HANDBOOK OF TOTAL QUALITY MANAGEMENT

Springer Science & Business Media Quality issues are occupying an increasingly prominent position in today's global business market, with firms seeking to compete on an international level on both price and quality. Consumers are demanding higher quality standards from manufacturers and service providers, while virtually all industrialized nations have instituted quality programs to help indigenous corporations. A proliferation in nation-wide and regional quality awards such as the Baldrige award and certification to ISO 9000 series are making corporations world-wide quality-conscious and eager to implement programs of continuous improvement. To achieve competitiveness, quality practice is a necessity and this book offers an exposition of how quality can be attained. The Handbook of Total Quality Management: Explores in separate chapters new topics such as re-engineering, concurrent engineering, ISO standards, QFD, the Internet, the environment, advanced manufacturing technology and benchmarking Discusses the views of leading quality practitioners such as Deming, Juran, Ishikawa, Crosby and Taguchi throughout the book Considers important strategies for quality improvement, including initiation and performance evaluation through auditing, re-engineering, and process and design innovations. With contributions from 47 authors in 13 different countries, the Handbook of Total Quality Management is invaluable as a reference guide for anyone involved with quality management and deployment, including consultants, practitioners and engineers in the professional sector, and students and lecturers of information systems, management and industrial engineering.

GORE CAPITALISM

MIT Press An analysis of contemporary violence as the new commodity of today's hyper-consumerist stage of capitalism. "Death has become the most profitable business in existence." —from Gore Capitalism Written by the Tijuana activist intellectual Sayak Valencia, Gore Capitalism is a crucial essay that posits a decolonial, feminist philosophical approach to the outbreak of violence in Mexico and, more broadly, across the global regions of the Third World. Valencia argues that violence itself has become a product within hyper-consumerist neoliberal capitalism, and that tortured and mutilated bodies have become commodities to be traded and utilized for profit in an age of impunity and governmental austerity. In a lucid and transgressive voice, Valencia unravels the workings of the politics of death in the context of contemporary networks of hyper-consumption, the ups and downs of capital markets, drug trafficking, narcopower, and the impunity of the neoliberal state. She looks at the global rise of authoritarian governments, the erosion of civil society, the increasing violence against women, the deterioration of human rights, and the transformation of certain cities and regions into depopulated, ghostly settings for war. She offers a trenchant critique of masculinity and gender constructions in Mexico, linking their misogynist force to the booming trade in violence. This book is essential reading for anyone seeking to analyze the new landscapes of war. It provides novel categories that allow us to deconstruct what is happening, while proposing vital epistemological tools developed in the convulsive Third World border space of Tijuana.

OVERTOURISM

EXCESSES, DISCONTENTS AND MEASURES IN TRAVEL AND TOURISM

CABI This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities and well-being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of overtourism as well as the system dynamics underpinning it. With a rigorous scientific approach, the book uses systems-thinking and contemporary paradigms around sustainable development, resilience planning and degrowth; while considering global economic, socio-political, environmental discourses. Researchers, analysts, policy makers and industry stakeholders working within tourism as well as those within the private sector, community groups, civil society groups and NGOs will find this book an essential source of information.

RECENT DEVELOPMENTS IN FORESIGHT METHODOLOGIES

Springer Science & Business Media Foresight is an area within Futures Studies that focuses on critical thinking concerning long term developments, whether within the public sector or in industry and management, and is something of a sub-section of complexity and network science. This book examines developments in foresight methodologies and relates in its greater part to the work done in the context of the COSTA22 network of the EU on Foresight Methodologies. Foresight is a professional practice that supports significant decisions, and as such it needs to be more assured of its claims to knowledge (methodology). Foresight is practiced across many domains and is not the preserve of specialized 'futurists', or indeed of foresight specialists. However, the disciplines of foresight are not well articulated or disseminated across domains, leading to re-inventions and practice that does not make best use of experience in other domains. The methodological development of foresight is an important task that aims at strengthening the pool of the tools available for application, thereby empowering the actors involved in foresight practice. Elaborating further on methodological issues, such as those presented in the present book, enables the actors involved in foresight to begin to critique current practice from this perspective and, thirdly, to begin to design foresight practice. The present trends towards methodological concerns indicates a move from 'given' expert-predicted futures to one in which futures are nurtured through a dialogue among "stakeholders." The book has four parts, each elaborating on a set of aspects of foresight methodologies. After an introductory section, Part II considers theorizing about foresight methodologies. Part III covers system content issues, and Part IV presents foresight tools and approaches.
