The Legacy of Wilfred Cantwell Smith SUNY Press First work to address the legacy of Wilfred Cantwell Smith and his influence on the development of religious studies and Islamic studies in the twentieth century. This is the first work to address the legacy of Wilfred Cantwell Smith (1916–2000), whose intellectual and institutional contributions helped shape the field of religious studies in the latter half of the twentieth century. As a young scholar, Smith taught Indian and Islamic history in Lahore for several years and witnessed the partition of India. Upon his return to North America, he obtained his PhD at Princeton University before embarking upon a long and distinguished career. He founded the Institute of Islamic Studies at McGill University and served as director of the Center for the Study of World Religions at Harvard University. Smith emphasized the place of the scholarly study of Islam in the Western academy long before Islam occupied its current position at the center of global politics, challenged the notion of monolithic world religions, and argued for the importance of dialogical processes and a personalist approach to the study of religion. Contributors to this volume, many of whom were Smith’s students, provide a wide-ranging exploration of his influence and legacy

The Psychedelic Explorer’s Guide Safe, Therapeutic, and Sacred Journeys Simon and Schuster Psychedelics for spiritual, therapeutic, and problem-solving use • Presents practices for safe and successful psychedelic voyages, including the benefits of having a guide and how to be a guide • Reviews the value of psychedelics for healing and self-discovery as well as how LSD has facilitated scientific and technical problem-solving • Reveals how microdosing (ultr-low doses) improve cognitive functioning, emotional balance, and physical stamina • This year 600,000 people in the U.S. alone will try LSD for the the first time, joining the 23 million who have already experimented with this substance Called “America’s wisest and most respected authority on psychedelics and their use,” James Fadiman has been involved with psychedelic research since the 1960s. In this guide to the immediate and long-term effects of psychedelic use for spiritual (high dose), therapeutic (moderate dose), and problem-solving (low dose and microdose)

purposes, Fadiman outlines best practices for safe, sacred entheogenic voyages learned through his more than 40 years of experience--from the benefits of having a sensitive guide during a session (and how to be one) to the importance of the setting and pre-session intention. Fadiman reviews the newest as well as the neglected research into the psychotherapeutic value of visionary drug use for increased personal awareness and a host of serious medical conditions, including his recent study of the reasons for and results of psychedelic use among hundreds of students and professionals. He reveals new uses for LSD and other psychedelics, including microdosing, extremely low doses, for improved cognitive functioning and emotional balance. Cautioning that psychedelics are not for everyone, he dispels the myths and misperceptions about psychedelics circulating in textbooks and clinics as well as on the internet. Exploring the life-changing experiences of Ram Dass, Timothy Leary, Aldous Huxley, and Huston Smith as well as Francis Crick and Steve Jobs, Fadiman shows how psychedelics, used wisely, can lead not only to healing but also to scientific breakthroughs and spiritual epiphanies. **The Illustrated World's Religions A Guide to Our Wisdom Traditions** HarperOne Retaining all the beloved qualities of Huston Smith's classic *The Religions of Man* and the current fully revised and updated *The World's Religions*, this stunning pictorial presentation refines the text to its wonderful essentials. If so, why do most Chinese think it isn't? From ancient Confucian temples, to nineteenth-century archives, to the testimony of people interviewed by the author throughout China over a period of more than a decade, this book traces the birth and growth of the idea of Confucianism as a world religion. The book begins at Oxford, in the late nineteenth century, when Friedrich Max Müller and James Legge classified Confucianism as a world religion in the new discourse of "world religions" and the emerging discipline of comparative religion. Anna Sun shows how that decisive moment continues to influence the understanding of Confucianism in the contemporary world, not only in the West but also in China, where the politics of Confucianism has become important to the present regime in a time of transition. Contested histories of Confucianism are vital signs of social and political change. Sun also examines the revival of Confucianism in contemporary China and the social significance of the ritual practice of Confucian temples. While the Chinese government turns to Confucianism to justify its political agenda, Confucian activists have started a movement to turn Confucianism into a religion. Confucianism as a world religion might have begun as a scholarly construction, but are we witnessing its transformation into a social and political reality? With historical analysis, extensive research, and thoughtful reflection, *Confucianism as a World Religion* will

