Haynes Manuals N. America, Incorporated Yamaha YZF-R1 1998-2003

Polymeric Materials

Surfaces, Interfaces and Bioapplications

MDPI This book collects the articles published in the Special Issue "Polymeric Materials: Surfaces, Interfaces and Bioapplications". It shows the advances in polymeric materials, which have tremendous applications in agricultural films, food packaging, dental restoration, antimicrobial systems, and tissue engineering. These polymeric materials are presented as films, coatings, particles, fibers, hydrogels, or networks. The potential to modify and modulate their surfaces or their content by different techniques, such as click chemistry, ozonation, breath figures, wrinkle formation, or electrospray, are also explained, taking into account the relationship between the structure and properties in the final application. Moreover, new trends in the development of such materials are presented, using more environmental friendly and safe methods, which, at the same time, have a high impact on our society.

International Perspectives on Spinal Cord Injury

World Health Organization "Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The aims of International perspectives on spinal cord injury are to: --assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; --make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

Physics for Scientists and Engineers, Volume 2

Cengage Learning Achieve success in your physics course by making the most of what PHYSICS FOR SCIENTISTS AND ENGINEERS has to offer. From a host of in-text features to a range of outstanding technology resources, you'll have everything you need to understand the natural forces and principles of physics. Throughout every chapter, the authors have built in a wide range of examples, exercises, and illustrations that will help you understand the laws of physics AND succeed in your course! Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Manual Therapy for Musculoskeletal Pain Syndromes

An Evidence- and Clinical-Informed Approach

Elsevier Health Sciences The book is divided into 11 sections, covering evidence-informed techniques in massage, trigger points, neural muscle energy, manipulations, dry needling, myofascial release, therapeutic exercise and psychological approaches. In the general introduction, several authors review the epidemiology of upper and lower extremity pain syndromes and the process of taking a comprehensive history in patients affected by pain. In chapter 5, the basic principles of the physical examination are covered, while chapter 6 places the field of manual therapy within the context of contemporary pain neurosciences and therapeutic neuroscience education. For the remaining sections, the book alternates the upper and lower quadrants. Sections 2 and 3 provide updates on mechanical neck pain, whiplash, thoracic outlet syndrome, myelopathy, radiculopathy, peri-partum pelvic pain, joint mobilizations and manipulations and therapeutic exercises, among others. Sections 4 to 9 review aspects of the shoulder, hip, elbow, knee, the wrist and hand, and finally the ankle and foot. The last two sections of the book are devoted to muscle referred pain and neurodynamics.

History of Nordic Computing 2

Second IFIP WG 9.7 Conference, HiNC 2, Turku, Finland, August 21-23, 2007, Revised Selected Papers

Springer Science & Business Media The First Conference on the History of Nordic Computing (HiNC1) was organized in Trondheim, in June 2003. The HiNC1 event focused on the early years of computing, that is the years from the 1940s through the 1960s, although it formally extended to year 1985. In the preface of the proceedings of HiNC1, Janis Bubenko, Jr. , John Impagliazzo, and Arne Sølvsberg describe well the peculiarities of early Nordic computing [1]. While developing hardware was a necessity for the first professionals, quite soon the computer became an industrial product. Computer scientists, among others, grew increasingly interested in programming and application software. Progress in these areas from the 1960s to the 1980s was experienced as astonishing. The developments during these decades were taken as the focus of HiNC2. During those decades computers arrived to every branch of large and medium-sized businesses and the users of the computer systems were no longer only computer specialists but also people with other main duties. Compared to the early years of computing before 1960, where the number of computer projects and applications was small, capturing a holistic view of the history between the 1960s and the 1980s is considerably more difficult. The HiNC2 conference attempted to help in this endeavor.

Honda Accord 1994-1997

Haynes Manuals N. America, Incorporated There is a Haynes manual for most popular domestic and import cars, trucks, and motorcycles. By conducting complete tear-downs and rebuilds, the Haynes staff has discovered all the problems owners will find in rebuilding or repairing their vehicle. Documenting the process in hundreds of illustrations and clear step-by-step instructions makes every expert tip easy to follow. From simple maintenance to trouble-shooting and complete engine rebuilds, it's easy with Haynes.

