**The Legacy of the Homesteaders Humble Homesteaders A South Dakota Legacy of Integrity** [Independently Published](#) **What is Your Legacy? What story did you receive? What impact will you leave? We do not know who we are without understanding the story of those who have gone before us. Humble Homesteaders tells the profound story of a legacy created, established and inherited by a couple farming near Nunda, South Dakota. Their parents and grandparents heeded the call to "go west," determined to seize their opportunity on the prairies of South Dakota. A generation later, this unpretentious couple sought their opportunity to be good parents, neighbors and citizens. Without intention, they each left a legacy of values and vocation, of overcoming obstacles and patiently persevering. Within these pages you will learn how these humble families learned and leaned on their \* Values,\* Community,\* Family,\* Education, and \* Faith to overcome the \* Loss of their Farms, \* The Great Depression,\* World War II, \* Personal Illness, and \* Family Injury. As you read this story, ask yourself what opportunities you sense and seize, what legacy you received and what influence you will leave. My Homesteader's Heritage My Life and Legacy** [Word Alive Press](#) **Homesteading the Plains Toward a New History** [U of Nebraska Press](#) **"Homesteading the Plains offers a bold new look at the history of homesteading, overturning what for decades has been the orthodox scholarly view. The authors begin by noting the striking disparity between the public's perception of homesteading as a cherished part of our national narrative and most scholars' harshly negative and dismissive treatment. Homesteading the Plains reexamines old data and draws from newly available digitized records to reassess the current interpretation's four principal tenets: homesteading was**

a minor factor in farm formation, with most Western farmers purchasing their land; most homesteaders failed to prove up their claims; the homesteading process was rife with corruption and fraud; and homesteading caused Indian land dispossession. Using data instead of anecdotes and focusing mainly on the nineteenth century, *Homesteading the Plains* demonstrates that the first three tenets are wrong and the fourth only partially true. In short, the public's perception of homesteading is perhaps more accurate than the one scholars have constructed. *Homesteading the Plains* provides the basis for an understanding of homesteading that is startlingly different from current scholarly orthodoxy. "-- *Legacy of the Tetons Homesteading in Jackson Hole* [LA Frontera Pub](#) These stories of homesteading the Wyoming frontier are told by a descendant of early settlers. *Black Homesteaders of the South* [Arcadia Publishing](#) *Homestead of Faith The Christian Legacy & Heritage of the Tribble-Vernon Family* One woman's faith in God during difficult circumstances transformed her family to be transformers-generation after generation! A preaching and teaching dynasty exploded during the 1950s and '60s with the Vernon brothers and Roger Tribble! They started many churches, and the four youngest Vernon brothers and their families starred in their own nationally televised series, *Homestead USA*, about the Christian family. This book tells the story of these heroes, including the true story of their forefathers who experienced challenges and victories. A young woman overcame a great family problem with God's promise and tough-love. Instead of breeding death and discouragement, her faith and tenacity opened the door for her children, grandchildren, great-grandchildren, and beyond to spread the love of God! By following their road of homesteading Heaven on earth, you will be encouraged with your own life and family! *Backcountry Ghosts California Homesteaders and the Making of a Dubious Dream* [U of Nebraska Press](#) Josh Sides tells the remarkable stories of the men and women who claimed homesteads in California and began a perilous quest to attain the American Dream at virtually any cost. *Portraits of Women in the American West* [Routledge](#) Men are usually the heroes of Western stories, but women also played a crucial role in developing the American frontier, and their stories have rarely been told. This anthology of biographical essays on women promises new insight into gender in the 19C American West. The women featured include Asian Americans, African-Americans and Native American women, as well as their white counterparts. The original essays offer observations about gender and sexual violence, the subordinate status of women of color, their perseverance and influence in changing that status, a look at the gendered religious legacy that shaped Western Catholicism, and women in the urban and rural, industrial and agricultural West. *Homesteading Space The Skylab Story* [U of Nebraska Press](#) As the United States and the Soviet Union went from exploring space to living in it, a space station was conceived as the logical successor to the Apollo moon program. But between conception and execution there was the vastness of space itself, to say nothing of monumental technological challenges. *Homesteading Space*, by two of

