To Boldly Go

Twenty six vehicle designs that dared to be different

Veloce Publishing Ltd To Boldly Go details 26 sometimes controversial vehicles, from 1911 to present, all solving different design challenges. COSWORTH - THE SEARCH FOR POWER (6th Edition)

Veloce Publishing Ltd This book covers the entire history, life and times of the famous British high-performance engineering company, from its 1958 foundation by Mike Costin and Keith Duckworth, through its often-exciting and always fascinating evolution, to its expansion and worldwide success in both motorsport and high-performance road car production.

André Lefebvre, and the Cars He Created at Voisin and Citroën

Veloce Publishing Ltd Together with his colleagues at Citroën, Andre Lefebvre created the Traction Avant (1934), the TUB (1939) - Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) - the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some these cars in races and record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to

remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.

British Lorries of the 1960s

Veloce Publishing Ltd British commercial manufacturers played a prime role in boosting Britain's economy during the 1960s, especially as many vehicles were exported worldwide. British lorries were, therefore, considered as being the workhorses of the world, performing a wide range of duties from heavy haulage to general goods delivery. This highly visual study of British lorries of the 1960s captures in 120 illustrations this often understated but very necessary work, which was undertaken day and night, 365 days a year. The comprehensive text reveals much about the marques that were everyday names, along with information about Britain's road haulage and commercial vehicle industries. This book will rekindle many memories and serve as a reminder of the important role British commercial vehicles played during the 1960s.

Russian Motor Vehicles

The Czarist Period 1784 to 1917

Veloce Publishing Ltd There has been nothing published outside of Russia concerning the activities of its motor industry, by 1937 the Soviets had become the largest producers of motor vehicles in Europe, albeit with the

help of Henry Ford The author decided to concentrate on the work of the pioneers in Czarist Russia, for their efforts were more diverse than those of their counterparts in the Soviet era. However, one Soviet motor car which was an indigenous product has been included to illustrate how the industry might have evolved if Henry Ford had not been approached. This is a comprehensive overview of all facets of vehicle production from the early days to the final demise of the Soviet Union. All the manufacturers of motor vehicles, certain accessories, military machines, and even aero engines are recorded in this unique book.
