It provides strong coverage on the basics of policing plus current and relevant topics such as female, gay and lesbian, and racial/ethnic minorities officers, policing issues in both rural and urban settings, police misconduct, accountability and ethics, and more. **The New World of Police Accountability** SAGE Publications The subject of police accountability includes some of the most important developments in American policing: the control of officer-involved shootings and use of force; citizen complaints and the best procedures for handling them; federal 'pattern or practice' litigation against police departments; allegations of race discrimination; early intervention systems to monitor officer behavior; and police self-monitoring efforts. The Second Edition of *The New World of Police Accountability* covers these subjects and more with a sharp and critical perspective. It provides readers with a comprehensive description of the most recent developments and an analysis of what works, what reforms are promising, and what has proven unsuccessful. The book offers detailed coverage of critical incident reporting; pattern analysis of critical incidents; early intervention systems; internal and external review of citizen complaints; and federal consent decrees. **Sentencing Law and Practice** This new edition of *Sentencing Law and Practice* provides judges and practitioners with a comprehensive and reliable analysis of Irish sentencing law, with particular emphasis on general principles. Author Thomas O Malley is a Senior Lecturer in Law at NUI Galway, a practising barrister and a member of the Law Reform Commission. He has published widely in the fields of criminal law and criminal justice **Benjamin's Sale of Goods Policing The Essentials** SAGE Publications One of the most diverse and inclusive books for the policing course, *Policing: The Essentials*, focuses on core concepts and contemporary research to provide a foundational understanding of policing in the current climate of criminal justice. **Core Concepts in Criminal Law and Criminal Justice** Cambridge University Press The trans-jurisdictional discourse on criminal justice is often hampered by mutual misunderstandings. The translation of legal concepts from English into other languages and vice versa is subject to ambiguity and potential error: the same term may assume different meanings in different legal contexts. More importantly, legal systems may choose differing theoretical or policy approaches to resolving the same issues, which sometimes - but not always - lead to similar outcomes. This book is the second volume of a series in which eminent scholars from German-speaking and Anglo-American jurisdictions work together on comparative essays that explore foundational concepts of criminal law and procedure. Each topic is illuminated from German and Anglo-American perspectives, and differences and similarities are analysed. **Essential Magistrates' Courts Law** Waterside Press In this concise and valuable book the authors distil their vast expertise for the benefit of all those needing quick and targeted points of reference on key aspects of magistrates' court law, whether as newcomers, justices, legal advisers, or criminal practitioners. Hugely informed and presented in an accessible format, it explains the central law, practice and procedure of these courts. The framework of summary justice has changed comprehensively in the past decade in terms of evidence, procedure, guidelines, sentencing, training and the fair but efficient expedition of cases. This book sets out these developments as well as inescapable aspects of case management. Gathers core information in one place. Sets out key processes in a manageable and readable way. Reviews 'Readable and blissfully concise... There are some nuggets for every reader, however much we might think we know... An excellent addition to the bookshelf at a modest price'-- *The Law Society Gazette* (external link). 'Howard Riddle and Robert Zara have effectively produced a must-read for any judge, magistrate or lawyer practising in the magistrates' courts. This book will become the reference book to carry to court ... We thoroughly recommend it to all new judges, deputies and magistrates'— Emma Arbuthnot, Senior District Judge (Chief Magistrate) for England and Wales; John Bache, Chairman of the Magistrates Association; Duncan Webster, Chairman, Magistrates' Leadership Executive. 'A very clear, succinct and practical guide which would be of great value to a pupil or junior practitioner finding their feet'— Anna Banfield, BPP. 'How useful your book is and how clear and well written I have found it. Undoubtedly an extremely useful resource'— Tom Lees JP, Greater Manchester. **Resource Book on the Use of Force and Firearms in Law Enforcement** United Nations This resource book explores international law sources relevant to the use of force and the general responsibility of law enforcement authorities for the use of force. It discusses a number of instruments of force, including firearms, and the conditions under which these should be used. It further examines the possible use of force in a number of specific policing situations. Finally, it also outlines good practices for accountability in the use of force and firearms by law enforcement officials. **Criminal liability in regulatory contexts a consultation paper** The Stationery Office In this consultation paper, the Law Commission sets out the case for reducing the scope for criminal law to be used in regulated fields such as farming, food safety, banking and retail sales. Criminal sanctions should only be used to tackle serious wrongdoing and it is out of proportion for regulators to rely wholly on the criminal law to punish and deter activities that are merely 'risky', unless the risk involved is a serious one. There has been a steep increase in the number of criminal offences created since the late 1980s to penalise