ADVANCE CARE PLANNING IN END OF LIFE CARE

Oxford University Press **Advance Care Planning (ACP)** is an essential part of end of life care in the UK and most developed countries. It enables more people to live well and die as they would choose, and has significant implications for the individual person, their family and carers, and our wider society. In the context of an ageing population and increasing possibilities for medical interventions, ACP is a particularly important aspect of quality care. Expanded and fully updated throughout, this new edition gives a comprehensive overview of ACP and explores a wide range of issues and practicalities in providing end of life care. Written by experts from around the world, the book takes a comprehensive look at the subject by exploring the wide range of issues and practicalities in providing ACP; framing the purpose, process, and outcomes of these plans; and providing an important update on national and international research, policy and practice. Chapters also discuss values, goals and priorities, and include detailed case examples to aid best practice. **This book is an invaluable resource for all clinicians involved in the caring for people in their final stages of life. It is of particular value to GPs, palliative care specialists, geriatricians, social care teams, researchers and policy leads interested in improving end of life care.**

A PRACTICAL GUIDE TO CARE PLANNING IN HEALTH AND SOCIAL CARE

McGraw-Hill Education (UK) **This accessible guide takes the mystery and fear out of care planning and will help you to develop a person centred approach to delivering good quality nursing care in all clinical settings. The book explores each part of the care planning process in detail and provides opportunities for you to reflect upon practice and to develop effective skills.**

EMERGENCY AND TRAUMA CARE FOR NURSES AND PARAMEDICS - EBOOK

Elsevier **Endorsed by the College of Emergency Nursing Australasia CENA is the peak professional association representing emergency nurses and has endorsed this text in recognition of the relevance it has to emergency nursing across Australasia. Led by an expanded editorial team of internationally recognised clinicians, researchers and leaders in emergency care, the 3rd edition of Emergency and Trauma Care for Nurses and Paramedics continues to be the foremost resource for students preparing to enter the emergency environment and for clinicians seeking a greater understanding of multidisciplinary emergency care. The text provides nursing and paramedicine students and clinicians with the opportunity to understand the best available evidence behind the treatment that is provided throughout the emergency care trajectory. This unique approach ultimately seeks to strengthen multidisciplinary care and equip readers with the knowledge and skills to provide safe, quality, emergency care. The 3rd edition builds on the strengths of previous editions and follows a patient journey and body systems approach, spanning the pre-hospital and hospital environments. Expanded editorial team, all internationally recognised researchers and leaders in Emergency Care Chapter 6 Patient safety and quality care in emergency All chapters revised to reflect the most up-to-date evidence-based research and practice Case studies and practice tips highlight cultural considerations and communication issues Aligns to NSQHSS 2e, NMBA and PBA Standards An eBook included in all print purchases**

CARE PLANNING

A GUIDE FOR NURSES

Routledge **Why is care planning important? How can you use care planning effectively in your own practice? Being able to plan the care of patients is one of most important aspects of a nurse's role. Using an interactive approach, this book explores the reasons why care planning is so important and explains the theory behind the practice, providing a step-by-step guide to assessing patients, diagnosing problems, planning goals and interventions, and evaluating progress.**

PALLIATIVE CARE FOR OLDER PEOPLE

A PUBLIC HEALTH PERSPECTIVE

Oxford University Press, USA **The ageing of society is becoming a major public health issue, posing challenges to social and health care structures in many countries. This book demonstrates the added value of palliative care which, although traditionally focused on cancer and the very end of life, can play a role in strengthening and complementing the care of older people. The book outlines the current state of worldwide policy work, research, and innovations in the field of public health and palliative care for older people and concludes with recommendations for policy and decision makers, at international and national level.**

