Horse Trading in the Age of Cars

Men in the Marketplace

JHU Press The trading, selling, and buying of personal transport has changed little over the past one hundred years. Whether horse trading in the early twentieth century or car buying today, haggling over prices has been the common practice of buyers and sellers alike. *Horse Trading in the Age of Cars* offers a fascinating study of the process of buying an automobile in a historical and gendered context. Steven M. Gelber convincingly demonstrates that the combative and frequently dishonest culture of the showroom floor is a historical artifact whose origins lie in the history of horse trading. Bartering and bargaining were the norm in this predominantly male transaction, with both buyers and sellers staking their reputations and pride on their ability to negotiate the better deal. Gelber comments on this point-of-sale behavior and what it reveals about American men. Gelber's highly readable and lively prose makes clear how this unique economic ritual survived into the industrial twentieth century, in the process adding a colorful and interesting chapter to the history of the automobile.

My Search for Andrew, Alexander and Tanner Skelton

Three young Michigan brothers disappeared in 2010. Their father says they will "hibernate until they graduate" but police believe it's a triple homicide. Eight years later, this remains one of the biggest unsolved mysteries in the United States, stretching from Michigan to Montana, and national coverage from John Walsh to Nancy Grace have yet to turn up a clue. If police are right, Andrew, Alexander and Tanner Skelton were the victims of a personal war between John Russel Skelton and his ex-wife. If they are wrong, the boys live among strangers cut off from the world and everything they had ever known. John Skelton is the only one who knows what happened and he still controls the fate of his sons. Silence is his victory. Reporter Lynn Thompson has covered this story since the day the boys disappeared. Based on what he has learned, and drawing from his newspaper and U.S. Army experience, Lynn exposes the elements of control to narrow the search, speed the recovery and bring the boys back home. Now retired, Don Allison served as author Lynn Thompson's editor at The Bryan Times as the story unfolded. "Lynn Thompson has doggedly followed the disappearance of Andrew, Alexander and Tanner Skelton since day one," Don says "It is more than just another story to Lynn - two of the missing boys are the same age as his own sons, and he has made the quest to find them a personal one. With the eye of an experienced crime reporter and the compassion of a parent, Lynn weaves a compelling insightful narrative."

American Multinationals and Japan

The Political Economy of Japanese Capital Controls, 1899-1980

BRILL "This pioneering study of United States direct investment in Japan will interest academic specialists, business managers, and government policymakers in America, Japan, and elsewhere. Drawing on rich historical materials from both sides of the Pacific, including corporate records and government documents never before made public, Mason examines the development of both Japanese policy towards foreign investment and the strategic responses of American corporations. This history is related in part through original case studies of Coca-Cola, Dow Chemical, Ford, General Motors, International Business Machines, Motorola, Otis Elevator, Texas Instruments, Western Electric, and Victor Talking Machine. The book seeks to explain why a little foreign direct investment has entered modern Japan. In contrast to the widely held view that emphasizes an alleged lack of effort on the part of foreign corporations, this study finds that Japanese restrictions merit greater attention. Many analysts of the modern Japanese political economy identify the Japanese government as the key actor in initiating such restrictions. Mason finds that the influence of Japanese business has often proved more potent than these analysts suggest. This book offers fresh insights into both the operation of the modern Japanese political economy and of its relations with the world economy."

Two Hundred 69 Ways to a Man's Heart

Race and Racism in Nineteenth-Century Art

The Ascendency of Robert Duncanson, Edward Bannister, and Edmonia Lewis

Univ. Press of Mississippi Painters Robert Duncanson (ca. 1821-1872) and Edward Bannister (1828-1901) and sculptor Mary Edmonia Lewis (ca. 1844-1907) each became accomplished African American artists. But as emerging art makers of color during the antebellum period, they experienced numerous incidents of racism that severely hampered their pursuits of a profession that many in the mainstream considered the highest form of social cultivation. Despite barriers imposed upon them due to their racial inheritance, these artists shared a common cause in demanding acceptance alongside their white contemporaries as capable painters and sculptors on local, regional, and international levels. Author Naurice Frank Woods Jr. provides an in-depth examination of the strategies deployed by Duncanson, Bannister, and Lewis that enabled them not only to overcome prevailing race and gender inequality, but also to achieve a measure of success that eventually placed them in the top rank of nineteenth-century American art. Unfortunately, the racism that hampered these three artists throughout their careers ultimately denied them their rightful place as significant contributors to the development of American art. Dominant art historians and art critics excluded them in their accounts of the period. In this volume, Woods restores their artistic legacies and redeems their memories, introducing these significant artists to rightful, new audiences.

U.S. Government Printing Office Style Manual

An Official Guide to the Form and Style of Federal Government Printing

WWW.Militarybookshop.CompanyUK This, the 30th edition of the "United States Government Printing Office Style Manual," is the first revision to this authoritative style manual since 2002. The "GPO Style Manual, as it is popularly known, is issued under the authority of section 1105 of Title 44 U.S.C., which requires the Public Printer, as head of the GPO to "determine the form and style in which the printing...ordered by a department is executed...having proper regard to economy, workmanship, and the purposes for which the work is needed." The Manual is prepared by the GPO Style Board, composed of proofreading, printing, and Government documents specialists from within GPO, where all congressional publications, and many other key Federal Government documents are prepared. The first "GPO Style Manual" appeared in 1894. It was developed originally as a printer's stylebook to standardize word and type treatment and remains so today. Through successive editions, however, the "GPO Style Manual" has come to be widely recognized by writers and editors both within and outside the Federal Government as one of the most useful resources in the editorial arsenal. This new, revised version of the "GPO Style Manual" has been thoroughly redesigned to make it more modern and easier to read, and the content has been updated generally throughout in keeping with current usage.
