## **PAEDIATRIC FORENSIC MEDICINE AND PATHOLOGY, SECOND EDITION**

---

CRC Press Child abuse and suspicious child deaths are very complicated matters for clinicians, pathologists, law enforcement officials and legal professionals to investigate. Meanwhile, the evidence base for forensic pathology, especially in paediatrics, is steadily growing. In Paediatric Forensic Medicine and Pathology, two internationally acclaimed editors have brought together a first class author team who provide an up-to-date, comprehensive, and thorough review of the contemporary problems encountered in practice today. Individual chapters explore the emerging role of imaging in the diagnosis of non-accidental injury and compare recent evidence contrasting sudden infant death and SIDS; the head and neck injury chapter carefully explores the 'shaken baby syndrome' and similar patterns of injury that have recently gained widespread media attention. Special emphasis is given to interview and assessment procedures, and useful clinical forms are included throughout the book. Whether in a clinical, laboratory, or legal setting, readers dealing with forensic inquiries or who are in preparation for court will find the

## **POLICE COMMUNITY SUPPORT OFFICERS**

---

Clarendon Studies in Criminology Police Community Support Officers: Cultures and Identities within Pluralised Policing presents the first in-depth ethnographic study of Police Community Support Officers (PCSOs) since the creation of the role in 2002. Situated within the tradition of police ethnographies, this text examines the working worlds of uniformed patrol support staff in two English police forces. Based on over 350 hours of direct observation and 33 interviews with PCSOs and police constables in both urban and rural contexts, Police Community Support Officers offers a

detailed analysis of the operational and cultural realities of pluralised policing from within. Using a dramaturgic framework, the author finds that PCSOs have been undermined by their own organisations from the beginning, which has left a lasting legacy in terms of their relationships and interactions with police officer colleagues. The implications of this for police cultures, community policing approaches and the success of pluralisation are examined. The author argues that while PCSOs can have similar occupational experiences to constables, their particular circumstances have led to a unique occupational culture, one which has implications for existing police culture theories. The book considers these findings in light of budget reductions and police reforms occurring across the sector, processes in which PCSOs are particularly vulnerable.