engage all those interested in religion and global politics at the beginning of the Chinese century. **Sourcebook of the World's Religions An Interfaith Guide to Religion and Spirituality** New World Library Now in its third edition, this is the most comprehensive work available on the rich variety of paths available to today's spiritual seekers. Asian Dance Infobase Publishing Introduces the history, methods of teaching, ceremonial styles, basic steps, and famous figures of traditional Asian dance from Japan, China, India and more. **Word and Silence Hans Urs Von Balthasar and the Spiritual Encounter Between East and West** Second Spring Books Asked about the dialogue between Asian and Christian mysticisms, Hans Urs von Balthasar wrote: "The dialogue is possible. The question is: 'does selflessness mean emptiness, or (trinitarian) love.'" *Word and Silence* is an ascent to the fullness of the Christian vision, from the depths of natural and Christian wisdom and under the guidance of this great master of contemplative theology of our time. It offers an overview of the human condition, and then broadens to explore the fullness of God's revelation, which overflows the deepest longings of the human heart, fully embracing the human as human, and leading it into the heart of God. "What one of the greatest theologians of our century--Hans Urs von Balthasar--says about what the world's religions mean for one another as pluralism intensifies their interaction--no other study comes close to the depth with which *Word and Silence* addresses that subject."--Huston Smith, author of *The World's Religions* "In this luminous book, Father Raymond Gawronski demonstrates the fruitfulness of Balthasar's distinctive Christology, Mariology, and nuptial mysticism for a genuine Catholic theology of world religions; and in the process, he sheds much-needed light upon the mysteries of sexuality and gender, the spirituality of obedience, and the beauty of holiness."--Carol Zaleski, Professor of World Religions, Smith College; co-author of *Prayer: A History* "The Epistle to the Hebrews tells us that while 'in many and various ways God spoke of old to our fathers, ' in 'these days he has spoken to us by a Son.' Meanwhile, at the heart of that word, spoken in and through the Son, sits the 'wordless word' of Christ's death and descent into hell. This paradox--that in revealing himself to us in both word and deed God makes His final word a wordless deed--lies at the center of this spellbinding and beautifully written book. As Raymond Gawronski succinctly puts it, 'The Word weds silence, as it were.' This book is no less relevant now than when it was first published in 1995. Indeed, not only is this one of the best books on Balthasar to date, it should also be required reading for anyone interested in the important dialogue between Christianity and the East."--Rodney Howsare, Professor of Theology, DeSales University; author of *Balthasar: A Guide for the Perplexed*

A native of New York, Fr. Gawronski entered the Maryland Province of the Society of Jesus in 1977, after studies in East Asian culture, and then graduate study in comparative religion with Huston Smith at Syracuse University. His doctoral studies were undertaken in Rome, and included work in Eastern Christian spirituality, which led in turn to a lifelong commitment to the theology of Hans Urs von Balthasar. He was professor of theology at Marquette University for thirteen years, during which time he helped design the Spirituality Year program for the St. John Vianney Seminary in Denver, where he then served as professor and spiritual director for eight years. He has published and lectured widely on issues of culture and spirituality, and has for years served as an active retreat master, annually leading the full Spiritual Exercises of St. Ignatius. He is currently professor of dogmatic theology at St. Patrick's Seminary in Menlo Park, California, where he also gives spiritual direction.

The Ocean of God On the Transreligious Future of Religions Anthem Press 'The Ocean of God'conveys the proposition that the future of religions, if they will not want to contribute to the destruction of humanity, will become transreligious. Based on the assumption that the spiritual impulse of humanity cannot simply be eradicated, religiosity will persist in transreligious forms, as secularizations, naturalizations and transhumanist dreams only envision such transformations, but fall short in their ability to replace the force of spirituality to further civilized peace of human existence on Earth and its future in evolutionary, ecological and cosmological dimensions. In relating the contributions of religious pluralism to the concept of the unity of religions, which have arisen in this "new axial age" for overcoming the checkered history of religions in furthering peace, the program of a polyphilic pluralism with its transreligious discourse, based on the insight of the fundamental relativity of (religious) truth and the special contributions of process philosophy and theology as well as the Bahá'í universe of thought, analyses and projects a new religiosity or spirit enabling religions to overcome their deepest motives of strife and warfare.

