Drugs and Drug Policy

What Everyone Needs to Know

Oxford University Press In Drugs and Drug Policy: What Everyone Needs to Know Mark A. R. Kleiman, Jonathan P. Caulkins, and Angela Hawken will provide a comprehensive introduction to domestic drug policy. They will address topics ranging from the basic biology of drug addiction, to the rationale behind drug policies and moves to legalize drugs, approaches to enforcement, drug abuse prevention, treatment, drug-related crime, prevalence of use, medical benefits of drugs, pricing of drugs, international policy, the connection between trafficking and terrorism, and the socio-cultural elements of drug policy.

Drug Policy: What Everyone Needs to Know

Oxford University Press Debate around drugs and the policies, taxes, and regulations that surround them have left citizens and officials with questions on what can be done about both illicit drugs and marijuana. The foremost public and scholarly authorities on U.S. drug policy provide a truly balanced and comprehensive overview of the subject in this bundle containing Drugs and Drug Policy: What Everyone Needs to Know and Marijuana Legalization: What Everyone Needs to Know.

Criminal Law, Philosophy and Public Health Practice

Cambridge University Press This examination of the interface between criminal law, philosophy and public health brings together international experts from a variety of disciplines and areas of practice, including law, public health, philosophy, health policy and ethics. It will be of particular relevance to academics, policy-makers, lawyers and public health practitioners.

Making Your Workplace Drug-free

A Kit for Employers

Marijuana Legalization

What Everyone Needs to Know®

Oxford University Press Should marijuana be legalized? The latest Gallup poll reports that exactly half of Americans say "yes"; opinion couldn't be more evenly divided. Marijuana is forbidden by international treaties and by national and local laws across the globe. But those laws are under challenge in several countries. In the U.S., there is no short-term prospect for changes in federal law, but sixteen states allow medical use and recent initiatives to legalize production and non-medical use garnered more than 40% support in four states. California's Proposition 19 nearly passed in 2010, and multiple states are expected to consider similar measures in the years to come. The debate and media coverage surrounding Proposition 19 reflected profound confusion, both about the current state of the world and about the likely effects of changes in the law. In addition, not all supporters of "legalization" agree on what it is they want to legalize: Just using marijuana? Growing it? Selling it? Advertising it? If sales are to be legal, what regulations and taxes should apply? Different forms of legalization might have very different results. Marijuana Legalization: What Everyone Needs to Know® will provide readers with a non-partisan primer about the topic, covering everything from the risks and benefits of using marijuana, to describing the current laws around the drug in the U.S. and abroad. The authors discuss the likely costs and benefits of legalization at the state and national levels and walk readers through the "middle ground" of policy options between prohibition and commercialized production. The authors also consider how marijuana legalization could personally impact parents, heavy users, medical users, drug traffickers, and employers. What Everyone Needs to Know® is a registered trademark of Oxford University Press.

The Drug Paradox

An Introduction to the Sociology of Psychoactive Substances in Canada

Canadian Scholars Why are some drugs considered socially acceptable while others are demonized? What makes these definitions so widespread? Who benefits from these conceptualizations? The Drug Paradox examines both the empirically founded and the socially constructed facets of drugs and drug use, highlighting the incongruous aspects of laws, policies, and programming that aim to address behaviours around drugs. The authors explore this paradox, arguing that Canada's punitive approach to addressing drug use continues to exist alongside harm-reduction strategies and that these competing approaches ultimately impede Canada's ability to deal effectively with substance misuse. Using a policy-oriented approach while also emphasizing the utility of a multifaceted biopsychosocial model, this text provides students with a foundation in the sociology of psychoactive substances in the Canadian context. It covers a broad range of issues—models of addiction, the history of Canada's drug laws, media representation, government responses to substance use, and international perspectives on drug policy—and addresses various research areas that are important for students to consider when trying to make sense of the competing discourses on drugs in society. The Drug Paradox is ideal for use in sociology courses on drugs and drug use and will also appeal to those focusing on drug use from a criminology, public health, or policy perspective.

