ON BYPASS

ADVANCED PERFUSION TECHNIQUES

Springer Science & Business Media With the introduction of cardiac surgery more than five decades ago and the use of the heart-lung machine for open heart surgical procedures granting the surgeon unlimited time in which to operate inside the heart, a complex task has been given to the Perfusionist. With a pairing of a perfusionist and a surgeon for each chapter, this book is an essential collection of techniques and protocols to aid in decision making in the operating room.

COMMERCE BUSINESS DAILY

CRUISING WORLD

HEART REPLACEMENT

ARTIFICIAL HEART 6

Springer Science & Business Media The 6th International Symposium on Artificial Heart and Assist Devices met in Tokyo in July 1996, bringing together researchers and specialists from around the world. The symposiums proceedings in this volume comprise papers from nine sessions, each opening with contributions by leading scientists: TAH, heart transplantation, biomaterials, VAS, clinical application, pathophysiology, engineering, new approaches, and special sessions. Of special note is the inclusion, for the first time, of pathophysiology related to clinical use of assist devices. The clinical application section includes a paper by Dr. Michael DeBakey on the progress made in recent years. With descriptions of the scientific exhibition, accompanied by photographs of all artificial heart devices and systems displayed by major laboratories and manufacturers, Artificial Heart 6 presents the latest information on developments in the field of artificial heart, biomaterials, and heart transplantation.

YACHTING

ULTRAFILTRATION MEMBRANES AND APPLICATIONS

Springer Science & Business Media This book is a record of a symposium, "Ultrafiltration Membranes and Applications," which was held at the 178th National Meeting of the American Chemical Society in Washington, D.C., September 11-13, 1979. In organizing these sessions, I hoped to provide a comprehensive survey of the current state of ultrafiltration theory, the most recent advances in membrane technology, and a thorough treatment of existing applications and future directions for ultrafiltration. For me, the symposium was an outstanding success. It was a truly international forum with stimulating presentations and an enthusiastic audience. I hope that some of this spirit has spilled over into this volume, which is intended to reach a much wider audience. I am indebted to the Division of Colloid and Surface Chemistry of the American Chemical Society for their sponsorship. ANTHONY R. COOPER Palo Alto, California }larch, 1980 vii CONTENTS PART I. FUNDAMENTALS Fifteen Years of Ultrafiltration: Problems and Future Promises of an Adolescent Technology . . . 1 Alan S. PRACTICAL FLOW CYTOMETRY

John Wiley & Sons From the reviews of the 3rd Edition... "The standard reference for anyone interested in understanding flow cytometry technology." American Journal of Clinical Oncology "...one of the most valuable of its genre and...addressed to a wide audience?written in such an attractive way, being both informative and stimulating." Trends in Cell Biology This reference explains the science and discusses the vast biomedical applications of quantitative analytical cytology using laser-activated detection and cell sorting. Now in its fourth edition, this text has been expanded to provide full coverage of the broad spectrum of applications in molecular biology and biotechnology today. New to this edition are chapters on automated analysis of array technologies, compensation, high-speed sorting, reporter molecules, and multiplex and apoptosis assays, along with fully updated and revised references and a list of suppliers.

SELECTED WATER RESOURCES ABSTRACTS

SUSTAINABILITY BEHIND SUSTAINABILITY

Nova Science Pub Incorporated Sustainable development is all about integrating all of our present day needs with the needs of society, the environment and global citizenship, in a way that does not compromise future generations. Sustainable development also promotes equality, independence, collaboration and empowerment. By maintaining all of our resources and protecting nature so that future generations can also benefit, we encourage a sustainable society and for the environment to grow. Sustainable development has one main objective, which is to create balance between our social, environmental and economic needs, whilst maintaining equality and justice. The way in which we have chosen to live our lives in the recent past has been responsible for the damage that has been caused to the environment. We are polluting the Earth and consuming far more resources than we produce and are therefore damaging the development of future generations. This Book has been prepared in order to provide details regarding Sustainable Development and what is behind Sustainability.

WHO'S WHO IN PLASTICS POLYMERS, FIRST EDITION

CRC Press This is the first edition of a unique new plastics industry resource: Who's Who in Plastics & Polymers. It is the only biographical directory of its kind and includes contact, affiliation and background information on more than 3300 individuals who are active leaders in this industry and related organizations. The biographical directory is in alphabetical order by individual name. After each individual name, current affiliation and contact information is provided. This includes job title, full name of affiliation (e.g., business, university, association, research institute), business address, and electronic contacts-telephone, fax, e-mail and Web site. Home addresses and contacts are also provided for most of the entries. In the biographical summary section for each individual, the following information is provided: date and place of birth, education and educational achievements, work experience including company or other organization names, positions held and time periods. Also included in this section are the number of patents awarded, articles, and book chapters authored, and conference sessions chaired. Other information includes titles of books edited or written by the individual, listing of conferences where the person had a leadership position, and listing of memberships and positions held in professional organizations. Finally, professional and civic awards are listed. Indexes provide listings of individuals by company or other organization name, and also by geographical location. Who's Who in Plastics & Polymers is now published in a limited edition of 1,000 copies. This edition will not be reprinted. To be sure of receiving your copy, please act now. Information on ordering follows sample pages on the reverse.