NURSING DIAGNOSIS HANDBOOK E-BOOK

AN EVIDENCE-BASED GUIDE TO PLANNING CARE

Elsevier Health Sciences **Get nursing care plans right! Ackley's Nursing Diagnosis Handbook: An Evidence-Based Guide to Planning Care, 12th Edition helps practicing nurses and nursing students select appropriate nursing diagnoses and write care plans with ease and confidence. This convenient handbook shows you how to correlate nursing diagnoses with known information about clients on the basis of assessment findings, established medical or psychiatric diagnoses, and the current treatment plan. Extensively revised and updated with the new 2018-2020 NANDA-I approved nursing diagnoses, it integrates the NIC and NOC taxonomies, evidence-based nursing interventions, and adult, pediatric, geriatric, multicultural, home care, safety, and client/family teaching and discharge planning considerations to guide your students in creating unique, individualized care plans. Step-by-step instructions shows you how to use the Guide to Nursing Diagnoses and Guide to Planning Care sections to create a unique, individualized plan of care. UNIQUE! Provides care plans for every NANDA-I approved nursing diagnosis Promotes evidence-based interventions and rationales by including recent or classic research that supports the use of each intervention. Presents examples of and suggested NIC interventions and NOC outcomes in each care plan. 150 NCLEX exam-style review questions are available on Evolve. Easy-to-follow sections I and II guide you through the nursing process and selection of appropriate nursing Appendixes provide you with valuable information in an easy-to-access location. Clear, concise interventions are usually only a sentence or two long and use no more than two references. Safety content emphasizes what must be considered to provide safe patient care. Classic evidence-based references promote evidence-based interventions and rationales. List of Nursing Diagnosis Index on inside front cover of book for quick reference. Alphabetical thumb tabs allow quick access to specific symptoms and nursing diagnoses. NEW! Includes comprehensive, up-to-date information on the new 2018-2020 NANDA-I approved nursing diagnoses, complete with 17 new diagnoses. NEW! and UPDATED! Provides the latest NIC/NO C, interventions, and rationales for every care plan NEW! Section I: Gender identity discussion includes information about the caregiver's responsibility for adapting care accordingly. NEW! Interventions reorganized by priority helps you quickly identify the information you're searching for. NEW! Section II: Bullying, Gender Dysphoria, Medical marijuana, Military families/personnel, Opioid use/abuse, Service animals, Technology addiction, and Veterans. NEW! Additional clarification of use of QSEN throughout book in Section I NEW! Concept map creator added from Yoost textbook. NEW! Updated rationales include evidence-based references 5 years or less.**

TEAM-BASED ONCOLOGY CARE: THE PIVOTAL ROLE OF ONCOLOGY NAVIGATION

Springer This book discusses how effective navigation requires a team approach to oncology care and should never be considered an “add-on” resource or service. The Academy of Oncology Nurse & Patient Navigators (AONN) is the only national professional organization for navigation professionals, and has more than 6,000 members, 90% of which are oncology nurse navigators. They are the experts on creating team-based programs, which remove the risk of others trying to reinvent the wheel by designing a navigation program from scratch. They also understand the role of effective navigation across the entire continuum of care, and understand and are able to apply other key aspects of navigation, including clinical trial screenings and tumor board coordination and monitoring, as well as measurement using evidence-based navigation metrics, to name but a few. It is the only book designed to educate and support anyone developing a new navigation program, or wanting to improve one they have created. As such it offers a guide for cancer centers needing to develop and implement an oncology navigation program; understand and successfully meet and exceed the Commission on Cancer accreditation standards linked to navigation; expand or improve their current navigation program as well as demonstrate its value using reliable measurable results, including patient satisfaction and improved-quality clinical outcomes. This comprehensive book also provides insights into applying the information presented to the real world of oncology care.

ULRICH & CANALE'S NURSING CARE PLANNING GUIDES E-BOOK

PRIORITIZATION, DELEGATION, AND CLINICAL REASONING

Elsevier Health Sciences Confidently plan individualized care for clients in acute care, extended care, and home care environments with Ulrich & Canale's Nursing Care Planning Guides: Prioritization, Delegation, and Clinical Reasoning, 8th Edition. This in-depth nursing care planning guide features 31 detailed nursing diagnosis care plans and 63 disease/disorder care plans that are keyed to specific expected outcomes and interventions. With updated content and the most recent NANDA-I® nursing diagnoses, NIC® interventions, and NOC® outcomes, it reflects the latest nursing taxonomies and evidence-treatment protocols. The most in-depth care plans of any nursing care planning book foster clinical reasoning and promote effective clinical decision-making. 31 nursing diagnosis care plans provide detailed interventions with rationales and documentation guidelines for the most common NANDA-I® nursing diagnoses. 63 in-depth disease/disorder care plans serve as a complete reference for the most common disorders in acute care, extended care, and home care settings. UNIQUE! Care plan format with a focus on prioritized nursing interventions, interventions that can be delegated, and documentation criteria, as well as differentiation between independent and collaborative nursing actions, provides a comprehensive and practical care planning tool. In-depth patient teaching content, with each disorder care plan, concluding with a "Deficient Knowledge" diagnosis with extensive discharge teaching information, serves as a guideline for planning client education. A complete discussion of caring for older adult clients and changes that occur with aging helps you understand the unique considerations of caring for this growing population group. Nursing and collaborative diagnoses are linked to actions and rationales. Body system organization makes content easy to locate.