A War that Can't Be Won

Binational Perspectives on the War on Drugs

University of Arizona Press More than forty years have passed since President Richard Nixon described illegal drugs as "public enemy number one" and declared a "War on Drugs." Recently the United Nations Global Commission on Drug Policy declared that "the global war on drugs has failed with devastating consequences for individuals and societies around the world." Arguably, no other country has suffered as much from the War on Drugs as Mexico. From 2006 to 2012 alone, at least sixty thousand people have died. Some experts have said that the actual number is more than one hundred thousand. Because the war was conceived and structured by US policymakers and officials, many commentators believe that the United States is deeply implicated in the bloodshed. A War that Can't Be Won is the first book to include contributions from scholars on both sides of the US-Mexico border. It provides a unique breadth of perspective on the many dimensions of the societal crisis that affects residents of both nations—particularly those who live and work in the borderlands. It also proposes practical steps toward solving a crisis that shows no signs of abating under current policies. Each chapter is based on well-documented data, including previously unavailable evidence that was obtained through freedom-of-information inquiries in Mexico. By bringing together views from both sides of the border, as well as from various academic disciplines, this volume offers a much wider view of a complex problem—and possible solutions.

Juvenile Delinquency: The Core

Cengage Learning Succinct but thorough and cutting edge, Siegel and Welsh's JUVENILE DELINQUENCY: THE CORE, 6th Edition presents theory, policy, relevant legal cases, and the latest research in a value-priced, student-friendly paperback. This brief text is acclaimed for its authority and balance as well as the authors' ability to completely engage students in the juvenile delinquency course. In around 500 pages, Siegel and Welsh help students understand the nature of delinquency, its causes and correlates, and current strategies being used to control or eliminate its occurrence. Juvenile Delinquency: Theory, Practice, and Law

Cengage Learning Unrivaled in its current coverage of topics, the thirteenth edition of best-selling **JUVENILE DELINQUENCY: THEORY, PRACTICE, AND LAW** provides an in-depth analysis of the theories of delinquency, environmental issues, juvenile justice issues, and the juvenile justice system. Praised both for its authority and balance as well as for the authors' ability to engage students in the course, the book presents cutting-edge, seminal research, as well as up-to-the-minute policy and newsworthy examples. Siegel and Welsh offer a timely and objective presentation of juvenile delinquency theory and juvenile justice policy issues by examining opposing sides of controversial aspects of delinquency and delinquency programs in an unbiased way. What's more, the MindTap that accompanies this text helps students practice and master techniques and key concepts while engaging them with video cases, career-based decision-making scenarios, visual summaries, and more. Needless Suffering

How Society Fails Those with Chronic Pain

University Press of New England **Needless Suffering** offers a sociological examination of a complex medical problem: chronic pain and the inability of doctors and other health professionals to understand and manage it in their patients. People in pain, writes Dr. David Nagel, are the poor of the medical world. Like the poor, they are stigmatized and left at the mercy of powerful social actors who tend to work in their own self-interest, frequently at the expense of those they propose to serve. This leaves those who suffer with little control over their own destinies and creates a dysfunctional status quo that harms instead of helps. Drawing on his own experience witnessing his mother's chronic pain and

numerous clinical stories from over thirty years' expertise as a pain management specialist, Nagel looks first at patients, their families, and their doctors (usually not trained in pain management), and then broadens his canvas to elaborate a pain power structure that includes the entire healthcare community, insurers, lawyers, government regulators, employers, politicians, law enforcement agencies, and painkilling drugs. Concluding with concrete reforms to create more effective and compassionate pain care, this book is designed for pain patients and their families, healthcare providers, legislators and other public policymakers, judges, personal injury and other attorneys, insurers, government regulators, law enforcement personnel, and health care businesspeople.

Privacy

Greenhaven Publishing LLC Privacy, or being free from being observed or disturbed by others, is a right that we often take for granted. The daily lifestyle of a teenager is filled with issues that they often just want to work out themselves, in private. This volume explores the real and perceived teen rights related to privacy issues. Readers will evaluate whether a student's right to privacy is more restricted than an adult's right to privacy, and the impact of blank parental consent requirements and parental involvement laws. Also discussed are school searches of students and their lockers, and student drug testing.

