With submissions from both small and large publishers, CBIP provides access to titles not listed anywhere else. Containing more than 48,000 titles, of which approximately 4,000 have a 2001 imprint, the Author and Title Index is extensively cross-referenced. The Subject Index lists the titles under 800 different subject categories. Both books offer the most complete directory of Canadian publishers available, listing the names and ISBN prefixes, as well as the street, e-mail and web addresses of more than 4,850 houses. The quarterly microfiche service provides updated information in April, July and October. CBIP is constantly referred to by order librarians, booksellers, researchers, and all those involved in book acquisition. In addition, CBIP is an invaluable record of the vast wealth of publishing and writing activity in the scientific, literary, academic and arts communities across Canada. A quarterly subscription service including the annual Author and Title Index (March 2001) plus quarterly microfiche updates (April, July, and October 2001) is also available. and appreciation several years ago when I first read *World View Theory and Science Education Research* by Bill Cobern (1991). It was a comprehensive, theoretical discussion of worldview theory in science education. I am delighted to see that Cobern has taken the next step to provide empirical accounts of worldview in *Everyday Thoughts about Nature*. . The primary goal of the book is to understand how typical- ninth grade students and their science teachers think about Nature or the natural world, and how their thoughts are related to science. In pursuing this goal, the book raises a basic question about the purpose of science education for the public: Should science education seek to educate "scientific thinkers" in the pattern of the science teachers? Or, should science education seek to foster sound science learning within the matrices of various cultural perspectives? (p. 3) The answer to this question becomes clear, thanks to Cobern's excellent research and persuasive arguments. First, this research takes a humanistic approach in understanding what students and teachers think about Nature "through the language and ideas voluntarily expressed" (p. 1). The research used multi directional prompts and encouraged students and teachers to speak freely and at length in any directions they wished. This humanistic approach is stated clearly: "[T]he research seeks to illuminate some of the various ways in which students think about Nature without judging even the most unorthodox perspectives" (p. 14). **ERIC Educational Documents Index** "A subject-author-institution index which provides titles and accession numbers to the document and report literature that was announced in the monthly issues of *Resources in education*" (earlier called *Research in education*). **Resources in Education RIE..
