The Central Intelligence Agency and Overhead Reconnaissance

The U-2 and Oxcart Programs, 1954–1974

Simon and Schuster This volume presents the complete CIA document revealing newly declassified information on the U-2 and Oxcart programs—plus new photos and supporting text. The Central Intelligence Agency and Overhead Reconnaissance 1954-1974 is a fascinating and important historical document. It contains a significant amount of newly declassified material with respect to the U-2 and Oxcart programs, including names of pilots; codenames and cryptonyms; locations, funding, and cover arrangements; electronic countermeasures equipment; cooperation with foreign governments; and overflights of the Soviet Union, Cuba, China, and other countries. Originally published with a Secret/No Foreign Dissemination classification, this detailed study describes not only the program's technological and bureaucratic aspects, but also its political and international context, including the difficult choices faced by President Eisenhower in authorizing overflights of the Soviet Union and the controversy surrounding the shoot down of U-2 pilot Francis Gary Powers in 1960. The authors discuss the origins of the U-2, its top-secret testing, its specially designed high-altitude cameras and complex life-support systems, and even the possible use of poison capsules by its pilots, if captured. Finally, they discuss the CIA's development of a successor to the U-2, the Oxcart, which became the world's most technologically advanced aircraft. For the first time, the more complete 2013 release of this historical text is available in a professionally typeset format, supplemented with higher quality photographs, a new preface by author Gregory W. Pedlow, and a foreword by Chris Pocock.

The Typewriter Revolution: A Typist's Companion for the 21st Century

The Countryman Press The connoisseur's guide to the typewriter, entertaining and practical What do thousands of kids, makers, poets, artists, steampunks, hipsters, activists, and musicians have in common? They love typewriters—the magical, mechanical contraptions that are enjoying a surprising second life in the 21st century, striking a blow for self-reliance, privacy, and coherence against dependency, surveillance, and disintegration. The Typewriter Revolution documents the movement and provides practical advice on how to choose a typewriter, how to care for it, and what to do with it—from National Novel Writing Month to letter-writing socials, from type-ins to typewritten blogs, from custom-painted typewriters to typewriter tattoos. It celebrates the unique quality of everything typewriter, fully-illustrated with vintage photographs, postcards, manuals, and more.

Technics and Civilization

University of Chicago Press Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, Technics and Civilization was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. “The questions posed in the first paragraph of Technics and Civilization still deserve our attention, nearly three quarters of a century after they were written.”—Journal of Technology and Culture

The Precarious Future of Education

Risk and Uncertainty in Ecology, Curriculum, Learning, and Technology

Springer This volume examines the challenges weighing on the future of education in the face of globalization in the twenty-first century. Bringing together eleven authors who explore the paradox of an “after” to the future of education, each chapter in this book targets three important areas: ecology as understood in the broader framework of globalization and pedagogy; curriculum concerns which impact learning; and the pervasiveness of technology in education today.

Process Mining

Data Science in Action

Springer This is the second edition of Wil van der Aalst's seminal book on process mining, which now discusses the field also in the broader context of data science and big data approaches. It includes several additions and updates, e.g. on inductive mining techniques, the notion of alignments, a considerably expanded section on software tools and a completely new chapter of process mining in the large. It is self-contained, while at the same time covering the entire process-mining spectrum from process discovery to predictive analytics. After a general introduction to data science and process mining in Part I, Part II provides the basics of business process modeling and data mining necessary to understand the remainder of the book. Next, Part III focuses on process discovery as the most important process mining task, while Part IV moves beyond discovering the control flow of processes, highlighting conformance checking, and organizational and time perspectives. Part V offers a guide to successfully applying process mining in practice, including an introduction to the widely used open-source tool ProM and several commercial products. Lastly, Part VI takes a step back, reflecting on the material presented and the key open challenges. Overall, this book provides a comprehensive overview of the state of the art in process mining. It is intended for business process analysts, business consultants, process managers, graduate students, and BPM researchers.

The Pilgrimage of Egeria

A New Translation of the Itinerarium Egeriae with Introduction and Commentary

Liturgical Press This new version of the late fourth-century diary of journeys in and around the Holy Land known as the Itinerarium Egeriae provides a more literal translation of the Latin text than earlier English renderings, with the aim of revealing more of the female traveler's personality. The substantial introduction to the book covers both early pilgrimage as a whole, especially travel by women, and the many liturgical rites of Jerusalem that Egeria describes. Both this and the verse-by-verse commentary alongside the translated text draw on the most recent scholarship, making this essential reading for pilgrims, students, and scholars seeking insight into life and piety during one of Christianity's most formative periods.

Forms of List-Making: Epistemic, Literary, and Visual Enumeration

Palgrave Macmillan This open access book attempts to show that an examination of the list's formal features has the potential to produce genuine insights into the production of knowledge, the poetics of literature and the composition of visual art. Following a conceptual introduction, the twelve single-authored chapters place the list in a variety of well-researched contexts, including ancient Roman historiography, medieval painting, Enlightenment periodicals, nineteenth-century botanical geography, American Beat poetry and contemporary photobooks. With its interdisciplinary approach, this book is a unique contribution to an emerging field dedicated to the study of lists.