Dual Markets

Comparative Approaches to Regulation

Springer This comprehensive volume analyzes dual markets for regulated substances and services, and aims to provide a framework for their effective regulation. A "dual market" refers to the existence of both a legal and an illegal market for a regulated product or service (for example, prescription drugs). These regulations exist in various countries for a mix of public health, historical, political and cultural reasons. Allowing the legal market to thrive, while trying to eliminate the illegal market, provides a unique challenge for governments and law enforcement. Broken down into nine main sections, the book studies comparative international policies for regulating these "dual markets" from a historical, legal, and cultural perspective. It includes an analysis of the markets for psychoactive substances that are illegal in most countries (such as marijuana, cocaine, opioids and amphetamines), psychoactive substances which are legal in most countries and where consumption is widespread (such as alcohol and tobacco), and services that are generally regulated or illegal (such as sports betting, the sex trade, and gambling). For each of these nine types of markets, contributions focus on the relationship between regulation, the emerging illegal market, and the resulting overall access to these services. This work aims to provide a comprehensive framework from a historical, cultural, and comparative international perspective. It will be of interest to researchers in criminology and criminal justice, particularly with an interest in organized crime, as well as related fields such as sociology, public policy, international relations, and public health.

Responding to Drug Use and Violence

Helping People, Families and Communities: A Directory and Resource Guide of Public and Private-Sector Drug Control Grants

DIANE Publishing Important resource for all state & local officials seeking Federal assistance for new programs against drug use in their communities. Discusses public- & private-sector forms of support. Includes information on programs from the U. S. Departments of Education, Health & Human Services, Justice, Interior, Labor, Transportation, & others. Provides principal contact, criminal justice, treatment/prevention, & education contacts for all states. Appendices list Federal formula grant funding by state, HIDTA points of contact, & grant program points of contact. Over 100 programs are profiled.

National Drug Control Strategy

Public Health Reports

Review of Bolivian Soybeans, U.S. Drug Policy, and the Food for Peace Program

Joint Hearing Before the Subcommittee on Wheat, Soybeans, and Feed Grains and the Subcommittee on Department Operations, Research, and Foreign Agriculture of the Committee on Agriculture, House of Representatives, One Hundred First Congress, Second Session, June 27, 1990

Regulatory Policies of the Food and Drug Administration

Hearings Before a Subcommittee on the Committee...91-2, June 9, 1970

A Legislative History of the Federal Food, Drug, and Cosmetic Act and Its Amendments

Explores how the human brain works, covering such topics as memory, sleep, dreaming, dysfunctions, and new technology used to learn more about it.

International Drug Control Policy, Colombia

Hearing Before the Subcommittee on National Security, International Affairs, and Criminal Justice of the Committee on Government Reform and Oversight, House of Representatives, One Hundred Fifth Congress, First Session, July 9, 1997

Drug Use and Abuse: A Comprehensive Introduction

Cengage Learning Packed with the latest data and research, the powerful new DRUG USE AND ABUSE: A COMPREHENSIVE INTRODUCTION, 8e delivers a thorough, interdisciplinary survey of all aspects of drug and alcohol abuse. The text draws from the many disciplines of history, law, pharmacology, political science, social work, counseling, psychology, sociology, and criminal justice--resulting in the most comprehensive, authoritative single source available. It explores the history of drugs, their impact on society, the pharmacological impact of drugs on the body, drug policy implications, the criminal justice system response, the drug business, law enforcement, theories of use, as well as the effects, treatment, and prevention of abuse. New coverage includes nonmedical use of prescription drugs, synthetic substances, the use of stimulants to treat PTSD and ADD, medical marijuana, the connection between drug trafficking and terrorism, and an updated analysis of the United States drug policy. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Drug Crisis

Treatment and Prevention : Hearing Before the Committee on Labor and Human Resources, United States Senate, One Hundred First Congress, First Session, on Examining State and Local Treatment and Prevention Programs Relating to the Drug Crisis, August 3 and October 25, 1989

Current trends in anglophone studies: cultural, linguistic and literary research:

