The Republic of India

The Development of Its Laws and Constitution

World Development Report 2013

Jobs

World Bank Publications **Jobs provide higher earnings and better benefits as countries grow, but they are also a driver of development. Poverty falls as people work their way out of hardship and as jobs empowering women lead to greater investments in children. Efficiency increases as workers get better at what they do, as more productive jobs appear, and less productive ones disappear. Societies flourish as jobs bring together people from different ethnic and social backgrounds and provide alternatives to conflict. Jobs are thus more than a byproduct of economic growth. They are transformational —they are what we earn, what we do, and even who we are. High unemployment and unmet job expectations among youth are the most immediate concerns. But in many developing countries, where farming and self-employment are prevalent and safety nets are modest are best, unemployment rates can be low. In these countries, growth is seldom jobless. Most of their poor work long hours but simply cannot make ends**

meet. And the violation of basic rights is not uncommon. Therefore, the number of jobs is not all that matters: jobs with high development payoffs are needed. Confronted with these challenges, policy makers ask difficult questions. Should countries build their development strategies around growth, or should they focus on jobs? Can entrepreneurship be fostered, especially among the many microenterprises in developing countries, or are entrepreneurs born? Are greater investments in education and training a prerequisite for employability, or can skills be built through jobs? In times of major crises and structural shifts, should jobs, not just workers, be protected? And is there a risk that policies supporting job creation in one country will come at the expense of jobs in other countries? The World Development Report 2013: Jobs offers answers to these and other difficult questions by looking at jobs as drivers of development—not as derived labor demand—and by considering all types of jobs—not just formal wage employment. The Report provides a framework that cuts across sectors and shows that the best policy responses vary across countries, depending on their levels of development, endowments, demography, and institutions. Policy fundamentals matter in all cases, as they enable a vibrant private sector, the source of most jobs in the world. Labor policies can help as well, even if they are less critical than is often assumed. Development policies, from making smallholder farming viable to fostering functional cities to engaging in global markets, hold the key to success.

The Special Artist in American Culture

A Biography of Frank Hamilton Taylor (1846-1927)

Peter Lang Pub Incorporated **Frank Hamilton Taylor represents an important, but overlooked, group of documentalists of American history - Special Artists. These were men and women who wrote and illustrated articles for the pictorial press which included "Harper's Weekly" and "Frank Leslie's." Well known Specials like Winslow Homer and Frederic Remington have received only cursory acknowledgment of the importance of their early work for these papers. However, studying the works and lives of Special Artists, like Taylor, can give unique insights into the development of American culture. His achievements give us a better understanding of the emergence of middle-class values at the turn of the century.**

An Imperial Vision

Indian Architecture and Britain's Raj

Oxford University Press, USA **This book looks at the relationship between culture and power expressed in architectural forms employed by the British in India. These buildings reflect the choices made by the British in their politics as imperial rulers.**

Indigenous Peoples, Poverty, and Development

Cambridge University Press **This is the first book that documents poverty systematically for the world's indigenous peoples in developing regions in Asia, Africa, and Latin America. The volume compiles results for roughly 85 percent of the world's indigenous peoples. It draws on nationally representative data to compare trends in countries' poverty rates and other social indicators with those for indigenous sub-populations and provides comparable data for a wide range of countries all over the world. It estimates global poverty numbers and analyzes other important development indicators, such as schooling, health, and social protection. Provocatively, the results show a marked difference in results across regions, with rapid poverty reduction among indigenous (and non-indigenous) populations in Asia contrasting with relative stagnation - and in some cases falling back - in Latin America and Africa. Two main factors motivate the book. First, there is a growing concern among poverty analysts worldwide that countries with significant vulnerable populations - such as indigenous peoples - may not meet the Millennium Development Goals, and thus there exists a consequent need for better data tracking conditions among these groups. Second, there is a growing call by indigenous organizations, including the United Nations Permanent Forum on Indigenous Peoples, for solid, disaggregated data analyzing the size and causes of the "development gap."**

