KEY=BE - COMPTON HARPER

The Easy Way to Stop Gambling

Take Control of Your Life

Arcturus Publishing **READ THIS BOOK AND BECOME A HAPPY NONGAMBLER FOR THE REST OF YOUR LIFE** Allen Carr's **Easyway** is a global phenomenon. It has helped millions of smokers from all over the world, and has also been successfully applied to a wide range of other issues, including drinking, overeating, and overspending. Here the method addresses the fastest growing social problem of modern times: gambling. Allen Carr explains how gamblers fall into the trap and why they keep gambling despite knowing that it's ruining their lives. By explaining the nature of the trap, he removes the desire to gamble and the fears that keep you hooked. Most important of all, you will not feel that you've made a sacrifice, you will not miss gambling, and you will enjoy life to the full without feeling in any way deprived. What people say about Allen Carr's Easyway method: "The Allen Carr program was nothing short of a miracle." Anjelica Huston "It was such a revelation that instantly I was freed from my addiction." Sir Anthony Hopkins "His skill is in removing the psychological dependence." The Sunday Times

Atlas of the World

Twenty-Eighth Edition

The only world atlas updated annually, Oxford's Atlas of the World is the most authoritative atlas on the market. Full of crisp, clear cartography of urban areas and natural landscapes around the globe, the Atlas contains maps of cities and regions at carefully selected scales that give a striking view of the Earth's surface. It opens with a detailed survey of world statistics, a six-page feature examining human migration, and an immersive collection of satellite images of Earth, including stunning new photographs specially sourced and processed for this atlas. The volume continues with a Gazetteer of Nations that has been comprehensively updated to include recent economic and political changes. The extensive thematic World Geography section is beautifully illustrated with charts, maps, and graphs on diverse topics of geographic significance, such as climate change, biodiversity, oceans and seas, population and cities, conflict and cooperation, energy and minerals, tourism and travel, global health, wealth, and standards of living. The hundreds of city and world maps that form the body of the Atlas have been thoroughly updated for this 28th edition. Providing the finest global coverage available, the Atlas of the World offers a diverse collection of information and cartography of unrivaled accuracy and clarity, presented in an uncommonly beautiful volume.

Language Dispersal, Diversification, and Contact

Oxford University Press, USA This book addresses the complex question of how and why languages have spread across the globe. International experts in the field explore this issue using new analytical research techniques and drawing on large databases, with a focus on the language and population histories of Island Southeast Asia/Oceania, Africa, and South America.

Empire of Pain

The Secret History of the Sackler Dynasty

Pan Macmillan **THE SUNDAY TIMES BESTSELLER** Now on BBC Radio 4 'Book of the Week' Winner of the 2021 Baillie Gifford Prize for Non-Fiction Shortlisted for the 2021 Financial Times/McKinsey Business Book of the Year Award One of Barack Obama's Favorite Books of 2021 Shortlisted for the Crime Writers' Association Gold Dagger for Non-Fiction The gripping and shocking story of three generations of the Sackler family and their roles in the stories of Valium, OxyContin and the opioid crisis. 'One of those authors I will always read, no matter what the subject matter, which is

why I gobbled up *Empire of Pain* . . . a masterclass in compelling narrative nonfiction.' - Elizabeth Day, *The Guardian*
 '30 Best Summer Reads' 'You feel almost guilty for enjoying it so much' - *The Times* The Sackler name adorns the walls of many storied institutions - Harvard; the Metropolitan Museum of Art; Oxford; the Louvre. They are one of the richest families in the world, known for their lavish donations in the arts and the sciences. The source of the family fortune was vague, however, until it emerged that the Sacklers were responsible for making and marketing Oxycontin, a blockbuster painkiller that was a catalyst for the opioid crisis - an international epidemic of drug addiction which has killed nearly half a million people. In this masterpiece of narrative reporting and writing, award-winning journalist and host of the *Wind of Change* podcast Patrick Radden Keefe exhaustively documents the jaw-dropping and ferociously compelling reality. *Empire of Pain* is the story of a dynasty: a parable of twenty-first-century greed.

