CRITICALLY CONSTITUTING ORGANIZATION

John Benjamins Publishing In the past, contingency and neo-Marxist theorists of culture reduced culture to an effect of something other than itself and, as they made culture metaphorical, they constituted its object of inquiry — a somewhat impossible pretension. This book extends the debate considerably. It does so through considering the work of Foucault in the context of the analysis of culture. While Foucault has had a considerable impact on organization studies, up to the present no text has systematically addressed what happens to organization culture when it encounter a Foucauldian gaze. Read this book and you will find out. Stewart Clegg, UTS, Sydney

ARCHAEOLOGY AFTER STRUCTURALISM

POST-STRUCTURALISM AND THE PRACTICE OF ARCHAEOLOGY

Routledge Most practising archaeologists have preferred to leave the deep theories of what lies behind their methods and perceptions on one side. Now archaeologists have faced up to the difficult task of making (or not making) the connections between the past, interpretation and the present. The writers of this volumes address the problems of archaeology, sometimes warily and sometimes with enthusiasm. The connections are not easy to accomplish: a great deal of theory seems of little relevance to the everyday practice of archaeology, and much of post-structuralism refers exclusively back to itself rather than to the more specific concerns of a historical discipline. But where the junction between post-structuralism and archaeology can be made, the results are innovative and enriching. Originally published in 1990.

FOUCAULT AND ANIMALS

FOUCAULT AND THE HUMAN SUBJECT OF SCIENCE

Springer This book offers a clear analysis of Foucault's work on scientific knowledge and its relationship to individuals and society. It suggests a way of using Foucault's tools for science criticism and resistance, while avoiding the pitfalls of vulgar relativism or irrational anti-science views. Two cases of scientific conflict are considered. The first considers left-handers as subjects of science, in particular studies which purport to show that left-handers die on average younger than right-handers. The second case considers Icelanders as subjects of science in the context of a partly failed attempt to construct a genetic database encompassing the entire nation. The book will be of interest to bioethicists and philosophers who are concerned with the interaction between science and its human subjects, as well as scholars concerned with Foucault's work on science.

DOING COLLECTIVE BIOGRAPHY

INVESTIGATING THE PRODUCTION OF SUBJECTIVITY

McGraw-Hill Education (UK) The authors introduce the reader to collective biography, an innovative research methodology for use in education and the social sciences. WEARY WARRIORS

POWER, KNOWLEDGE, AND THE INVISIBLE WOUNDS OF SOLDIERS

Berghahn Books As seen in military documents, medical journals, novels, films, television shows, and memoirs, soldiers' invisible

wounds are not innate cracks in individual psyches that break under the stress of war. Instead, the generation of weary warriors is caught up in wider social and political networks and institutions—families, activist groups, government bureaucracies, welfare state programs—mediated through a military hierarchy, psychiatry rooted in mind-body sciences, and various cultural constructs of masculinity. This book offers a history of military psychiatry from the American Civil War to the latest Afghanistan conflict. The authors trace the effects of power and knowledge in relation to the emotional and psychological trauma that shapes soldiers' bodies, minds, and souls, developing an extensive account of the emergence, diagnosis, and treatment of soldiers' invisible wounds.

GENUINE RECIPROCITY AND GROUP AUTHENTICITY

FOUCAULT'S DEVELOPMENTS OR SARTRE'S SOCIAL ONTOLOGY

University Press of America To some, Jean-Paul Sartre's philosophy signaled the end of modernity. Michael Foucault's theories on the generation of the self helped to usher in the post-modern era. Kevin Boileau's work, *Genuine Reciprocity and Group Authenticity* argues that Sartre's insight into the positive reciprocal relationships of individuals can be understood through the Foucauldian concept of power and discourse. The book explores authenticity on individual and group levels, breaking new ground in the study of Sartre and Foucault. It is a beneficial tool for philosophers studying modern or post-modern thought.