The Indian Princes and their States

Cambridge University Press **Although the princes of India have been caricatured as oriental despots and British stooges, Barbara Ramusack's study argues that the British did not create the princes. On the contrary, many were consummate politicians who exercised considerable degrees of autonomy until the disintegration of the princely states after independence. Ramusack's synthesis has a broad temporal span, tracing the evolution of the Indian kings from their pre-colonial origins to their**

roles as clients in the British colonial system. The book breaks ground in its integration of political and economic developments in the major princely states with the shifting relationships between the princes and the British. It represents a major contribution, both to British imperial history in its analysis of the theory and practice of indirect rule, and to modern South Asian history, as a portrait of the princes as politicians and patrons of the arts.

Oriental Scenery

One Hundred and Fifty Views of the Architecture, Antiquities, and Landscape Scenery of Hindoostan

Psychological Perspectives on Religion and Religiosity

Routledge **Is religion to blame for deadly conflicts? Should religious behaviour be credited more often for acts of charity and altruism? In what ways are religious and 'spiritual' ideas, practices and identities surviving and changing as religion loses its political power in those parts of the world which are experiencing increasing secularization? Written by one of the world's leading authorities on the psychology of religion and social identity, Psychological Perspectives on Religion and Religiosity offers a comprehensive and multidisciplinary review of a century of research into the origins and consequences of religious belief systems and religious behaviour. The book employs a unique theoretical framework that combines the 'new' cognitive-evolutionary psychology of religion, examining the origins of religious ideas, with the 'old' psychology of religiosity, which looks at correlates and consequences. It examines a wide range of psychological variables and their relationship with religiosity. It is also provides fresh insights into classical topics in the psychology of religion, such as religious conversion, the relevance of Freud's ideas about religion and religiosity, the meaning of secularization, and the crucial role women play in religion. The book concludes with the author's reflections on the future for the psychology of religion as a field. Psychological Perspectives on Religion and Religiosity will be invaluable for academic researchers in psychology, sociology, anthropology, political science, economics, and history worldwide. It will also be of great interest to advanced undergraduate students and graduate students across the social**

sciences.

What Drives Innovation? Lessons from COVID-19 R&D

International Monetary Fund To examine the drivers of innovation, this paper studies the global R&D effort to fight the deadliest diseases and presents four results. We find: (1) global pharmaceutical R&D activity—measured by clinical trials—typically follows the ‘law of diminishing effort’: i.e. the elasticity of R&D effort with respect to market size is about 1/2 in the cross-section of diseases; (2) the R&D response to COVID-19 has been a major exception to this law, with the number of COVID-19 trials being 7 to 20 times greater than that implied by its market size; (3) the aggregate short-term elasticity of science and innovation can be very large, as demonstrated by aggregate flow of clinical trials increasing by 38% in 2020, with limited crowding out of trials for non-COVID diseases; and (4) public institutions and government-led incentives were a key driver of the COVID-19 R&D effort—with public research institutions accounting for 70 percent of all COVID-19 clinical trials globally and being 10 percentage points more likely to conduct a COVID-19 trial relative to private firms. Overall, while economists are naturally in favor of market size as a driving force for innovation (i.e. “if the market size is sufficiently large then innovation will happen”), our work suggests that scaling up global innovation may require a broader perspective on the drivers of innovation—including early-stage incentives, non-monetary incentives, and public institutions.

Speaking of Faith

Why Religion Matters--and How to Talk About It

Penguin A thought-provoking, original appraisal of the meaning of religion by the host of public radio's *On Being* Krista Tippett, widely becoming known as the Bill Moyers of radio, is one of the country's most intelligent and insightful commentators on religion, ethics, and the human spirit. With this book, she draws on her own life story and her intimate conversations with both ordinary and famous figures, including Elie Wiesel, Karen Armstrong, and Thich Nhat Hanh, to explore complex subjects like science, love, virtue, and violence within the context of spirituality and everyday life. Her way of speaking about the mysteries of life--and of listening with care to those who endeavor to understand those mysteries--is nothing short of revolutionary.