1001 THINGS TO DO WITH YOUR MACINTOSH

Contains Applications for Home, Business & Educational Uses as Well as Games. Includes Programs, Printouts, Flowcharts, Diagrams & Illustrations

DIALYSING FOR LIFE

THE DEVELOPMENT OF THE ARTIFICIAL KIDNEY

Springer Science & Business Media Seeing a patient die under his hands because there is no adequate treatment causes an emotion and a frustration in a doctor, which sometimes stimulates him to try to develop a new type of treatment. Seeing so many wounded young soldiers die due to renal failure in World War I incited the German doctor Georg Haas to try to develop an artificial kidney. He had to give up in despair in 1928. Ten years later doctor Willem Kolff saw a young man die in his ward in the University Hospital of Groningen due to renal failure. By that time two essential factors for an artificial kidney had become available: a drug to keep the blood from clotting outside of the body and an efficient

dialysing membrane through which waste substances can pass from the blood into the dialysing fluid. Kolff succeeded in creating the rotating artificial kidney which he started using in the town hospital of Kampen in 1943. The rotation of this artificial kidney started a revolution that made it possible for thousands of kidney patients all over the world to keep on living - and sometimes to forget their disease for the time being. In addition it gave rise to the development of other artificial organs such as the heart-lung machine, the artificial heart and the artificial eye. Doctor Jacob van Noordwijk, the author of this book, was Kolff's first assistant in the treatment of the first 15 patients. How Kolff succeeded in spite of all the limitations imposed by the German occupation of the Netherlands and in spite of the absence of antibiotics and other medical tools which are common nowadays makes a story which may sound incredible. Yet it did happen and visitors to the town of Kampen can still see the hospital building where it all took place.

EFFECTIVE BUSINESS COMMUNICATIONS

INFORMATION ASSURANCE

SURVIVING IN THE INFORMATION ENVIRONMENT

Springer Science & Business Media When you first hear the term Information Assurance you tend to conjure up an image of a balanced set of reasonable measures that have been taken to protect the information after an assessment has been made of risks that are posed to it. In truth this is the Holy Grail that all organisations that value their information should strive to achieve, but which few even understand. Information Assurance is a term that has recently come into common use. When talking with old timers in IT (or at least those that are over 35 years old), you will hear them talking about information security, a term that has survived since the birth of the computer. In the more recent past, the term Information Warfare was coined to describe the measures that need to be taken to defend and attack information. This term, however, has military connotations - after all, warfare is normally their domain. Shortly after the term came into regular use, it was applied to a variety of situations encapsulated by Winn Schwartau as the three classes of Information Warfare: Class 1- Personal Information Warfare. Class 2 - Corporate Information Warfare. Class 3 - Global Information Warfare. Political sensitivities lead to "warfare" being replaced by "operations", a much more "politically correct" word. Unfortunately, "operations" also has an offensive connotation and is still the terminology of the military and governments.

STRATEGY AND MANAGEMENT OF INDUSTRIAL BRANDS

BUSINESS TO BUSINESS PRODUCTS AND SERVICES

Springer Science & Business Media Strategy and Management of Industrial Brands is the first book devoted to business-to-business products and services. Looking at numerous companies, this book defines two brand objectives that are specific to the industrial and service sectors and which must be added to the traditional functions of branding: the minimization of risk as perceived by buyers, and the facilitation of the customer company's performance by the supplier brand. Different ways of classifying brands are suggested, providing a better understanding of brand strategies adopted by business-to-business companies, as well as new concepts such as brand 'printability', 'visibility', and 'purchaseability'. Five major brand categories are dealt with in separate chapters: -entering goods brands; -intermediary equipment goods brands; -equipment goods brands; -business-to-business service brands; and -industrial distributor brands. From a practical point of view, the aim of the book is to address the main concerns of managers: How to create and protect brands? What type of visual identity is appropriate? How to manage international brands? An analysis of 1,500 industrial brands as well as 40 case studies are included in this book. These brands are used in both the industrial (automotive, building, aeronautics, IT, etc.) and consumer sectors (clothing, electronics, food packaging, telecommunications, etc.). This book has been written for professors and students of universities and business schools, as well as managers and people working in industry or the service sector.

IMPORTANT BIRD AREAS IN FIJI

CONSERVING FIJI'S NATURAL HERITAGE

This book describes the 14 sites in Fiji which are of global importance for bird conservation. These Important Bird Areas (IBAs) are priorities for conserving the natural heritage of Fiji for future generations. Fiji's rich natural heritage includes 11 threatened bird species and 27 endemic bird species. This book updates the status and conservation needs of all these special birds. This book is aimed at land-use planners, policy-makers, conservationists, forestry managers, researchers, birdwatchers and local land owners. It is published by BirdLife International in Fiji, with primary sponsorship from the Darwin Initiative.

THE DARK WIND

Harper The corpse had been "scalped," its palms and soles removed after death. Sergeant Jim Chee of the Navajo Tribal Police knows immediately he will have his hands full with this case, a certainty that is supported by the disturbing occurrences to follow. A mysterious nighttime plane crash, a vanishing shipment of cocaine, and a bizarre attack on a windmill only intensify Chee's fears. A dark and very ill wind is blowing through the Southwestern desert, a gale driven by Navajo sorcery and white man's greed. And it will sweep away everything unless Chee can somehow change the weather.

PROSTHETICS AND ORTHOTICS

This book consists of two parts: Prosthetics and Orthotics. Over the years there has been rapid development in prostheses and orthoses. Advancement of technology, significant progress in computer components and robotics, and the development of new materials have enabled many people in need to return to useful and practical life. This book provides information for effective clinical decision-making for those working with people who need medical supportive devices. Over two parts, chapters in this volume examine construction methods, applications, and effects of prosthetic and orthotic devices.