PATIENT ASSESSMENT AND CARE PLANNING IN NURSING

Learning Matters Nurses of the future need to accurately assess people of all ages, with varying mental and physical problems, across different settings and with changing health needs. This book introduces student nurses and novice practitioners to the assessment process enabling them to identify patient problems in order for solutions to be planned and implemented. Linked to the NMC Standards and Essential Skills Clusters for degree-level education, and with detailed case studies and scenarios demonstrating practical application of key theory, the book encourages critical thinking and urges students to consider the social, cultural, psychological and environmental factors as well as the physical symptoms that may be present when making assessments.

ULRICH & CANALE'S NURSING CARE PLANNING GUIDES, 8TH EDITION REVISED REPRINT WITH 2021-2023 NANDA-I® UPDATES - E-BOOK

Elsevier Health Sciences Ulrich & Canale's Nursing Care Planning Guides, 8th Edition Revised Reprint with 2021-2023 NANDA-I® Updates - E-Book

CARE PLANNING IN CHILDREN AND YOUNG PEOPLE'S NURSING

John Wiley & Sons Care Planning in Children and Young People's Nursing addresses a selection of the most common concerns that arise when planning care for infants, children and young people within the hospital and community setting. Clear and detailed, this text reflects both the uniqueness and diversity of contemporary children's nursing and utilizes images and case studies to provide a holistic insight into the practice of care planning through the reporting of best available evidence and current research, policy and education. Divided into sections for ease of reference, Care Planning in Children and Young People's Nursing explores both the theory and practice of care planning. Chapters on the principles of care planning include issues such as managing risk, safeguarding children, ethical and legal implications, integrated care pathways, interprofessional assessment, and invaluable parent perspectives. Additional chapters on the application of planning care examine the practical aspects of a wide range of specific conditions including cystic fibrosis, obesity, cardiac/renal failure and HIV/AIDS. Each chapter is interactive, with questions, learning activities and points for discussion creating an engaging and enquiry-based learning approach. Care Planning in Children and Young People's Nursing is a definitive resource, reflecting innovative practice which is suitable for undergraduate and postgraduate nurse education.

NUTRITION CARE OF THE OLDER ADULT: A HANDBOOK FOR DIETETICS PROFESSIONALS WORKING THROUGHOUT THE CONTINUUM OF CARE

American Dietetic Associati Completely revised with new chapters and sections covering everything the health-care provider needs to know when working with the older adult either at home or in nursing and long-term care facilities. Chapters cover factors affecting nutrition, nutrition and disease, nutritional assessment, dining challenges and regulatory compliance. This scientifically sound and practical resource for new and experienced nutrition professionals includes new forms, resources, the food guide pyramid for older adults and an index of tales.

GERIATRIC EMERGENCY MEDICINE

Springer This book discusses all important aspects of emergency medicine in older people, identifying the particular care needs of this population, which all too often remain unmet. The up-to-date and in-depth coverage will assist emergency physicians in identifying patients at risk for adverse outcomes, in conducting appropriate assessment, and in providing timely and adequate care. Particular attention is paid to the common pitfalls in emergency management and means of avoiding them. Between 1980 and 2013, the number of older patients in emergency departments worldwide doubled. Compared with younger patients, older people suffer from more comorbidities, a higher mortality rate, require more complex assessment and diagnostic testing, and tend to stay longer in the emergency department. This book, written by internationally recognized experts in emergency medicine and geriatrics, not only presents the state of the art in the care of this population but also underlines the increasing need for adequate training and development in the field.

MENTAL CAPACITY ACT 2005 CODE OF PRACTICE

[LARGE PRINT 2007 FINAL EDITION]

The Stationery Office The Mental Capacity Act 2005 provides a statutory framework for people who lack the capacity to make decisions for themselves, or for people who want to make provision for a time when they will be unable to make their own decisions. This code of practice, which has statutory force, provides information and guidance about how the Act should work in practice. It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets out the role of the Public Guardian. It also covers medical treatment and the way disputes can be resolved.

HIGH QUALITY CARE FOR ALL

NHS NEXT STAGE REVIEW FINAL REPORT

The Stationery Office This review incorporates the views and visions of 2,000 clinicians and other health and social care professionals from every NHS region in England, and has been developed in discussion with patients, carers and the general public. The changes proposed are locally-led, patient-centred and clinically driven. Chapter 2 identifies the challenges facing the NHS in the 21st century: ever higher expectations; demand driven by demographics as people live longer; health in an age of information and connectivity; the changing nature of disease; advances in treatment; a changing health workplace. Chapter 3 outlines the proposals to deliver high quality care for patients and the public, with an emphasis on helping people to stay healthy, empowering patients, providing the most effective treatments, and keeping patients as safe as possible in healthcare environments. The importance of quality in all aspects of the NHS is reinforced in chapter 4, and must be understood from the perspective of the patient's safety, experience in care received and the effectiveness of that care. Best practice will be widely promoted, with a central role for the National Institute for Health and Clinical Excellence (NICE) in expanding national standards. This will bring clarity to the high standards expected and quality performance will be measured and published. The review outlines the need to put frontline staff in control of this drive for quality (chapter 5), with greater freedom to use their expertise and skill and decision-making to find innovative ways to improve care for patients. Clinical and managerial leadership skills at the local level need further development, and all levels of staff will receive support through education and training (chapter 6). The review recommends the introduction of an NHS Constitution (chapter 7). The final chapter sets out the means of implementation.

