CANCER CONSULT

EXPERTISE FOR CLINICAL PRACTICE

John Wiley & Sons The field of oncology benefits from several large-scale reference books and a host of monographs dedicated to specific cancers. However, truly excellent practice and review books are, surprisingly, quite scarce. Outside of a scant handful of books and online reference tools that offer clinical response practice and board review in a basic question and answer format, there are no resources that offer a robust, engaging, fully referenced tool for these vital activities in every oncologist's and oncology trainee's work. This print and electronic book seeks to fill that void, offering comprehensive question-and-answer style content that covers the entire specialty of oncology and provides practicing oncologists with a fascinating and immediately applicable compendium of vital information dealing with a well-balanced selection of common and uncommon cancers. At the heart of this book is the editor's and authors' desire to overcome the controversies and barriers to practice that usually emerge following the appearance of new data. In every section, the user is guided toward collaboration in ongoing clinical research - for example, via discussions of well-designed ongoing clinical trials in each specific area. Developed with both the teacher and learner in mind, this book also offers trainees and fellows an excellent opportunity to enhance their preparation for the ABIM oncology fellowship exam as well as for the oncology boards. It will also be an extremely useful tool for oncologists working toward the recertification exam. This comprehensive, beefy book includes hundreds of painstakingly developed multiple-choice and mini-case-based questions covering the principles of medical oncology, malignant hematology, surgical oncology, and radiation oncology. It also contains mini-cases and questions dealing with the biology, diagnosis, classification, staging, and multidisciplinary treatment of cancers at every anatomic site. The very latest topics are included, such as molecular techniques, targeted therapies, and translational cancer research. Concise but detailed

answers are referenced to key journals and books, and evidence-based wherever possible. NCCN guidelines are also referenced as appropriate. With its powerful focus on take-home messages from and for actual clinical work, this book will help keep oncologists up to date, bridging the gaps between journal and reference literature, conferences, and their existing knowledge base.

IAPSM'S TEXTBOOK OF COMMUNITY MEDICINE

Jaypee Brothers Medical Publishers

THE PHILOSOPHY OF EXPERTISE

Columbia University Press From the use of expert testimony in the courtroom to the advice we rely on to solve key economic, political, and social problems, expertise is an essential part of our decision-making process. However, the extent to which experts can be trusted is a subject of persistent and contentious debate. The Philosophy of Expertise is the first collection to explore the fundamental philosophical issues surrounding these authorities and their expert knowledge. Part 1 considers the problems surrounding the issue of trust and deference; part 2 launches a phenomenological clarification of expertise that pinpoints the universal structures embodied in cognition and affect; and part 3 examines the consequences of the social and technical externalization of expertise. Contributors including Edward Said, Alvin Goldman, Peter Singer, Hubert Dreyfus, Julia Annas, Harry Collins, and Don Ihde draw on a number of intellectual approaches to explore the justification of expert authority, the potentially dangerous role of expertise in a liberal democratic society, how laypeople can critique experts, and the social and ideological character of expert advice. The contributors also discuss the reasoning process of judges and juries, the ancient Greek view of moral conduct, and the incorporation of experts into governmental bureaucracy. By honestly tackling the legitimacy and consistency of various positions, this volume sheds much-needed light on the theoretical dimensions of a controversial and pervasive practice. Contributors: Alvin I. Goldman, Don Ihde, Edward Said, Evan Selinger and John Mix, Evan Selinger and Robert P. Crease, H. M. Collins and Robert Evans, Hélène Mialet, Hubert Dreyfus, John Hardwig, Julia Annas, Paul Feyerabend, Peter Singer, Scott Brewer, Steve Fuller, Steven Turner

HOSPICE PALLIATIVE HOME CARE AND BEREAVEMENT SUPPORT

NURSING INTERVENTIONS AND SUPPORTIVE CARE

Springer This book provides an unique resource for registered nurses working in hospice palliative care at home and for the community, outside of acute care settings and also incorporates literature related to palliative care in acute health care settings, as part of the overall services and supports required. Very few resources exist which specifically address hospice palliative care in the home setting, despite the fact that most palliative care occurs outside acute care settings and is primarily supported by unpaid family caregivers. An overview of the concerns for individuals and families, as well as specific nursing interventions, from all ages would be an excellent support for nursing students and practicing registered nurses alike. The book structure begins with a description of the goals and objectives of hospice palliative care and the nursing role in providing excellent supportive care. Chapters include research findings and specifically research completed by the authors in the areas of pediatric palliative care, palliative care for those with dementia, and the needs of family caregivers in bereavement. Interventions developed by the editors are provided in this book, such as the "Finding Balance Intervention" for bereaved caregivers; the "Reclaiming Yourself" tool for bereaved spouses of partners with dementia; and The Keeping Hope Possible Toolkit for families of children with life threatening and life limiting illnesses. The development and application of these theory-based interventions are also highlighted. Videos and vignettes written by family caregivers about what was helpful for them, provide a patient-and family-centered approach./div The book will benefit nursing students, educators and practicing registered nurses by providing information, theory, and evidence from research.