risk-taking. The areas regulated cover a wide range of risk-posing activities, and involve millions of people and thousands of businesses. By turning to civil penalties for minor breaches, regulators could reduce costs to themselves and the criminal justice system by £11 million a year. In some cases, criminal prosecution can cost almost twice what the courts obtain in fines. The paper proposes that: (i) regulatory authorities should make more use of cost-effective, efficient and fairer civil measures to govern standards of behaviour; (ii) a set of common principles should be established to help agencies consider when and how to use the criminal law to tackle serious wrongdoing, and (iii) existing low-level criminal offences should be repealed where civil penalties could be as effective. Where criminal offences are created in regulatory contexts, they should require proof of fault elements such as intention, knowledge, or a failure to take steps to avoid harm being done or serious risks posed. **Participating in Crime** The Stationery Office This is the second of two Commission reports which examine options for reform of the law relating to criminal liability for encouraging or assisting another person to commit an offence (the previous report 'Inchoate liability for assisting and encouraging crime' was published in July 2006 as Cm. 6878 (Law Com. no. 300, ISBN 9780101687829). This report focuses on the law of secondary liability and examines the problems with the law as it currently stands; the differences between inchoate liability and secondary liability; recommendations to introduce statutory schemes of secondary liability and of innocent agency and a new offence of causing the commission of a no fault offence; defences and exemptions; and extra-territorial jurisdiction. It includes the text of two draft bills: *Participating in Crime Bill* and *Participating in Crime (Jurisdiction, Procedure and Consequential Provisions) Bill*. Taken together, the recommendations contained in both reports seek to establish a system whereby inchoate and secondary liability will support and supplement each other in a way that is rational and fair. **Individual Criminal Responsibility in International Law** Oxford University Press Atrocities such as genocide or crimes against humanity are usually committed by a large number of perpetrators. Moreover, those who masterminded the crimes may not have actively participated. This book sets out how these people can be held responsible for their crimes by international criminal tribunals. **A Treatise on the Law of Trusts and Trustees** Beard Books **Commentary on the Law of the International Criminal Court** Torkel Opsahl Academic EPublisher **Murder, Manslaughter and Infanticide Project 6 of the Ninth Programme of Law Reform : Homicide** The Stationery Office A Law Commission consultation paper 'A new homicide act for England and Wales?' was published as LCCP 177 (ISBN 0117302643) in April 2006 **Blackstone's Criminal Practice 2020** Your single point of reference on criminal law and procedure, Blackstone's *Criminal Practice* is the only text to offer all the material you need to practise with ease in the Crown and magistrates' courts. Regularly cited, its incomparable quality and accessibility make it an essential reference for all criminal law specialists. **Expert evidence in criminal proceedings in England and Wales** The Stationery Office This project addressed the admissibility of expert evidence in criminal proceedings in England and Wales. Currently, too much expert opinion evidence is admitted without adequate scrutiny because no clear test is being applied to determine whether the evidence is sufficiently reliable to be admitted. Juries may therefore be reaching conclusions on the basis of unreliable evidence, as confirmed by a number of miscarriages of justice in recent years. Following consultation on a discussion paper (LCCP 190, 2009, ISBN 9780118404655) the Commission recommends that there should be a new reliability-based admissibility test for expert evidence in criminal proceedings. The test would not need to be applied routinely or unnecessarily, but it would be applied in appropriate cases and it would result in the exclusion of unreliable expert opinion evidence. Under the test, expert opinion evidence would not be admitted unless it was adjudged to be sufficiently reliable to go before a jury. The draft *Criminal Evidence (Experts) Bill* published with the report (as Appendix A) sets out the admissibility test and also provides the guidance judges would need when applying the test, setting out the key reasons why an expert's opinion evidence might be unreliable. The Bill also codifies (with slight modifications) the uncontroversial aspects of the present law, so that all the admissibility requirements for expert evidence would be set out in a single Act of Parliament and carry equal authority. **Electronic Signatures in Law** Cambridge University Press Using case law from multiple jurisdictions, Stephen Mason examines the nature and legal bearing of electronic signatures. **EU Constitutional Law An Introduction** Bloomsbury Publishing The second revised edition of this acclaimed book brings the story of the EU's constitutional journey up to date. The EU's constitution, composed of a myriad of legal texts, case law and practice, is a moving target subject to continuous change, and the past two years have seen no slacking in the pace of that change. With a wider geographical ambit than ever, the EU faces unprecedented political, economic and cultural challenges, all of which impact upon the evolution of its constitution. Moreover, the crisis in the Eurozone has given rise to the need for a whole new chapter focussing on the institutional reforms embarked upon in the quest to restore financial order. The book succeeds, where others have struggled, in making sense of the EU's complex constitutional order, focussing