Advances in Investment Analysis and Portfolio Management (New Series) Vol 7

Center for PBBEFR & Airiti Press Advances in Investment Analysis and Portfolio Management (New Series) is an annual publication designed to disseminate developments in the area of investment analysis and portfolio management. The publication is a forum for statistical and quantitative analyses of issues in security analysis, portfolio management, options, futures, and other related issues. The objective is to promote interaction between academic research in finance, economics, and accounting and applied research in the financial community.

Encyclopedia of Quantitative Risk Analysis and Assessment

John Wiley & Sons Leading the way in this field, the Encyclopedia of Quantitative Risk Analysis and Assessment is the first publication to offer a modern, comprehensive and in-depth resource to the huge variety of disciplines involved. A truly international work, its coverage ranges across risk issues pertinent to life scientists, engineers, policy makers, healthcare professionals, the finance industry, the military and practising statisticians. Drawing on the expertise of world-renowned authors and editors in this field this title provides up-to-date material on drug safety, investment theory, public policy applications, transportation safety, public perception of risk, epidemiological risk, national defence and security, critical infrastructure, and program management. This major publication is easily accessible for all those involved in the field of risk assessment and analysis. For ease-of-use it is available in print and online.

The Economic Consequences of State Lotteries

Greenwood Publishing Group Examining the economic impact and consequences of state lotteries, this book focuses on the efficiency and equity of state government revenue and expenditure policy. The authors offer an analysis of equity issues by studying the Illinois and Florida lotteries, and address efficiency considerations through an examination of six education-supporting lotteries and their allocation and administration of revenue. Among the other topics discussed are the effect of lottery taxes on other sources of revenue, whether lottery tickets are purchased at the expense of necessities, and possible policies for enhancing lotteries.

Basics of Winning Lotto/ Lottery

Cardoza Publishing earn to be a winner in just one quick read! This handy guide shows you everything you need to know to play and win money at lotto and lottery games, including: the rules and variations, the payoffs, the odds and GRI, inside secrets, and winning strategies. Illustrations. 64 pages

Leonhard Euler

Life, Work and Legacy

Elsevier The year 2007 marks the 300th anniversary of the birth of one of the Enlightenment's most important mathematicians and scientists, Leonhard Euler. This volume is a collection of 24 essays by some of the world's best Eulerian scholars from seven different countries about Euler, his life and his work. Some of the essays are historical, including much previously unknown information about Euler's life, his activities in the St. Petersburg Academy, the influence of the Russian Princess Dashkova, and Euler's philosophy. Others describe his influence on the subsequent growth of European mathematics and physics in the 19th century. Still others give technical details of Euler's innovations in probability, number theory, geometry, analysis, astronomy, mechanics and other fields of mathematics and science. - Over 20 essays by some of the best historians of mathematics and science, including Ronald Calinger, Peter Hoffmann, Curtis Wilson, Kim Plofker, Victor Katz, Ruediger Thiele, David Richeson, Robin Wilson, Ivor Grattan-Guinness and Karin Reich - New details of Euler's life in two essays, one by Ronald Calinger and one he co-authored with Elena Polyakhova - New information on Euler's work in differential geometry, series, mechanics, and other important topics including his influence in the early 19th century

The Economics of Gambling

*Routledge Against a background of extraordinary growth in the popularity of betting and gaming across many countries of the world, there has never been a greater need for a study into gambling's most important factor - its economics. This collection of original contributions drawn from such leading experts as David Peel, Stephen Creigh-Tyte, Raymond Sauer and Donald Siegel covers such interesting themes as: *betting on the horses *over-under betting in football games *national lotteries and lottery fatigue *demand for gambling *economic impact of casino gambling This timely and comprehensive book covers all the bases of the economics of gambling and is a valuable and important contribution to the ongoing and growing debates. The Economics of Gambling will be of use to academics and students of applied, industrial and mathematical economics as well as of being vital reading for those involved and interested in the gambling industry.*

Winning Lotto/Lottery for Everyday Players

Cardoza Publishing The worlds foremost lotto and lottery expert shows players his inside secrets of beating the game that millions play religiously every day. Prof. Jones shows you how to scientifically track and wheel numbers to substantially increase your chances of winning million-dollar jackpots. You'll learn how to use three- and four-ball lottery strategies, advanced six-ball wheeling systems, how to create the same wheels used by experts, and how to identify high/low frequency and hot numbers. Includes winning strategies for every state, plus twenty Dimitrov Wheels. 160 Pgs.