Marine Aviation in the Philippines

The return of Allied forces to the Philippines in the fall of 1944 further throttled Japan's already tenuous pipe line to the rich resources of Malaya and the Netherlands Indies, and with it the last vestige of her ability to meet the logistical requirements of a continuing war. The Battle for Leyte Gulf marked the end of Japan as a naval power, forcing her to adopt the desperation kamikaze tactic against the United States Fleets. The Philippine victories were primarily Army and Navy operations. Marines, comprising only a fraction of the total forces engaged, played a secondary but significant role in the overall victory. The campaign was important to the Corps in that the Marine aviators, who had battled two years for air control over the Solomons, moved into a new role, their first opportunity to test on a large scale the fundamental Marine doctrine of close air support for ground troops in conventional land operations. This test they passed with credit, and Marine flyers contributed materially to the Philippines victory. Lessons learned and techniques perfected in those campaigns form an important chapter in our present-day close air support doctrines.--Foreword.

Conflict of Interest in Medical Research, Education, and Practice

National Academies Press Collaborations of physicians and researchers with industry can provide valuable benefits to society, particularly in the translation of basic scientific discoveries to new therapies and products. Recent reports and news stories have, however, documented disturbing examples of relationships and practices that put at risk the integrity of medical research, the objectivity of professional education, the quality of patient care, the soundness of clinical practice guidelines, and the public's trust in medicine. Conflict of Interest in Medical Research, Education, and Practice provides a comprehensive look at conflict of interest in medicine. It offers principles to inform the design of policies to identify, limit, and manage conflicts of interest without damaging constructive collaboration with industry. It calls for both short-term actions and long-term commitments by institutions and individuals, including leaders of academic medical centers, professional societies, patient advocacy groups, government agencies, and drug, device, and pharmaceutical companies. Failure of the medical community to take convincing action on conflicts of interest invites additional legislative or regulatory measures that may be overly broad or unduly burdensome. Conflict of Interest in Medical Research, Education, and Practice makes several recommendations for strengthening conflict of interest policies and curbing relationships that create risks with little benefit. The book will serve as an invaluable resource for individuals and organizations committed to high ethical standards in all realms of medicine.

The Official Pictorial History of the AAF

Sethian Gnosticism and the Platonic Tradition

Presses Université Laval

Technical and Military Imperatives

A Radar History of World War 2

CRC Press Technical and Military Imperatives: A Radar History of World War II is a coherent account of the history of radar in the second World War. Although many books have been written on the early days of radar and its role in the war, this book is by far the most comprehensive, covering ground, air, and sea operations in all theatres of World War II. The author manages to synthesize a vast amount of material in a highly readable, informative, and enjoyable way. Of special interest is extensive new material about the development and use of radar by Germany, Japan, Russia, and Great British. The story is told without undue technical complexity, so that the book is accessible to specialists and nonspecialists alike.

SM: Citroen's Maserati-Engined Supercar

Veloce Publishing Ltd This is the fascinating story of how the Citroen SM came into being, with company politics and Maserati's involvement covered in detail. The text and pictures then follow the car's progress from its world premier at the 1970 Geneva Show until the final production models were built in July 1975. With 200 mainly color photos, full coverage of production models and a buyers guide this book is the complete Citroen SM resource.

Manufacturing Facilities Design and Material Handling

Pearson Educación This project-oriented facilities design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A "how-to," systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design.

Polymeric Materials with Antimicrobial Activity

From Synthesis to Applications

Royal Society of Chemistry Antimicrobial polymers are materials that prevent microorganism growth and are needed for many everyday applications from food packaging and water treatment to medicine and healthcare. This new book covers different areas of antimicrobial materials based on polymers including chitosan, polymers with ammonium and phosphonium groups, polymer nanofibers, carbon-based polymer Nanocomposites, polymeric and non-polymeric metal complexes, and biomimetic materials. By combining the information of different materials as well as antimicrobial action modes and applications within one source, the book provides a general summary of the field. Polymeric Materials with Antimicrobial Activity starts with a general introduction to antimicrobial polymers

and presents the most common types of microorganisms (bacteria, fungi, yeast and algae) along with the main areas of application of antimicrobial polymeric materials. Specific chapters then detail different polymer systems covering the fundamental issues of synthesis, characterization, physico-chemical properties and applications. With contributions from leading scientists the book is suitable for researchers in polymers, chemistry, biology and materials science interested in an overview of antimicrobial polymeric materials as well as the recent advances in their synthesis, properties and applications.