on its essential features but taking into account the profound changes that have taken place over the past 20 years. The EU has become much more than an internal economic market and has recently become active in areas such as immigration and third-country nationals, security and defence policy, and penal law and procedure, while the crisis in the Eurozone has triggered an increasing focus on economic and fiscal policy. Eschewing too much detail the authors underline the essential values, principles and objectives of the integration regime as well as its basic normative structure and hierarchy. In this context, the decentralised nature of the EU is highlighted as an integral part of its constitutional make-up. Recurring themes include European citizenship, fundamental rights and the rule of law. The book also confronts head-on the problems and challenges facing the Union and the gap which is often perceived between lofty ideals and harsh realities. The book will be useful to students of EU law and European integration but will also appeal to a broader audience of researchers and practitioners, including political scientists. **An Introduction to the Study of the Law of the Constitution** Springer A starting point for the study of the English Constitution and comparative constitutional law, *The Law of the Constitution* elucidates the guiding principles of the modern constitution of England: the legislative sovereignty of Parliament, the rule of law, and the binding force of unwritten conventions. **Writing Law Dissertations An Introduction and Guide to the Conduct of Legal Research** Pearson Education Shows the reader how to research and write a dissertation, covering planning, identifying key issues, utilising the appropriate research methods, time management issues, and managing one's supervision. This edited book outlines the major challenges and changes needed to achieve a more stable future for the policing profession and police organizations. The chapters come from innovative police leaders and officers as well as academics with subject matter expertise, to provide insight into how reform can be done with the police. It focusses on how leaders should understand and approach their role during times of instability and uncertainty. It starts with an examination of how policing reached this state of crisis and discusses some interviews

conducted with police leaders, particularly chiefs as agents of change and reform. This is followed by chapters from several veteran police leaders and personnel describing some of the factors that brought policing to this critical time of change and reform, how has policing evolved in the late 20th and early 21st centuries, and how that impacts the current environment, and some potential strategies to create meaningful change while considering unintended consequences. The following chapters from academics seek to define paths that policing can take toward needed changes that will increase legitimacy, trust, and equality of policing services. It speaks to students, academics and professionals interested in police organization and administration, police leadership, and contemporary issues in policing and criminal justice. **The Oxford Handbook of Criminal Law** Oxford University Press, USA Providing scholars with a comprehensive international resource, a common point of entry into cutting edge contemporary research and a snapshot of the state and scope of the field, this Handbook takes a broad approach to its subject matter, disciplinarily, geographically, and systemically. **Blackstone's Criminal Practice 2019** Oxford University Press, USA Led by Professor David Ormerod QC and David Perry QC, our team of authors has been hand-picked to ensure that you can trust our unique combination of authority and practicality. Brian Kerr was appointed as a judge of the High Court of Northern Ireland in 1993. He became the Lord Chief Justice of Northern Ireland in 2004 before being elevated to a peerage and appointed as the last Lord of Appeal in Ordinary in June 2009. Four months later, as Lord Kerr, he moved from the Appellate Committee of the House of Lords to the UK Supreme Court where, after exactly 11 years, he concluded his distinguished judicial career as the longest-serving Justice to date. During his career he established an exceptional reputation for independence of thought, fairness and humanitarianism. Lord Kerr's judicial mind has inspired and influenced a significant number of scholars and jurists throughout the UK and beyond. In this book, his unique brand of jurisprudence is examined alongside a catalogue of broader issues in which he displayed a keen interest during his lifetime. The volume includes topical contributions from a range of legal experts in Britain and Ireland. Lord Kerr's particular interest in public law, human rights law, criminal law, and family law is featured prominently, but so too is the importance of his dissenting judgments, some influential jurisprudence of the Judicial Committee of the Privy Council (where he sat on many occasions), the legacy of his influence on the law and legal system of Northern Ireland and the significance of his place in the historical development of judicial roles and responsibilities more generally. **How the Law Works** Routledge 'How the Law Works is a gem of a book, for law students and for everyone else. To each, he has added reflections on what has transpired since or an explanation of the British legal and political context that originally prompted it. Covering the history, engineering and architecture of the justice system, their common theme relates to the author's experiences as a barrister and judge, most notably in relation to the constitutional changes which have emerged in the last twenty years in the United Kingdom. **Women and the Law The Barrister's World--and the Nature of Law** An examination of the role of the advocate in the workings of the UK legal process.