Indigenous Peoples and Poverty

An International Perspective

Zed Books Ltd. **This book brings together two of today's leading concerns in development policy - the urgent need to prioritize poverty reduction and the particular circumstances of indigenous peoples in both developing and industrialized countries. The contributors analyse patterns of indigenous disadvantage worldwide, the centrality of the right to self-determination, and indigenous people's own diverse perspectives on development. Several fundamental and difficult questions are explored, including the right balance to be struck between autonomy and participation, and the tension between a new wave of assimilationism in the guise of 'pro-poor' and 'inclusionary' development policies and the fact that such policies may in fact provide new spaces for indigenous peoples to advance their demands. In this regard, one overall conclusion that emerges is that both differences and commonalities must be recognised in any realistic study of indigenous poverty.**

Princes & Painters

In Mughal Delhi 1707-1857

Penguin UK **A dazzling celebration of the art and artists of late-Mughal Delhi Between 1707 and 1857, Delhi was a hotbed of political intrigue and power struggles the Mughal Empire was on the decline and the British East India Company was emerging as a formidable power. In 1857, these tensions would culminate in the Mutiny that led to the end of Mughal dominion and the beginning of the British Raj. But this turbulent epoch also witnessed a burst of artistic innovation and experimentation. Delhis artists were increasingly employed by Company officials as well as the Mughal and regional courts, and thus became adept at improvising with a variety of techniques, creating traditional miniatures while continually experimenting with new European styles. Art historians are only now coming to recognize the richness and ingenuity of the work created in this period. With insightful essays by distinguished scholars, Princes and Painters is a stunning visual document of eighteenth- and nineteenth-century Delhi.**

The Meadow

Penguin UK **In the summer of 1995, six tourists were kidnapped in the mountains of Kashmir. The ransom note said the kidnappers were from an unheard of Islamic outfit and that they wanted the release of Pakistani militant leader Maulana Masood Azhar (later responsible for the attack on**

the Indian parliament). The kidnapping electrified the world and for the first time put the global spotlight on Kashmir. Within four days, one of the prisoners had made a hair-raising escape. A month on, was found, beheaded by his captors who had carved their name into his flesh. In the background, camped out in Delhi, the families of the missing struggled to keep their hopes alive, while international governments negotiated frantically with India, and the army, police and intelligence services tried to follow the trail. But the remaining four hostages were never found, their case forgotten - until now.

The Returns to Education

A Review of Evidence, Issues and Deficiencies in the Literature

Laghuvasudeva Mananam

Lulu Press, Inc The story is told of a dowager who attended a talk and came out muttering, 'Mesopotamia, Mesopotamia.' She was in ecstasy. When a friend questioned her what Mesopotamia was, she blithely answered, 'I do not have the ghost of an idea, but the word Mesopotamia sounds so soothing.' Advaita is Mesopotamia to many of us. We hail it as the acme of philosophic thinking, we call it revolutionary, we term it sublime. But, if pressed, we have to admit that we have only a very hazy notion about its profound implications, not only as theory but also as a practical guide in the odyssey of life. Sri Sankaracharya's Bhashyas and Prakaranas are, no doubt, masterly expositions of this grand perspective of Reality, but his language is so mellifluous and alluring that we are lulled into a complacency that we have understood where we have not. The beauty veils the truth. It is in this predicament that Laghu Vasudevamananam comes to our rescue. It takes us by the hand and leads us step by easy step to the very summit.