Skylab's own astronauts and a NASA journalist, tells the dramatic story of America's first space station from beginning to fiery end. Homesteading Space is much more than a story of technological and scientific success; it is also an absorbing, sometimes humorous, often inspiring account of the determined, hardworking individuals who shepherded the program through a near-disastrous launch, a heroic rescue, and an exhausting study of Comet Kohoutek, as well as the lab's ultimate descent into the Indian Ocean. Featuring the unpublished in-flight diary of astronaut Alan Bean, the book is replete with the personal recollections and experiences of the Skylab crew and those who worked with them in training, during the mission, and in bringing them safely home. Legacies of Dust: Land Use and Labor on the Colorado Plains [U of Nebraska Press](#) Introduction: the dust and everything after -- Early lessons from the land of opportunity -- The county agents take root -- Dirt -- Claiming the Arkansas -- On the move -- Food for victory -- An unquenchable thirst -- Back to work -- Conclusion: there and back again? Legacies of Dust Land Use and Labor on the Colorado Plains [U of Nebraska Press](#) The Dust Bowl of the 1930s was the worst ecological disaster in American history. When the rains stopped and the land dried up, farmers and agricultural laborers on the southeastern Colorado plains were forced to adapt to new realities. The severity of the drought coupled with the economic devastation of the Great Depression compelled farmers and government officials to combine their efforts to achieve one primary goal: keep farmers farming on the Colorado plains. In Legacies of Dust Douglas Sheflin offers an innovative and provocative look at how a natural disaster can dramatically influence every facet of human life. Focusing on the period from 1929 to 1962, Sheflin presents the disaster in a new light by evaluating its impact on both agricultural production and the people who fueled it, demonstrating how the Dust Bowl fractured Colorado's established system of agricultural labor. Federal support, combined with local initiative, instituted a broad conservation regime that facilitated production and helped thousands of farmers sustain themselves during the difficult 1930s and again during the drought of the 1950s. Drawing from western, environmental, transnational, and labor history, Sheflin investigates how the catastrophe of the Dust Bowl and its complex consequences transformed the southeastern Colorado agricultural economy. The Legacies of a Hawaiian Generation From Territorial Subject to American Citizen [Berghahn Books](#) Through the voices and perspectives of the members of an extended Hawaiian family, or `ohana, this book tells the story of North American imperialism in Hawai'i from the Great Depression to the new millennium. The family members offer their versions of being "Native Hawaiian" in an American state, detailing the ways in which US laws, policies, and institutions made, and continue to make, an impact on their daily lives. The book traces the ways that Hawaiian values adapted to changing conditions under a Territorial regime and then after statehood. These conditions involved claims for land for Native Hawaiian Homesteads, education in American public schools, military service, and participation in the Hawaiian cultural

