Gender, Miracles, and Daily Life

The Evidence of Fourteenth-century Canonization Processes

Brepols Pub Interaction with the saints was central to the everyday life of medieval Christians. The process of praying to a heavenly intercessor not only involved private devotion but was also intrinsically connected with society at large. It required the individual to communicate and negotiate both with the saint and within a group of devotees, thereby exposing social processes such as community dynamics and the construction of gender. Considering these issues and others, Gender, Miracles, and Daily Life focuses on the depositions of the canonization processes of Thomas Cantilupe (1307) and Nicholas of Tolentino (1325). It explores how ordinary laypeople understood the daily responsibilities that determined their relationship to the saints and articulates how their shared narratives contributed to the rituals which surrounded a miracle. This material has been little explored by scholars, yet offers a vivid and colourful insight into the world of men and women in the fourteenth century.

Miracle of the Beast

Sonia Nova Leaving Earth was no longer safe as a human woman... Offered a trainee position in the Alliance, Hazel is on her way to Inea, the First Planet of the Alliance. She's sad to miss the holiday season on Earth, and more than a bit concerned about the recent Krezlian attacks on spaceships leaving the solar system, but there's no turning back now. When her worst nightmare comes true and the Krezlians attack the ship she's on, Hazel can only put her trust on a beastly Ezak-X Alliance soldier. But why does she feel so drawn to him...? The word "vacation" didn't exist in the Ezak-X vocabulary... Zeriq couldn't have it worse. Just as he's on leave from the military, unarmed and unprepared, the damned Krezlians attack the Alliance ship he's on. Although he'd rather join the fight, a small human female tags along with him, clearly expecting him to get her to safety. He can't just ignore her. But when their emergency shuttle malfunctions, they find themselves stranded on a frozen alien planet. Far from Inea, possibly even farther from Earth, they must fight the extreme conditions to survive. And although the temperature on the planet freezes, his body burns for the female... Miracle of the Beast is a steamy holiday romance set in the Mate of the Beast universe. Complete with a HEA and no cliffhangers.

Rewire Your Brain

Think Your Way to a Better Life

John Wiley & Sons How to rewire your brain to improve virtually every aspect of your life-based on the latest research in neuroscience and psychology on neuroplasticity and evidence-based practices Not long ago, it was thought that the brain you were born with was the brain you would die with, and that the brain cells you had at birth were the most you would ever possess. Your brain was thought to be "hardwired" to function in predetermined ways. It turns out that's not true. Your brain is not hardwired, it's "softwired" by experience. This book shows you how you can rewire parts of the brain to feel more positive about your life, remain calm during stressful times, and improve your social relationships. Written by a leader in the field of Brain-Based Therapy, it teaches you how to activate the parts of your brain that have been underactivated and calm down those areas that have been hyperactivated so that you feel positive about your life and remain calm during stressful times. You will also learn to improve your memory, boost your mood, have better relationships, and get a good night sleep. Reveals how cutting-edge developments in neuroscience, and evidence-based practices can be used to improve your everyday life Other titles by Dr. Arden include: Brain-Based Therapy-Adult, Brain-Based Therapy-Child, Improving Your Memory For Dummies and Heal Your Anxiety Workbook Dr. Arden is a leader in integrating the new developments in neuroscience with psychotherapy and Director of Training in Mental Health for Kaiser Permanente for the Northern California Region Explaining exciting new developments in neuroscience and their applications to daily living, Rewire Your Brain will guide you through the process of changing your brain so you can change your life and be free of self-imposed limitations.