Introduction to autogyros, helicopters, and other V/STOL aircraft

Commercial Directory of Latin America (Classic Reprint)

Forgotten Books Excerpt from Commercial Directory of Latin America In compliance with the requests of many merchants and manu facturers who desire to send Catalogues and Circulars to importers and dealers in Mexico, Central and South America, the Bureau of the American Republics has undertaken to publish a series of Commercial Directories of the several countries and colonies. The difficulty of securing the names and addresses of merchants has been greater than was anticipated, particularly those in cities and towns where there are no consular officers of the United States, and the lists herein given will be found incomplete. They are, however, as complete and accurate as the Bureau can make them with the present facilities at its command, and will doubtless be found useful to those who desire to introduce their wares to the knowledge of buyers on the southern continent. Any additions and corrections for subsequent publications will be appreciated. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

The Creative Atari

Active Service Pocket Book

Alone

Sourcebooks, Inc. This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

Aircraft Systems

Mechanical, Electrical, and Avionics Subsystems Integration

John Wiley & Sons This third edition of *Aircraft Systems* represents a timely update of the *Aerospace Series'* successful and widely acclaimed flagship title. Moir and Seabridge present an in-depth study of the general systems of an aircraft - electronics, hydraulics, pneumatics, emergency systems and flight control to name but a few - that transform an aircraft shell into a living, functioning and communicating flying machine. Advances in systems technology continue to alloy systems and avionics, with aircraft support and flight systems increasingly controlled and monitored by electronics; the authors handle the complexities of these overlaps and interactions in a straightforward and accessible manner that also enhances synergy with the book's two sister volumes, *Civil Avionics Systems* and *Military Avionics Systems*. *Aircraft Systems, 3rd Edition* is thoroughly revised and expanded from the last edition in 2001, reflecting the significant technological and procedural changes that have occurred in the interim - new aircraft types, increased electronic implementation, developing markets, increased environmental pressures and the emergence of UAVs. Every chapter is updated, and the latest technologies depicted. It offers an essential reference tool for aerospace industry researchers and practitioners such as aircraft designers, fuel specialists, engine specialists, and ground crew maintenance providers, as well as a textbook for senior undergraduate and postgraduate students in systems engineering, aerospace and engineering avionics.

Love, Lavender Pen

A Collection of Words, Rhymes, and Poetries

Love, Lavender Pen is a collection of words, rhymes, and poetries.

Speed Duel

The Inside Story of the Land Speed Record in the Sixties

Firefly Books The quest for the land speed record in the 1960s and the epic rivalry between two dynamic American drivers, Art Arfons and Craig Breedlove. "Interesting and complex. . . .The best job I've seen done on the subject so far." -- Craig Breedlove Until the 1950s, the land speed record (LSR) was held by a series of European gentlemen racers such as British driver John Cobb, who hit 394 miles per hour in 1947. That record held for more than a decade, until the car culture swept the U.S. Hot-rodders and drag racers built and souped up racers using car engines, piston aircraft engines and, eventually, jet engines. For this determined and dedicated group, the LSR was no longer an honor to be held by rich aristocrats with industrial backing -- it was brought stateside. In the summer of 1960, the contest moved into overdrive, with eight men contending for the record on Utah's Bonneville Salt Flats. Some men died in horrific crashes, others prudently retired, and by mid-decade only two men were left driving: Art Arfons and Craig Breedlove. By 1965, Arfons and Breedlove had walked away from some of the most spectacular wipeouts in motor sport history and pushed the record up to 400, then 500, then 600 miles per hour. *Speed Duel* is the fast-paced history of their rivalry. Despite the abundant heart-stopping

action, *Speed Duel* is foremost a human drama. Says author Samuel Hawley, "It is a quintessential American tale in the tradition of *The Right Stuff*, except that it is not about extraordinary men doing great things in a huge government program. It's about ordinary men doing extraordinary things in their back yards."

The Development of the B-52 and Jet Propulsion

A Case Study in Organizational Innovation

National security decision makers face an uncertain world where the accelerated growth of knowledge has changed the character of technological advance and destabilized long-standing relations within and among the military services. Dr Mandeles separates the principles that guide decision making from the proverbs through a case study of decision making in the early post-World War II period. This study examines the impact of organization on the invention and development of jet propulsion-in the form of the B-52-and illustrates both the organizational conditions conducive to developing new operational concepts and the organizational innovations necessary to implement new technology. This study also examines how the Air Force organized to learn and acquire new technology, how the Air Force conceived or identified problems, and how it organized to ensure management would respond to program failure or errors. Attention is devoted to the origins of the weapons system operational requirement, the initial concept of operation, the evolution of technology, organizational structure, and implementation.