NURSING DIAGNOSIS HANDBOOK - E-BOOK

AN EVIDENCE-BASED GUIDE TO PLANNING CARE

Elsevier Health Sciences Use this convenient resource to formulate nursing diagnoses and create individualized care plans! Updated with the most recent NANDA-I approved nursing diagnoses, *Nursing Diagnosis Handbook: An Evidence-Based Guide to Planning Care, 9th Edition* shows you how to build customized care plans using a three-step process: assess, diagnose, and plan care. It includes suggested nursing diagnoses for over 1,300 client symptoms, medical and psychiatric diagnoses, diagnostic procedures, surgical interventions, and clinical states. Authors Elizabeth Ackley and Gail Ladwig use Nursing Outcomes Classification (NOC) and Nursing Interventions Classification (NIC) information to guide you in creating care plans that include desired outcomes, interventions, patient teaching, and evidence-based rationales. Promotes evidence-based interventions and rationales by including recent or classic research that supports the use of each intervention. Unique! Provides care plans for every NANDA-I approved nursing diagnosis. Includes step-by-step instructions on how to use the Guide to Nursing Diagnoses and Guide to Planning Care sections to create a unique, individualized plan of care. Includes pediatric, geriatric, multicultural, and home care interventions as necessary for plans of care. Includes examples of and suggested NIC interventions and NOC outcomes in each care plan. Allows quick access to specific symptoms and nursing diagnoses with alphabetical thumb tabs. Unique! Includes a Care Plan Constructor on the companion Evolve website for hands-on practice in creating customized plans of care. Includes the new 2009-2011 NANDA-I approved nursing diagnoses including 21 new and 8 revised diagnoses. Illustrates the Problem-Etiology-Symptom format with an easy-to-follow, colored-coded box to help you in formulating diagnostic statements. Explains the difference between the three types of nursing diagnoses. Expands information explaining the difference between actual and potential problems in performing an assessment. Adds detailed information on the multidisciplinary and collaborative aspect of nursing and how it affects care planning. Shows how care planning is used in everyday nursing practice to provide effective nursing care.

ENDODONTIC DIAGNOSIS, PATHOLOGY, AND TREATMENT PLANNING

MASTERING CLINICAL PRACTICE

Springer This book is intended as a practical guide to endodontic diagnosis, pathology, and treatment planning. The coverage is comprehensive and encompasses such topics as disease classification, the endodontic armamentarium, anatomy, the role of different radiographic techniques, treatment decision making, preoperative management, the use of antibiotics and analgesics, and anesthesia. Numerous high-quality illustrations and clinical photographs are included to highlight key concepts and findings, and best practice is documented by means of clinical case examples. The provision of concise tips and recommendations ensures that the reader will quickly be able to find solutions to diverse endodontic challenges. In addition, the most relevant literature is reviewed in order to support and reinforce the discussed clinical concepts. The book will assist dental practitioners and endodontic trainees/specialists in planning the management of any endodontic case from first principles.

SEX- AND GENDER-BASED WOMEN'S HEALTH

A PRACTICAL GUIDE FOR PRIMARY CARE

Springer Nature This book provides primary care clinicians, researchers, and educators with a guide that helps facilitate comprehensive, evidenced-based healthcare of women and gender diverse populations. Many primary care training programs in the United States lack formalized training in women's health, or if they do, the allotted time for teaching is sparse. This book addresses this learning gap with a solid framework for any program or individual interested in learning about or teaching women's health. It can serve as a quick in-the-clinic reference between patients, or be used to steer curricular efforts in medical training programs, particularly tailored to internal medicine, family medicine, gynecology, nursing, and advanced practice provider programs. Organized to cover essential topics in women's health and gender based care, this text is divided into eight sections: Foundations of Women's Health and Gender Based Medicine, Gynecologic Health and Disease, Breast Health and Disease, Common Medical Conditions, Chronic Pain Disorders, Mental Health and Trauma, Care of Selected Populations (care of female veterans and gender diverse patients), and Obstetric Medicine. Using the Maintenance of Certification (MOC) and American Board of Internal Medicine blueprints for examination development, authors provide evidence-based reviews with several challenge questions and annotated answers at the end of each chapter. The epidemiology, pathophysiology, evaluation, diagnosis, treatment, and prognosis of all disease processes are detailed in each chapter. Learning objectives, summary points, certain exam techniques, clinical pearls, diagrams, and images are added to enhance reader's engagement and understanding of the material. Written by experts in the field, Sex and Gender-Based Women's Health is designed to guide all providers, regardless of training discipline or seniority, through comprehensive outpatient women's health and gender diverse care.