Forgotten Masters

Indian Painting for the East India Company

Philip Wilson Publishers **As the East India Company extended its sway across India in the late eighteenth century, many remarkable artworks were commissioned by Company officials from Indian painters who had previously worked for the Mughals. Published to coincide with the first UK exhibition of these masterworks at The Wallace Collection, this book celebrates the work of a series of extraordinary Indian artists, each with their own style and tastes and agency, all of whom worked for British patrons between the 1770s and the bloody end of the Mughal rule in 1857. Edited by writer and historian William Dalrymple, these hybrid paintings explore both the beauty of the Indian natural world and the social realities of the time in one hundred masterpieces, often of astonishing brilliance and originality. They shed light on a forgotten moment in Anglo-Indian history during which Indian artists responded to European influences while keeping intact their own artistic visions and styles. These artists represent the last phase of Indian artistic genius before the onset of the twin assaults - photography and the influence of western colonial art schools - ended an unbroken tradition of painting going back two thousand years. As these masterworks show, the greatest of these painters deserve to be remembered as among the most remarkable Indian artists of all time.**

Responsibility, God and Society

Theological Ethics in Dialogue :

Festschrift Roger Burggraeve

Peeters Pub & Booksellers **A generation of students at the Faculty of Theology of the K.U.Leuven have been introduced by Roger Burggraeve to the thoughts of Emmanuel Levinas (1905-1995). Levinas has been (and still is) for him a true "master in thinking". For Levinas responsibility is heteronymous because it does not start from the "I" but from the epiphany of the other as the face, appealing to me not "to kill" but to promote him/her. In and through the appeal of the face, the difference between the other and me - expressed in the irreducible alterity of the other - is, ethically speaking, the appeal to the highest "non-indifference": proximity without absorption. As Levinas' thinking carries on obvious Jewish-Talmudic imprint, Burggraeve was interested as to how the concept of responsibility can be connected to a biblically inspired ethic. In which way can the Levinasian view on responsibility enhance a Christian anthropology, and in particular that one articulated by Louvain personalism, and in its turn inspired by a Christian anthropology, so that it benefits from uniquely Christian accents? In this Festschrift for Roger Burggraeve, authors explore the theme of "Responsibility, God and Society" in order to answer two questions. What does Levinas' ethic of responsibility have to offer Christian theology? And vice-versa, what can Christian theology offer to contemporary ethical thought on personal, relational and societal responsibility.**

Congress of Photography in Vienna

Mughal and Deccani Paintings

Eva and Konrad Seitz Collection of Indian Miniatures

Paul Holberton Pub **Accompanying an exhibition at the Museum Rietberg, this catalogue of 60 works drawn from one of the most important private collections in Europe provides an excellent survey of Indian painting from**

1575-1850 from two of the most important sources: the court of the north Indian Mughal rulers and the ateliers in the Deccan farther south. The works present a wide variety of styles and themes and invite close examination. Mughal culture was one of the richest the world has ever seen. The magnificence of the Mughal palaces and tombs, the pomp of the court, the lavish ceremonies and feasts, the fame of the court poets, intellectuals, painters and musicians, the sumptuousness of the courtiers' attire--all these came together to create an aristocratic culture of extraordinary wealth and grandeur. Books--and above all books lavishly decorated with exquisite miniatures--had a role and a status in Mughal culture which is almost unimaginable today. They were among the most valuable and certainly the most prized objects in the imperial treasury and were used systematically and effectively to propagate the political goals of the ruler. Whereas Mughal artists depict the real world, record historical events, and portray their patrons in realistic likenesses, Deccanni painters, instead, aim at evoking lyrical moods. They invent paradisaal dreamworlds bathed in fantastic, flamboyant colors, sparkling with gold. When they represent their rulers, they create idealized, introspective figures lost in the quiet enchantment of love, or music, or merely the perfume of a beautiful flower.