Navigating a Path to Peace Orbis Books **The Hope of Liberation in World Religions** Baylor University Press Uncovers the influence of liberation theology in major world religions **Jesus, Pope Francis, and a Protestant Walk into a Bar Lessons for the**

Christian Church Presbyterian Publishing Corp Pope Francis has taken the world by storm, captivating Catholics, Protestants, and non-Christians alike. Sneaking out of the Vatican at night, washing the feet of inmates, and taking selfies with young fans is certainly unlike any religious leader we've seen in a while, and some of the religious establishment is uneasy about it. The revitalization Francis is bringing to the Catholic Church is not without precedent, however. Jesus had a similar effect in his day, drawing crowds with his humility, kindness, and wisdom--even as he drew the disapproval of established religious leaders. The things that have brought Francis such media attention are the same things that made Jesus so peculiar and attractive in his day. Thoughtful examination of Jesus' example and legacy, as well as an honest look at the similarities and differences between Catholic and Protestant faith, invites reflection on the heart of Christianity and how we relate to our fellow Christians. Readers will discover the power of heartfelt joy, radical love, and passion for justice to shake people out of religious complacency and into dynamic, contagious faith. Jesus, Pope Francis, and a Protestant Walk into a Bar looks at what is universal among Christians, what is unique to Catholics and Protestants, and how all Christians can practice understanding and cooperation across differences. Perfect for individual or group use, discussion questions are also included to encourage further thought and conversation.

Death Rituals among the Karanga of Zimbabwe Praxis, Significance, and Changes Wipf and Stock Publishers One of the inescapable truths that humanity has to grapple with is the reality of death. The manner in which we die, or the cause of our death, may differ, but death remains inevitable. We may be afraid of it or not; we may try to evade it, or not, but death still comes. Although most religions promise the possibility of another life in the hereafter, there is no scientifically verifiable evidence about the reality of that life. Despite that lack of evidence, every culture performs death rituals meticulously to prepare the spirits of its deceased for whatever form of life that may be available. *Death Rituals among the Karanga of Zimbabwe: Praxis, Significance, and Changes* explores the causes of sickness and death, and the praxis of pre-burial, burial, and post-burial rituals of the Karanga of Zimbabwe in an attempt to unearth their original form and significance, to identify the changes that have taken place. It also provides a brief manual for the performance of some selected Karanga death rituals.

Through a death-denying culture, medicine has gained enormous power-an influence it maintains by distancing itself from religion, which too often reminds us of our mortality. As a result of this separation of medicine and religion, patients facing serious illness infrequently receive adequate spiritual care, despite the large body of empirical data demonstrating its importance to patient decision-making, quality of life, and medical utilization. This secular-sacred divide also unleashes depersonalizing, social forces through the market, technology, and legal-bureaucratic powers that reduce clinicians to tiny cogs in an unstoppable machine. Hostility to Hospitality is one of the first books of its kind to explore these hostilities threatening medicine and offer a path forward for the partnership of modern medicine and spirituality. Drawing from interdisciplinary scholarship including empirical studies, interviews, history and sociology, theology, and public policy, the authors argue for structural pluralism as the key to changing hostility to hospitality. **Faith-based Diplomacy and Interfaith Dialogue** BRILL Interfaith dialogue is a practice that could benefit diplomatic strategies but has not yet been brought into diplomacy's scope. This paper uses the theoretical construct of faith-based diplomacy to recommend interfaith dialogue as a viable strategy within diplomatic activities. **Illustrated World's Religions A Guide to Our Wisdom Traditions** Harper Collins Retaining all the beloved qualities of Huston Smith's classic *The World's Religions*, this stunning pictorial presentation refines the text to its wonderful essentials. This delightful marriage of engaging text and remarkable pictures vividly brings to life the scope and vision of Huston Smith's expertise and insight. **Guide to the Study of Religion** Bloomsbury Publishing What is religion? Can it be defined at all? Or is it too easily defined in far too many ways so as to make a "religion" a drifting signifier or whatever one's pleasure is? Does the study of religion require special, perhaps religious, tools of analysis and explanation? What is the difference between a knowledge of religion derived