ALL-IN-ONE CARE PLANNING RESOURCE

Elsevier Health Sciences The only book featuring nursing care plans for all core clinical areas, Swearingen's All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatric, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing assessments/interventions and rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical practice. Outcome criteria with specific timelines help you to set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.

DYING IN AMERICA

IMPROVING QUALITY AND HONORING INDIVIDUAL PREFERENCES NEAR THE END OF LIFE

National Academies Press For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families. Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life. Death is not a strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. Dying in America evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families. The findings and recommendations of this report will address the needs of patients and their families and assist policy makers, clinicians and their educational and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders, advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life.

CRITICAL CARE MANUAL OF CLINICAL PROCEDURES AND COMPETENCIES

John Wiley & Sons This manual is aimed at all healthcare practitioners, from novice to expert, who care for the critically ill patient, recognising that different disciplines contribute to the provision of effective care and that essential knowledge and skills are shared by all practitioners. It provides evidence-based guidelines on core critical care procedures and includes a comprehensive competency framework and specific competencies to enable practitioners to assess their abilities and expertise. Each chapter provides a comprehensive overview, beginning with basic principles and progressing to more complex ideas, to support practitioners to develop their knowledge, skills and competencies in critical care.

ALL-IN-ONE NURSING CARE PLANNING RESOURCE

MEDICAL-SURGICAL, PEDIATRIC, MATERNITY, AND PSYCHIATRIC-MENTAL HEALTH

Elsevier Health Sciences The only book featuring nursing care plans for all core clinical areas, Swearingen's All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. THE ROYAL MARSDEN MANUAL OF CLINICAL NURSING PROCEDURES STUDENT EDITION

John Wiley & Sons The student edition of The Royal Marsden Manual of Clinical Nursing Procedures has been the definitive, market-leading textbook of clinical nursing skills for fifteen years. This internationally best-selling title sets the gold standard for nursing care, providing the procedures, rationale, and guidance required by pre-registration students to deliver clinically effective, patient-focused care with expertise and confidence. With over two-hundred detailed procedures which reflect the skills required to meet The Standards of Proficiency for Registered Nurses (NMC 2019), this comprehensive manual presents the evidence and underlying theory alongside full-colour illustrations and a range of learning activities designed to support student nurses in clinical practice. Loved and trusted by millions, The Royal Marsden Manual of Clinical Nursing Procedures, Student Edition continues to be a truly indispensable textbook for students, and includes coverage of patient assessment and discharge planning, communication, infection prevention and control, perioperative care, wound management, nutrition, diagnostic testing, medicines management, and much more. Learning features in this revised tenth edition include: Learning outcomes - summarise the focus of the information in each chapter Learning in practice - asks you to consider issues within your practice environment Case studies - provide learning around a particular patient scenario Clinical applications - ask you to consider how you would apply your knowledge to a clinical situation Stretch activities - challenge you with more nuanced, advanced issues to reflect upon Many of the features in the book are relevant to trainee nursing associates, especially when used in conjunction with supervision from academic and clinical teachers. A companion website to this title is available at www.royalmarsdenmanual.com/student10e

MORBIDITY AND MORTALITY WEEKLY REPORT

MMWR

ALL-IN-ONE NURSING CARE PLANNING RESOURCE - E-BOOK

MEDICAL-SURGICAL, PEDIATRIC, MATERNITY, AND PSYCHIATRIC-MENTAL HEALTH

Elsevier Health Sciences Introducing a plan for success with the only nursing care planning reference book for all core clinical areas! Swearingen's All-In-One Nursing Care Planning Resource, 5th Edition, features over 100 care plans including medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health to help you care for patients in any setting. This new edition is the first in the market to include a unique, interprofessional, "patient problem" focus that teaches students how to speak to patients in conversational terms rather than in nursing-specific language. New non-medical-surgical care plans and updated content throughout reflect the latest evidence-based treatment guidelines for national and international clinical practice. Plus, with its clear approach, easy-to-use format, and straightforward rationales, you can use this one book throughout their entire nursing curriculum! Bolded and highlighted Safety Icons corresponds to the safety competency of the Quality and Safety Education for Nurses (QSEN) initiative for easier recognition. Care plans for all four major clinical areas include medical-surgical, OB/maternity, pediatric, and psychiatric-mental health nursing care plans. A consistent format for each care plan enables you to perform faster searches, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Patient Problems, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized patient problems are listed in order of importance and physiologic patient needs. Detailed rationales for each nursing intervention help you apply concepts to specific patient situations in clinical practice. Full-color design makes the book more user friendly and includes color-coded tabs and improved cross-referencing and navigation aids for faster information retrieval. NEW! UNIQUE! Interprofessional "patient problems" focus familiarizes you with how to speak to patients and other medical colleagues in the consistent interprofessional language of "patient problems," rather than the nursing-specific language of nursing diagnosis. NEW! Care plans helps you to support the lesbian, gay, bisexual, transgender, queer/questioning, or intersex patient. NEW! Updated content throughout reflects the latest evidence-based treatment guidelines and national and international clinical practice guidelines.