The Oxford Companion to Spirits and Cocktails

[Oxford University Press](#) "The Oxford Companion to Spirits and Cocktails presents an in-depth exploration of the world of spirits and cocktails in a ground-breaking synthesis. The Companion covers drinks, processes, and techniques around the world as well as those in the US and Europe. It provides clear explanations of the different ways that spirits are produced, including fermentation, distillation and ageing, alongside a wealth of new detail on the emergence of cocktails and cocktail bars, including entries on key cocktails and influential mixologists and cocktail bars"--

To the Lighthouse

[Renard Press Ltd](#) Described by Virginia Woolf herself as 'easily the best of my books', and by her husband Leonard as a 'masterpiece', *To the Lighthouse*, first published in 1927, is one of the milestones of Modernism. Set on the Isle of Skye, over a decade spanning the First World War, the narrative centres on the Ramsay family, and is framed by Mrs Ramsay's promise to take a trip to the lighthouse the next day - a promise which isn't to be fulfilled for a decade. Flowing from character to character and from year to year, the novel paints a moving portrait of love, loss and perception. Bearing all the hallmarks of Woolf's prose, with her delicate handling of the complexities of human relationships, *To the Lighthouse* has earned its reputation - frequently appearing in lists of the best novels of the twentieth century, it has lost not an iota of brilliance.

Simultaneous Structure in Phonology

[Oxford University Press](#) This book surveys the range of well-known non-sequential phonological phenomena that are problematic for the traditional one-dimensional idealization of language. It makes a valuable contribution to phonology and phonetics, focusing on the role of these simultaneous features in the relation between phonological representations and the speech signal

Communities in Action

Pathways to Health Equity

[National Academies Press](#) In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Rewire Your Brain

Think Your Way to a Better Life

[John Wiley & Sons](#) How to rewire your brain to improve virtually every aspect of your life-based on the latest research in neuroscience and psychology on neuroplasticity and evidence-based practices Not long ago, it was thought that the brain you were born with was the brain you would die with, and that the brain cells you had at birth were the most you would ever possess. Your brain was thought to be "hardwired" to function in predetermined ways. It turns out that's not true. Your brain is not hardwired, it's "softwired" by experience. This book shows you how you can rewire parts of the brain to feel more positive about your life, remain calm during stressful times, and improve your social relationships. Written by a leader in the field of Brain-Based Therapy, it teaches you how to activate the parts of your

brain that have been underactivated and calm down those areas that have been hyperactivated so that you feel positive about your life and remain calm during stressful times. You will also learn to improve your memory, boost your mood, have better relationships, and get a good night sleep. Reveals how cutting-edge developments in neuroscience, and evidence-based practices can be used to improve your everyday life Other titles by Dr. Arden include: Brain-Based Therapy-Adult, Brain-Based Therapy-Child, Improving Your Memory For Dummies and Heal Your Anxiety Workbook Dr. Arden is a leader in integrating the new developments in neuroscience with psychotherapy and Director of Training in Mental Health for Kaiser Permanente for the Northern California Region Explaining exciting new developments in neuroscience and their applications to daily living, Rewire Your Brain will guide you through the process of changing your brain so you can change your life and be free of self-imposed limitations.

Parenting Matters

Supporting Parents of Children Ages 0-8

National Academies Press Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

The Writing Revolution

Cuneiform to the Internet

John Wiley & Sons In a world of rapid technological advancements, it can be easy to forget that writing is the original Information Technology, created to transcend the limitations of human memory and to defy time and space. The Writing Revolution picks apart the development of this communication tool to show how it has conquered the world. Explores how writing has liberated the world, making possible everything from complex bureaucracy, literature, and science, to instruction manuals and love letters Draws on an engaging range of examples, from the first cuneiform clay tablet, Egyptian hieroglyphs, and Japanese syllabaries, to the printing press and the text messaging Weaves together ideas from a number of fields, including history, cultural studies and archaeology, as well as linguistics and literature, to create an interdisciplinary volume Traces the origins of each of the world's major written traditions, along with their applications, adaptations, and cultural influences

Common European Framework of Reference for Languages: Learning, Teaching, assessment

Companion volume

Council of Europe The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments since the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ► an explanation of the key aspects of the CEFR for teaching and learning; ► a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre-A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ► a short report on the four-year

development, validation and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ► promote and support the learning and teaching of modern languages; ► enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ► protect linguistic and cultural diversity in Europe; and ► promote the right to quality education for all.