An Essay Against Modern Superstition

A Companion to Middle English Hagiography

DS Brewer The saints were the superheroes and the celebrities of medieval England, bridging the gap between heaven and earth, the living and the dead. A vast body of literature evolved during the middle ages to ensure that everyone, from kings to peasants, knew the stories of the lives, deaths and afterlives of the saints. However, despite its popularity and ubiquity, the genre of the Saint's Life has until recently been little studied. This collection introduces the canon of Middle English hagiography; places it in the context of the cults of saints; analyses key themes within hagiographic narrative, including gender, power, violence and history; and, finally, shows how hagiographic themes survived the Reformation. Overall it offers both information for those coming to the genre for the first time, and points forward to new trends in research. The Miracle's Curse

iUniverse Peter Harris is a young, nerdy physicist with big dreams—and those dreams have finally come true. He has invented a “replicator,” a machine that creates items for human survival using sub-atomic particles. Peter’s machine doesn’t affect the environment and appears to be a miracle of modern science. Despite the machine’s ability to feed and clothe humanity and even create building materials while reducing carbon dioxide, powerful people are not pleased. The United States government hopes to thwart Peter’s accomplishments, even though his replicator could save the world. Desperate to share his breakthrough, Peter assembles a team to navigate the pitfalls of creating powerful enemies. They must now represent the resistance and survive all attempts to end replicator technology. In an ironic twist of fate, this miracle of life-changing proportions holds the seeds of tragedy.

Family Disintegration

A Bibliography with Indexes

Nova Publishers The contemporary family is being distracted, disturbed and distraught by societal pressures from every direction. The nuclear family concept, believed crucial to child rearing, is becoming passé according to census data. Or has the wave of disruption to families crested? It is hoped that this bibliography will serve as a useful tool to researchers seeking further information on families and the pressures being exerted upon them in the 21st century.

Up Through an Empty House of Stars

Wildside Press LLC At last, Up Through an Empty House of Stars brings together the best of the never before collected SF reviews and articles that helped build David Langford's towering reputation since 1980. Complementing the review columns collected in The Complete Critical Assembly and the knockabout essays and squibs in The Silence of the Langford, this volume's 100 glittering

selections mix serious critical insight with the inimitable Langford wit. In 2002 David Langford won his sixteenth Hugo award as Best Fan Writer, for critical and humorous commentary on SF. In the same year his occasionally scandalous SF newsletter Ansible won its fifth Hugo. Langford also received the 2001 Hugo for best short story, and the 2002 Skylark Award. Here he shines a unique light on classics like Ernest Bramah, G.K. Chesterton, Robert Heinlein and Jack Vance, and analyses major SF -- and major clunkers, and minor eccentrics -- of the 1980s, 1990s and early 2000s, continuing to the latest by such current stars as Gene Wolfe and China Mi, ville. Plus witty asides on crime fiction and its SF links, gleeful examination of writing so bad it's almost good, and (even at his most serious) turns of phrase to make you laugh aloud

Marian Representations in the Miracle Tales of Thirteenth-century Spain and France

Catholic University of Amer Press The Marian miracle tale of thirteenth-century Spain and France is an unusual thematic genre comprising tales, songs, poems, plays, and sermons dedicated to miraculous occurrences attributed to the Virgin Mary. While there are scholarly articles on particular aspects of this large and important body of literature, there has been no attempt to bring its principal authors together into a single scholarly study. Bringing five well-known thirteenth-century authors together -- Gonzalo de Berceo, Gautier de Coinci, Cardinal Jacques de Vitry, Rutebeuf, and King Alfonso X of Spain -- the book shows how each used the Marian collections for individual purposes. Mary is portrayed in a variety of manifestations, as Mediatrix, Monitrix, Maler Dei, National Patroness, and even as something close to the troubadour's desired or unattainable Lady. Berceo was a secular priest who found an older collection of tales useful as an instructive tool. Gautier, an aristocratic monk of intellectual refinement, had a nearly exclusively artistic interest in his Marian materials, while Cardinal Jacques de Vitry -- an eminent churchman and eloquent reformer -- sought with his carefully chosen tales to bring Marianism into the fold of doctrinal orthodoxy. Rutebeuf, a minstrel, accepted the tales as popular piety and returned them to his audience in a spirit of reproach to the sometimes heavy-handed didactic use made of the material by churchmen with vested interests. Finally, the personal voice and directing presence of Spain's King Alfonso X makes of his famous Marian collection, the Cantigas de Santa Maria, a part of his social and religious program for Spain. Additionally, a reflection upon the formalistcriticism of Bakhtin and Todorov suggests new possibilities for seeing within some Marian tales of the period a subtle tool for

the subverting of perceived Church excesses.