ULRICH AND CANALE'S NURSING CARE PLANNING GUIDES

PRIORITIZATION, DELEGATION, AND CRITICAL THINKING

Saunders Confidently plan individualized care for clients in acute care, extended care, and home care environments with Ulrich & Canale's Nursing Care Planning Guides: Prioritization, Delegation, and Clinical Reasoning, 8th Edition. This in-depth nursing care planning guide features 31 detailed nursing diagnosis care plans and 63 disease/disorder care plans that are keyed to specific expected outcomes and interventions. With updated content and the most recent NANDA-I® nursing diagnoses, NIC® interventions, and NOC® outcomes, it reflects the latest nursing taxonomies and evidence-treatment protocols. You'll also receive access to a popular Online Care Planner that allows you to edit and print standardized nursing diagnosis care plans. The most in-depth care plans of any nursing care planning book foster clinical reasoning and promote effective clinical decision-making. 31 nursing diagnosis care plans provide detailed interventions with rationales and documentation guidelines for the most common NANDA-I® nursing diagnoses. 63 in-depth disease/disorder care plans serve as a complete reference for the most common disorders in acute care, extended care, and home care settings. UNIQUE! Care plan format with a focus on prioritized nursing interventions, interventions that can be delegated, and documentation criteria, as well as differentiation between independent and collaborative nursing actions, provides a comprehensive and practical care planning tool. Online Care Planner on Evolve allows you to customize each of the 31 nursing diagnosis care plans. In-depth patient teaching content, with each disorder care plan, concluding with a "Deficient Knowledge" diagnosis with extensive discharge teaching information, serves as a guideline for planning client education. A complete discussion of caring for older adult clients and changes that occur with aging helps you understand the unique considerations of caring for this growing population group. Nursing and collaborative diagnoses are linked to actions and rationales. Animations, additional care plans, and skills videos on Evolve offer additional help in care planning. Body system organization makes content easy to locate. NEW and UNIQUE! A completely new chapter on nursing-sensitive indicators features care plans devoted to "measures and indicators that reflect the structure, processes and outcomes of nursing care" (American Nurses Association, 2004), as well as financial implications for healthcare organizations. NEW! The most recent NANDA-I® nursing diagnoses, NIC® interventions, and NOC® outcomes reflect the most up-to-date nursing taxonomies. NEW! Updated content throughout reflects the latest evidence-treatment protocols and national and international guidelines.

THE RESPIRATORY THERAPIST AS DISEASE MANAGER

Jones & Bartlett Learning Written for both students and practicing clinicians, The Respiratory Therapist as Disease Manager is a foundational resource for the Respiratory Therapist who desires to augment their acute care and technical skills with a knowledge base that will enable them to competently perform the duties of a Pulmonary Disease Manager.

INPATIENT GERIATRIC PSYCHIATRY

OPTIMUM CARE, EMERGING LIMITATIONS, AND REALISTIC GOALS

Springer This book offers mental health guidelines for all medical professionals facing the emerging challenges presented by an aging population worldwide. The text acknowledges that as the geriatric demographic grows, limited resources and infrastructures demand quality protocols to deliver inpatient geriatric psychiatric care, and that many physicians may not be trained to address these specific needs. This text fills this gap with guidelines assessing, diagnosing, and treating aging patients as they present in the emergency room and other settings. Unlike any other text, this book focuses on how to optimize the use of the inpatient setting by recommending evaluations and treatments, and offering flow-charts and figures of key points, to guide both general workup and continued evaluation and treatment. This approach aims to minimize instances of premature release or readmissions and to improve outcomes. Chapters cover the various issues that clinicians face when working with an older patient, including legal topics, limitations to treatment, prescription-related complications, patients struggling with substance abuse, and various behavioral concerns. Written by experts in the field, the text takes a multidisciplinary approach to deliver high-quality care as needs of the aging population evolve. Inpatient Geriatric Psychiatry is a vital resource for all clinicians working with an aging population, including geriatricians, psychiatrists, neurologists, primary care providers, hospitalists, psychologists, neuropsychologists, emergency room and geriatric nurses, social workers, and trainees.