ANALYSING POLICY

Pearson Higher Education AU This book offers a novel approach to thinking about public policy and a distinctive methodology for analysing policy. It introduces a set of six questions that probe how 'problems' are represented in policies, followed by an injunction to apply the questions to one's own policy proposals. This form of analysis, it suggests, is crucial to understanding how policy works, how we are governed, and how the practice of policy-making implicitly constitutes us as subjects. The book mounts a challenge to the problem-solving paradigm currently dominating the intellectual and policy landscape, a paradigm manifest in 'evidence-based policy'. Arguing that such a paradigm denies the shaping that goes on in the process of problematisation, it offers a 'what's the problem represented to be?' approach to policy analysis as a counter-discourse. In this view critical thinking involves putting 'problems' into question rather than learning how to 'solve' them. Bacchi's approach to policy analysis offers exciting insights in a wide array of policy areas, including welfare, drugs/alcohol and gambling, criminal justice, health, education, immigration and population, media and research policy. Invaluable to those involved in policy studies and public administration, it will also appeal to students and academics in sociology, social work, anthropology, cultural studies and human geography.

HEGEMONY AND POWER

CONSENSUS AND COERCION IN CONTEMPORARY POLITICS

Lexington Books This book provides the first systematic examination of the relationship of hegemony and power. Nine essays delve into the diverse analytical aspects of the two concepts, and an introduction and conclusion by the editors, respectively, forge a synthesis of their theoretical coherence. Hegemony has long existed as a term in political science, international relations, and social theory, but its meaning varies across these fields. While each has developed its own 'local' language games for treating the idea, they all conceptualize hegemony as a form of power. Building on the recent rigorous exposition of power, this book subjects hegemony to a clarifying debate. In doing so, it advances the power debate. Components of the literature assume a relationship between power and hegemony, but no previous work has performed a concentrated and consistent analytical examination of them until now.

POWER, KNOWLEDGE AND FEMINIST SCHOLARSHIP

AN ETHNOGRAPHY OF ACADEMIA

Taylor & Francis Feminist scholarship is sometimes dismissed as not quite 'proper' knowledge - it's too political or subjective, many argue. But what are the boundaries of 'proper' knowledge? Who defines them, and how are they changing? How do feminists negotiate them? And how does this boundary-work affect women's and gender studies, and its scholars' and students' lives? These are the questions tackled by this ground-breaking ethnography of academia inspired by feminist epistemology, Foucault, and science and technology studies. Drawing on data collected over a decade in Portugal and the UK, US and Scandinavia, this title explores different spaces of academic work and sociability, considering both official discourse and 'corridor talk'. It links epistemic negotiations to the shifting political economy of academic labour, and situates the smallest (but fiercest) departmental negotiations within global relations of unequal academic exchange. Through these links, this timely volume also raises urgent questions about the current state and status of gender studies and the mood of contemporary academia. Indeed, its sobering, yet uplifting, discussion of that mood offers fresh insight into what it means to produce feminist work within neoliberal cultures of academic performativity, demanding increasing productivity. As the first book to analyse how academics talk (publicly or in off-the-record humour) about feminist scholarship, *Power, Knowledge and Feminist Scholarship* is essential reading for scholars and students in gender studies, LGBTQ studies, post-colonial studies, STS, sociology and education.

FOUCAULT

Routledge Five eminent critics explore the validity of Foucault's ideas on such questions as the fit between power and knowledge and the tension between historicist and universalist claims. The very possibility of a critical stance is a recurring theme in all of Foucault's works, and the contributors vary in the ways that they relate to his key views on truth and reason in relation to power and government.

