EXTRATERRESTRE ALLA PARI

THE HOUSE IN THE TREE

Alma Books All children dream of having a secret house where they can live on their own, far from any rules and regulations. But not all of them are as lucky as Aglaia, who lives at the top of a magical tree together with her friend Bianca and an incredible host of flying dogs, talking cats, carnivorous flowers and children who speak in verse. Inventively illustrated by Quentin Blake, Aglaia's adventures - and her battles with the gruff Signor Brullo and the woodmen who want to cut down the tree - are sure to enchant and inspire the imagination of every child.

THE DAY AFTER ROSWELL

Simon and Schuster Since 1947, the mysterious crash of an unidentified aircraft at Roswell, New Mexico, has fueled a firestorm of speculation and controversy with no conclusive evidence of its extraterrestrial origin -- until now. Colonel Philip J. Corso (Ret.), a member of President Eisenhower's National Security Council and former head of the Foreign Technology Desk at the U.S. Army's Research & Development department, has come forward to tell the whole explosive story. Backed by documents newly declassified through the Freedom of Information Act, Colonel Corso reveals for the first time his personal stewardship of alien artifacts from the crash, and discloses the U.S. government's astonishing role in the Roswell incident: what was found, the cover-up, and how these alien artifacts changed the course of 20th century history.

They face problems in almost all sectors such as energy, water, communication, climate, food, education, transportation, social development, and economic growth.

THE TRANSLATION OF CHILDREN'S LITERATURE

A READER

Multilingual Matters In the last few decades a number of European scholars have paid an increasing amount of attention to children's literature in translation. This book not only provides a synthetic account of what has been achieved in the field, but also makes us fully aware of all the textual, visual and cultural complexities that translating for children entails.... Students of this subject have had problems in finding a book that attempted an up-to-date and comprehensive review of the field. Gillian Lathey's Reader does just this. Dr Piotr Kuhniewicz, Director, Centre for Translation and Comparative Cultural Studies University of Warwick.

TELEPHONE TALES

Reminiscent of Scheherazade and One Thousand and One Nights, Gianni Rodari's Telephone Tales is many stories within a story. Every night, a traveling father must finish a bedtime story in the time that a single coin will buy. One night, it's a carousel that adults cannot comprehend, but whose operator must be some sort of magician, the next, it's a land filled with butter men who melt in the sunshine. Awarded the Hans Christian Anderson Award in 1970, Gianni Rodari is widely considered to be Italy's most important children's author of the 20th century. Newly re-illustrated by Italian artist Valerio Vidali (The Forest), Telephone Tales entertains, while questioning and imagining other worlds.

INTELLIGENT DESIGN

MESSAGE FROM THE DESIGNERS

Raelian Foundation Years ago, people knew without a doubt that the Earth was flat. Even the top scientists of the day were certain that the sun revolved around the earth. Today, most people are sure that life on Earth is either the result of random evolution or a supernatural God. Or is it? In 'Intelligent Design', Rael presents us with a third option: that life on Earth was created by advanced human scientists from another world. In 1973, Rael was visited by one of these designers, who dictated a series of messages to him to share with all of humanity. This astonishing 'message from the designers' reveals knowledge on science, religion, love, relationships, government, meditation, infinity, sensuality, eternal life, and so much more, giving us the secrets to the past, present, and future of mankind...

THE ROLE OF TRANSLATORS IN CHILDREN'S LITERATURE

INVISIBLE STORYTELLERS

Routledge This book offers a historical analysis of key classical translated works for children, such as writings by Hans Christian Andersen and Grimms' tales. Translations dominate the earliest history of texts written for children in English, and stories translated from other languages have continued to shape its course to the present day. Lathey traces the role of the translator and the impact of translations on the history of English-language children's literature from the ninth century onwards. Discussions of popular texts in each era reveal fluctuations in the reception of translated children's texts, as well as instances of cultural mediation by translators and editors. Abridgement, adaptation, and alteration by translators have often been viewed in a negative light, yet a closer examination of historical translators' prefaces reveals a far more varied picture than that of faceless conduits or wilful censors. From William Caxton's dedication of his translated History of Jason to young Prince Edward in 1477 ('to thentent/he may begynne to lerne read Englissh'), to Edgar Taylor's justification of the first translation into English of Grimms' tales as a means of promoting children's imaginations in an age of reason, translators have recorded in prefaces and other writings their didactic, religious, aesthetic, financial, and even political purposes for translating children's texts.

