Management Practice in Dietetics

A book that moves well beyond the view of dietetics management as primarily in foodservice, *Management Practice in Dietetics* deals with management in all areas of dietetics, and provides clear, relevant examples of management principles and the ways they can be applied. This book is unique in its approach to include examples for foodservices, clinical nutrition, and community nutrition management. The book demonstrates how leadership in dietetics and nutrition fits into the management structure of organizations. Students will become familiar with management tools such as decision-making, communication, and marketing. They will develop knowledge and skills related to human resources management, and acquire basic skills in finance. The book directly addresses management and customer service competencies that are required for accreditation of academic programs in dietetics and are included in the credentialing examination for registered dietitian nutritionists. Specific topics include developing and motivating employees, employee discipline, material management, workflow and production, budgeting, information management, and sustainability. Learning objectives at the beginning of each chapter provide focus and direction for students. Margin definitions and a glossary introduce specialized vocabulary and increase comprehension. End of chapter activities aid retention and give students the opportunity for self-testing and application of the material. Written in an accessible style, *Management Practice in Dietetics* is designed for accredited dietetics programs. Nancy R. Hudson earned her master of science degree at the University of Kansas, and did her training as a registered dietitian at the university's medical center. Her career spans more than forty years, and includes teaching posts at the University of Connecticut School of Allied Health Professions, the University of California, Berkeley, and the University of California, Davis. She has worked as a dietitian and nutritionist in hospitals and is the author of numerous professional publications. She is the recipient of the Outstanding Dietetic Education Award from the American Dietetic Association and the California Dietetic Association's Excellence in Education Award, and was granted an honorary doctorate from the Nagoya University of Arts and Sciences. Patricia Booth earned her master of science degree in nutrition and medical dietetics at University of Illinois at Chicago and completed her dietetic internship at Barnes Hospital in Missouri. She is currently the director of nutrition services and the dietetic internship at the University of California San Francisco Medical Center and UCSF Benioff Children's Hospital, San Francisco. She is the author of numerous publications and an active member of the Academy of Nutrition and Dietetics and the California Academy of Nutrition and Dietetics. She was awarded the Academy of Nutrition and Dietetics Outstanding Dietitian of the Year and the Dolores Nyhus Memorial Award for Outstanding Achievement in 2015.

Manual of Dietetic Practice

Wiley-Blackwell Since it was first published in 1988, the *Manual of Dietetic Practice* has become an indispensable textbook and reference for all those involved in the field of clinical nutrition and dietetics. Compiled from the knowledge of both individual experts and the British Dietetic Association's Specialist Groups, it is a comprehensive guide to the principles and practice of dietetics across its entire range - from health promotion to disease management. The third edition has been fully revised in terms of content and presentation, and new topics such as clinical effectiveness, cognitive behavioural therapy and healthcare ethics have been included. From reviews of previous editions 'All sections of this book are excellently written and presented. In the introduction the editor states that its purpose is "to provide the information dietitians need in order to use their skills effectively". The production of such an authoritative source of essentially practical information on all aspects of dietetics fulfils this aim and the book can be recommended to qualified and student dietitians alike. Although the manual is clearly aimed at dietitians in clinical practice, it will be a useful reference source for all health care professionals with an interest in nutrition.' *European Journal of Clinical Nutrition* 'Highly recommended to all dietitians and anyone interested in practical dietetic and nutritional information which is relevant and useful. The user-friendly format makes the text easy to read and to skim quickly for specific details despite the enormous range of topics covered.' *Australian Journal of Nutrition and Dietetics* 'This manual is an excellent resource for experienced practitioners. It is well organized and filled with practical, clearly presented, sound information.' *Journal of Nutrition Education* 'Clear, concise, comprehensive, and well referenced, it provides an essential source of dietetic practice.' *The Lancet*

The Role of Nutrition in Maintaining Health in the Nation's Elderly

Evaluating Coverage of Nutrition Services for the Medicare Population

National Academies Press Malnutrition and obesity are both common among Americans over age 65. There are also a host of other medical conditions from which older people and other Medicare beneficiaries suffer that could be improved with appropriate nutritional intervention. Despite that, access to a nutrition professional is very limited. Do nutrition services benefit older people in terms of morbidity, mortality, or quality of life? Which health professionals are best qualified to provide such services? What would be the cost to Medicare of such services? Would the cost be offset by reduced illness in this population? This book addresses these questions, provides recommendations for nutrition services for the elderly, and considers how the coverage policy should be approached and practiced. The book discusses the role of nutrition therapy in the management of a number of diseases. It also examines what the elderly receive in the way of nutrition services along the continuum of care settings and addresses the areas of expertise needed by health professionals to provide appropriate nutrition services and therapy.

Nutrition Counseling and Education Skill Development

Cengage Learning *NUTRITION COUNSELING AND EDUCATION SKILL DEVELOPMENT, 3rd Edition*, is a step-by-step guide to help entry-level practitioners through the basic components involved in changing food behavior and improving nutritional status. This book provides nutritional professionals with a solid foundation of counseling and education principles, opportunities to practice new skills, and knowledge of evaluation methodologies in an organized, accessible, and engaging approach. The authors' clear style helps readers translate theoretical perspectives on nutrition counseling into actual effective dialogues between client and counselor to influence client knowledge, skills, and attitudes. In addition, since the goals and objectives of nutrition counselors and educators complement each other, the scope of this text has expanded to include elements unique to nutrition education.
