Innkeepers' Key to Success

[Dog Ear Publishing](#) **MESSAGE TO MY READERS** When I am seeking information about an unfamiliar topic and thumb through a book, I do not want to see a lot of prose that plays Ring Around the Rosie about irrelevant stuff. I am looking for solutions to serious problems and want to see the nitty-gritty of the matter laid bare, and presented in outline form, in a clear, precise, detailed fashion of what and what not to do. If you feel the same, this is the book for you. One of the biggest problems in the inn business is that a vast segment of your guests will not return, not because they do not like your inn, but because they want to explore new places. The book addresses this problem head-on and spells out the solution on a multitude of fronts, in easy-to-understand detail, using many lists and outlines, so that these non returning guests are replaced without you spending huge amounts for advertising. Another unique problem of the inn business is that your inventory, unlike a typical retailer's, will disappear if rooms are not rented. This is examined in depth, and solutions are presented to fill the rooms so the problem is kept to a minimum. What is really exciting is that this is not just another run-of-the-mill book about inn keeping. The author was not satisfied with the status quo of the usual business operation and set out to seek perfection. This was not achieved overnight, and every new idea went through many trials and errors before the perfect system was developed. Room supplies, for example, were first laid out in easy-to-reach display fashion in the closets on each floor. This gave way to having the supplies in plastic cabinets on wheels so they could be rolled into the rooms. This, too, turned out to be less than satisfactory because of the restocking problem. To convey what was needed for each cabinet, two-way radios were tried, and even a video method was considered. Finally, the perfect system was developed and thoroughly tested. It is fully described in detail so the reader can duplicate it in his or her own inn.

Finding America

Book Two in the Series Harley Woman: Tales from the Open Road: a Cross-Country Motorcycle Tour from Oregon to Georgia

[iUniverse](#) For Jim and Rose Singhose, any day they are riding their Harley Davidson motorcycles is a good day. Since 1998, they have logged more than 100,000 miles riding cross-country on their bikes. In this, her second book, author Rose Singhose narrates the couples journey from their home near Cottage Grove, Oregon, to Tybee Island, Georgia, and back again in the summer of 2002. Follow Rose and Jim as they leave their home the morning of June 29, 2002, destined to attend the kick-off party July 19 in Atlanta, Georgia, for Harley Davidsons 100th birthday. As they travel through the heart of America, they celebrate the Fourth of July in Russell, Kansas; they investigate the happenings in Branson, Missouri; learn more about the Natchez Trace in Mississippi; and walk into the Atlantic Ocean, boots and all. This memoir narrates finding America the Harley Davidson way. With charm, Finding America describes the people, places, and events Rose and Jim encounter as they experience the thrill of the open road. During this trip, taken on the heels of the events of 2001, the Singhoses discover that good is alive and well in the United States.

Living with Complexity

[MIT Press](#) Why we don't really want simplicity, and how we can learn to live with complexity. If only today's technology were simpler! It's the universal lament, but it's wrong. In this provocative and informative book, Don Norman writes that the complexity of our technology must mirror the complexity and richness of our lives. It's not complexity that's the problem, it's bad design. Bad design complicates things unnecessarily and confuses us. Good design can tame complexity. Norman gives us a crash course in the virtues of complexity. Designers have to produce things that tame complexity. But we too have to do our part: we have to take the time to learn the structure and practice the skills. This is how we mastered reading and writing, driving a car, and playing sports, and this is how we can master our complex tools. Complexity is good. Simplicity is misleading. The good life is complex, rich, and rewarding—but only if it is understandable, sensible, and meaningful.

Evacuate

[Dorrance Publishing](#) **Evacuate** By Margaret Seiders-Metz It is hard to believe that these calm waters that we swim in, fish and cruise on with our pontoons and boats, would turn against us with its swift currents, dragging everything in its path along the way to destruction, leaving the victims suffering from the horrible disaster of flooding. It is useless to fight those swift, dangerous currents since they have strength of their own that no human can beat. The flooding water destroys houses, trees, boats, piers, even the heavy appliances and furniture inside our flooded homes. The damage one is left with is unbelievable and very depressing after you see your beautiful items destroyed from the high levels of mud and water left inside your house. But, life goes on, and you start repairing and replacing the damage only to have it all damaged again and again by more floods. You thank the Good Lord that He spared your family, pets and yourself. Material things can be replaced, but a life cannot be.