from practicing it and a knowledge about religion derived from nonreligious modes of inquiry? Sooner or later, any serious student of religion must face these questions if religious practices are to be investigated in the light of the terms and aims of the social and human sciences in the modern university. *The Guide to the Study of Religion* provides a map of the key concepts and thought-structures for imagining and studying religion as a class of everyday social practices that lend themselves to no more or less difficult explanation than any other class of social phenomena. **Community Practice Skills Local to Global Perspectives** Columbia University Press Dorothy N. Gamble and Marie Weil differentiate among a range of intervention methods to provide a comprehensive and effective guide to working with communities. Presenting eight distinct models grounded in current practice and targeted toward specific goals, Gamble and Weil take an unusually inclusive step, combining their own extensive experience with numerous case and practice examples from talented practitioners in international and domestic settings. The authors open with a discussion of the theories for community work and the values of social justice and human rights, concerns that have guided the work of activists from Jane Addams and Martin Luther King Jr. to Cesar Chavez, Wangari Maathai, and Vandana Shiva. They survey the concepts, knowledge, and perspectives influencing community practice and evaluation strategies. Descriptions of eight practice models follow, incorporating real-life case examples from many parts of the world and demonstrating multiple applications for each model as well as the primary roles, competencies, and skills used by the practitioner. Complexities and variations encourage readers to determine, through comparative analysis, which model at which time best fits the goals of a community group or organization, given the context, culture, social, economic, and environmental issues and opportunities for change. An accompanying workbook stressing empowerment strategies and skills development is also available from Columbia University Press. **The INTRAFaith Conversation: How Do Christians Talk Among Ourselves About INTERfaith Matters?** Lulu.com *The INTRAFaith Conversation: How Do Christians Talk Among Ourselves About INTERfaith Matters?* by Susan M. Drawing from the universal teachings and essential practices of the mystics from all the world's major religious traditions, distilled and presented in generic terms suitable for all seekers, *The Way of Selflessness* is appropriate for both those who belong to an established religion and those who do not. **False Dawn The United Religions Initiative, Globalism, and the Quest for a One-World Religion** Sophia Perennis *The interfaith movement, which began with the 1893 World's Parliament of Religions in Chicago, has grown worldwide. Although this movement has been largely unknown to the public, it now provides a spiritual face for globalization, the economic and political forces leading us all from nationalism to One World.* The most ambitious organization in today's interfaith movement is the United Religions Initiative (URI),

founded by William Swing, the Episcopal Bishop of California. Investigative reporter Lee Penn, a Catholic ex-Marxist, exhaustively documents the history and beliefs of the URI and its New Age and globalist allies, the vested interests that support these movements, and the direction they appear to be taking. The interfaith movement is no longer merely the province of a coterie of little-headed religious idealists with grandiose visions. The URI's proponents have ranged from billionaire George Soros to President George W. Bush, from the far-right Rev. Sun Myung Moon to the liberal Catholic theologian Hans Küng, and from the Dalai Lama to the leaders of government-approved Protestant churches in the People's Republic of China. The interfaith movement, including the URI, is being promoted by globalist and New Age reformers who favor erosion of national sovereignty, marginalization of traditional religions, establishment of global governance, and creation of a new, Earth-based global spirituality—in effect, a one-world religion. Therefore, the URI and the interfaith movement are poised to become the spiritual foundation of the New World Order: the new civilization now proposed by Mikhail Gorbachev, the last leader of the Soviet Union. In *The Reign of Quantity and the Signs of the Times*, French metaphysician René Guénon spoke of the anti-tradition (the forces of materialism and secular humanism) finally giving way to the counter-tradition (the satanic inversion of true spirituality), leading to the regime of Antichrist. The anti-tradition weakens and dissolves traditional spiritualities, after which the counter-tradition sets up a counterfeit in their place. Since Guénon's time, as is well known, anti-traditional forces have greatly advanced worldwide. It is less well-known that counter-traditional movements have also made great strides, and now stand closer to the centers of global political and religious power than ever before. The counter-tradition is making inroads on the political and cultural Right, as much as it is doing on the Left. *False Dawn* painstakingly documents these trends, and speculates on their future development. In so doing, the author takes investigative reporting to the threshold of prophecy, and gives us a stunningly plausible picture of the global religious landscape of the 21st century. This extraordinary project is the literary equivalent of turning over a flat rock. There is much to be seen and learned here—all of it unsettling, disquieting, occasionally downright scary. William Murchison, Radford Distinguished Professor, Baylor University When a bishop of a Christian church happily worships alongside a Wiccan invoking other gods, something has gone horribly wrong. In *False Dawn*, Lee Penn has produced a comprehensive and critical history of the United Religions Initiative. This book sounds a clear warning: Anyone who makes theological truth subservient to utopianism denigrates all religions. Douglas LeBlanc, Editor, *GetReligion.org* **The World's Religious Traditions Current Perspectives in Religious Studies** Bloomsbury Publishing The aim of this book is to make a major contribution to the field of religious studies while at the same time paying tribute to the work of Wilfred Smith. Although the basis of the chapters is provided by Smith's themes of faith and tradition and Smith's approach to the study of religion, this book stands in its own right as a significant addition to both content and method in the global history of religions. First published in 1984, it includes contributions by Geoffrey Parrinder, Annemarie Schimmel, George Rupp, Ninian Smart and others. **A Guide to the World's Religions International Perspectives on Citizenship, Education and Religious Diversity** Routledge

