## **MOTOCROSS AMERICA**

---

Motorbooks Motocross began in England in the 1920s and took firm root in post-war Europe. After arriving in North America in the late 1960s, the

sport was embraced by enthusiasts and developed into an American phenomenon. By the early 1980s riders from the USA were dominating the sport's natural-terrain circuits, and the uniquely-American spinoff discipline of Supercross was packing NFL stadiums nationwide. In 2005, the Motorcycle Hall of Fame Museum created an exhibit, Motocross America, which celebrates the history of American motocross. Motocross America is a lavishly illustrated book that features the bikes and memorabilia from the museum display and text by Bill Amick. The Motocross America exhibit is open to the public at the Motorcycle Hall of Fame Museum in Pickerington, Ohio, through 2006.

### **A COGNITIVE NEUROPSYCHOLOGICAL APPROACH TO ASSESSMENT**

---

## **AND INTERVENTION IN APHASIA**

---

### **A CLINICIAN'S GUIDE**

---

Psychology Press This is a second edition of the highly popular volume used by clinicians and students in the assessment and intervention of aphasia. It provides both a theoretical and practical reference to cognitive neuropsychological approaches for speech-language pathologists and therapists working with people with aphasia. Having evolved from the activity of a group of clinicians working with aphasia, it interprets the theoretical literature as it relates to aphasia, identifying available assessments and published intervention studies, and draws together a complex literature for the practicing clinician. The opening section of the book outlines the cognitive neuropsychological approach, and explains how it can be applied to assessment and interpretation of language processing impairments. Part 2 describes the deficits which can arise from impairments at different stages of language processing, and also provides an accessible guide to the use of assessment tools in identifying underlying impairments. The final part of the book provides systematic summaries of therapies reported in the literature, followed by a comprehensive synopsis of the current themes and issues confronting clinicians when drawing on cognitive neuropsychological theory in planning and evaluating intervention. This new edition has been updated and expanded to include the assessment and treatment of verbs as well as nouns, presenting recently published assessments and intervention studies. It also includes a principled discussion on how to conduct robust evaluations of intervention within the clinical and research settings. The book has been written by clinicians with hands-on experience. Like its predecessor, it will remain an invaluable resource for clinicians and students of speech-language pathology and related disciplines, in working with people with aphasia.

## **MEDICAL ANTHROPOLOGY**

---

---

### **A BIOCULTURAL APPROACH**

---

Oxford University Press, USA Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.