Barrier-Free Design

[Routledge](#) **This book for architects, interior designers, building managers, students, conference organisers looks at first principles to provide the user with the 'tools' to make their own decisions rather than a 'cookbook' approach. It is intended that designs and product information can be taken straight from the manual and inserted into ongoing projects. For the first time the book considers the needs of people with visual, hearing and mental disabilities, who make up the majority of disabled people in the population, alongside those of people with physical mobility disabilities. Practical low cost solutions to retro-fitting existing buildings are discussed, as well as the methods used to assess the suitability of an existing building, and assembling a project to improve access for disabled people. Specific products and designs are illustrated and discussed - with full working technical drawings, and full specification details. These will reduce considerably the research time needed to produce a cost-effective solution that will improve access for disabled people. A perspective of the standards and legislation dealing with access issues in the UK is compared with those in other countries, and the standards mentioned are compared with the realities of practical implementation carried out in 4 years of design in this area.**

Mom, There's a Dinosaur in Beeson's Lake

[Simon and Schuster](#) **Fourth grader Scab McNally has a real quandary on his hands. During a fishing expedition with his two best friends and new favorite doggy companion, golden retriever Joe, he's convinced that he glimpsed some kind of swamp creature. All Scab needs to do is get permission to go back out on Beeson's Lake with another fishing rod (and some special handcrafted dinosaur-spying inventions, of course!) and he'll be able to find proof. But before she'll let him back out on the water, Scab's mom insists that he pass the swimming class he's being forced to take with his "smart times ten" twin sister Isabelle. That means Scab has to master swimming in the super deep end of the pool, and Scab is NOT ready for that! So, it's back to his top secret lab to diagram some special schemes and plans for the occasion. Will any of them go awry? Well, it wouldn't be any fun if they didn't, would it?**

Liphar Short Stories Volume 2

[Spangaloo](#) **We are proud to present second collection of 20 short stories by 20 different authors. The stories may have or will appear in past or future issues of LIPHAR magazine. Most of the authors presented here have an extensive portfolio of other books and stories that you may want to check out. From heart warming family situations to the totally bizarre, including aliens worlds and ideas, you will find stories that get your attention. The stories cover a wide genre and offer a cross-section of writing talents. We have not edited the stories in any way and are publishing them as we have received them. We hope you enjoy the stories as we also hope to publish many volumes of short stories. All these stories have come to us from submissions to the magazine. We encourage all writers to send us their stories for inclusion.**

Small Space Living

Expert Tips and Techniques on Using Closets, Corners, and Every Other Space in Your Home

[Simon and Schuster](#) Complete with demonstrative illustrations and photographs, *Small Space Living* offers more than one hundred space-saving ideas from Roberta Sandenbergh, a.k.a the Small Space Architect. Sandenbergh will introduce you to the idea of space opportunities—untapped areas in every home that can be expanded for storage and organizational purposes. A space opportunity might be as simple as using an empty space under a stairway or above a doorway or as complicated as dividing your entire apartment for rental income. Each chapter addresses a different kind of space opportunity area, including closets, corners, walls, windows, ceilings, and floors. In these areas, you will be inspired by Sandenbergh's creative approaches to divided spaces, stacked spaces, empty spaces, mirrored spaces, and multipurpose furniture. Learn from the author's stories of her own designs for "small-by-choice" homes—for herself and for her clients—in which she tried to make the best possible use of varied living spaces. Allow Sandenbergh to help you create more space-efficient and attractive areas in your home whether you live in a studio apartment, a tiny home, or a larger home that needs more of a cozy feel.

Angry Birds and Beehive Hair

[Author House](#) "Chovancek (*I Can Finally Hear Birds*, 2013, etc.) covers territory similar to the turf once occupied by the late Erma Bombeck in this collection of humorous sketches...Chovancek has a strong, clear, and for the most part, appealing voice. She is a suburban Everywoman: Her troubles are our troubles, her peeves are our peeves. An enjoyable collection of observations on some of the less-than idyllic aspects of suburban family life." - Kirkus Reviews Nancy takes us on a journey through her childhood years with an Italian/Polish upbringing, and continues through the triumphs and tribulations of her adulthood with sarcastic humor and grace. As we become immersed in Nancy's true-life story telling, it becomes obvious that she has a knack for humor in the most unexpected, yet highly relatable moments that we all share in life. Nancy takes us on a humorous and touching journey in which all stories have a common thread: Life's absurdities show us that we are not alone for this wild ride. Loving oneself for who you are and not what other's want you to become is imperative. To quote William Shakespeare's "Hamlet", "This above all: To thine own self, be true."