THE WAR OF THE WORLDS

First Avenue Editions™ When a meteorite lands in Surrey, the locals don't know what to make of it. But as Martians emerge and begin killing bystanders, it quickly becomes clear—England is under attack. Armed soldiers converge on the scene to ward off the invaders, but meanwhile, more Martian cylinders land on Earth, bringing reinforcements. As war breaks out across England, the locals must fight for their lives, but life on Earth will never be the same. This is an unabridged version of one of the first fictional accounts of extraterrestrial invasion. H. G. Wells's military science fiction novel was first

published in book form in 1898, and is considered a classic of English literature.

THE CURIOUS INCIDENT OF THE DOG IN THE NIGHT-TIME

Random House Winner of the Whitbread Book of the Year 'Outstanding...a stunningly good read' Observer 'Mark Haddon's portrayal of an emotionally dissociated mind is a superb achievement... Wise and bleakly funny' Ian McEwan The Curious Incident of the Dog in the Night-Time is a murder mystery novel like no other. The detective, and narrator, is Christopher Boone. Christopher is fifteen and has Asperger's Syndrome. He knows a very great deal about maths and very little about human beings. He loves lists, patterns and the truth. He hates the colours yellow and brown and being touched. He has never gone further than the end of the road on his own, but when he finds a neighbour's dog murdered he sets out on a terrifying journey which will turn his whole world upside down.

INTERPRETATION

TECHNIQUES AND EXERCISES

Multilingual Matters In recent decades the explosive growth of globalization and regional integration has fuelled parallel growth in multilingual conferences. Although conference interpreting has come of age as a profession, interpreter training programs have had varied success, pointing to the need for an instructional manual which covers the subject comprehensively. This book seeks to fill that need by providing a structured syllabus and an overview of interpretation accompanied by exercises in various aspects of the art. It is meant to serve as a practical guide for interpreters and as a complement to interpreter training programs in the classroom and online, particularly those for students preparing for conference interpreting in international governmental and business settings. This expanded second edition includes additional exercises and provides direct links to a variety of web-based resources and practice speeches, also including additional language combinations.

BIOTECHNOLOGY OF BIOPOLYMERS

FROM SYNTHESIS TO PATENTS

Wiley-Blackwell The best of the "Biopolymers" series. Since only a small number of individuals can afford to buy the entire Biopolymers series, or would simply prefer a broader overview, this handbook contains the very best of biotechnology, with articles taken directly from Alexander Steinbüchel's successful series. As such, these two volumes cover the entire range of biopolymers and not just one chemical class, with the focus on the biotechnological systems and processes under development for a cost effective production, isolation and modification of biopolymers. Furthermore it covers the fundamentals of their chemical and physical properties, their occurrence, metabolism, biosynthesis and biodegradation as well as their industrial applications as renewable resources, novel materials and technical applications. With its contributions similarly structured for easy data comparison and an extensive table of patents, this is an ideal reference for medium sized laboratories and libraries.

CAPITALIST REALISM

IS THERE NO ALTERNATIVE?

John Hunt Publishing After 1989, capitalism has successfully presented itself as the only realistic political-economic system - a situation that the bank crisis of 2008, far from ending, actually compounded. The book analyses the development and principal features of this capitalist realism as a lived ideological framework. Using examples from politics, films, fiction, work and education, it argues that capitalist realism colours all areas of contemporary experience. But it will also show that, because of a number of inconsistencies and glitches internal to the capitalist reality program capitalism in fact is anything but realistic.