A SECRET SORROW

Harlequin Comics

Harlequin / SB Creative After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. In extreme shock, she breaks off her engagement, leaves her job and confines herself in her family home. One day, she meets her brother's best friend, and her soul makes a first step to healing.

PHP & MySQL: The Missing Manual

"O'Reilly Media, Inc." If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.

Vogue x Music

Abrams Vogue has always been on the cutting edge of popular culture, and *Vogue x Music* shows us why. Whether they're contemporary stars or classic idols, whether they made digital albums or vinyl records, the world's most popular musicians have always graced the pages of Vogue. In this book you'll find unforgettable portraits of Madonna beside David Bowie, Kendrick Lamar, and Patti Smith; St. Vincent alongside Debbie Harry, and much more. Spanning the magazine's 126 years, this breathtaking book is filled with the work of acclaimed photographers like Richard Avedon and Annie Leibovitz as well as daring, music-inspired fashion portfolios from Irving Penn and Steven Klein. Excerpts from essential interviews with rock stars, blues singers, rappers, and others are included on nearly every page, capturing exactly what makes each musician so indelible. *Vogue x Music* is a testament to star power, and proves that some looks are as timeless as your favorite albums.

MG by McComb

Motorbooks For more than 30 years, F. Wilson McComb was at the forefront of motoring journalism. With this book, now updated by Jonathan Wood, McComb offers a guide to the MG.

Cooperative Design, Visualization, and Engineering

7th International Conference, CDVE 2010, Calvia, Mallorca, Spain, September 19-22, 2010, Proceedings

Springer Many papers in this volume reflect, to some degree, the active, rapid economic development in certain geographic areas in the world such as China, Japan, South Korea, and Eastern Europe, which demand cooperative work, particularly cooperative engineering, more than ever. New concepts and new ideas of cooperative design, visualization, and engineering have emerged to meet the higher demand resulting from the economic development in these areas. Another trend among the papers in this volume is to apply existing concepts and methods to new application areas. The emergence of new concepts can be considered as a signal of fruitful research with its maturity in the field. This can be found in the papers of this year's conference. Cooperative design, visualization, and engineering via cloud computing is a new concept presented in a group of papers in this volume. The concept of cloud has been proposed for cooperative manufacturing, large scale cooperative simulation, and visualization, etc. Applying existing concepts to new application areas or creating new methods based on them is a logical direction to take full advantage of the cooperative design, visualization, and engineering technology. This is no doubt the best way to widen and deepen the knowledge in the field. Typical examples in this volume include the cooperative visualization of DNA microarray data in bioinformatics, astrophysical simulations, natural disaster simulations, and cooperative risk assessment, etc. As the volume editor, I would like to congratulate all the authors for their research and development results, raising cooperative technology to a new level.

Design and Development of Aircraft Systems

John Wiley & Sons Provides a significant update to the definitive book on aircraft system design This book is written for anyone who wants to understand how industry develops the customer requirement for aircraft into a fully integrated, tested, and qualified product that is safe to fly and fit for purpose. The new edition of *Design and Development of Aircraft Systems* fully expands its already comprehensive coverage to include both conventional and unmanned systems. It also updates all chapters to bring them in line with current design practice and technologies taught in courses at Cranfield, Bristol, and Loughborough universities in the UK. *Design and Development of Aircraft Systems*, 3rd Edition begins with an introduction to the subject. It then introduces readers to the aircraft systems (airframe, vehicle, avionics, mission, and ground systems). Following that comes a chapter on the design and development process. Other chapters look at design drivers, systems architectures, systems integration, verification of system requirements, practical

considerations, and configuration control. The book finishes with sections that discuss the potential impact of complexity on flight safety, key characteristics of aircraft systems, and more. Provides a holistic view of aircraft system design, describing the interactions among subsystems such as fuel, navigation, flight control, and more Substantially updated coverage of systems engineering, design drivers, systems architectures, systems integration, modelling of systems, practical considerations, and systems examples Incorporates essential new material on the regulatory environment for both manned and unmanned systems Discussion of trends towards complex systems, automation, integration and the potential for an impact on flight safety Design and Development of Aircraft Systems, 3rd Edition is an excellent book for aerospace engineers, researchers, and graduate students involved in the field.

