WHO Technical Manual on Tobacco Tax Administration

World Health Organization *Tobacco use is the single largest cause of preventable death globally, killing more than five million people each year. Tobacco use also creates considerable economic costs, from greater spending on health care to treat the diseases it brings on in users and those exposed to tobacco smoke to the lost productivity resulting from the premature deaths it causes. Of all the many interventions for reducing tobacco use, a significant increase in tobacco product taxes and prices has been demonstrated to be the single most effective and cost-effective intervention, particularly among the poor and the young. At the same time, because of the inelasticity of demand for tobacco products in most countries and the low share of tax in price in many, significant increases in tobacco taxes generate significant increases in the revenues generated by these taxes. This technical manual aims to help governments achieve both objectives by identifying a set of "best practices" for tobacco taxation. It documents governments' existing approaches to tobacco taxation, discusses barriers to using tobacco taxes to achieve health and revenue objectives, and provides case studies of effective tobacco tax administration. This manual is intended to be useful to tax administrators at the Ministry of Finance level by making them aware of the practices used and challenges faced by other countries. It will also be useful to officials in a country's Ministry of Health or similar organizations by providing them with a more thorough understanding of key issues in tax structure and administration.*

The Geography of Beer

Regions, Environment, and Societies

Springer Science & Business Media *This edited collection examines the various influences, relationships, and developments beer has had from distinctly spatial perspectives. The chapters explore the functions of beer and brewing from unique and sometimes overlapping historical, economic, cultural, environmental and physical viewpoints. Topics from authors - both geographers and non-geographers alike - have examined the influence of beer throughout history, the migration of beer on local to global scales, the dichotomous nature of global production and craft brewing, the neolocalism of craft beers, and the influence local geography has had on beer's most essential ingredients: water, starch (malt), hops, and yeast. At the core of each chapter remains the integration of spatial perspectives to effectively map the identity, changes, challenges, patterns and locales of the geographies of beer.*

The Saturday Review of Politics, Literature, Science and Art

Farmer's Tax Guide - Publication 225 (For Use in Preparing 2020 Returns)

vate, operate, or manage a farm for profit, either as owner or tenant. A farm includes livestock, dairy, poultry, fish, fruit, and truck farms. It also includes plantations, ranches, ranges, and orchards and groves. This publication explains how the federal tax laws apply to farming. Use this publication as a guide to figure your taxes and complete your farm tax return. If you need more information on a subject, get the specific IRS tax publication covering that subject. We refer to many of these free publications throughout this publication. See chapter 16 for information on ordering these publications. The explanations and examples in this publication reflect the Internal Revenue Service's interpretation of tax laws enacted by Congress, Treasury regulations, and court decisions. However, the information given does not cover every situation and is not intended to replace the law or change its meaning. This publication covers subjects on which a court may have rendered a decision more favorable to taxpayers than the interpretation by the IRS. Until these differing interpretations are resolved by higher court decisions, or in some other way, this publication will continue to present the interpretation by the IRS.
