AIRLINE OPERATIONS AND MANAGEMENT

A MANAGEMENT TEXTBOOK

Taylor & Francis **Airline Operations and Management: A Management Textbook** is a survey of the airline industry, mostly from a managerial perspective. It integrates and applies the fundamentals of several management disciplines, particularly economics, operations, marketing and finance, in developing the overview of the industry. The focus is on tactical, rather than strategic, management that is specialized or unique to the airline industry. The primary audiences for this textbook are both senior and graduate students of airline management, but it should also be useful to entry and junior level airline managers and professionals seeking to expand their knowledge of the industry beyond their own functional area.

WOMEN IN MANAGEMENT

A FRAMEWORK FOR SUSTAINABLE WORK-LIFE INTEGRATION

Taylor & Francis This book presents a realistic perspective on the paradoxes employees face when navigating work and personal responsibilities for career success. The author answers the critical question of how to achieve sustainable and rewarding work-life integration from a perspective of "both/and" rather than "either/or." While most books focus on a fragmented, hyper-effective view of women and leadership, this book advances the need for an integrated approach. Its Competing Values Framework acts as an organizing model that aligns personal competency with organizational capability, helping readers to identify important leadership roles and competencies, break societal barriers, and choose the right set of behaviors to fit their personal and professional goals. In-chapter text boxes provide personal insight from real employees both entering and established in leadership positions, offering a varied perspective on the challenges and resolutions available to women in management. As men become more engaged with their families, they too will find this book a useful tool. Students in diversity management, women and management, career development, leadership, and organizational behavior classes will benefit from this realistic and sustainable alternative to the "have it all" model.

FCC RECORD

A COMPREHENSIVE COMPILATION OF DECISIONS, REPORTS, PUBLIC NOTICES, AND OTHER DOCUMENTS OF THE FEDERAL COMMUNICATIONS COMMISSION OF THE UNITED STATES

THE BUSINESS MODEL INNOVATION PROCESS

PREPARATION, ORGANIZATION AND MANAGEMENT

[Routledge](#) **Business Model Innovation Process: Preparation, Organization and Management** examines a range of critical questions that merit thoughtful interdisciplinary consideration, such as: Why do business models, and their innovation in particular, matter today? How can the process of business model innovation be understood, organized and managed adequately under increasingly volatile, uncertain, complex and ambiguous technological, business and geo-political conditions? What should decision-making and risk-management look like under these conditions, with managers whose rationality is bounded? The book offers a detailed account of the relatively unknown process of business model innovation by looking into the intersection of strategic, operations and innovation management, organizational design, decision-making and performance management. In doing so, this book addresses fundamental issues, and introduces new ideas and theoretical perspectives. In envisioning and thinking about various potential scenarios of business model innovation and understanding how to organize for each of these under different conditions, the book provides original arguments and suggestions for practitioners. For that purpose, the book also offers many compelling real-life examples of business models and their innovation. Combining theory and practice, this book is an essential read for researchers and academics of business model innovation, as well as strategic management, digital transformation, innovation management and organizational change. It will also be of direct interest to practitioners and business leaders seeking new perspectives to increase their competitive advantage.

MANAGEMENT

[Cengage Learning](#) **MANAGEMENT, 12E** includes several innovative pedagogical features to help students understand their management capabilities and learn what it's like to manage in an organization today. Each of the 19 chapters begins with an opening questionnaire that engages the reader's interest, directly connects to the topic of the chapter, and enables students to see how they respond to situations and challenges that real-life managers typically face. A New Manager Self-Test in each chapter provides students with further insight into how they would function in the real world of management. The Remember This bullet-point summaries at the end of each major chapter section give students a snapshot of the key points and concepts covered in that section. The end-of-chapter questions have been carefully revised to encourage critical thinking and application of chapter concepts, and Small Group Breakout exercises give students the opportunity to apply concepts while building teamwork skills. Ethical dilemmas, all-new end-of-chapter cases, and a fully updated set of On the Job video cases help students sharpen their diagnostic skills for management problem solving. The chapter sequence in **MANAGEMENT** is organized around the management functions of planning, organizing, leading, and controlling. These four functions effectively encompass management research and the characteristics of the manager's job.
