about how influential checklists are in the modern era and in The Checklist Manifesto you'll learn all about it. Gawande shares with us riveting stories about the importance of checklists. Their power might shock you but they will also convince you of their utility. P.S. The Checklist Manifesto is an extremely informative book that will teach you the importance of checklists, an invention many people nowadays mistakenly underestimate. P.P.S. It was Albert Einstein who famously said that once you stop learning, you start dying. It was Bill Gates who said that he would want the ability to read faster if he could only have one superpower in this world. Abbey Beathan's mission is to bring across amazing golden nuggets in amazing books through our summaries. Our vision is to make reading non-fiction fun, dynamic and captivating. The way of success is the way of continuous pursuit of knowledge" - Abbey Beathan İşler nasıl doğru yapılır The Tennis Partner Harper Perennial An unforgettable, illuminating story of how men live and how they survive, from the acclaimed New York Times bestselling author of Cutting for Stone When Abraham Verghese, a physician whose marriage is unraveling, relocates to El Paso, Texas, he hopes to make a fresh start as a staff member at the county hospital. There he meets David Smith, a medical student recovering from drug addiction, and the two men begin a tennis ritual that allows them to shed their inhibitions and find security in the sport they love and with each other. This friendship between doctor and intern grows increasingly rich and complex, more intimate than two men usually allow. Just when it seems nothing can go wrong, the dark beast from David's past emerges once again—and almost everything Verghese has come to trust and believe in is threatened as David spirals out of control. El efecto Checklist Cómo una simple lista de comprobación elimina errores y salva vidas En El efecto Checklist, Atul Gawande nos explica cómo las listas de comprobación han hecho posibles algunas de las actividades más difíciles realizadas por los seres humanos, desde pilotar aviones a construir rascacielos de una sofisticación inconcebible. Y, basándose en su propia experiencia, nos enseña cómo la aplicación de esta idea al universo inmensamente variado y complejo de la cirugía dio lugar a una lista de comprobación de noventa segundos que redujo los fallecimientos y las complicaciones, en más de un tercio, en ocho hospitales de todo el mundo, sin prácticamente ningún coste y para casi cualquier tipo de intervención. A lo largo de unos relatos fascinantes, Gawande nos lleva desde Austria, donde una lista de comprobación salvó la vida de una niña que había estado media hora bajo el agua, hasta Michigan, donde una lista de comprobación de higiene en las UCIs prácticamente erradicó una letal infección hospitalaria, y de ahí a la cabina de un avión que estuvo a punto de estrellarse. Por el camino, nos muestra lo que son capaces de hacer las listas de comprobación, lo que no pueden hacer y cómo pueden ocasionar tremendas mejoras en ámbitos muy alejados de la medicina, que van desde la seguridad nacional a la banca de negocios, pasando por todo tipo de profesiones y

negocios. El efecto Checklist es un análisis apasionante de la naturaleza de la complejidad en nuestras vidas y una lectura fundamental para cualquiera que se esfuerce por hacer bien las cosas. Find the Bug A Book of Incorrect Programs Addison-Wesley Professional Gain a deeper understanding of software and learn to be a better programmer with this unique book of challenging code exercises. Efeito Checklist, O Leya No Name in the Street Vintage An extraordinary history of the turbulent sixties and early seventies that displays James Baldwin's fury and despair more deeply than any of his other works, and powerfully speaks to contemporary conversations around racism. "It contains truth that cannot be denied." — The Atlantic Monthly In this stunningly personal document, James Baldwin remembers in vivid details the Harlem childhood that shaped his early conciousness and the later events that scored his heart with pain—the murders of Martin Luther King and Malcolm X, his sojourns in Europe and in Hollywood, and his return to the American South to confront a violent America face-to-face. Change to Strange Create a Great Organization by Building a Strange Workforce Pearson Education To achieve sustained competitive advantage, you must create and deliver something that's valuable, rare, and hard to imitate—and you can't do that with a run-of-the-mill workforce. Your workforce needs to be strikingly different, obsessively focused on delivering on your unique value proposition. Compared with everyone else's workforce, your people need to be downright strange! This book is about everything it takes to build a workforce that's strange and extraordinary enough to execute your most powerful strategies and your unique value proposition. It's about understanding exactly how your workforce needs to be different...creating an end-to-end Strange Workforce Value Chain...implementing workforce systems that support your unique goals...establishing detailed metrics based on what makes you unique...using those metrics to drive clarity throughout your entire organization, and steer it toward success. If you're tasked with executing strategy through people, and "balanced scorecards" and "strategy maps" just haven't been enough, take your next and greatest leap forward: make the Change to Strange. · Why "normal" workforces just won't cut it anymore Everyone says their people make the difference. Most everyone's wrong. · Create your strange workforce in four steps Imagine, pinpoint your gaps, prioritize, and act. · What your customers must notice for you to win Link your real performance drivers to specific workforce deliverables. · Rearchitect your workforce to break from the pack Organize to get strategic results from the right people. · Leverage the magic of measurement Implement metrics that work—and keep them working.