The Oldest Trick in the Book

Panic-Driven Scapegoating in History and Recurring Patterns of Persecution

Springer Nature This book investigates the normalisation of blame-shifting within ideological discourse as a broad feature of history, working from Churchill's truism that history is written by the victors. To that end, it explores historical episodes of political persecution carried out under cover of moral panic, highlighting the process of 'Othering' common to each and theorising a historical model of panic-driven scapegoating from the results. Building this model from case studies in witch panic, communist panic and terrorist panic respectively, *The Oldest Trick in the Book* builds an argument that features common to each case study reflect broader historical patterning consistent with Churchill's maxim. On this basis it argues that the periodic construction of bogeymen or 'folk demons' is a useful device for enabling the kind of victim-playing and victim-blaming critical to protecting elite privilege during periods of crisis and that in being a recurring theme historically, panic-driven scapegoating retains great ongoing value to the privileged and powerful, and thus conspicuously remains an ongoing feature of world politics.

Analyzing Microbes

Manual of Molecular Biology Techniques

This Springer Protocols manual is a practical guide to the application of key molecular biology techniques in microbiological research. The focus is on experimental protocols, which are presented in an easy-to-follow way, as step-by-step procedures for direct use in the laboratory. Notes on how to successfully apply the procedures are included, as well as recommendations regarding materials and suppliers. In addition to the practical protocols, important background information and representative results of experiments using the described methods are presented. Researchers in all areas applying microbial systems, such as in molecular biology, genetics, pathology, and agricultural research will find this work of great value.

The Ascent of Mount Carmel

Aeterna Press THE Carmelite Order was originally devoted to a purely contemplative life. Its members lived as hermits on Mount Carmel, striving to imitate the holy prophets Elias and Eliseus. According to their Rule—which, given about A.D. 1210, records the customs observed by these hermits since they became a body corporate—they spent their time in or near their cells, meditating on the law of the Lord day and night, repairing only once a day to the oratory to hear mass. They said their office or their Paters privately, and took their more than frugal meals in solitude. James de Vitry thus speaks of these hermits: 'Others, following the example of Elias, that holy anchorite and great prophet, embraced the eremitical life on Mount Carmel, chiefly on the part overlooking the town of Porphyry, now called Caiffa, near the fountain of Elias, not far from the monastery of S. Margaret, Virgin. There living in small cells, like bee-hives, they made a sweet spiritual honey Aeterna Press

Saving Cinema

The Politics of Preservation

Oxford University Press The importance of media preservation has in recent years achieved much broader public recognition. From the vaults of Hollywood and the halls of Congress to the cash-strapped museums of developing nations, people are working to safeguard film from physical harm. But the forces at work aren't just physical. The endeavor is also inherently political. What gets saved and why? What remains ignored? Who makes these decisions, and what criteria do they use? *Saving Cinema* narrates the development of the preservation movement and lays bare the factors that have influenced its direction. Archivists do more than preserve movie history; they actively produce and codify cinematic heritage. At the same time, digital technologies have produced an entirely new reality, one that resists the material, artifact-driven approach that is the gold standard of preservation in the Western world. As it has become increasingly easy to capture and access moving images, increasing evidence of something many archivists have known for years has emerged: industrial and training films, amateur travel diaries, and even family videos are critical public resources. It has also raised question about the role of the profession. Is access equivalent to preservation, and, if it is, how should archivists alter their activities? The time is ripe for a reconsideration of the politics and practices of preservation. *Saving Cinema* is the book to guide that conversation.

Byzantium Between the Ottomans and the Latins

Politics and Society in the Late Empire

Cambridge University Press This book examines Byzantine political attitudes towards the Ottomans and western Europeans during the critical last century of Byzantium. It explores the political orientations of aristocrats, merchants, the urban populace, peasants, and members of ecclesiastical and monastic circles in three major areas of the Byzantine Empire in their social and economic context.

Agricultural Drones

A Peaceful Pursuit

CRC Press Agricultural drones are expected to revolutionize the way we conduct agronomic procedures and maintain natural vegetation on earth. This book explores the increasing importance of the role of aerial robots in managing agricultural farms and natural resources. *Agricultural Drones: A Peaceful Pursuit* provides a wealth of information on drone usage in agriculture. The book discusses the advanced sensors and imaging capabilities of drones that give farmers new ways to increase yields and reduce crop damage. An introductory chapter provides historical data, with details about various models of drones as well as the most recent and popular agricultural drones in usage. The book goes on to look at such topics as the use of drones for soil fertility, production agronomy, irrigation, weed control, pest and disease control, grain yield forecasting, and economic advantages from drone use. This timely and useful volume will be a valuable resource for faculty, agricultural extension officers, and farmers and farm consultancy agencies. This book would also serve as an excellent textbook for students in agriculture, engineering, geography, etc. Key features: • outlines the advantages of using drones in agriculture, such as for the management of soil fertility, the study of natural resources and vegetation, the maintenance of adequate irrigation, and the control of weeds and pests • covers the economic advantages of using drones in agriculture • examines the regulatory aspects of agricultural drones • provides actual examples of drone usage in agriculture