COMMUNITY-BASED MANAGEMENT OF FRESHWATER RESOURCES: A PRACTITIONERS' GUIDE TO APPLYING TNC'S VOICE, CHOICE, AND ACTION FRAMEWORK

Intl Food Policy Res Inst Despite being one of the most critical resources for all life on Earth, freshwater represents only 3 percent of the planet's water supply, but only 0.5 percent is readily accessible to humans. In addition, the available freshwater resources (FWR) are unequally distributed across the globe, so many areas and populations face issues of water scarcity and quality. FWR are under enormous stress from agricultural systems, climate change, and other factors directly linked to human behavior—including population growth and industrialization. Moreover, the institutions intended to manage FWR under stress may be ill-equipped to do so, especially in the context of multiple, often competing claims on FWR and the complexity of water flows across time and space. Growing awareness of these challenges has given rise to a sense of urgency to raise attention and catalyze action toward improving the management of FWR, especially at the local level. This guide aims to advance the understanding of how communities can sustainably manage FWR by applying The Nature Conservancy's Voice, Choice, and Action (VCA) framework. The original framework focused more on terrestrial resources but has been adapted here to address the unique characteristics of FWR. These characteristics present significant implications for sustainable resource management and, therefore, need to be taken into account in the design and implementation of community-based conservation (CBC) programs.

EVIDENCE-BASED TREATMENT PLANNING FOR POSTTRAUMATIC STRESS DISORDER, DVD COMPANION WORKBOOK

John Wiley & Sons This DVD helps address the challenges many practitioners face in assimilating results from psychotherapy research into their treatment plans. It offers step-by-step guidance on how to create an evidence-based psychotherapy treatment plan for posttraumatic stress disorder (PTSD). Drs. Art Jongasma and Tim Bruce discuss the steps involved in psychotherapy treatment planning and how to integrate objectives and interventions into a treatment plan, as part of an overall evidence-based practice. A sample evidence-based treatment plan for PTSD is provided.

NURSING DIAGNOSIS HANDBOOK

AN EVIDENCE-BASED GUIDE TO PLANNING CARE

Mosby Get nursing care plans right! *Ackley's Nursing Diagnosis Handbook: An Evidence-Based Guide to Planning Care, 12th Edition* helps practicing nurses and nursing students select appropriate nursing diagnoses and write care plans with ease and confidence. This convenient handbook shows you how to correlate nursing diagnoses with known information about clients on the basis of assessment findings, established medical or psychiatric diagnoses, and the current treatment plan. Extensively revised and updated with the new 2018-2020 NANDA-I approved nursing diagnoses, it integrates the NIC and NOC taxonomies, evidence-based nursing interventions, and adult, pediatric, geriatric, multicultural, home care, safety, and client/family teaching and discharge planning considerations to guide your students in creating unique, individualized care plans. Step-by-step instructions shows you how to use the Guide to Nursing Diagnoses and Guide to Planning Care sections to create a unique, individualized plan of care. UNIQUE! Provides care plans for every NANDA-I approved nursing diagnosis Promotes evidence-based interventions and rationales by including recent or classic research that supports the use of each intervention. Presents examples of and suggested NIC interventions and NOC outcomes in each care plan. 150 NCLEX exam-style review questions are available on Evolve. Easy-to-follow sections I and II guide you through the nursing process and selection of appropriate nursing Appendixes provide you with valuable information in an easy-to-access location. Clear, concise interventions are usually only a sentence or two long and use no more than two references. Safety content emphasizes what must be considered to provide safe patient care. Classic evidence-based references promote evidence-based interventions and rationales. List of Nursing Diagnosis Index on inside front cover of book for quick reference. ?? Topics discussed in this issue include but are not limited to: Evidence for the use of MBC in clinical practice; Validated Measures in Child Psychiatry and How to Use Them; Integrating MBC into Trainee Education; MBC in the Treatment of Depression; MBC in the Treatment of Anxiety; MBC in the Treatment of ADHD and disruptive behavior disorders; MBC in the Treatment of Substance Use Disorders; Implementing MBC in Various Practice Settings; Use of MBC Data to track Clinic Performance and Quality Outcomes; Use of MBC Data in Population Health Management; HIT resources to support MBC, among others.