SOCIAL THEORY

A NEW INTRODUCTION

Springer Nature This textbook delivers a new thematic introduction to social theory that explores theoretical issues in their contemporary social contexts. Each chapter is devoted to a specific thematic area, including the state, governance, the economy, civil society, culture, language, knowledge, the self, emotions, the body, and social justice. Each chapter details the key issues for debate and the relevant theories while linking those debates and theories to everyday life. Distributed throughout the chapters are focused sections on key concepts and their research applications, alongside helpful additional detail including a glossary, further suggested readings, chapter summaries, and questions for discussion. The book also provides useful information on key theoretical movements such as feminism, Marxism, and post-structuralism, as well as biographies of key theorists. As such, it reflects the breadth of social theory and its interdisciplinary nature by drawing on thinkers not just from sociology, but also from philosophy, history, literature, geography, cultural and gender studies. The book's logical structure and clear pedagogical features make it an appealing and accessible introductory text for students new to social theory. The chapters demonstrate the relevance of social theory to everyday life, such that readers can understand and actively engage with key concepts.

THE DISCOURSE OF PALESTINIAN-ISRAELI RELATIONS

PERSISTENT ANALYTICS AND PRACTICES

Routledge Many observers have portrayed the Oslo Process as a milestone in the peacemaking process between Palestinians and Israelis. In this controversial and groundbreaking new work, McMahon challenges the interpretation of the Oslo Process as a breakthrough or new beginning in Palestinian-Israeli relations. He argues that the Oslo Process affected no discursive or non-discursive change and that the Oslo Process in fact institutionalized the analytics practices involved in Israeli and Palestinian relations. It should, McMahon concludes, be no surprise that the process ended with direct Palestinian-Israeli violence. This book will be crucial reading for scholars of Israeli and Palestinian relations as well as anyone who is interested in understanding what discursive change must occur for peace between Israel and Palestinians to be established and sustained.

THE ENVIRONMENT AND INTERNATIONAL POLITICS

INTERNATIONAL FISHERIES, HEIDEGGER AND SOCIAL METHOD

Routledge This new study shows how environmental issues represent a deep problem in conceptualising the relationship between human beings and nature. This key relationship grounds the implicit ethical and political concerns of International Relations and our understandings of environmental politics. It demonstrates that the core theoretical orientations of the study of International Relations are not only incapable of understanding and responding to contemporary problems, but are profoundly complicit in creating the ecological problems in the first place. This major book develops a sense of these realities based on the thinking of Martin Heidegger. It forwards new ways of rethinking the environmental questions and addresses crucial issues such as sovereignty, the International Law of The Sea, the Kyoto Protocol, Northern Alaskan oil exploration and exploitation and the impact of the United Nations Convention on the Law of The Sea III. This is essential specialist reading for readers concerned with the environment.

ONE HUNDRED YEARS OF HOMOSEXUALITY

AND OTHER ESSAYS ON GREEK LOVE

Routledge Halperin's subject is the erotics of male culture in ancient Greece. Arguing that the modern concept of "homosexuality" is an inadequate tool for the interpretation of these features of sexual life in antiquity, Halperin offers an alternative account that accords greater prominence to the indigenous terms in which sexual experiences were constituted in the ancient Mediterranean world. Wittily and provocatively written, Halperin's meticulously drawn windows onto ancient sexuality give us a new meaning to the concept of "Greek love."

TRACING GLOBAL DEMOCRACY

LITERATURE, THEORY, AND THE POLITICS OF TRAUMA

Walter de Gruyter GmbH & Co KG Focused on the recently hotly debated topic at the crossroads of various human and social sciences, this book investigates the emergence of the cosmopolitan idea of literature and its impact on the reconfiguration of the European and non-European political spaces. The birthplace of this idea is its designers' traumatic experience as induced by the disconcerting condition of their abode. The thesis is that the eighteenth and nineteenth century's cosmopolitan projects that grow out of such deep frustrations trace the twentieth century's global democracy. This hidden origin of cosmopolitan projects dismantles the usual European representation of modernization as universal progress as myopic. Rather than being a generous action of prominent subjects such as Voltaire, Kant, and Goethe, or Bakhtin, Derrida and Deleuze, cosmopolitanism is an enforced reaction of the instances dispossessed by injury that search for the ways of healing it. Yet as soon as their remedy establishes itself as the ground for universal reconciliation, it risks suppressing other's trauma, i.e. turns from politics into a police. Articulating the author's position in the recent debates on the structure of democracy, the epilogue suggests an alternative strategy.

