## Strengthening Forensic Science in the United States

### A Path Forward

*National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.*

## Tourism Management

## An Introduction

SAGE *This introductory text provides readers with a robust understanding of tourism and its industries, including how destinations are developed, marketed and managed, and how tourism impacts communities, environments and economies. The authors discuss the critical issues affecting 21st century tourism, such as sustainability, the climate crisis, globalisation, community, technology, the environment and the sharing economy. The text has been fully updated in light of the Covid-19 pandemic and its notable, and in some cases lasting, impacts on the tourism industry. The text features new mini-case studies (snapshots) and international case studies from countries around the globe including USA, Saudi Arabia, India, China, New Zealand, Australia, Namibia and the UK. It discusses the latest trends in transport, hospitality, attractions and the travel trade and includes examples from major tourism companies including Trip.com, TUI and Airbnb. The book is suitable for students who are starting their tourism studies as part of their college or university education. Clare Inkson is a Senior Lecturer in Tourism and Course Leader of BA Tourism with Business at the University of Westminster, London. Lynn Minnaert is the Academic Director and Clinical Associate Professor at New York University's Jonathan M. Tisch Center for Hospitality and Tourism.*

## Small Scale Sport Tourism Events and Local Sustainable Development

## A Cross-National Comparative Perspective

Springer Nature *This book outlines the impacts of small scale sport tourism events on local sustainable development in different countries. Using half marathons organized in small and medium sized cities as an example, the chapters are robust case studies, applying a unified methodology in order to provide a clear overview of the sport tourism system in each country. The book begins with a description of*

*the methodologies used and an overview of the countries studied. The country chapters focus on several dimensions of sport tourism in each city, including but not limited to the history of past sport tourism events in the municipality, the characteristics of the city hosting the event, the demographic profile of participants in the event, and the quantifiable economic, environmental, and sociocultural impacts of the event. Each chapter concludes with analysis and policy recommendations for holding future events that contribute to local sustainable development. The book concludes by summarizing and comparing the main results across different countries, and presenting main conclusions and overarching recommendations. Written by international experts in sports tourism, this book is geared towards academic researchers and students, interested in sport tourism, sports economics, management, and sustainable development, as well as policy makers and professionals tasked with bringing such events to their cities.*

## The Geography of Transport Systems

Routledge Mobility is fundamental to economic and social activities such as commuting, manufacturing, or supplying energy. Each movement has an origin, a potential set of intermediate locations, a destination, and a nature which is linked with geographical attributes. Transport systems composed of infrastructures, modes and terminals are so embedded in the socio-economic life of individuals, institutions and corporations that they are often invisible to the consumer. This is paradoxical as the perceived invisibility of transportation is derived from its efficiency. Understanding how mobility is linked with geography is main the purpose of this book. The third edition of The Geography of Transport Systems has been revised and updated to provide an overview of the spatial aspects of transportation. This text provides greater discussion of security, energy, green logistics, as well as new and updated case studies, a revised content structure, and new figures. Each chapter covers a specific conceptual dimension including networks, modes, terminals, freight transportation, urban transportation and environmental impacts. A final chapter contains core methodologies linked with transport geography such as accessibility, spatial interactions, graph theory and Geographic Information Systems for transportation (GIS-T). This book provides a comprehensive and accessible introduction to the field, with a broad overview of its concepts, methods, and areas of application. The accompanying website for this text contains a useful additional material, including digital maps, PowerPoint slides, databases, and links to further reading and websites. The website can be accessed at: <http://people.hofstra.edu/geotrans> This text is an essential resource for undergraduates studying transport geography, as well as those interest in economic and urban geography, transport planning and engineering.

## Pre-Incident Indicators of Terrorist Incidents

### The Identification of Behavioral, Geographic and Temporal Patterns of Preparatory Conduct

*DIANE Publishing This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.*

### The Challenge of Obesity in the WHO European Region and the Strategies for Response

#### Summary

*World Health Organization* In a brief, clear and easily accessible way, this summary illustrates the dynamics of the obesity epidemic and its impact on public health throughout the WHO European Region, particularly in eastern countries. It describes how factors that increase the risk of obesity are shaped in different settings, such as the family, school, community and workplace. It makes both ethical and economic arguments for accelerating action against obesity, and analyses effective programs and policies in different government sectors, such as education, health, agriculture and trade, urban planning and transport. The summary also describes how to design policies and programs to prevent obesity and how to monitor progress, and calls for specific action by stakeholders: not only government sectors but also the private sector - including food manufacturers, advertisers and traders - and professional consumers' and international and intergovernmental organizations such as the European Union.

### Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation

#### Special Report of the Intergovernmental Panel on Climate Change

*Cambridge University Press* This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and

*adaptation to climate change, including policymakers, the private sector and academic researchers.*

## Health-Care Utilization as a Proxy in Disability Determination

*National Academies Press The Social Security Administration (SSA) administers two programs that provide benefits based on disability: the Social Security Disability Insurance (SSDI) program and the Supplemental Security Income (SSI) program. This report analyzes health care utilizations as they relate to impairment severity and SSA's definition of disability. Health Care Utilization as a Proxy in Disability Determination identifies types of utilizations that might be good proxies for "listing-level" severity; that is, what represents an impairment, or combination of impairments, that are severe enough to prevent a person from doing any gainful activity, regardless of age, education, or work experience.*