New Horizons in the Analysis of Control and Raising

Springer Science & Business Media Raising and control have figured in every comprehensive model of syntax for forty years. Recent renewed attention to them makes this collection a timely one. The contributions, representing some of the most exciting recent work, address many fundamental research questions. What beside the canonical constructions might be subject to raising or control analyses? What constructions traditionally treated as raising or control might not actually be so? What classes of control must be recognized? How do tense, agreement, or clausal completeness figure in their distribution? The chapters address these and other relevant issues, and bring new empirical data into focus.

Public Budgeting

Policy, Process and Politics

Routledge Some of the best writings on public budgeting and finance can be found in the journals that ASPA publishes or sponsors. For this volume editor Irene Rubin has brought together the best of these articles - emerging classics that address the most important theoretical and practical problems underlying public budgeting. The anthology is organized topically rather than historically, with an effort to delineate the issues needed to understand some of the more recent controversies in the field. Rubin's introductory essay and section openers frame the key issues and provide historical context for each article. The collection begins with descriptions of what public budgeting is, where it comes from, and what it is for. It moves on to the relationship between budget processes and outcomes, constraints on budgeting, the legal context in which it operates, and adaptations to those constraints such as contracting out. The book concludes with a discussion of the ethics and norms that underlie budgeting in a democracy. Throughout the anthology, the emphasis is on areas of disagreement and debate, so students can get involved and explore different viewpoints.

Naval Research Logistics Quarterly

Estimating the Elasticity of Demand for Gambling Through the Analysis of Lotto

Risk Analysis

Prospects and Opportunities

Springer Science & Business Media This volume of the series *Advances in Risk Analysis* consists of papers presented at the 1988 Annual Meeting of the Society for Risk Analysis, which was held October 30 through November 2 at the Mayflower Hotel in Washington, DC. The papers span the gamut of the increasing number of risk assessment topics addressed by the Society since it held its first annual meeting in June 1981, also in Washington DC. Organized to promote interdisciplinary analyses, the Society approaches risks from three broad perspectives: (1) the impact of various risks on the health of the world's populations and on the environment; (2) the social and political implications of specific risks, and (3) the management and reduction of risks through the development of a risk analysis methodology and corresponding data bases. The papers included in this volume typify these three approaches and illustrate their interdependence. For example, both cancer and noncancer health risks are examined for a variety of situations that exist within society. The public's perception of risks and the correlation between that perception and the acceptance or nonacceptance of certain risks is also addressed. In addition, the progress to date on predicting and quantifying specific risks, including the risks associated with the construction and use of large engineered systems, is reported. Included among the papers are several dealing with recent current issues, such as the impact of California's Proposition 65, hazardous waste disposal, and chemical accidents.

Decision Theory and Decision Analysis: Trends and Challenges

Springer Science & Business Media *Decision Theory and Decision Analysis: Trends and Challenges* is divided into three parts. The first part, overviews, provides state-of-the-art surveys of various aspects of decision analysis and utility theory. The second part, theory and foundations, includes theoretical contributions on decision-making under uncertainty, partial beliefs and preferences. The third section, applications, reflects the real possibilities of recent theoretical developments such as non-expected utility theories, multicriteria decision techniques, and how these improve our understanding of other areas including artificial intelligence, economics, and environmental studies.

Handbook on the History of Economic Analysis Volume III

Developments in Major Fields of Economics

Edward Elgar Publishing This unique troika of Handbooks provides indispensable coverage of the history of economic analysis. Edited by two of the foremost academics in the field, the volumes gather together insightful and original contributions from scholars across the world. The encyclopaedic breadth and scope of the original entries will make these Handbooks an invaluable source of knowledge for all serious students and scholars of the history of economic thought.

Advanced Risk Analysis in Engineering Enterprise Systems

CRC Press Since the emerging discipline of engineering enterprise systems extends traditional systems engineering to develop webs of systems and systems-of-systems, the engineering management and management science communities need new approaches for analyzing and managing risk in engineering enterprise systems. *Advanced Risk Analysis in Engineering Enterpri*

Becoming Investorji -Fundamental Analysis for Noobs

BlueRose Publishers "Buying and selling of stock is an easy task and anyone can do it. But what to buy, when to buy, at what price to buy, how much capital to allocate and when to sell are the questions for which many investors don't have the answer. Though anyone can do buying and selling of shares without knowledge, that won't make money. Just like a prior knowledge and training is required to do any task efficiently, training is required to invest efficiently in stocks also. Sensex was at 100 points in 1979 and today at 30,000+, despite the 15% CAGR growth in the market many fail to earn here just because of lack of knowledge and understanding of the stock market. This book explains in an easy manner various investing principles. From this book, you can learn. · How to find the right industry to invest. · How to read the annual reports and financial statements. · How to get stock ideas. · How to do the valuation of stock price. · How to design a profit-maximizing and risk minimizing portfolio."

