ALGEBRA TEACHER'S ACTIVITIES KIT

150 ACTIVITIES THAT SUPPORT ALGEBRA IN THE COMMON CORE MATH STANDARDS, GRADES 6-12

John Wiley & Sons An important feature of the new edition is the alignment of the activities with the Common Core Math Standards for algebra for grades six through high school. Every standard is supported by at least one activity, and many are supported by two or more. The rest of the activities address prerequisite skills related to the standards. The number and diversity of the activities in this resource will help teachers to meet the needs of the various abilities and learning styles of their students. The book is designed for easy use. Each section is divided into two parts: a summary of the activities, which includes teaching notes and answers, followed by the reproducibles of the section. The activities stand alone and can be used to supplement instruction and reinforce skills and concepts. Many are self-correcting, a feature that adds interest for students and saves time for teachers. The nine sections of the book are: Section 1: The Language of Algebra (Using Whole Numbers) Section 2: Integers, Variables, and Expressions Section 3: Linear Equations and Inequalities Section 4: Graphing Linear Equations and Inequalities Section 5: Basic Operations with Monomials and Polynomials Section 6: Factors of Monomials and Polynomials Section 7: Complex Numbers Section 8: Polynomial, Exponential, and Logarithmic Functions and Equations Section 9: Potpourri

TECHNOLOGY SUPPORTED ACTIVE LEARNING

STUDENT-CENTERED APPROACHES

Springer Nature This book promotes student-centered approaches to the learning process, allowing students to develop skills and competences that traditional, passive learning methods cannot foster. In turn, supporting active learning with digital technology tools creates new possibilities in terms of pedagogical design and implementation. This book addresses the latest research and practice in the use of technology to promote active learning. As such, on the one

hand, it focuses on active pedagogical methodologies like problem-based learning, design thinking and agile approaches; on the other, it presents best practice cases on the use of digital environments to support these methodologies. Readers will come to understand and learn to apply active learning methodologies, either by replicating the best practices presented here, or by creating their own methods.

GROUP SOLUTIONS

COOPERATIVE LOGIC ACTIVITIES FOR GRADES K-4

GEMS This new edition of *GEMS* most popular math guide features a new foreword by the author. These fifty cooperative logic activities are designed for groups of four. Each student receives a clue to a problem and needs to share the information with all other group members. The solution can **ONLY** be discovered by working together and connecting all the clues. In a non-competitive environment, students develop communication and problem-solving skills. To come up with a "group solution," students will need to learn to listen, to be patient, and to value the contributions of others. Through the process, students learn to appreciate a variety of approaches to a problem. Jan M. Goodman is currently Principal of Jefferson Elementary School in Berkeley, California. Reissued with new ISBN. Also available by Jan M. Goodman "Group Solutions, Too!" PB \$21.00, 0-912511-38-9" CUSA
