ADVANCES IN PHYSICAL ERGONOMICS AND HUMAN FACTORS

PROCEEDINGS OF THE AHFE 2017 INTERNATIONAL CONFERENCE ON PHYSICAL ERGONOMICS AND HUMAN FACTORS, JULY 17-21, 2017, THE WESTIN BONAVENTURE HOTEL, LOS ANGELES, CALIFORNIA, USA

Springer *This book reports on the state of the art in physical ergonomics and is concerned with the design of products, process, services, and work systems to assure their productive, safe, and satisfying use by people. With focus on the human body's responses to physical and physiological work demands, repetitive strain injuries from repetition, vibration, force, and posture are the most common types of issues examined, along with their design implications. The book explores a wide range of topics in physical ergonomics, which includes the consequences of repetitive motion, materials handling, workplace safety, and usability in the use of portable devices, design, working postures, and the work environment. Mastering physical ergonomics and safety engineering concepts is fundamental to the creation of products and systems that people are able to use, as well as the avoidance of stresses and minimization of the risk of accidents. Based on the AHFE 2017 Conference on Physical Ergonomics and Human Factors, July 17-21, 2017, in Los Angeles, California, USA, this book provides readers with a comprehensive view of the current challenges in Physical Ergonomics, which are a critical aspect in the design of any human-centered technological system, and factors influencing human performance.*

IRAN'S LANGUAGE PLANNING CONFRONTING ENGLISH ABBREVIATIONS

PERSIAN TERMINOLOGY PLANNING

Springer Nature *This book addresses one of the most crucial and common questions confronting planners of languages other than English, that is, how the impacts of global languages on local languages should be dealt with: internationalization or local language promotion? This empirical study examines the implementation of Iran's governmental language and terminology policy to accelerate rarely used abbreviation methods in Persian in order to preserve the language from the extensiveness of borrowed English abbreviated forms. This book provides an in-depth analysis of relevant linguistic theories as well as the structure and social context of the Persian language itself, rather than relying on personal opinions or beliefs either in favour of or against abbreviation. The text appeals to politicians, language planners, terminologists, lecturers, authors and translators of scientific works, especially those who are speakers of languages other than English and seek to promote their local languages. This book is particularly relevant to linguistics students (both undergraduate and graduate students) and language teachers and researchers in the broader areas of language education and curriculum design.*

BRITISH INFANTRY BATTALION COMMANDERS IN THE FIRST WORLD WAR

Routledge *Recent studies of the British Army during the First World War have fundamentally overturned historical understandings of its strategy and tactics, yet the chain of command that linked the upper echelons of GHQ to the soldiers in the trenches remains poorly understood. In order to reconnect the lines of communication between the General Staff and the front line, this book examines the British army's commanders at battalion level, via four key questions: (i) How and where resources were found from the small officer corps of 1914 to cope with the requirement for commanding officers (COs) in the expanding army; (ii) What was the quality of the men who rose to command; (iii) Beyond simple overall quality, exactly what qualities were perceived as making an effective CO; and (iv) To what extent a meritocracy developed in the British army by the Armistice. Based upon a prosopographical analysis of a database over 4,000 officers who commanded infantry battalions during the war, the book tackles one of the central historiographical issues pertaining to the war: the qualities of the senior British officer. In so doing it challenges lingering popular conceptions of callous incompetence, as well more scholarly criticism that has derided the senior British officer, but has done so without a data-driven perspective. Through his thorough statistical analysis Dr Peter Hodgkinson adds a valuable new perspective to the historical debate underway regarding the nature of British officers during the extraordinary expansion of the Army between 1914 and 1918, and the remarkable, yet often forgotten, British victories of The Hundred Days.*

FAIRIES AFIELD

Book Excerpt: ... But she said nothing of the sort of mystery connected with the powder; some instinct prevented her doing so. Nor did she tell that but a little of it remained, or that their stock of rose-leaves would soon be exhausted."Who knows what may happen before that?" she reflected, and the

words of Linde's dream-visitor recurred to her, "Three times, and then ask the robin." Dame Barbara was quite satisfied and greatly delighted. "Here," she said, fumbling for her substantial purse, "a groat for two ounces of it, did you say? No, a half-groat only? My dear, you'll have to raise your prices if the perfume is so excellent! Well to begin with, give me the four ounces straight away, and here's a half-groat over and above what it all comes to--dried leaves and fresh ones and flowers, all together--just the tiny silver piece for luck, you know."...

SAFETY AT STREET WORKS AND ROAD WORKS

A CODE OF PRACTICE

This publication sets out the statutory requirements for signing, lighting, and guarding at street works and road works. This is the core reference manual for utility companies, local authorities, street work contractors and others whose day-to-day business involves street works (works by statutory undertakers and other utility companies etc) and road works (works to maintain or repair road infrastructure). It applies to all single carriageway roads and dual carriageways with a speed limit of 40 mph or less. The code is now divided into three parts: Basic Principles, Operations, and Equipment and Vehicles; site layout diagrams have been redrawn to make them easier to understand. There is: increased emphasis on using risk assessment and guidance on what to consider in such assessments; strengthened guidance on providing for pedestrians and cyclists and new guidance on traffic control measures related to road closures, one-way working and temporary road obstructions; enhanced advice on other traffic control measures including works near tramways and railways, and mobile/short duration works; and updated advice on high visibility clothing and the signing and conspicuity requirements for work vehicles.