Cultural, linguistic and literary research

Ediciones Universidad de Salamanca La publicación de este volumen representa un caso relativamente insólito. Un pequeño grupo de jóvenes investigadores de menos de treinta años convence a un grupo mucho más numeroso de la misma edad para celebrar en Salamanca la First Conference of Young Researchers on Anglophone Studies. El resultado es deslumbrante. No solo demuestran una gran capacidad organizativa, sino que los resultados individuales de las aportaciones científicas son sobresalientes. Este volumen, *Current Trends in Anglophone Studies*, recoge una selección revisada de las propuestas presentadas en el Encuentro y gira en torno a una estructuración tripartita clásica: estudios culturales, lingüísticos y literarios. En ella caben todos aquellos que se mueven en el campo de los estudios anglófonos. Cada uno de estos campos podría haber sido suficiente para celebrar un congreso, pero parece razonable que en este tipo de encuentros tengan cabida todos. De ese modo, este volumen se convierte en un ejemplo de aproximación interdisciplinar a los estudios anglófonos. Desde un punto de vista cuantitativo, los estudios culturales ocupan sin duda un espacio menor. Sin embargo, sobresale la variedad de temas tratados, así como la internacionalización de los autores, dentro de este apartado. Estudiantes españoles e italianos acometen estudios relacionados con la música, la pintura, el cine, la traducción, la marginalidad social o el impacto de las nuevas tecnologías en la producción artística. Si no pareciera demasiado atrevido, podría decirse que estos jóvenes estudiosos irían más allá de lo que un día ya lejano pudieron imaginar Richard Hoggard o Raymond Williams. Los estudios aquí presentados reflejan, sin duda, la evolución que la propia sociedad ha experimentado en estos últimos cincuenta años y exploran la relación entre las prácticas culturales, la vida diaria, y los contextos económicos, políticos e históricos. No es de extrañar que una gran parte de las contribuciones presentadas en este volumen se centren en el estudio de la lengua, ya que la demanda del inglés se ha incrementado de forma considerable en los últimos años. Sobresalen los análisis puramente filológicos y sobre todo los relacionados con el aprendizaje del inglés como segunda lengua. Por eso, destacan estudios que contemplan rasgos morfológicos, léxicos o sintácticos. Sin embargo, el mayor número de participaciones hace referencia al ya citado aprendizaje del inglés como L2, tanto desde el análisis de materiales, como desde la práctica oral o escrita. Las contribuciones literarias ofrecen una evaluación teórica, formal e interpretativa de distintas tendencias desde perspectivas tanto interdisciplinarias como interculturales. Cronológicamente los estudios abarcan textos desde el siglo XVIII hasta nuestros días, con un acento especial en los autores más contemporáneos y en el género narrativo. En general estos estudios se fijan en textos concretos y los analizan desde perspectivas culturales, sociológicas o psicológicas. Pero abundan menos las aproximaciones desde la teoría literaria, desde la técnica narrativa o, como tal vez cabría esperar al tratarse de estudiantes tan jóvenes, desde la aplicación de las nuevas tecnologías. Por el contrario, se repiten temas como los traumas heredados de la Guerra de Vietnam, las cicatrices del 11 de septiembre o los problemas de género.

Drugs, Crime, and Justice

Contemporary Perspectives, Third Edition

Waveland Press The twenty-six articles in this edited volume provide perspective on the interrelated issues surrounding the use of drugs in society. Although drugs have long been a social problem, the importance of the issue—and the involvement of the criminal justice system—have varied across time. Public concern has typically centered on illegal drugs, but the drug issue today is even more complex given the impact of prescription drugs. Exaggeration has been a constant theme in the history of public policy on drugs, usually playing on public fear to demonize specific drugs and users. Some drugs are more dangerous than others. The variations in effects impact enforcement, prevention, and treatment. If we are going to criminalize drugs and drug usage, policies and penalties should be based on the relative dangerousness of a drug or class of drugs. Policies can reduce harm, create harm, or both. Our current drug policies attempt to reduce harm through law enforcement. We arrest anyone involved in drug activities under the premise of protecting society. These same policies, however, result in the incarceration of large numbers of people; they are expensive; they overburden the criminal justice system; and they have lasting consequences for those caught up in the drug war no matter how minor their offenses. Drug policies should be weighed carefully, implementing those that result in the least amount of harm to society. The editors have collected timely articles that provide perspective and a foundation for an informed approach to addressing problems associated with drug use.

Drugs and Violence

The Criminal Justice System in Crisis : Hearings Before the Permanent Subcommittee on Investigations of the Committee on Governmental Affairs, United States Senate, One Hundred First Congress, First Session, June 26, 1989 (Macon, GA) and June 28, 1989 (Atlanta, GA).