Oxford Atlas of the World

Oxford University Press, USA Provides maps and satellite photography that reflect the most recent political, economic, and demographic statistics, and presents articles addressing the environment and population matters in major cities of the world.

Stochastic Hybrid Systems

CRC Press Because they incorporate both time- and event-driven dynamics, stochastic hybrid systems (SHS) have become ubiquitous in a variety of fields, from mathematical finance to biological processes to communication networks to engineering. Comprehensively integrating numerous cutting-edge studies, Stochastic Hybrid Systems presents a captivating treatment of some of the most ambitious types of dynamic systems. Cohesively edited by leading experts in the field, the book introduces the theoretical basics, computational methods, and applications of SHS. It first discusses the underlying principles behind SHS and the main design limitations of SHS. Building on these fundamentals, the authoritative contributors present methods for computer calculations that apply SHS analysis and synthesis techniques in practice. The book concludes with examples of systems encountered in a wide range of application areas, including molecular biology, communication networks, and air traffic management. It also explains how to resolve practical problems associated with these systems. Stochastic Hybrid Systems achieves an ideal balance between a theoretical treatment of SHS and practical considerations. The book skillfully explores the interaction of physical processes with computerized equipment in an uncertain environment, enabling a better understanding of sophisticated as well as everyday devices and processes.

Once in a House on Fire

Pan Macmillan 'One of the most extraordinary stories you will ever read of the triumph of the human spirit' Daily Mail Set in 1970s Manchester, Once in a House on Fire tells the true story of three sisters and their mother, a close-knit and loving family forced to battle with poverty, abuse and the effects of depression. Beautifully written and deeply inspiring, with a new afterword by Andrea Ashworth, it is a book that will stay with its readers for ever.

Real World Research

A Resource for Social Scientists and Practitioner-Researchers

Wiley-Blackwell This successful text on carrying out research in 'real world' situations has been thoroughly revised and updated in order to make it as useful as possible to teachers and students from a range of behavioral and social science disciplines. Includes new examples from applied psychology, applied social science, health studies, social work and education. Provides more coverage of qualitative methods. Pedagogical material has been updated to include a glossary and detailed cross-referencing across chapters. Bases the quantitative analysis section around version 10 of SPSS and the section on qualitative analysis around the NUD*IST software. Situates material more clearly within theoretical conceptualizations of the nature of social science research, pointing to the advantages of a critical realist approach. For sample chapters please visit www.blackwellpublishing.com/robson

The Epistemology of Fake News

Oxford University Press Fake news is an important topic of current social concern. This book is the first sustained inquiry into the epistemology of fake news. The chapters examine the meaning of the term 'fake news', discuss practices that generate or promote fake news, and investigate potential therapies for the problems it presents.

The Changing Business of Journalism and Its Implications for Democracy

Peter Lang Pub Incorporated The business of journalism is widely held to be in a terminal crisis today, in particular because the rise of the internet has drained audience attention and advertising revenue away from existing media platforms. This book, the first systematic international overview of how the news industry is dealing with current changes, counters such simplistic predictions of the supposedly technologically determined death of the news industry. It offers instead nuanced scrutiny of the threats and opportunities facing legacy news organisations across

the world in countries as diverse as the United States, the United Kingdom, France, Germany, Finland, Brazil, and India as they transition to an increasingly convergent media landscape.

Social Theory after the Internet

Media, Technology, and Globalization

UCL Press The internet has fundamentally transformed society in the past 25 years, yet existing theories of mass or interpersonal communication do not work well in understanding a digital world. Nor has this understanding been helped by disciplinary specialization and a continual focus on the latest innovations. Ralph Schroeder takes a longer-term view, synthesizing perspectives and findings from various social science disciplines in four countries: the United States, Sweden, India and China. His comparison highlights, among other observations, that smartphones are in many respects more important than PC-based internet uses. *Social Theory after the Internet* focuses on everyday uses and effects of the internet, including information seeking and big data, and explains how the internet has gone beyond traditional media in, for example, enabling Donald Trump and Narendra Modi to come to power. Schroeder puts forward a sophisticated theory of the role of the internet, and how both technological and social forces shape its significance. He provides a sweeping and penetrating study, theoretically ambitious and at the same time always empirically grounded. The book will be of great interest to students and scholars of digital media and society, the internet and politics, and the social implications of big data.