SECURING URBANISM

CONTAGION, POWER AND RISK

Springer Nature This book is concerned with developing an in-depth understanding of contemporary political and spatial analyses of cities. In the three-part development of the book's overall argument or premise, the reader is taken in Part I through a range of contemporary critical and political understandings of urban securitizing. This is followed by an historical urban landscape of emerging liberalism and neo-liberalism, in nineteenth-century Britain and twentieth-century United States, respectively. These case-study historical chapters enable the introduction of key political issues that are more critically assayed in Parts II and III. With Part II, the reader is introduced in depth to a series of spatial analyses undertaken by Michel Foucault that have been crucial for especially late-twentieth and twenty-first century urban theory and political geography. With Part III the full ramifications of a paradigmatic shift are explored at the level of rethinking territory, population and design. This book is timely and useful for readers who want to develop a stronger understanding of what the book's researchers term a new political paradigm in urban planning, one ultimately governed by global economic forces that define the end of probability.

TOWARDS A SPATIAL SOCIAL POLICY

BRIDGING THE GAP BETWEEN GEOGRAPHY AND SOCIAL POLICY

Policy Press Social policy and human geography are intimately intertwined yet frequently disconnected fields. Whilst social policies are always conceived, implemented and experienced in and through geography, the role of place in social policy scholarship and practice is frequently overlooked. Bringing together experts from both fields, this collection illuminates the myriad of ways that human geography offers rich insights conceptually, empirically and methodologically into the neglected spatialities of policy scholarship, practice and experience. By building the necessary bridges towards a spatial social policy, this book enables the enhanced design, performance and understanding of social policies once properly rooted in their multiple spatialities.

PRESENTING JAPANESE BUDDHISM TO THE WEST

ORIENTALISM, OCCIDENTALISM, AND THE COLUMBIAN EXPOSITION

Univ of North Carolina Press Japanese Buddhism was introduced to a wide Western audience when a delegation of Buddhist priests attended the World's Parliament of Religions, part of the 1893 Columbian Exposition in Chicago. In describing and analyzing this event, Judith Snodgrass challenges the predominant view of Orientalism as a one-way process by which Asian cultures are understood strictly through Western ideas. Restoring agency to the Buddhists themselves, she shows how they helped reformulate Buddhism as a modern world religion with specific appeal to the West while simultaneously reclaiming authority for the tradition within a rapidly changing Japan. Snodgrass explains how the Buddhism presented in Chicago was shaped by the institutional, social, and political imperatives of the Meiji Buddhist revival movement in Japan and was further determined by the Parliament itself, which, despite its rhetoric of fostering universal brotherhood and international goodwill, was thoroughly permeated with confidence in the superiority of American Protestantism. Additionally, in the context of Japan's intensive diplomatic campaign to renegotiate its treaties with Western nations, the nature of Japanese religion was not simply a religious issue, Snodgrass argues, but an integral part of Japan's bid for acceptance by the international community.

RITUAL THEORY, RITUAL PRACTICE

Oxford University Press Ritual studies today figures as a central element of religious discourse for many scholars around the world. *Ritual Theory, Ritual Practice*, Catherine Bell's sweeping and seminal work on the subject, helped legitimize the field. In this volume, Bell re-examines the issues, methods, and ramifications of our interest in ritual by concentrating on anthropology, sociology, and the history of religions. Now with a new foreword by Diane Jonte-Pace, Bell's work is a must-read for understanding the evolution of the field of ritual studies and its current state.