Hearing Before the Subcommittee on Domestic Policy of the Committee on Oversight and Government Reform, House of Representatives, One Hundred Eleventh Congress, First Session, May 19, 2009

Informing America's Policy on Illegal Drugs

What We Don't Know Keeps Hurting Us

National Academies Press How should the war on drugs be fought? Everyone seems to agree that the United States ought to use a combination of several different approaches to combat the destructive effects of illegal drug use. Yet there is a remarkable paucity of data and research information that policy makers require if they are to create a useful, realistic policy package—details about drug use, drug market economics, and perhaps most importantly the impact of drug enforcement activities. *Informing America's Policy on Illegal Drugs* recommends ways to close these gaps in our understanding—by obtaining the necessary data on drug prices and consumption (quantity in addition to frequency); upgrading federal management of drug statistics; and improving our evaluation of prevention, interdiction, enforcement, and treatment efforts. The committee reviews what we do and do not know about illegal drugs and how data are assembled and used by federal agencies. The book explores the data and research information needed to support strong drug policy analysis, describes the best methods to use, explains how to avoid misleading conclusions, and outlines strategies for increasing access to data. *Informing America's Policy on Illegal Drugs* also discusses how researchers can incorporate randomization into studies of drug treatment and how state and local agencies can compare alternative approaches to

drug enforcement. Charting a course toward a better-informed illegal drugs policy, this book will be important to federal and state policy makers, regulators, researchers, program administrators, enforcement officials, journalists, and advocates concerned about illegal drug use.

Introduction to Health and Safety in Construction

Routledge This NEBOSH-endorsed textbook is matched to the latest syllabus of the National Certificate in Construction Safety and Health. Within the construction industry the need for specialist health and safety training is high due to the high risks involved. This is reflected in recent legislation such as CDM 2007 and explains the consistent demand for courses and learning materials. The text is easy to read, highly illustrated in full color, and supported with checklists, report forms and record sheets used currently in the industry. Students are supported with end-of-chapter questions, a study skills chapter and specimen assignments including specimen answers. As NEBOSH actively grow their qualifications internationally, demand for this book and its sister titles continues to increase overseas. High growth markets are the Middle East, Malaysia, India and China.

Drugs, Society and Behavior, 2000-2001

McGraw-Hill/Dushkin This anthology examines the past and present historical evolution of drugs in the United States. It discusses cocaine, heroine, marijuana, alcohol, and other major drugs, explores developing patterns of drug use and its implications, and reviews criminal behaviour perpetuated by drugs.

Against Excess

Drug Policy For Results

Drug-taking and drug control are alike; both are often done to excess. Against Excess shows how we can limit the damage done by drugs and the damage done by drug policies.

Towards More Effective Global Drug Policies

Springer This book examines the topical issue of global drug policy and outlines five steps that could be taken to improve its effectiveness. A public criminology approach is applied to explore not only what could be done, but also why it matters and how it could be achieved. It argues that more effective global drug policies require an acknowledgement of the failure of a war on drugs approach and the harms it has caused. Instead, strategies that reduce drug related harm should be prioritised. An innovative and diverse range of approaches should be developed that are underpinned by evaluation and dissemination of results. Finally, the horizons of the drug policy debate should be broadened. In line with the central aims of public criminology, this book provides an accessible contribution to global drug policy debates that links theory and practice and which will have appeal to a wide range of audiences.

Doing Drugs and Dropping Out

A Report Prepared for the Use of the Subcommittee on Economic Growth, Trade, and Taxes of the Joint Economic Committee, Congress of the United States

This report assesses the societal costs of substance abuse--especially cocaine and crack addiction--and dropping out of school. It is organized around three themes: (1) the impact of cocaine and crack abuse in terms of crime, public spending, and lost productivity; (2) policies that move addicts away from crack; and (3) policies that reduce the high school dropout rate. Based on extant literature, the report quantifies a bottom-line cost of drug abuse to have been between \$60.4 billion and \$124.9 billion in 1988, a figure that reflects the costs of health care, economic loss, and law enforcement relating to substance abuse. Impact also is assessed in terms of private and social issues. In evaluating the success of policies that have effectively moved addicts away from drugs, important questions concerning criteria for success, motivation for drug use, and addiction are explored. Law enforcement, treatment, educational, and prevention policies are evaluated. The current literature on testing, outpatient treatment, and peer programs to reduce the motivation toward drug abuse and to move addicts away from cocaine and crack is reviewed. In response to the issue of dropout prevention, the report recommends a rethinking of the structure of high schools within a collaborative context involving parents, schools, and communities. Included in the report are a working bibliography and a community service booklet that deals with the issues of this report on a local community level. (NB)