Someone Like You

A heart-warming story from the author of *The Prenup!*

Hachette UK Fans of Julie James, Carly Phillips and Chanel Cleeton - meet the men of Oxford magazine! Lauren Layne's bestselling Oxford Series continues with *Someone Like You*, the poignant, heartwarming story of New York's most eligible bachelor, Lincoln Mathis, a man who's living a lie - until his dream woman takes away the pain. Lincoln Mathis doesn't hide his reputation as Manhattan's ultimate playboy. In fact, he cultivates it. But behind every flirtatious smile, each provocative quip, there's a secret that Lincoln's hiding from even his closest friends - a tragedy from his past that holds his heart quietly captive. Lincoln knows what he wants: someone like Daisy Sinclair, the sassy, off-limits bridesmaid he can't take his eyes off at his best friend's wedding. He also knows that she's everything he can never have. After a devastating divorce, Daisy doesn't need anyone to warn her off the charming best man at her sister's wedding. One look at the breathtakingly hot Lincoln Mathis and she knows that he's exactly the type of man she should avoid. But when Daisy stumbles upon Lincoln's secret, she realizes there's more to the charming playboy than meets the eye. And suddenly Daisy and Lincoln find their lives helplessly entwined in a journey that will either heal their damaged souls...or destroy them forever. Want more fun, fresh, flirty and very sexy rom-com? Check out all the titles in the Oxford series: *Irresistibly Yours*, *I Wish You Were Mine* and *Someone Like You*, and don't miss the warm, witty and sexy *Wedding Belles* series. Can a guy and a girl really be 'just friends'? You won't want to miss Lauren Layne's sexy take on this timeless question in *Blurred Lines*.

Global Burden of Disease and Risk Factors

World Bank Publications Strategic health planning, the cornerstone of initiatives designed to achieve health improvement goals around the world, requires an understanding of the comparative burden of diseases and injuries, their corresponding risk factors and the likely effects of intervention options. The Global Burden of Disease framework, originally published in 1990, has been widely adopted as the preferred method for health accounting and has become the standard to guide the setting of health research priorities. This publication sets out an updated assessment of the situation, with an analysis of trends observed since 1990 and a chapter on the sensitivity of GBD estimates to various sources of uncertainty in methods and data.

Fiction and Interaction

How Clicking a Mouse Can Make You Part of a Fictional World

Popular Mechanics

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

The Brain That Changes Itself

Stories of Personal Triumph from the Frontiers of Brain Science

Penguin UK An introduction to the science of neuroplasticity recounts the case stories of patients with mental limitations or brain damage whose seemingly unalterable conditions were improved through treatments that involved the thought re-alteration of brain structure.

Neurodevelopmental Disorders Across the Lifespan

A Neuroconstructivist Approach

Oxford University Press This book is unique in presenting evidence on development across the lifespan across multiple levels of description (genetic, brain, cognitive, environmental). The authors use a well-defined disorder - Williams syndrome, to explore the impact of genes, brain development, behaviour, as well as the individual's environment on development.

AI Superpowers

China, Silicon Valley, and the New World Order

Houghton Mifflin Introduction -- China's Sputnik moment -- Copycats in the Coliseum -- China's alternate Internet universe -- A tale of two countries -- The four waves of AI -- Utopia, dystopia, and the real AI crisis -- The wisdom of cancer -- A blueprint for human co-existence with AI -- Our global AI story

The Psychology of Fake News

Accepting, Sharing, and Correcting Misinformation

Routledge This volume examines the phenomenon of fake news by bringing together leading experts from different fields within psychology and related areas, and explores what has become a prominent feature of public discourse since the first Brexit referendum and the 2016 US election campaign. Dealing with misinformation is important in many areas of daily life, including politics, the marketplace, health communication, journalism, education, and science. In a general climate where facts and misinformation blur, and are intentionally blurred, this book asks what determines whether people accept and share (mis)information, and what can be done to counter misinformation? All three of these aspects need to be understood in the context of online social networks, which have fundamentally changed the way information is produced, consumed, and transmitted. The contributions within this volume summarize the most up-to-date empirical findings, theories, and applications and discuss cutting-edge ideas and future directions of interventions to counter fake news. Also providing guidance on how to handle misinformation in an age of "alternative facts", this is a fascinating and vital reading for students and academics in psychology, communication, and political science and for professionals including policy makers and journalists.