renaissance. Based on fieldwork observations, kitchen table conversations, and talk-stories, or mo`olelo, this book is a unique blend of biography, history, and anthropological analysis. *Homestead National Monument of America, General Management Plan Environmental Impact Statement Lived Religion in America Toward a History of Practice* Princeton University Press At once historically and theoretically informed, these essays invite the reader to think of religion dynamically, reconsidering American religious history in terms of practices that are linked to specific social contexts. The point of departure is the concept of "lived religion." Discussing such topics as gift exchange, cremation, hymn-singing, and women's spirituality, a group of leading sociologists and historians of religion explore the many facets of how people carry out their religious beliefs on a daily basis. As David Hall notes in his introduction, a history of practices "encompasses the tensions, the ongoing struggle of definition, that are constituted within every religious tradition and that are always present in how people choose to act. Practice thus suggests that any synthesis is provisional." The volume opens with two essays by Robert Orsi and Danièle Hervieu-Léger that offer an overview of the rapidly growing study of lived religion, with Hervieu-Léger using the Catholic charismatic renewal movement in France as a window through which to explore the coexistence of regulation and spontaneity within religious practice. Anne S. Brown and David D. Hall examine family strategies and church membership in early New England. Leigh Eric Schmidt looks at the complex meanings of gift-giving in America. Stephen Prothero writes about the cremation movement in the late nineteenth century. In an essay on the narrative structure of Mrs. Cowman's Streams in the Desert, Cheryl Forbes considers the devotional lives of everyday women. Michael McNally uses the practice of hymn-singing among the Ojibwa to reexamine the categories of native and Christian religion. In essays centering on domestic life, Rebecca Kneale Gould investigates modern homesteading as lived religion while R. Marie Griffith treats home-oriented spirituality in the Women's Aglow Fellowship. In "Golden-Rule Christianity," Nancy Ammerman talks about lived religion in the American mainstream. *Humanities At Home in Nature Modern Homesteading and Spiritual Practice in America* Univ of California Press "Gould's attention to the ironies and ambivalences that abound in the practice of homesteading provides fresh and insightful perspective."—Beth Blissman, Oberlin College "This luminously written ethnography of the worlds that homesteaders make significantly broadens our understanding of modern American religion. In richly textured descriptions of the everyday lives and work of the homesteaders with whom she lived, Gould helps us understand how the tasks of clearing land, making bread, and building a garden wall were ways of taking on the most urgent issues of meaning and ethics."—Robert A. Orsi, Harvard University "This is a fascinating, authoritative, and accessible look at one of America's most important subcultures. If you ever get around to building that cabin in the woods, or especially if you don't, you'll want this volume on the bookshelf."—Bill McKibben, author of *Wandering*

**Home: A Long Walk Across America's Most Hopeful Landscape** "Rebecca Gould's compelling book on American homesteading brings the study of the religion-nature connection in the U.S. to a new place."—Catherine L. Albanese, author of *Nature Religion in America: From the Algonkian Indians to the New Age* "Gould provides brand new data and sheds new interpretive light on familiar figures and movements. *At Home in Nature* is a model of how to seamlessly blend ethnography and history."—Bron Taylor, University of Florida, editor of the *Encyclopedia of Religion and Nature*

**Staking Her Claim Women Homesteading the West** Instead of talking about women's rights, these frontier women grabbed the opportunity to become landowners by homesteading in the still wild west of the early 1900s. Here they tell their stories in their own words—through letters and articles of the time—of adventure, independence, foolhardiness, failure, and freedom. **Book jacket.**

**Huskerville A Story of Nebraska Football, Fans, and the Power of Place** [McFarland](#) The author, drawing upon his experiences as a devoted "Huskerviller" along with an extensive collection of interviews and questionnaires with fellow Husker fans, composes a story that highlights how the culture, history, and geography of Nebraska are intimately embedded in fans' devotion to the Cornhuskers.

**Colonial Legacies Economic and Social Development in East and Southeast Asia** [University of Hawaii Press](#) It is well known that Taiwan and South Korea, both former Japanese colonies, achieved rapid growth and industrialization after 1960. The performance of former European and American colonies (Malaysia, Singapore, Burma, Vietnam, Laos, Cambodia, Indonesia, and the Philippines) has been less impressive. Some scholars have attributed the difference to better infrastructure and greater access to education in Japan's colonies. Anne Booth examines and critiques such arguments in this ambitious comparative study of economic development in East and Southeast Asia from the beginning of the twentieth century until the 1960s. Booth takes an in-depth look at the nature and consequences of colonial policies for a wide range of factors, including the growth of export-oriented agriculture and the development of manufacturing industry. She evaluates the impact of colonial policies on the growth and diversification of the market economy and on the welfare of indigenous populations. Indicators such as educational enrollments, infant mortality rates, and crude death rates are used to compare living standards across East and Southeast Asia in the 1930s. Her analysis of the impact that Japan's Greater Asian Co-Prosperity Sphere and later invasion and conquest had on the region and the living standards of its people leads to a discussion of the painful and protracted transition to independence following

Japan's defeat. Throughout Booth emphasizes the great variety of economic and social policies pursued by the various colonial governments and the diversity of outcomes. Lucidly and accessibly written, *Colonial Legacies* offers a balanced and elegantly nuanced exploration of a complex historical reality. It will be a lasting contribution to scholarship on the modern economic history of East and Southeast Asia and of special interest to those concerned with the dynamics of development and the history of colonial regimes. Inclusion in the *American Dream Assets, Poverty, and Public Policy* [Oxford University Press](#)

The typical American household accumulates its assets in home equity and retirement accounts, both of which are subsidized through the tax system. But the poor, for the most part, do not participate in these asset accumulation policies. This book brings together scholars and experts on the topic of asset building, as this relates to public policy.

