Worlds of Music: An Introduction to the Music of the World's Peoples, Shorter Version

Cengage Learning This shorter version of the best-selling **WORLDS OF MUSIC** provides much of the authoritative coverage of the comprehensive version in a format that's accessible to students without any background or training in music. Using a case-study approach, the text presents in-depth explorations of music of several cultures from around the world. The authors, all ethnomusicologists working in their fields of expertise, base their discussions of music-cultures on their own fieldwork, and give students a true sense of both the music and culture that created it. General editor, Jeff Todd Titon, has written the text's opening chapter that introduces students to ethnomusicology and relates each chapter's music heard on the accompanying CDs to the fundamentals of music in a worldwide context. The text concludes with a chapter that invites students to participate by undertaking a fieldwork research project that increases a student's understanding of music in daily life. The supplementary three-CD set works hand in hand with the authors' prose, providing students with access to a wide range of music-cultures and include authentic recordings from the authors' fieldwork. Leading off is the long-standing jewel in the **WORLDS OF MUSIC** crown -- James Koetting's magnificent recording of postal workers canceling stamps at the University of Ghana post office. A Western-sounding hymn tune performed against African rhythms, this piece, more than any other, lets the student hear contrasting music-cultures. Global Mandatory Fair Use

The Nature and Scope of the Right to Quote Copyright Works

Cambridge University Press In a path-breaking work, Tanya Aplin and Lionel Bently make the case that the quotation exception in Article 10 of the Berne Convention constitutes a global, mandatory, fair use provision. It is global, they argue, because of the reach of Berne qua Berne and qua TRIPS, and its mandatory nature is apparent from the clear language of Article 10 and its travaux. It relates to 'use' that is not limited by type of work, type of act, or purpose and it is 'fair' use because the work must be made available to the public, with attribution, and the use must be proportionate and consistent with fair practice. By explaining the contours of global, mandatory fair use - and thus displacing the 'three-step test' as the dominant, international copyright norm governing copyright exceptions - this book creates new insights into how national exceptions should be framed and interpreted.

Music and the Child

Children are inherently musical. They respond to music and learn through music. Music expresses children's identity and heritage, teaches them to belong to a culture, and develops their cognitive well-being and inner self worth. As professional instructors, childcare workers, or students looking forward to a career working with children, we should continuously search for ways to tap into children's natural reservoir of enthusiasm for singing, moving and experimenting with instruments. But how, you might ask? What music is appropriate for the children I'm working with? How can music help inspire a well-rounded child? How do I reach and teach children musically? Most importantly perhaps, how can I incorporate music into a curriculum that marginalizes the arts? This book explores a holistic, artistic, and integrated approach to understanding the developmental connections between music and children. This book guides professionals to work through music, harnessing the processes that underlie music learning, and outlining developmentally appropriate methods to understand the role of music in children's lives through play, games, creativity, and movement. Additionally, the book explores ways of applying music-making to benefit the whole child, i.e., socially, emotionally, physically, cognitively, and linguistically.