Privacy is Power

Why and How You Should Take Back Control of Your Data

Random House An Economist BEST BOOK OF THE YEAR As the data economy grows in power, Carissa Véliz exposes how our privacy is eroded by big tech and governments, why that matters and what we can do about it. The moment you check your phone in the morning you are giving away your data. Before you've even switched off your alarm, a whole host of organisations have been alerted to when you woke up, where you slept, and with whom. As you check the weather, scroll through your 'suggested friends' on Facebook, you continually compromise your privacy. Without your permission, or even your awareness, tech companies are harvesting your information, your location, your likes, your habits, and sharing it amongst themselves. They're not just selling your data. They're selling the power to influence you. Even when you've explicitly asked them not to. And it's not just you. It's all your contacts too. Digital technology is stealing our personal data and with it our power to make free choices. To reclaim that power and democracy, we must protect our privacy. What can we do? So much is at stake. Our phones, our TVs, even our washing machines are

spies in our own homes. We need new regulation. We need to pressure policy-makers for red lines on the data economy. And we need to stop sharing and to adopt privacy-friendly alternatives to Google, Facebook and other online platforms. Short, terrifying, practical: *Privacy is Power* highlights the implications of our laid-back attitude to data and sets out how we can take back control. If you liked *The Age of Surveillance Capitalism*, you'll love *Privacy is Power* because it provides a philosophical perspective on the politics of privacy, and it offers a very practical outlook, both for policymakers and ordinary citizens.

Blindsight

Macmillan *Blindsight* is the Hugo Award-nominated novel by Peter Watts, "a hard science fiction writer through and through and one of the very best alive" (*The Globe and Mail*). Two months have past since a myriad of alien objects clenched about the Earth, screaming as they burned. The heavens have been silent since—until a derelict space probe hears whispers from a distant comet. Something talks out there: but not to us. Who should we send to meet the alien, when the alien doesn't want to meet? Send a linguist with multiple-personality disorder and a biologist so spliced with machinery that he can't feel his own flesh. Send a pacifist warrior and a vampire recalled from the grave by the voodoo of paleogenetics. Send a man with half his mind gone since childhood. Send them to the edge of the solar system, praying you can trust such freaks and monsters with the fate of a world. You fear they may be more alien than the thing they've been sent to find—but you'd give anything for that to be true, if you knew what was waiting for them. . . . At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Introduction to the Languages of the World

Oxford University Press Unique in scope, *An Introduction to the Languages of the World* introduces linguistics students to the variety of world's languages. Students will gain familiarity with concepts such as sound change, lexical borrowing, diglossia, and language diffusion, and the rich variety of linguistic structure in word order, morphological types, grammatical relations, gender, inflection, and derivation. It offers the opportunity to explore structures of varying and fascinating languages even with no prior acquaintance. A chapter is devoted to each of the world's continents, with in-depth analyses of representative languages of Europe, Asia, Africa, Oceania, and America, and separate chapters cover writing systems and pidgins and creoles. Each chapter contains exercises and recommendations for further reading. New to this edition are eleven original maps as well as sections on sign languages and language death and revitalization. For greater readability, basic language facts are now organized in tables, and language samples follow international standards for phonetic transcription and word-by-word glossing. There is an instructor's manual available for registered instructors on the book's companion website.

World Inequality Report 2022

World Inequality Report 2022 is the most authoritative and comprehensive account of global trends in inequality, providing cutting-edge information about income and wealth inequality and also pioneering data about the history of inequality, gender inequality, environmental inequalities, and trends in international tax reform and redistribution.

The Oxford Handbook of Cognitive Neuroscience, Volume 1

Core Topics

Oxford University Press A rich source of authoritative information that supports reading and study in the field of cognitive neuroscience, this two-volume handbook reviews the current state-of-the-science in all major areas of the field.

