Renting Homes in Wales The Stationery Office The report Renting Homes in Wales (Cm. 8578) updates the recommendations of the 2006 Law Commission report Renting Homes: The Final Report, for the purpose of an introduction of a bill by the Welsh Government. At the core of the recommendations is the creation of a simplified statutory framework which: (i) Reduces the number of available forms of rental occupation of residential property to

two: the secure contract; and the standard contract. (ii) Provides model contracts which set out the basis on which occupiers occupy rented housing in clear terms. Whilst the Renting Homes recommendations were designed as far as possible to maintain the current balance of rights and responsibilities between landlords and occupiers, the development of the proposals inevitably involved some modifications to the status quo. This review highlights the most significant of these modifications and where these have proved controver

Law's Documents Authority, Materiality, Aesthetics Routledge Illuminating their breadth and diversity, this book presents a comprehensive and multidisciplinary view of legal documents and their manifold forms, uses, materialities and meanings. In 1951, Suzanne Briet, a librarian at the Bibliotheque Nationale in Paris, famously said that an antelope in a zoo could be a document, thereby radically changing the way documents were analysed and understood. In the fifty years since this pronouncement, the digital age has introduced a potentially limitless range of digital and technological forms for the capture and storage of information. In their multiplicity and their ubiquity, documents pervade our everyday life. However, the material, intellectual, aesthetic and political dimensions and effects of documents remain difficult to pin down. Taking a multidisciplinary and international approach, this collection tackles the question, what is a legal document?, in order to explore the material, aesthetic and intellectual attributes of legal documentation; the political and colonial orders reflected and embedded in documents; and the legal, archival and social systems which order and utilise information. As well as scholars in law, documentary theory, history, Indigenous studies, art history and design theory and practice, this book will also appeal to those working in libraries, archives, galleries and museums, for whom the ongoing challenges of documentation in the digital age are urgent and timely questions.

Enclaves of Economic Rent Being a Compendium of the Legal Documents Involved Together with a Historical Description The Rent Law of Bengal Being the Bengal Tenancy Act (Act No. VIII of 1885) ... The Art of Not Being Governed An Anarchist History of Upland Southeast Asia Yale University Press From the acclaimed author and scholar James C. Scott, the compelling tale of Asian peoples who until recently have stemmed the vast tide of state-making to live at arm's length from any organized state society For two thousand years the disparate groups that now reside in Zomia (a mountainous region the size of Europe that consists of portions of seven Asian countries) have fled the projects of the organized state societies that surround them—slavery, conscription, taxes, corvée labor, epidemics, and warfare. This book, essentially an "anarchist history," is the first-ever examination of the huge literature on state-making whose author evaluates why people would deliberately and reactively remain stateless. Among the strategies employed by the people of Zomia to remain stateless are physical dispersion in rugged terrain; agricultural practices that

enhance mobility; pliable ethnic identities; devotion to prophetic, millenarian leaders; and maintenance of a largely oral culture that allows them to reinvent their histories and genealogies as they move between and around states. In accessible language, James Scott, recognized worldwide as an eminent authority in Southeast Asian, peasant, and agrarian studies, tells the story of the peoples of Zomia and their unlikely odyssey in search of self-determination. He redefines our views on Asian politics, history, demographics, and even our fundamental ideas about what constitutes civilization, and challenges us with a radically different approach to history that presents events from the perspective of stateless peoples and redefines state-making as a form of "internal colonialism." This new perspective requires a radical reevaluation of the civilizational narratives of the lowland states. Scott's work on Zomia represents a new way to think of area studies that will be applicable to other runaway, fugitive, and marooned communities, be they Gypsies, Cossacks, tribes fleeing slave raiders, Marsh Arabs, or San-Bushmen.

It sets out, in the form of a draft Bill, a new statutory scheme for the termination of tenancies, including a new concept of 'tenant default', to replace the current law of forfeiture. The proposed scheme would define the circumstances in which a landlord may seek to terminate a tenancy early, require the landlord to warn the tenant of the impending action by giving a written notice, and confers

enhanced protection on those with interests deriving out of the tenancy. The report is divided into eight parts with three appendices, and issues considered include: problems with the current law of forfeiture of tenancies and the case for reform; the various components of the proposed scheme, including the concept of tenant default and the stages of a landlord's 'termination claim'; and the role of the court.

Without doubt, just as today, one of the

important sources of income was widespread rental of houses in the large cities, which, except in periods of crisis, gave a fairly stable income. (Renting of houses in the countryside was in Mesopotamia rare, because clay - main building material - was commonly available and building a small house was cheap and easy). This observation is supported by the fact that in the extant documents no known example refers to a legal dispute about unpaid rent, although cases of novation are known. Despite the importance of the rental of private houses the question has never been the subject of a comprehensive study. Only occasionally has it been discussed by editors of documents, in a synthesis, or in a chapter (or part of it) on family archives.
