While states efforts to fulfill their international obligations in developing anti-trafficking legislations are recognized, their failure to carry out prosecutions of offenders and ensure protection of the victims reveals that law alone is not a sufficient instrument for realizing human rights and improving peoples lives. Faced with the sobering background of less than successful efforts by governmental entities to end the trade in humans, this research study recommends adopting essential elements of Catholic social teaching, which rests on the inherent dignity of human beings allowing the development of political, socio-cultural, and religious reforms that will increase the effectiveness of existing legislation designed to combat trafficking. This faith-based approach highlights the role that religion may play in fulfilling the discretionary provisions of the Palermo Protocol by promoting the welfare and protecting the life and dignity of the victims. Additionally, religion is composed of sound moral ethics that determine people's behavior to refrain from the sinful conduct of trafficking. It also creates a sense of ethical responsibility that promotes supply chain transparency and ethical purchasing as well as advocating social reforms and anti-trafficking legislations initiatives. In fact, the

author's approach, may be a model for other regions in the world and will be of interest to scholars, law and policy makers, human rights advocates and law enforcement agents working in the field of trafficking in persons. . **Annual Report on the OECD Guidelines for Multinational Enterprises 2008 Employment and Industrial Relations** *OECD Publishing* Provides an account of the actions the 41 adhering governments have taken over the past year to enhance the contribution of the Guidelines to the improved functioning of the global economy. **Seen and (Mostly) Unseen The True Costs of E-Verify** *DIANE Publishing* **Employment Law New Challenges in the Business Environment** *Pearson College Division* Employment Law, Personnel Law and Labor law. To overcome persistent institutional resistance and barriers to change, the NSF ADVANCE institutional transformation initiative, instituted in 2001, seeks to increase the workforce participation of women faculty in academic science and engineering through systematic institutional transformation. This book assesses the equity, diversity and inclusion outcomes of the changes underway at 19 universities. It provides a comprehensive, stand-alone description of successful approaches to increase the recruitment, advancement and retention of women faculty throughout the academic career pipeline. The findings show that targeted

institutional transformation at these 19 U.S. universities has resulted in significant increases in women faculty's workforce participation, as well as improved gender equity and inclusion. Analyses by discipline show that the greatest changes have occurred within engineering and natural science disciplines at these universities. Yet the results also point to the overall continued underrepresentation of women faculty in academic science and engineering at the nation's research universities. A framework of organizational change is derived to serve as a template to academic and other organizations seeking transformation to enhance gender equity, diversity and inclusion. **Annual Report on the OECD Guidelines for Multinational Enterprises 2008 Employment and Industrial Relations** OECD Publishing Provides an account of the actions the 41 adhering governments have taken over the past year to enhance the contribution of the Guidelines to the improved functioning of the global economy. **Teachers who Thrive Navigating the Self-efficacy Career Journey** Rowman & Littlefield This book serves as a travel guide for teachers to grow their self-efficacy and thrive. **JOB INTERVIEW Offshore Drilling Rigs** Petrogav International The job interview is probably the most important step you will take in your job search journey.