How to Succeed at Medical School

An Essential Guide to Learning

John Wiley & Sons Can you adapt to the wide variety of learning environments in medicine? Can you show your best abilities in the exams at the same time as learning to be a doctor? Can you balance your studies with an enjoyable social life? Can you develop your professionalism and manage your 'digital footprint'? *How to Succeed at Medical School* will help you learn these vital skills, and much more. Written by experienced medical school teachers and packed full of case studies, illustrations, quotes from other students, tip boxes, exercises, portfolios and learning techniques to help you communicate, study and revise - it's an essential resource to help you thrive at medical school. This thoroughly updated second edition includes new chapters on Professionalism and Teaching, and provides invaluable insight into what to expect from the start of medical school right through to the start of your medical career.

Pocket Book of Hospital Care for Children

Guidelines for the Management of Common Childhood Illnesses

World Health Organization **The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem.**

World Development Report 1978

World Bank Publications **This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.**

Pygmalion Illustrated

Pygmalion is a play by George Bernard Shaw, named after a Greek mythological figure. It was first presented on stage to the public in 1913.

The Line of Beauty

Picador Classic

Pan Macmillan **CELEBRATING 50 YEARS OF PICADOR BOOKS Winner of the Man Booker Prize, The Line of Beauty is a classic novel about class, politics and sexuality in Margaret Thatcher's 1980s Britain. There was the soft glare of the flash - twice - three times - a gleaming sense of occasion, the gleam floating in the eye as a blot of shadow, his heart running fast with no particular need of courage as he grinned and said, 'Prime Minister, would you like to dance?' In the summer of 1983, twenty-year-old Nick Guest moves into an attic room in the Notting Hill home of the wealthy Feddens: Gerald, an ambitious Tory MP, his wife Rachel and their children Toby and Catherine. Innocent of politics and money, Nick is swept up into the Feddens' world and an era of endless possibility, all the while pursuing his own private obsession with beauty. The Line of Beauty is Alan Hollinghurst's Man Booker Prize-winning masterpiece. It is a novel that defines a decade, exploring with peerless style a young man's collision with his own desires, and with a world he can never truly belong to. Part of the Picador Collection, a new series showcasing the best of modern literature.**

Stuart: A Life Backwards

HarperCollins UK **'Stuart does not like the manuscript. He's after a bestseller, "like what Tom Clancy writes". "But you are not an assassin trying to frazzle the president with anthrax bombs," I point out. You are an ex-homeless, ex-junkie psychopath, I do not add.'**

White Teeth

Penguin UK **Chosen by the Guardian as one of the Best Books of the 21st Century From the MAN BOOKER PRIZE- and WOMEN'S PRIZE-SHORTLISTED author of Swing Time, On Beauty and Grand Union 'BELIEVE THE HYPE' The Times The international bestseller and modern classic of multicultural Britain - an unforgettable portrait of London One of the most talked about debut novels of all time, White Teeth is a funny, generous, big-hearted novel, adored by critics and readers alike. Dealing - among many other things - with friendship, love, war, three cultures and three families over three generations, one brown mouse, and the tricky way the past has of coming back and biting you on the ankle, it is a life-affirming, riotous must-read of a book. 'The almost preposterous talent was clear from the first pages' Julian Barnes, Guardian 'Street-smart and learned, sassy and philosophical all at the same time' New York Times 'Outstanding' Sunday Telegraph**

Through the Language Glass

Why The World Looks Different In Other Languages

Random House "Guy Deutscher is that rare beast, an academic who talks good sense about linguistics... he argues in a playful and provocative way, that our mother tongue does indeed affect how we think and, just as important, how we perceive the world." Observer *Does language reflect the culture of a society? *Is our mother-tongue a lens through which we perceive the world? *Can different languages lead their speakers to different thoughts? In *Through the Language Glass*, acclaimed author Guy Deutscher will convince you that, contrary to the fashionable academic consensus of today, the answer to all these questions is - yes. A delightful amalgam of cultural history and popular science, this book explores some of the most fascinating and controversial questions about language, culture and the human mind.