The Allied Occupation and Japan's Economic Miracle Building the Foundations of Japanese Science and Technology 1945-52

Psychology Press There is a substantial body of literature dealing with the Occupation of Japan; yet hardly any of it has addressed the significance of the considerable contributions in science and technology to Japan's startling economic progress - contributions made possible in large measure by the Scientific and Technical Division of General MacArthur's Occupation Headquarters. This book chronicles their story and provides a full answer to the Big Question: Did the Japanese have or were near to having an Atomic Bomb? Apart from their immediate task of reviewing the status of Japan's science and technology at the beginning of the Occupation, the Scientific and Technical Division set about encouraging the formation of new national bodies for science and technology and persuaded the Japanese government to create new and more efficient means of dealing with technological matters, including industrial matters, quality control, patents and other intellectual property, and rendered aid in many other ways to Japan's engineers and scientists.

St. Martin and His Hagiographer

History and Miracle in Sulpicius Severus

Oxford Historical Monographs The Life of St Martin by Sulpicius Severus was one of the formative works of Latin hagiography. Yet although written by a contemporary who knew Martin, it attracted immediate criticism. Why? This study seeks an explanation by placing Sulpicius works both in their intellectual context, and in the context of a church that was then undergoing radical transformation. It is thus both a study of Sulpicius, Martin, and their world, and at the same time an essay in the interpretation of hagiography.

Modern Applications to Group Work

Nova Publishers The effectiveness of group counselling, as a treatment modality, has been well established. And while additional theoretical work will always be needed, perhaps the greater challenge for contemporary group practitioners lies in crafting theoretically sound applications of group theory so that group methods can be used more effectively to benefit clients struggling with various psychological and developmental problems. This book responds to this need by offering fourteen chapters of creative, useful examples of how group methods can be successfully applied to a wide range of problems and populations. Each chapter, written by innovators from the fields of counselling, social work, psychology and psychiatry, focuses on specific mental health problems of issues that will interest a wide population. A careful analysis of each psychological or development problem greets the reader, followed by a discussion of the theoretical basis for the interventions. Each chapter utilises practical recommendations, outlines of procedures, and liberal use of case examples to illuminate important process points. Each broad category, Adults; Children and Adolescents; and Training and Theory; includes interesting chapter topics such as Group counselling with late deafened adults, Marital restoration groups, Therapist's uses of self in group psychotherapy, and Group play therapy with abused children. The elegant combination of theory and practice offers the reader a range of easily implemented methods and techniques applied to each specified problem. Modern Applications to Group Work is a valuable companion text for any group-oriented course. Undergraduate and graduate courses in group can use the text to illustrate the application of general group principles to specific psychological concerns. Modern Applications to Group Work may he used as the primary text for advanced courses in group counselling, psychology and social work

programs. Practitioners will be attracted to the book due to the comprehensive scope and the strong theoretical basis of each chapter that is followed by pragmatic treatment strategies.

The Trifurcating Miracle

Corporations, Workers, Bureaucrats, and the Erosion of Japan's National Economy

Psychology Press This title examines the transformation of Japan's national economy. It employs the concept of the structure of accumulation composed of the organizations of labor, credit and markets. The postwar Japanese miracle trifurcated into prosperous corporations, squeezed workers and parasitic bureaucracy in the slow growth period, 1974-91. The "miracle" continues only for the major Japanese corporations that are East Asianizing and globalizing.
