Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

Displaying a stunning grasp of the policy details, he looks at the long term impact of the changes, which have been obscured by the focus on tuition fee increases. What will be the role of universities within society? How will they be funded? What kind of experiences will they offer students? Written in a clear and engaging style, *The Great University Gamble* outlines the architecture of the new policy regime, which many find difficult to grasp. ## Language, Global Mobilities, Blue-Collar Workers and Blue-collar Workplaces

**Routledge** This collection brings together global perspectives which critically examine the ways in which language as a resource is used and managed in myriad ways in various blue-collar workplace settings in today's globalized economy. In focusing on blue-collar work environments, the book sheds further light on the informal processes through which top down language policies take place in different multilingual settings and the resultant asymmetrical power relations which emerge among employees and employers in such settings. Taking into account the latest debates on poststructuralist theories of language, the volume also extends its conceptualization of language to demonstrate the ways in which it extends to a wider range of multilingual and multimodal resources and communicative practices, all of which combine in unique and different ways toward constructing meaning in the workplace. The volume's unique focus on such workplaces also showcases domains of work which have generally until now been less visible within existing research on language in the workplace and the subsequent methodological challenges that arise from studying them. Integrating a range of theoretical and methodological approaches, along with empirical data from a diverse range of blue-collar workplaces, this book will be of particular interest to students and researchers in critical sociolinguistics, applied linguistics, sociology, and linguistic anthropology.

## Women of Faith and the Quest for Spiritual Authenticity

# Comparative Perspectives from Malaysia and Britain

**Routledge** Drawn from over fifty-eight individual, in-depth, qualitative interviews with women of faith in Malaysia and Britain, *Women of Faith and the Quest for Spiritual Authenticity* is a multifaith, multicultural and cross-cultural comparative focus that explores women's religious expressions, as derived from practising Buddhists, Hindus, Christians, Muslims, Jews, Wiccans and Druids among others. Despite social advances towards women's emancipation and the lacerating critiques from feminist theologians across the Abrahamic religions and beyond, women's religious experiences remain submerged beneath the weight of patriarchal religious leadership and ongoing masculinised, dogmatic interpretations. Even feminism itself has yet to move the spiritual onto their main agenda of inequity in women's lives. This extensive, feminist research monograph challenges these exclusions to centre and amplify women's voices in speaking powerfully of their religious experiences, interpretations and practices. This is an ecumenical and entertaining ethnography where women's narratives and life stories ground faith as embodied, personal, painful, vibrant, diverse, illuminating and shared. This book will of interest not only to academics and students of the sociology of religion, feminist and gender studies, politics, ethnicity and Southeast Asian studies, but is equally accessible to the general reader broadly interested in faith and feminism.