Citizenship is high on the agenda of education systems in many of the world's democracies. As yet, however, discussions of citizenship education have neglected issues of religious diversity and how the study of religions can contribute to our understanding of citizenship. International Perspectives on Citizenship, Education and Religious Diversity brings together an international range of contributions from religious studies scholars and educators specialising in the study of religions. Together, these illustrate and explore the key questions for educational theory and pedagogy raised by drawing issues of religious diversity into citizenship education. The chapters address and extend debates over the nature of citizenship in late modernity, highlighting local and global dimensions of citizenship in relation to issues of national, religious, ethnic and cultural identity. As well as emphasising the role religious education has to play in citizenship education, this book also covers wider issues such as state-supported faith schools and cultural diversity in relation to common citizenship. The authors argue that critical, yet reflective, approaches to religious education have a distinctive and valuable contribution to make to citizenship education. Issues addressed within the study of religions are related to new forms of global and cultural citizenship, as well as citizenship within the nation state. Ultimately, this stimulating and original collection highlights the challenges and possibilities for teaching and learning about religion, religions and religious diversity within an inclusive educational practice.

Teaching Adolescents Religious Literacy in a Post-9/11 World IAP *For thousands of years, religion has been a key element of human societies. Whenever we, as educators, exclude or minimize religion's vast role in society, we leave out a large part of our world's shared history. This is a serious act of educational omission, even neglect, on the part of our nation's public middle and secondary schools, particularly when adolescents are so ready to engage in meaningful conversation about the world that surrounds them. Our book's central purpose is to provide middle-level and high school teachers with the necessary background knowledge and pedagogical skills necessary to help adolescents*

become religiously literate learners and citizens. Currently, there is no text like ours on the market that both covers a number of world religions, and presents concrete recommendations for teaching and learning this material. Our book is meant to educate the following audiences: teacher educators, middle-level and high school teachers in all content areas, administrators, school boards, and parents. For us, educating for religious literacy is all about bringing adolescents into the 21st century of teeming religious and spiritual diversity—a long-neglected component of the multicultural curriculum in public schools. In a post-9/11 world, religious literacy requires that students understand the whats and whys of differing religious beliefs, both in their own country and elsewhere. It means looking for commonalities, as well as differences, between and among the great wisdom traditions—both nationally and internationally. It is about understanding how all of us might live peacefully in a religiously diverse world. Our book accomplishes these goals by being informative, practical, experiential, case-based, and, above all, accessible to beginners. **True Myth C. S. Lewis and Joseph Campbell on the Veracity of Christianity** Wipf and Stock Publishers Each generation asks in its own way, "What does it mean to be human?" In *True Myth*, James Menzies addresses this question by exploring myth and religion in the thinking of mythologist Joseph Campbell and Oxford don C. S. Lewis. Joseph Campbell understood Christianity as comprised of mythical themes similar to those in other religious and secular myths. Admitting that certain portions of the biblical record are historical, he taught the theological and miraculous aspects as symbolic, as stories in which the reader discovers what it means to be human today. C. S. Lewis defined Christianity, and being truly human, as a relationship between the personal Creator and his creation mediated through faith in his son, Jesus Christ. In contrast to Campbell, Lewis took the theological and miraculous literally. Although Lewis understood how one could see symbolism and lessons for life in miraculous events, he believed they were more than symbolic and indeed took place in human history. Not only does Menzies consider the ways Campbell and Lewis utilize myth in answering the question for their generation, but he also probes the influence and presence of myth in philosophy, media, ethics, history, literature, art, music, and religion in a contemporary context, thus helping readers consider answers for their own age. **Seven Testaments of World Religion and the Zoroastrian Older Testament** Rowman & Littlefield Publishers *Seven Testaments* is volume one of a trilogy, introducing and supplementing the already popular academic texts, *Three Testaments: Torah Gospel and Quran* (2012) and *Four Testaments: Tao Te Ching, Analects, Dhammapada, Bhagavad Gita* (2016). Organized in three parts, *Seven Testaments* will cover the foundations of how these testaments were formed, the essence of each one of the testaments and a section of primary source documents that frames the testaments in a modern setting.