ULRICH & CANALE'S NURSING CARE PLANNING GUIDES - E-BOOK

Elsevier Health Sciences Practical and comprehensive, this essential resource helps you plan individualized care for clients in a variety of settings, including acute care, extended care, and home care environments. It features 33 detailed nursing diagnosis care plans and 65 disease/disorder care plans that are keyed to specific expected outcomes and interventions. This book also includes the popular Online Care Planner that allows you to edit and print standardized nursing diagnosis care plans. Offers the most in-depth care plans of any planning book, fostering critical thinking and promoting effective clinical decision-making. 33 separate nursing diagnosis care plans provide detailed interventions with rationales and documentation guidelines for the most common nursing diagnoses. 65 comprehensive care plans serve as a complete reference for the most common disorders in acute care, extended care, and home care settings. Body system organization makes content easy to locate. Nursing/collaborative diagnoses are linked to actions and rationales. Specific points for discharge teaching serve as guidelines for planning client education. A complete discussion of caring for older adult clients and changes that occur with aging helps you understand the unique considerations of caring for this population group. A new care plan format focuses on prioritized nursing interventions, interventions that can be delegated, and documentation criteria, as well as differentiating between independent and collaborative nursing actions. Features 8 new nursing diagnosis care plans on topics such as comfort, confusion, contamination, decision-making, falls/injury, unstable glucose level, risk-prone health behavior, and self-care. Includes 9 new disease/disorder care plans for Abdominal Trauma, Alzheimer's Disease, Asthma, Enteral Nutrition, Intravenous Conscious Sedation, Internal Radiation Therapy (Brachytherapy), Mechanical Ventilation, Parkinson's Disease, and Total Parenteral Nutrition. Evidence-based practice content presents the latest research findings and standards of care. Updated NANDA nursing diagnoses, NIC interventions, and NOC outcomes reflect the latest nursing taxonomies. An open, user-friendly design makes it easy to quickly locate essential information. The companion Evolve website features 71 new narrated 3D pathophysiology animations that correspond to disorders content in the text.

NURSING CARE PLANS & DOCUMENTATION

NURSING DIAGNOSES AND COLLABORATIVE PROBLEMS

Lippincott Williams & Wilkins The Fifth Edition of *Nursing Care Plans and Documentation* provides nurses with a comprehensive guide to creating care plans and effectively documenting care. This user-friendly resource presents the most likely diagnoses and collaborative problems with step-by-step guidance on nursing action, and rationales for interventions. New chapters cover moral distress in nursing, improving hospitalized patient outcomes, and nursing diagnosis risk for compromised human dignity. The book includes over 70 care plans that translate theory into clinical practice. Online Tutoring powered by Smarthinking--Free online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.

PHARMACOTHERAPY PRINCIPLES AND PRACTICE STUDY GUIDE

A CASE-BASED CARE PLAN APPROACH

McGraw Hill Professional A case-based companion study guide to *Pharmacotherapy Principles and Practice, 2e* - learn how to apply your knowledge to actual patient situations *Pharmacotherapy Principles and Practice Study Guide* uses 98 cases to help you learn how to apply pharmacotherapeutic concepts to specific patient situations. Each case is presented in a consistent manner, similar to what you would see in a clinical setting and focuses on one primary topic or problem. Patients discussed in these cases will have drug therapy problems requiring identification and management. For each case, you will be asked to develop a Patient Database, Drug Therapy Problem Worksheet, and Pharmacotherapy Care Plan using the forms provided. These forms are adapted from those originally developed by the American Society of Health System Pharmacists Clinical Skills program. Each case includes: Learning Objectives Patient Presentation Targeted Questions followed by a hint that refers you to pages in *Pharmacotherapy Principles and Practice, 2e* where you can find the information to answer the question Follow-up Global Perspective which highlights an issue related to the case that is important to countries outside of North America or involve different ethnic groups or races Case Summary

EVIDENCE-BASED NURSING GUIDE TO LEGAL & PROFESSIONAL ISSUES

Lippincott Williams & Wilkins Evidence should be the basis of all nursing practice and action. This book was written to provide nurses with guidelines for evidence-based nursing care.

NURSING CARE PLANS

GUIDELINES FOR INDIVIDUALIZING CLIENT CARE ACROSS THE LIFE SPAN

F.A. Davis Here's the step-by-step guidance you need to develop individualized plans of care while also honing your critical-thinking and analytical skills. You'll find about 160 care plans in all, covering acute, community, and home-care settings across the life span.

PHYSICAL REHABILITATION

F.A. Davis Rely on this comprehensive, curriculum-spanning text and reference now and throughout your career! You'll find everything you need to know about the rehabilitation management of adult patients... from integrating basic surgical, medical, and therapeutic interventions to how to select the most appropriate evaluation procedures, develop rehabilitation goals, and implement a treatment plan. Online you'll find narrated, full-color video clips of patients in treatment, including the initial examination, interventions, and outcomes for a variety of the conditions commonly seen in rehabilitation settings.
