This book will be your ideal guide to efficiently passing and achieving this certification. Learn from industry experts and implement their practices to resolve complex IT issues. This book revolves around networking concepts where readers will learn topics like network architecture, security, network monitoring, and

troubleshooting. This book will not only prepare the readers conceptually but will also help them pass the N10-007 exam. This guide will also provide practice exercise after every chapter where readers can ensure their concepts are clear. By the end of this book, readers will leverage this guide and the included practice questions to boost their confidence in appearing for the actual certificate. What you will learn

Explain the purpose of a variety of networking concepts and implement them appropriately

Understand physical security and common attacks while securing wired and wireless networks

Understand the fundamentals of IPv4 and IPv6

Determine and explain the appropriate cabling, device, and storage technologies

Understand network troubleshooting methodology and appropriate tools to support connectivity and performance

Use best practices to manage the network, determine policies, and ensure business continuity

Who this book is for

This book is ideal for readers wanting to pass the CompTIA Network+ certificate. Rookie network engineers and system administrators interested in enhancing their networking skills would also benefit from this book. No Prior knowledge on networking would be needed.

Just knowing the theory is no longer enough to pass your Cisco CCENT or CCNA exams. During a grueling 90 minute exam you are now hit with several 'live'; network issues to either configure or troubleshoot. It is estimated that over 80% of exam failures are due to missing vital marks on the practical element which counts heavily towards your final score. Don't let that happen to you.

101 Labs for the Cisco CCNA Exam will help you quickly and easily gain the hands on skill and speed to get you through the CCNA and CCENT exams and in fact, well past CCNA level. These labs have been compiled by two of the most experienced Cisco engineers in the IT industry. Let them share with you their insider tips and secrets to effective Cisco router and switch configuration. This best selling guide has been revised and updated to prepare you for the new Cisco exams:

- 200-125 CCNA - Interconnecting Cisco Networking Devices: Accelerated (CCNAX)
- 100-105 ICND - Interconnecting Cisco Networking Devices Part 1 (ICND1)
- 200-105 ICND2 - Interconnecting Cisco Networking Devices Part 2 (ICND2)

All syllabus topics are covered including:

- - Configure and troubleshoot VLANs and Trunking-
- Configure eBGP- RIP, EIGRP, EIGRP for IPv6, OSPF and OSPFv3-
- Router and switch security- SNMP- HSRP- GRE- and many more

You cover configuration and troubleshooting as well as important 'need to know' commands for the exam and the real world of working as a Cisco network engineer. We've added 20 challenge labs to test your skills to the limit as well as several bonus labs. All solutions are provided so you can check your configurations against ours. As your confidence quickly grows you will find your speed and understanding vastly improves making you more than prepared come exam day. There is no other book like this on the market. Mike Valentine has been in the IT field for 16 years, focusing on network design and implementation. He is a Cisco Certified Systems Instructor (#31461) and specializes in Cisco Unified Communications instruction as well as CCNA and CCNP courses. His accessible, humorous, and effective teaching style has demystified Cisco for hundreds of students since he began teaching in 2002. Keith Barker,

CCIE No. 6783 R/S & Security, is a 27-year veteran of the networking industry. He currently works at CBT Nuggets. His past experience includes EDS, Blue Cross, Paramount Pictures, and KnowledgeNET, and he has delivered CCIE-level training for several years. Cisco CCNA in 60 Days Reality Press Limited The Cisco CCNA is one of the most widely recognised and respected qualifications in the IT industry. Every year, tens of thousands of people embark towards taking the exam via private study, Cisco Academy courses, or online training. The sad truth is most students quit along the way, and for those few who actually do attempt it, only 50% pass. All that time, effort, and money wasted! If there are so many manuals, CBT courses, lab simulators, exam engines, and study resources out there, then what goes wrong? This is the question Cisco trainer Paul Browning wanted to get to the bottom of. After interviewing thousands of students, he discovered that most people quit because they are simply overwhelmed with the sheer volume of material they need to digest and, of course, the large number of hands-on skills they need to be able to demonstrate in the exam. Add to that the day-to-day stresses of commuting to work, bringing up a family, and the distraction of everyday problems and challenges; it's no wonder people quit. This is where Cisco CCNA in 60 Days can help. Devised by two industry experts and countless Cisco students just like you, the 60-day programme breaks down every exam requirement into a daily study task. All you need to do is open the book at the relevant day (from 1 to 60), read the theory, and complete the lab. Every lesson is reviewed several times in the form of exam questions, review sessions, a handy exam cram guide, and, of course, hands-on labs for you to follow. You can choose to take the CCENT after the first 30 days and the ICND2 after the next 30 days, or you can take the CCNA after 60 days of study. Here is what is included in your study guide: 60 daily study tasks Full explanations of theory Real-world tips and advice Over 47 hands-on labs, plus 15 bonus CCENT and ICND2 labs CCENT and ICND2 cram guides Bonus VLSM guide Motivational goal-setting guide Downloadable videos Free support via [www.in60days.com](http://www.in60days.com) Author Paul Browning is a former police officer who used his CCNA qualification to help him make a career change to IT. He worked for Cisco in the UK for a while, and then went on to start his own Cisco training company, which he ran for 8 years before moving into online Cisco training. He is the author of several Cisco study guides. He has also created the online Cisco certification training sites, including [www.howtonetwork.net](http://www.howtonetwork.net) and [www.in60days.com](http://www.in60days.com) Technical author Farai Tafa used to work in a shoe shop but decided he wanted more out of life, so he began to study for his Cisco exams. He is now a dual CCIE and one of the leading Cisco consultants in the US. He currently designs, installs, and troubleshoots networks for large companies. Author Daniel Gheorghe is a CCIE in Routing and Switching. He is currently preparing for his second CCIE certification (in Security) and he is developing his skills in system penetration testing. He also holds numerous certifications in networking and security, from Cisco and other vendors, including CCNA,

CCDA, CCNA Security, CCNP, CCDP, CCIP, FCNSA, FCNSP, and CEH. He took an interest in IT at an early age and soon developed a passion for computer networking, which made him study hard in order to reach an expert level. Technical author Dario Barinic is a network expert (dual CCIE #25071 - Routing and Switching, and Service Provider) with a Master of Engineering degree and eight years of experience in the networking field. He also holds other certifications, such as Cisco CCNA and CCNP, HP AIS, ASE, MASE, and various Cisco specialisations.