Suzuki GSX-R1000 2005-2006

Haynes Manuals N. America, Incorporated GSX-R1000 (2005-2006)

Dear Ally, How Do I Write a Book?

Hachette UK Problem plot lines? Character chaos? Ask Ally! The definitive guide to writing from one of teen fiction's best-loved authors. Writing finally has its own agony aunt in bestselling author, Ally Carter. Always wanted to write? Not sure how to begin, or what to do with tricky characters or pesky plotlines? Ask Ally! Ally Carter is the internationally bestselling author of Gallagher Girls, Embassy Row and Heist Society. Known for her gripping plots and adventures that combine danger and glamour in equal measure, Ally knows how to write brilliant books for teen and YA readers. Now Ally and her author friends want to help YOU write the book you've always dreamed of. Part agony aunt, part writing guru, this writing guide is thoughtful, witty and best of all, useful. With advice from some of children's fiction's brightest stars including Holly Black, Cassandra Clare and Kody Keplinger.

Military Avionics Systems

John Wiley & Sons Ian Moir and Allan Seabridge Military avionics is a complex and technically challenging field which requires a high level of competence from all those involved in the aircraft design and maintenance. As the various systems on board an aircraft evolve to become more and more inter-dependent and integrated, it is becoming increasingly important for designers to have a holistic view and knowledge of aircraft systems in order to produce an effective design for their individual components and effectively combine the systems involved. This book introduces the military roles expected of aircraft types and describes the avionics systems required to fulfil these roles. These range from technology and architectures through to navigations systems, sensors, computing architectures and the human-machine interface. It enables students to put together combinations of systems in order to perform specific military roles. Sister volume to the authors' previous successful title 'Civil Avionics Systems' Covers a wide range of military aircraft roles and systems applications Offers clear and concise system descriptions Includes case studies and examples from current projects Features full colour illustrations detailing aircraft display systems Military Avionics Systems will appeal to practitioners in the aerospace industry across many disciplines such as aerospace engineers, designers, pilots, aircrew, maintenance engineers, ground crew, navigation experts, weapons developers and instrumentation developers. It also provides a valuable reference source to students in the fields of systems and aerospace engineering and avionics.

Loving Anna

CreateSpace Amelia Kurt was different. And she knew it. That didn't stop her from loving her best friend, Annabelle Johnson. They spent an entire summer making love, and growing into what was promising to be the only relationship either ever knew. Then, one day, the unexpected happens. Anna disappears. No reason, no forwarding address, no number. She was simply gone. Eleven years later, Anna returns. Her truth is heartbreaking but it's only the beginning of their journey to recovery.

Manual of Home Health Nursing Procedures

Mosby Incorporated CD-ROM contains full text for all the procedures available in the manual. Files are provided both as fully formatted Word 6.0 (.doc) documents and as text-only documents (.txt).

Enola Gay

Mission to Hiroshima

Open Road Media From theNew York Times-bestselling coauthors: A "fascinating . . . unrivaled" history of the B-29 and its fateful mission to drop the atomic bomb on Hiroshima (The New York Times Book Review). Painstakingly researched, the story behind the decision to send the Enola Gay to bomb Hiroshima is told through firsthand sources. From diplomatic moves behind the scenes to Japanese actions and the US Army Air Force's call to action, no detail is left untold. Touching on the early days of the Manhattan Project and the first inkling of an atomic bomb, investigative journalist Gordon Thomas and his writing partner Max Morgan-Witts, take WWII enthusiasts through the training of the crew of the Enola Gay and the challenges faced by pilot Paul Tibbets. A page-turner that offers "minute-by-minute coverage of the critical periods" surrounding the mission, Enola Gay finally separates myth and reality from the planning of the flight to the moment over Hiroshima when the atomic age was born (Library Journal).

Science Focus 3

The Science Focus Second Edition is the complete science package for the teaching of the New South Wales Stage 4 and 5 Science Syllabus. The Science Focus Second Edition package retains the identified strengths of the highly successful First Edition and includes a number of new and exciting features, improvements and components.

Organizational Behaviour

Concepts, Controversies, Applications, Sixth Canadian Edition,

Pearson Education Canada For introductory courses in Organizational Behaviour, Organizational Psychology, Industrial Psychology, and Human Relations in departments of management, public administration, psychology, social work, political science, and education. Organizational Behaviour, 6ce is the most student-engaging comprehensive book in the market. It makes OB relevant to students, no matter what their background, work experience or their career goals. MyOBLab is not included with the purchase of this product.