Religion, Food, and Eating in North America

Columbia University Press **The way in which religious people eat reflects not only their understanding of food and religious practice but also their conception of society and their place within it. This anthology considers theological foodways, identity foodways, negotiated foodways, and activist foodways in the United States, Canada, and the Caribbean. Original essays explore the role of food and eating in defining theologies and belief structures, creating personal and collective identities, establishing and challenging boundaries and borders, and helping to negotiate issues of community, religion, race, and nationality. Contributors consider food practices and beliefs among Christians, Jews, Muslims, and Buddhists, as well as members of new religious movements, Afro-Caribbean religions, interfaith families, and individuals who consider food itself a religion. They traverse a range of geographic regions, from the Southern Appalachian Mountains to North America's urban centers, and span historical periods from the colonial era to the present. These essays contain a variety of methodological and theoretical perspectives, emphasizing the embeddedness of food and eating practices within specific religions and the embeddedness of religion within society and culture. The volume makes an excellent resource for scholars hoping to add greater depth to their research and for instructors seeking a thematically rich, vivid, and relevant tool for the classroom.**

Modern Chinese History

Revised and Expanded Second Edition

Association for Asian Studies **Modern Chinese History** provides a concise narrative of Chinese history from the period 1644 to the present. It can easily supplement any history, international studies, cultural studies, or Asian studies course. It can also provide valuable background information necessary to understand contemporary Chinese politics, society, and economics. General readers wanting quickly to understand the collapse of imperial China and the rise of Communism will welcome this eminently readable text.

From Merchants to Emperors

British Artists and India, 1757-1930

Room for Wonder

Indigenous Peoples, Poverty and Human Development in Latin America

Springer **Indigenous people** constitute a large portion of Latin America's population and suffer from widespread poverty. This book provides the first rigorous assessment of changes in socio-economic conditions among the region's indigenous people, tracking progress in these indicators during the first international decade of indigenous peoples (1994-2004). Set within the context of existing literature and political changes over the course of the decade, this volume provides a rigorous statistical analysis of indigenous populations in Bolivia, Ecuador, Guatemala, Mexico and Peru, examining their poverty rates, education levels, income determinants, labour force participation and other social indicators. The results show that while improvements have been achieved in some social indicators, little progress has been made with respect to poverty.

Mourning Religion

Late nineteenth- and early twentieth-century theorists such as Freud, Durkheim, Weber, and Marx built their intellectual edifices on what they thought would be the remains or ruins of religion in the wake of modernization. But today the decline and disappearance of religion can no longer be simply assumed. In the face of contemporary entanglements of religion and violence, the establishment of meaning and morality remains troubling; the experience of loss and change remains, paradoxically, constant; and new theoretical perspectives--feminism, race studies, postcolonial studies, queer studies, postmodernism--have emerged, challenging the works that mourned religion and created meaning in earlier periods. The effects of this ongoing experience of mourning and symbolic loss on culture, on subjectivity, and on the academic disciplines of religious studies, though immense, are poorly understood and underinterpreted. In order to correct this lacuna in scholarly thought, this volume brings together a notable group of scholars who examine the ways in which recent cultural transformations inform the place of religion in the modern world. Methodologically, they represent the intersection of religious studies and the social scientific study of religion, bringing the disciplines of psychology, sociology, and anthropology into this dialogue.

Sintering Technology

CRC Press Based on the sintering conference held at the Pennsylvania State University, USA, this text presents advances in the application of sintering to the most important industrial materials. It offers results on both solid-state and microphase sintering as well as microstructure evolution, and introduces new applications, processes, materials and solutions to technical problems.

Babasaheb Ambedkar

Amar Chitra Katha Pvt Ltd He was from a respectable family, well-educated and a lawyer, yet many Indians thought of him as 'untouchable'. It was up to BR Ambedkar to teach his 'depressed' community to fight the injustices that it faced each day. Hard working and wise, he became the icon of the underprivileged. History, however, will remember him as the architect of India's Constitution.