*Arab Cooking on a Saskatchewan Homestead Recipes and Recollections* [University of Regina Press](#)

In *Arab Cooking on a Saskatchewan Homestead*, over 200 recipes and the author's recollections from childhood combine to tell the story of a little-known group of early immigrants to the Saskatchewan prairies--the Syrians (most of them later known as Lebanese). There was a significant Syrian community in Saskatchewan during the Depression, and as Mr. Salloum points out, their traditional foods and crops were well-suited to the dryland farming that the drought of the 1930s demanded. Thus they thrived during this difficult period on the prairies. Their traditional foods--such as yogurt, chickpeas, and burghul--were, at the time, virtually unknown to their fellow homesteaders; today, however, these same foods are an important part of an increasingly varied and globally influenced North American cuisine.

Eerdmans Publishing](#) *Figures in the Carpet* presents a stellar roster of first-rate historians dealing seriously with a perennially important subject. The case studies and more theoretical accounts in this book amount to an unusually perceptive assessment of how "the person" has been viewed in American history. *Administration of Native Hawaiian Home Lands Joint Hearings Before the Select Committee on Indian Affairs, United States Senate, and the Committee on Interior and Insular Affairs, House of Representatives, One Hundred First Congress, First Session, on Oversight Hearing on the Administration of Native Hawaiian Home Lands Administration of Native Hawaiian Home Lands: August 9, 1989, Kaunakakai, Molakai* *Enduring Legacies* [University Press of Colorado](#) Traditional accounts of Colorado's history often reflect an Anglocentric perspective that begins with the

1859 Pikes Peak Gold Rush and Colorado's establishment as a state in 1876. *Enduring Legacies* expands the study of Colorado's past and present by adopting a borderlands perspective that emphasizes the multiplicity of peoples who have inhabited this region. Addressing the dearth of scholarship on the varied communities within Colorado—a zone in which collisions structured by forces of race, nation, class, gender, and sexuality inevitably lead to the transformation of cultures and the emergence of new identities—this volume is the first to bring together comparative scholarship on historical and contemporary issues that span groups from Chicanas and Chicanos to African Americans to Asian Americans. This book will be relevant to students, academics, and general readers interested in Colorado history and ethnic studies.

**This Sovereign Land A New Vision For Governing The West** [Island Press](#) In the eight states of the interior West (Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming), 260 million acres -- more than 48 percent of the land base -- are owned by the federal government and managed by its Washington, D.C.-based agencies. Like many other peoples throughout history who have bristled under the controlling hand of a remote government, westerners have long nursed a deep resentment toward our nation's capital. Rumbings of revolution have stirred for decades, bolstered in recent years by increasing evidence of the impossibility of a distant, centralized government successfully managing the West's widespread and far-flung lands. In *This Sovereign Land*, Daniel Kemmis offers a radical new proposal for giving the West control over its land. Unlike those who wish to privatize the public lands and let market forces decide their fate, Kemmis, a leading western Democrat and committed environmentalist, argues for keeping the public lands public, but for shifting jurisdiction over them from nation to region. In place of the current centralized management, he offers a regional approach that takes into account natural topographical and ecological features, and brings together local residents with a vested interest in ensuring the sustainability of their communities. In effect, Kemmis carries to their logical conclusion the recommendations about how the West should be governed made by John Wesley Powell more than a century ago. Throughout, Kemmis argues that the West no longer needs to be protected against itself by a paternalistic system and makes a compelling case that the time has come for the region to claim sovereignty over its own landscape. *This Sovereign Land* provides a provocative opening to a much-needed discussion about how democracy and ecological sustainability can go hand in hand, and will be essential reading for anyone interested in the West and western issues, as well as for all those concerned with place-based conservation, public lands management, bioregionalism, or related topics.