Taking Measure of Charter Schools

Better Assessments, Better Policymaking, Better Schools

R&L Education This book breaks new ground on how policymakers and journalists can fairly assess charter school performance. The editors and authors show how good approaches to charter school assessment would also work for regular public schools, which is important because of the requirements of No Child Left Behind.

An Introduction to Behavior Analysis

John Wiley & Sons AN INTRODUCTION TO BEHAVIOR ANALYSIS Explore a fascinating introductory treatment of the principles of behavior analysis written by three leading voices in the field An Introduction to Behavior Analysis delivers an engaging and comprehensive introduction to the concepts and applications for graduate students of behavior analysis. Written from the ground up to capture and hold student interest, the book keeps its focus on practical issues. The book offers readers sound analyses of Pavlovian and operant learning, reinforcement and punishment, motivation and stimulus control, language and rule-following, decision-making and clinical behavior analysis. With fully up to date empirical research references and theoretical content, An Introduction to Behavior Analysis thoroughly justifies every principle it describes with empirical support and explicitly points out where more data are required. The text encourages students to analyze their own experiences and some foundational findings in the field in a way that minimizes jargon and maximizes engagement. Readers will also benefit from the inclusion of: A clear articulation and defense of the philosophical assumptions and overarching goals of behavior analysis. A thorough description of objective data collection, experimental methods, and data analysis in the context of psychology An exploration of the core principles of behavior analysis, presented at a level comprehensible to an introductory audience A broad array of principles that cover issues as varied as language, substance-use disorders, and common psychological disorders Perfect for students taking their first course in behavior analysis or behavior modification, An Introduction to Behavior Analysis will also earn a place in the libraries of students pursuing certification through the Behavior Analysis Certification Board or taking courses in the applied psychological sciences.

Economic Analysis of Neighbourhood Quality, Neighbourhood Reputation and the Housing Market

IOS Press Residents know exactly what their neighbourhood is like. House-hunters, on the other hand, must find out for themselves about the intangible social quality of a neighbourhood. As a simple rule of thumb, neighbourhood reputation can offer them an assessment of neighbourhood quality. In this research, regression analyses are applied to test whether neighbourhood reputations are being used as a proxy measure for neighbourhood quality in residential mobility choices and establishing the price of homes. The empirical results go beyond answering this research question. What price, for instance, do residents place on liveability? Why does urban restructuring so often fail to change the social make-up of an area, despite a marked increase in owner-occupation? Why does gentrification appear to emerge spontaneously, while deliberate attempts to gentrify an area often fail? How does a neighbourhood acquire that golden edge? This book also provides the answers to the above policy-oriented questions.

Experiments Investigating Fundraising and Charitable Contributors

Emerald Group Publishing Consists of nine papers that use experimental and theoretical tools to examine issues pertaining to charitable auctions and fundraising. This volume explores themes such as the structure of charity auctions, charity lotteries, fund drives, and more. It explores the structure of different fundraising and charitable programs.

Emerging Technologies for the Analysis of Forensic Traces

Springer Nature This book provides a line of communication between academia and end users/practitioners to advance forensic science and boost its contribution to criminal investigations and court cases. By covering the state of the art of promising technologies for the analysis of trace evidence using a controlled vocabulary, this book targets the forensics community as well as, crucially, informing the end users on novel and potential forensic opportunities for the fight against crime. By reporting end users commentaries at the end of each chapter, the relevant academic community is provided with clear indications on where to direct further technological developments in order to meet the law requirements for operational deployment, as well as the specific needs of the end users. Promising chemistry based technologies and analytical techniques as well as techniques that have already shown to various degrees an operational character are covered. The majority of the techniques covered have imaging capabilities, that is the ability to visualize the distribution of the target molecules within the trace evidence recovered. This feature enhances intelligibility of the information making it also accessible to a lay audience such as that typically found with a court jury. Trace evidence discussed in this book include fingerprints, bodily fluids, hair, gunshot residues, soil, ink and questioned documents thus covering a wide range of possible evidence recovered at crime scenes.

State Lotteries

An Overview : Hearing Before the Subcommittee on Intergovernmental Relations of the Committee on Governmental Affairs, United States Senate, Ninety-eighth Congress, Second Session, October 3, 1984

Agent-Mediated Electronic Commerce and Trading Agent Design and Analysis

AAMAS 2007 Workshop, AMEC 2007, Honolulu, Hawaii, May 14, 2007, and AAI 2007 Workshop, TADA 2007, Vancouver, Canada, July 23, 2007, Selected and Revised Papers

