QUALITY REPORT ON NATIONAL AND REGIONAL ACCOUNTS

2016 DATA

This document presents Eurostat's assessment of the quality of the 2016 national and regional accounts submitted by the EU Member States, Iceland, Norway and Switzerland, and information on Eurostat's publications of European aggregates. This quality report contains the first assessment results since 1 September 2014, when the European System of Accounts (ESA 2010) was introduced and data started being sent according to the new methodology. In general, data sent in 2016 were in line with the ESS quality standards and the ESA 2010 Regulation. Many Member States coped relatively well with the new data requirements and methodology even if the process of adapting national data compilation systems will continue until 2020.

THE SYSTEM OF MACROECONOMIC ACCOUNTS STATISTICS

AN OVERVIEW

International Monetary Fund **Designed to meet the basic needs of economists and statisticians, this pamphlet is unique in providing an explanation of the key principles underlying macroeconomic statistics when viewed as an integrated system. It highlights the interrelationships between the various sectors and provides a bridge linking the various macroeconomic accounts statistics-national accounts, balance of payments, government finance statistics, and monetary and financial statistics-to assist the reader in understanding the main concepts underlying these statistics. It does so by simplifying many of the concepts, explaining common features and differences, showing how the four key statistical areas harmonize, and providing examples to demonstrate the practical application and uses of the concepts within the conceptual framework. The pamphlet completely updates Pamphlet No. 29, Macroeconomic Accounts: An Overview, by Poul Hølst-Madsen, which was published in 1985.**

THE EU VAT SYSTEM AND THE INTERNAL MARKET

IBFD This thesis focuses upon VAT in the context of the Community's internal market. Its central aim is to prove that the current EU VAT system is incompatible with the concept of internal market as set out in the EC Treaty and interpreted by the Court of Justice. The study commences with an analysis of the concept of internal market, the main objective of which is to establish the basic legal framework for the proposed thesis. As part of this examination, it is demonstrated that the EC Treaty creates a temporally unlimited obligation for the Community to approve legislation with the aim of establishing and improving the functioning of the internal market. By analysis of existing EU VAT jurisprudence, it is argued that obstacles cannot be overcome through incremental developments emerging from the Court of Justice, but can only be resolved by fundamental and substantive legislative amendment.

THE GERMAN FINANCIAL SYSTEM

Oxford University Press on Demand This book is both a reference book on Germany's financial system and a contribution to the economic debate about its status at the beginning of the twenty-first century. In giving a comprehensive account of the many facets of the system, it covers corporate governance, relationship lending, stock market development, investor protection, the venture capital industry, and the accounting system, and reports on monetary transmission and the credit channel, regulation and banking competition, the insurance and investment industry, and mergers and acquisitions. The book is invaluable for those who want to understand the German economy and its financial system, promising not only a compilation of facts and statistics on Germany's financial markets and institutions, but also an analysis of its current structure and the determinants of its future development.

THE DIPLOMATIC SYSTEM OF THE EUROPEAN UNION

EVOLUTION, CHANGE AND CHALLENGES

This book examines the diplomatic system of the EU, locating it within the broader study of diplomacy and the European integration project. The volume is structured around the interrelated themes of institutional change and the evolving practices of EU diplomacy. It tracks the development of the EU's system of diplomacy, with particular reference to the implementation of the Lisbon Treaty, the establishment of the EEAS and the emerging practices of EU strategic and structural diplomacy. Bringing together contributions from leading experts in the field, this book provides an original approach to the development and operation of the EU's diplomatic system. The book aims to provide an account of the system of local government in each of the countries studied along with a critical and contextual approach to the level of autonomy that local government enjoys. The approach is comparative, based on a questionnaire which all of the authors considered. There is then a detailed conclusion to the book which offers a detailed summary and comparative analysis of the responses in order to better consider the role of local authorities as the 'fourth level' of governance in the EU. The book aims to offer a detailed introduction to and account of each system of local government which may appeal to those seeking an overview of the area, but also a critical and contextual approach that will be of interest to those actively researching in the areas of local and regional government or EU-central-local government relations. The book contains details of reform in local government up to November 2012, including an analysis of the impact of austerity measures on local autonomy where these have become significant.

A EUROPE MADE OF MONEY

THE EMERGENCE OF THE EUROPEAN MONETARY SYSTEM

Cornell University Press **A Europe Made of Money** is a new history of the making of the European Monetary System (EMS), based on extensive archive research. Emmanuel Mourlon-Druol highlights two long-term processes in the monetary and economic negotiations in the decade leading up to the founding of the EMS in 1979. The first is a transnational learning process involving a powerful, networked European monetary elite that shaped a habit of cooperation among technocrats. The second stresses the importance of the European Council, which held regular meetings between heads of government beginning in 1974, giving EEC legitimacy to monetary initiatives that had previously involved semisecret and bilateral negotiations. The interaction of these two features changed the EMS from a fairly trivial piece of administrative business to a tremendously important political agreement. The inception of the EMS was greeted as one of the landmark achievements of regional cooperation, a major leap forward in the creation of a unified Europe. Yet Mourlon-Druol's account stresses that the EMS is much more than a success story of financial cooperation. The technical suggestions made by its architects reveal how state elites conceptualized the larger project of integration. And their monetary policy became a marker for the conception of European identity. The unveiling of the EMS,

Mourlon-Druol concludes, represented the convergence of material interests and symbolic, identity-based concerns.