GERIATRICS FOR SPECIALISTS

Springer This book focuses on the circumstances that lead to the marked increased vulnerability of seniors and are most challenging to clinicians including the presence of multiple chronic medical conditions, variable losses of physiological function, and heterogeneity among individuals. Written by the experts who lead the initiative to deliver high quality surgical and medical care to the elderly, Geriatrics for Specialists is the first book of its kind to provide the comprehensive knowledge specialists and associated generalists need to deliver quality health care to seniors. With topics on important cross cutting issues like frailty, delirium and polypharmacy and specialty chapters on emergency medicine, anesthesia, many surgical and medical disciplines and rehabilitation, this book provides clinicians the knowledge and tools needed to evaluate, treat and manage the unique needs of seniors. Geriatrics for Specialists was created as a resource for specialist, generalists and allied health professionals and their students and trainees who care for elderly patients.

EXOTIC ANIMAL MEDICINE - REVIEW AND TEST - E-BOOK

Elsevier Health Sciences Exotic Animal Medicine Review & Test is the ideal way for students and clinicians in general practice to study, explore and extend their knowledge of this exciting new field. Distinguished avian specialist Jaime Samour and his international team of contributors from 13 countries present the reader with a collection of over 60 selected clinical cases observed in mammals, birds, reptiles, amphibians and fish species kept commonly as pets. Additional cases are included of some species maintained in zoological collections, captive breeding centres or brought into rescue and rehabilitation centres around the world. The cases are presented in a systematic format using descriptive and diagnostic images and clinical and laboratory data, challenging the reader to formulate a differential diagnosis, to suggest a recommended therapy pathway, to provide an educated prognosis and to propose ways of prevention. The definite diagnosis, treatment, preventative medicine and final comments are provided at the end of each question. A recommended list of further reading offers the reader additional consultative information on each medical condition addressed. In presenting comprehensive clinical and diagnostic information, Exotic Animal Medicine Review & Test allows the reader to explore cases in more depth and with more imagery and background data than may be available in other sources. It is perfect for the continuing education needs of busy clinicians and for veterinarians in training who wish to test their ability to establish a differential diagnosis. A selection of cases from the book, plus a range of more advanced bonus cases, is presented in interactive format on a companion website, which is optimized for viewing on mobile devices. Presents comprehensive clinical and diagnostic information A companion website optimized for access on mobile devices offers a fully interactive range of cases for convenient self testing Fully illustrated with a wide range of photographs and radiographs With contributions from a panel of international experts

EXPLOITING THE KNOWLEDGE ECONOMY

ISSUES, APPLICATIONS AND CASE STUDIES

IOS Press "Adaptation of applied Information and Communication Technologies (ICT) research results is one of the greatest challenges faced today in building the global Knowledge Economy. While research challenges can be quite similar across the world thus facilitating cross-border cooperation between researchers, government and industry, how actual research results can be exploited or implemented can vary considerably depending on the social, cultural and infrastructural context of the target country, province or region. This offers opportunities as well as challenges in terms of how applied ICT can be used to both support economic development and inform future research challenges. When cross-border collaboration is effective, there can be a valuable exchange of knowledge that can not only lead to successful adaptation of research results or lessons learnt from successful implementations in other countries, but can also provide insight into different problem solving techniques and new ways of thinking that can enrich the ICT research agenda. It is only through such mutually beneficial shared insight that the Digital Divide can be bridged. This set of two books brings together a comprehensive collection of over 220 contributions on commercial, government or societal exploitation of applied ICT, representing cutting edge research, good practice and practical eAdoption from Africa, the Americas, Asia & Europe."

INVESTING IN OUR FUTURE

A COMPREHENSIVE AGENDA FOR THE HEALTH AND WELL-BEING OF CHILDREN AND ADOLESCENTS

World Health Organization The Global Strategy for Women's, Children's and Adolescents' Health calls for the transformative change necessary to shape a more prosperous, sustainable future for children and adolescents. To implement the Strategy and contribute to Sustainable Development Goals, strategic shifts are necessary in maternal, newborn, child and adolescent health programming. It is no longer sufficient to save lives: health and other sectors must contribute to improving their health and well-being, and unlocking their full potential. An approach to health and development that supports a continuum of care throughout life is therefore essential to promote survival, enhance well-being and protect children and adolescents against risks and disease. Programmes to improve their health and well-being must be universal, while identifying those at risk or who are vulnerable and giving them extra support and protection required. This Framework outlines the rationale, highlights the areas for action and calls for a shift in redesigning child and adolescent programming. It calls for whole of government and whole of society approach to life course programming to achieve a shared goal and integrated coordinated response to ensuring health and well-being of children and adolescents.