PHENOMENOLOGY AND THE HUMAN POSITIONING IN THE COSMOS

THE LIFE-WORLD, NATURE, EARTH: BOOK TWO

Springer Science & Business Media The classic conception of human transcendental consciousness assumes its self-supporting existential status within the horizon of life-world, nature and earth. Yet this assumed absoluteness does not entail the nature of its powers, neither their constitutive force. This latter call for an existential source reaching beyond the generative life-world network. Transcendental consciousness, having lost its absolute status (its point of reference) it is the role of the logos to lay down the harmonious positioning in the cosmic sphere of the all, establishing an original foundation of phenomenology in the primogenital onto-poiesis of life.

than 1,000 pages. It stands alone as the definitive work in this field, and will serve as a modern messenger of scientific discovery and provide a look into the future of our solar system. · Forty-seven chapters from 75+ eminent authors review fundamental topics as well as new models, theories, and discussions · Each entry is detailed and scientifically rigorous, yet accessible to undergraduate students and amateur astronomers · More than 700 full-color digital images and diagrams from current space missions and observatories amplify the chapters · Thematic chapters provide up-to-date coverage, including a discussion on the new International Astronomical Union (IAU) vote on the definition of a planet · Information is easily accessible with numerous cross-references and a full glossary and index

HISTORY AND MEMORY

Columbia University Press In this brilliant meditation on conceptions of history, Le Goff traces the evolution of the historian's craft. Examining real and imagined oppositions between past and present, ancient and modern, oral and written history, *History and Memory* reveals the strands of continuity that have characterized historiography from ancient Mesopotamia to modern Europe.

THE COSMIC CODE

Simon and Schuster Reveals Zecharia Sitchin's groundbreaking research into the code left behind by the creators of humanity. • Explains how the Anunnaki were not merely the mythical gods of the Sumerians, but rather the founders of human life on Earth. • Using Biblical and ancient Sumerian sources, explains how to decode these messages our star ancestors left behind. Daring to challenge our long-held beliefs about the origins of man, Zecharia Sitchin suggests that humans are not the children of God, but rather the children of the Anunnaki, an ancient race from the planet Nibiru. His revolutionary theories are supported by his intense scrutiny of not only ancient Sumerian texts but also stone structures all over the world. The similarities and astrological significance of these formations suggests that rather than looking for guidance from leaders here on Earth, humanity should instead look to the sky for answers. The Earth Chronicles deal with the history and prehistory of Earth and humankind. Each book in the series is based upon information written on clay tablets by the ancient civilizations of the Near East. For the first time, the entire Earth Chronicles series is now available in a hardcover collector's edition.

ENLIGHTENMENT AND DIASPORA

THE ARMENIAN AND JEWISH CASES

Atlanta, Ga. : Scholars Press Scholars address the comparative historical paths of Jews and Armenians in absorbing and disseminating the values of the Enlightenment', and challenge conventional assumptions about the Enlightenment movement in Central and Western Europe. They explore the relationship between traditional religious sensibilities and new Enlightenment values, and the relationship among Enlightenment, diaspora, and nationalism. PHYSIOLOGUS

One of the most popular and widely read books of the Middle Ages, "Physiologus" contains allegories of beasts, stones, and trees both real and imaginary, infused by their anonymous author with the spirit of Christian moral and mystical teaching. Accompanied by an introduction that explains the origins, history, and literary value of this curious text, this volume also reproduces twenty woodcuts from the 1587 version. Originally composed in the fourth century in Greek, and translated into dozens of versions through the centuries, "Physiologus" will delight readers with its ancient tales of ant-lions, centaurs, and hedgehogs and their allegorical significance. An elegant little book . . . still diverting to look at today. . . . The woodcuts reproduced from the 1587 Rome edition are alone worth the price of the book. Raymond A. Sokolov, "New York Times Book Review"

PRACTICING MEMORY IN CENTRAL AMERICAN LITERATURE

Springer Through penetrating analysis of twentieth-century historical fiction from Central America this book asks: why do so many literary texts in the region address historical issues? What kinds of stories are told about the past when authors choose the fictional realm to represent history? Why access memory through fiction and poetry? Nicole Caso traces the active interplay between language, space, and memory in the continuous process of defining local identities through literature. Ultimately, this book looks to the dynamic between form and content to identify potential maps that are suggested in each of these texts in order to imagine possibilities of action in the future.