Springer Science & Business Media This book constitutes the thoroughly refereed post-conference proceedings of the 9th International Workshop on Agent-Mediated Electronic Commerce, AMEC IX, co-located with the Sixth International Joint Conference on Autonomous Agents and Multiagent Systems, AAMAS 2007, held in Honolulu, Hawaii, in May 2007, and the 5th Workshop on Trading Agent Design and Analysis, TADA 2007, co-located with the Twenty-Second AAAI Conference on Artificial Intelligence, AAAI 2007, held in Vancouver, Canada, in July 2007. This volume presents 15 carefully revised and selected papers from these workshops. The primary and complementary goal of both workshops was to continue to bring together novel work from diverse fields on modeling, implementation and evaluation of computational trading institutions and/or agent strategies. The papers originating from AMEC focus on a large variety of issues on auctions, negotiation, and strategic behavior in electronic marketplaces. The papers originating from TADA reflect the effort of the community to design scenarios where trading agent designers and market designers can be pitched against one another.

Journal of Policy Analysis and Management

Encompasses issues and practices in policy analysis and public management. Listed among the contributors are economists, public managers, and operations researchers. Featured regularly are book reviews and a department devoted to discussing ideas and issues of importance to practitioners, researchers, and academics.

Federal Register

Strengthening Links Between Data Analysis and Soft Computing

Springer This book gathers contributions presented at the 7th International Conference on Soft Methods in Probability and Statistics SMPS 2014, held in Warsaw (Poland) on September 22-24, 2014. Its aim is to present recent results illustrating new trends in intelligent data analysis. It gives a comprehensive overview of current research into the fusion of soft computing methods with probability and statistics. Synergies of both fields might improve intelligent data analysis methods in terms of robustness to noise and applicability to larger datasets, while being able to efficiently obtain understandable solutions of real-world problems.

Gambling in America

Intelligent Data analysis and its Applications, Volume I

Proceeding of the First Euro-China Conference on Intelligent Data Analysis and Applications, June 13-15, 2014, Shenzhen, China

Springer This volume presents the proceedings of the First Euro-China Conference on Intelligent Data Analysis and Applications (ECC 2014), which was hosted by Shenzhen Graduate School of Harbin Institute of Technology and was held in Shenzhen City on June 13-15, 2014. ECC 2014 was technically co-sponsored by Shenzhen Municipal People's Government, IEEE Signal Processing Society, Machine Intelligence Research Labs, VSB-Technical University of Ostrava (Czech Republic), National Kaohsiung University of Applied Sciences (Taiwan), and Secure E-commerce Transactions (Shenzhen) Engineering Laboratory of Shenzhen Institute of Standards and Technology.

Proceedings of the 1996 Multicultural Marketing Conference

Springer This volume includes the full proceedings from the 1996 Multicultural Marketing Conference presented by the Academy of Marketing Science (AMS) and Old Dominion University in Virginia Beach, Virginia. The focus of the conference and the enclosed papers is on marketing to various ethnic groups in both a US and global context. It presents papers on various multicultural issues across the entire spectrum of marketing activities and functions including marketing management, marketing strategy and consumer behavior. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights, complimenting the Academy's flagship journals, the Journal of the Academy of Marketing Science (JAMS) and AMS Review. Volumes are edited by leading scholars and practitioners across a wide range of subject areas in marketing science.

Introduction to Statistics and Data Analysis

Cengage Learning INTRODUCTION TO STATISTICS AND DATA ANALYSIS, 4th Edition, introduces you to the study of statistics and data analysis by using real data and attention-grabbing examples. The authors guide you through an intuition-based learning process that stresses interpretation and communication of statistical information. Simple notation--including the frequent substitution of words for symbols--helps you grasp concepts and cement your comprehension. You'll also find coverage of the graphing calculator as a problem-solving tool, plus hands-on activities in each chapter that allow you to practice statistics firsthand. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Economics of Betting Markets

Routledge During the last few decades, commercial gambling has increased substantially throughout the Western world. More people than ever before have access to sources of legalised gambling, leading to bumper revenues for the institutions involved. Naturally enough, this has led to an increased interest in the area of the economics of betting. This book addresses the issues raised by the continued growth of the gambling sector. How can we model the behaviour of people who seemingly act irrationally? What are the implications of different tax policies with regard to gambling? Are casinos capable of taking money away from state-run lotteries and the causes they fund? Can bookmakers' odds be influenced in such a way as to make the gambling market inefficient? The authors in this volume provide insights based on data from many different countries, including England, the USA, Australia, Spain and Cyprus. This volume brings together work which addresses the economic impact of the huge growth of commercial gambling in the Western world, as well as trying to model the cognitive processes which can explain why individuals are prepared to behave in such apparently irrational ways. This book was published as a special issue of Applied Economics. The academic editor of this journal is Mark P. Taylor.

Proceedings of the ... Annual Conference on Taxation Held Under the Auspices of the National Tax Association-Tax Institute of America
