The well-received chapter on “Government At and Around the Table” has been expanded and updated with new examples that span the globe. In this comprehensive resource, Jeanne M. Brett describes how to develop a negotiation planning document and shows how to execute the plan. She provides a model that explains how the cultural environment affects negotiators’ interests, priorities, and strategies. The book explains how resolving disputes is different from making deals and how negotiation strategy can be used in multicultural teams. Negotiating Globally challenges negotiators to expand their repertoire of strategies so that they will be able to close deals, resolve disputes, and get teams to make decisions. The book is split into three parts. The first part, examining the basis of merger arbitrage, looks at the key role of the market in takeover bids. It also assesses the major changes in the financial markets over recent years and their impact on M&A. Various M&A risk and return factors are also discussed, alongside the historical profitability of merger arbitrage, the different approaches used by fund managers and the results of academic studies on the subject. The second part of the book deals with the risk of an M&A transaction failing in terms of financing risk, competition issues, the legal aspects of merger agreements and administrative and political risks. **Law and Finance Why Does Legal Origin Matter?** *World Bank Publications* Although it is widely acknowledged that the benefits of corporate governance reform could be substantial, systematic evidence on such reforms is scant. We both document and evaluate a contemporary corporate governance reform by constructing 18 measures of shareholder and creditor protection for Finland for the period 1980-2000. The measures reveal that shareholder protection has been strengthened whereas creditor protection has been weakened. We also demonstrate how the reform is consistent with a reorganisation of the Finnish financial market in which a bank-centred financial system shifted from relationship-based debt finance towards increasing dominance by the stock market. We find evidence that the development of shareholder protection has been a driver of the reorganisation, whereas the changes in creditor protection have mirrored market developments.
