---

**OUTBOARD ENGINES**

---

---

**MAINTENANCE, TROUBLESHOOTING, AND REPAIR**

---

McGraw Hill Professional **Outboard Engines** fills the gap between owner's manuals that don't even tell you how to change a spark plug and professional shop manuals that detail how to do a complete rebuild. It covers basic principles and techniques for a wide variety of outboards - four-stroke as well as two-stroke - with the emphasis on maintenance and advanced troubleshooting. Ed Sherman's clear explanations and diagrams take you step by step through the basics and beyond, helping you track down even the most elusive problems a modern outboard can throw in your way. his methodical approach can save you a world of frustration - and peril - as well as time-and-a-half weekend mechanics' charges.

---

### **THE ROCK MANUAL**

---

### **THE USE OF ROCK IN HYDRAULIC ENGINEERING**

---

This publication is a summary of good practice on the use of rock in engineering works for rivers, coasts and seas. It has incorporated all the significant advances in knowledge that have occurred over the past 10-15 years.

---

### **MODERN MARINE ENGINEER'S MANUAL**

---

[Cornell Maritime Pr/Tidewater Pub](#) Volume II of the manual that has been absolutely indispensable to the ship's engineer for over forty years was completely updated by a team of practicing marine engineers in 1991. Chapters on obsolete equipment were deleted; those on systems that are still current were updated; and new chapters were written to cover the innovations in materials, machines, and operating practices that evolved recently.

## **HISTORICAL PAINTING TECHNIQUES, MATERIALS, AND STUDIO PRACTICE**

---

### **PREPRINTS OF A SYMPOSIUM, UNIVERSITY OF LEIDEN, THE NETHERLANDS, 26-29 JUNE 1995**

---

[Getty Publications](#) Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkhas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.