Bloodline Bandra

Harper Collins David Cabral is a journalist, and also one of the original peepils: an East Indian from Pali Village. The village is a world unto itself, and the villagers such notables as Salt Peter, Freddy Fakir, Basco Big Stomach, Carla Four Eyes, Lorna Leg Spread, Spunkless Joe and Small Tree Big Fruit. It is a world relatively untroubled by the rapid changes around it, mostly because its inhabitants just ask themselves, 'My fadder wot going?' David, spurred by the sight of childhood friends who have made it big abroad, manages to shake off the stupor of his comfortable life and heads to New York for his piece of the American Dream pie. There, he finds himself a slave: unable to scrape together enough money to return to India, nor able to quit because it would render his stay illegal. There also, he meets and falls in love with Japanese cello student Hatsumi Nakamura - a difficult love, bound by culture and circumstances. All the while, Pali Village beckons David home. Bloodline Bandra captures with flair and wit the flavourful language of the East Indians, life in the tight-knit community of Pali Village and a way of life that's dying out. It is a riveting tale of love and loss, of home and homelessness that will linger on long after the book is read and put away.

Daniells' India

Views from the Eighteenth Century

Thomas Daniell was thirty-six years old when he and his nephew William, barely sixteen, sailed out from Gravesend in April 1785, headed for the East. They arrived in Calcutta via China the next year. This book presents a selection of their work in India, bringing alive the scenery and architecture of that age. Does Matching Overcome Lalonde's Critique of Nonexperimental Estimators?

Out of the Shadows

Herschel, Talbot & the Invention of Photography

This book chronicles for the first time in a detailed fashion the critical days of the invention and development of photography. In particular it explores the relationship between two Englishmen who played a key role in photography's early years; the preeminent scientist Sir John Herschel and William Henry Fox Talbot, the artist and scientist who had invented his own photographic process years before Louis Daguerre announced his discovery in Paris in 1839. Drawing on hundreds of Herschel's and Talbot's letters, notebooks, and diaries, Larry J. Schaaf tells the story of the evolution of photography as expressed through their words, and in the process he sheds light on some questions over which others have puzzled. Given that the camera and the necessary chemistry had coexisted for years, why rather than how was photography invented? Why did Talbot keep his own photographic process secret until Daguerre's announcement? Why did Herschel make such fundamental contributions to the process of photography, yet take very few pictures himself? Who or what provided the visual training that allowed Talbot to grow into the first photographic artist? Schaaf skillfully describes the complexities of the events, the personalities and interests of the participants, the often vital role played by trivial circumstances, and the chaotic nature of the progress of photography. He narrates the rivalry between Talbot and Daguerre, showing how it mirrored the differences between France and Great Britain in their support of science and art. Enhanced by more than 100 reproductions in color and in duotone of some of the earliest photographs ever made, this book vividly re-creates both the invention of an art and the art of invention.

The Goddess's Embrace

Multifaceted Relations at the Ekamranatha Temple Festival in Kanchipuram

Ethno-Indology **The study by Kerstin Schier examines the big annual festival (mahotsava) at the Ekamranatha temple in the South Indian town Kanchipuram, which - among other things - dramatises the divine marriage between god Siva (as Ekamranatha) and the goddess, generally considered to be Kamaksi. In the course of the festival's rituals gods and goddesses, temples, and religious traditions relate to each other in many ways. These complex and multifaceted relations are studied by taking into account different types of historical and contemporary sources, and by combining textual analysis with the observation and study of ritual performances, interviews, and oral narratives. The book provides a detailed description and analysis of the divine marriage's contemporary ritual practice and its associated myth in Sanskrit and Tamil texts. It also takes into consideration the different views and interpretations of members of local communities, temple priests, donors, and other participants, which leads to a multiplicity of perspectives on the festival. Numerous photographs and maps supplement the descriptions of the rituals. A concise day-by-day overview of the festival program and a list of the narrative themes of the marriage myth are given as appendix.**