EU SECURITY STRATEGIES

EXTENDING THE EU SYSTEM OF SECURITY GOVERNANCE

Routledge This volume offers a coherent analysis of the European Union's security strategies within a comparative framework. If the EU is to survive and prosper as an effective security actor, it requires that greater attention be devoted to taking a cohesive and common position on the relationship between EU foreign policy means and goals. The major claim of this edited collection is that there is a European grand security strategy that disciplines member state security strategies. That grand strategy has two distinct substantive goals: (1) the preservation and expansion of the EU system of security governance; and (2) the implementation of specific strategies to meet internal and external threats and sources of insecurity. The EU has sought to develop a grand security strategy that not only accounts for the proliferation of threats possessing a military or non-military character and differentiates between core and peripheral regions of interest, but also addresses the requirements to bridge the increasingly blurred boundary between internal and external security threats and the necessary reconciliation of the competing security preferences of its member states. The empirical contributions to this volume examine the EU security strategies for specific issue areas and regional threat complexes. These case studies assess whether and how those strategies have consolidated or expanded the EU system of security governance, as well as their successes and limitations in meeting the security threats confronting the EU and its member-states. This volume will be of great interest to students of EU policy, foreign policy, security studies and IR.

SOCIAL RIGHTS IN EUROPE

Oxford University Press on Demand The book is concerned with the legal framework for protecting and promoting social rights in Europe. Its chapters examine procedural and substantive aspects of the Council of Europe's European Social Charter and the European Union's Charter of Fundamental Rights, as well as the EU's so-called "acquis" in the area of social rights. They look at a range of issues, including the strengths and weaknesses of the two systems in terms of

promoting and protecting social rights by examining the legal and political enforcement mechanisms as well as at some of the important substantive rights contained within each.

THE NEW SYSTEM OF NATIONAL ACCOUNTS

Springer Science & Business Media National income estimates date back to the late 17th century, but only in the half-century since the Second World War have economic accounts developed in their present form, becoming an indispensable tool for macroeconomic analysis, projections and policy formulation. Furthermore, it was in this period that the United Nations issued several versions of a system of national accounts (SNA) to make possible economic comparisons on a consistent basis. The latest version, SNA 1993, published in early 1994, occasioned this collection of essays and commentaries. The three chief objectives of the volume are: to enhance understanding of socioeconomic accounts generally and of SNA 1993 in particular; to offer a critique of SNA 1993, including constructive suggestions for future revisions of the system, making it even more useful for its national and international purposes; and to serve as a textbook, or book of readings in conjunction with SNA 1993, for courses in economic accounts.

A HISTORY OF NATIONAL ACCOUNTING

IOS Press In *A History of National Accounting*, Andre Vanoli focuses on the history of accounting in the second part of the 20th century. The book is about the relations between economic theories and the observation of the present and the past looked at from the viewpoint of economic measurement. Some parts of the book are especially devoted to the French experience in this field, but the point of view is deliberately universal. The publication is about; The birth of national accounting; The evolution of systems of accounts and accounting issues in the perspective of international harmonization; National accounts as a statistical synthesis; Concepts and their relations with economic theory; Uses and status of national accounting.

The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ► promote and support the learning and teaching of modern languages; ► enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ► protect linguistic and cultural diversity in Europe; and ► promote the right to quality education for all.

GUIDE ON MEASURING HUMAN CAPITAL

United Nations The idea of viewing individuals' knowledge and abilities as an asset—as human capital—can be traced back to the work of Adam Smith in the 18th century. But human capital is intangible, and hence hard to define and measure. Increasingly, however, policymakers are calling for ways to understand and quantify human capital, in order to better understand what drives economic growth and the functioning of labour markets, to assess the long-term sustainability of a country's development path, and to measure the output and productivity performance of the educational sector. Devising a robust methodology for the monetary valuation of the stock of human capital is especially important as studies suggest that human capital is by far the most important component of the total capital stock in most advanced economies. This Guide on Measuring Human Capital discusses conceptual, methodological and implementation issues and challenges. The recommendations are a first attempt to come up with a way to estimate and record the role of human capital in a way that is aligned with the principles of the national accounts and that is comparable across economies.

PUBLIC FINANCE AND NATIONAL ACCOUNTS IN THE EUROPEAN CONTEXT

Springer This book offers an essential guide to Public Finance and National Accounts in the context of the European Union. Since the creation of the Eurozone, fiscal policy has been at the heart of economic (but also political/media) discussions in the EU. From the Stability and Growth Pact (1997) to the more recent Fiscal Treaty, EU and Eurozone, countries have been subject to various fiscal rules. The importance of these rules, and of the subsequent procedures that every Eurozone country has to adhere to, is unquestionable. The book provides the reader with an in-depth understanding of the complex EU rules concerning fiscal policy, breaking down the corresponding legal texts into simple and accessible language. It has a broad interdisciplinary appeal, and scholars and practitioners whose work involves these areas will find it of particular interest.