FOUNDATIONS OF MODERNITY

HUMAN AGENCY AND THE IMPERIAL STATE

Routledge Innovatively looking at the complex interactions between indigenous peoples and modern imperialism in Arabia and Balkans, *Foundations of Modernity* challenges previous analytical models that attempt to capture the complexity of human interactions during the 1800-1912 period in ways that instigates the paradigmatic shift of the "Euro-centric" perspective of modern world history.

REINTERPRETING THE POLITICAL

CONTINENTAL PHILOSOPHY AND POLITICAL THEORY

MODERNIST MYSTERIES: PERSEPHONE

Oxford University Press In *Modernist Mysteries: Persephone*, author Tamara Levitz demonstrates how a group of collaborating artists -- Igor Stravinsky, Ida Rubenstein, Andr Barsacq, André Gide, and others -- used the myth of Persephone to perform and articulate their most deeply held beliefs about four topics significant to modernism: religion, sexuality, death, and historical memory in art. In investigating the aesthetic and political consequences of the artists' diverging perspectives, and the fall-out of their titanic clash on the theater stage, Levitz dismantles myths about neoclassicism as a musical style. The result is a revisionary account of modernism in music in the 1930s.

GENDER, AGENCY AND WAR

THE MATERNALIZED BODY IN US FOREIGN POLICY

Routledge This book traces practices of militarization and resistance that have emerged under the sign of motherhood in US Foreign Policy. *Gender, Agency and War* examines this discourse against the background of three key moments of American foreign policy formation: the anti-nuclear movement of the 1980s, the Gulf War of the early 1990s, and the recent invasion of Iraq. For each of these moments the author explores the emergence of a historically specific and emblematic maternalized mode of female embodiment (ranging from the 'hysterical' antinuclear protester to the figure of 'Supermom'), in order to shed light onto the various practices which define and enable expressions of American sovereignty. In so doing, the text argues that the emergence of particular raced, gendered, and maternalized bodies ought not to be read as merely tangential to affairs of state, but as instantiations of global politics. This work urges an approach that rereads the body as an 'event' - with significant implications for the ways in which international

politics and gender are currently understood. This book will be of much interest to students of gender politics, critical security studies, US foreign policy and IR in general.

MANAGING THE ORGANIZATIONAL MELTING POT

DILEMMAS OF WORKPLACE DIVERSITY

SAGE Illuminating the troublesome and disturbing aspects of workplace diversity that tend to be glossed over in most management literature, *Managing the Organizational Melting Pot* covers key issues such as: individual and institutional resistance, the effectiveness of diversity change efforts, and the less visible ways in which exclusion and discrimination continue to be practiced in the workplace. To assist the reader in understanding some of these dilemmas, the contributors to this collection adopt an array of theoretical frameworks - that are all striking departures from traditional and more functional perspectives on diversity - including intergroup relations theory, critical theory, Jungian psychology, feminism, post-colonial theory, cultural history, postmodernism, realism, institutional theory, and class analysis.

THE SOCIOLOGY OF SPACE

MATERIALITY, SOCIAL STRUCTURES, AND ACTION

Springer In this book, the author develops a relational concept of space that encompasses social structure, the material world of objects and bodies, and the symbolic dimension of the social world. Löw's guiding principle is the assumption that space emerges in the interplay between objects, structures and actions. Based on a critical discussion of classic theories of space, Löw develops a new dynamic theory of space that accounts for the relational context in which space is constituted. This innovative view on the interdependency of material, social, and symbolic dimensions of space also permits a new perspective on architecture and urban development.

SPACE, KNOWLEDGE AND POWER

FOUCAULT AND GEOGRAPHY

Ashgate Publishing, Ltd. The first to engage Foucault's geographies in detail from a wide range of perspectives, this book is framed around his discussions with the journal *Hérodote* in the mid 1970s. The contributors (including a number of key figures such as David Harvey, Chris Philo, Sara Mills, Nigel Thrift, John Agnew, Thomas Flynn and Matthew Hannah) discuss just what they find valuable - and frustrating - about Foucault's geographies. This is a book which will both surprise and challenge.
