DOMESTIC VIOLENCE AND PSYCHOLOGY

CRITICAL PERSPECTIVES ON INTIMATE PARTNER VIOLENCE AND ABUSE

Routledge Despite changes to laws and policies across most western democracies intended to combat violence to women, intimate partner violence and abuse (IPVA) remains discouragingly commonplace. *Domestic Violence and Psychology: Critical Perspectives on Intimate Partner Violence and Abuse* showcases women's harrowing stories of living with and leaving violent partners, offering a psychological perspective on domestic violence and developing a theoretical framework for examining the context, intentions and experiences in the lives of people who experience abuse and abuse themselves. Nicolson provides an analysis of survivors' real-life stories, and thoughts about IPVA. The attitudes of the general public and health and social care professionals are also presented and discussed. The theoretical perspective employs three levels of evidence – the material (context), discursive (explanations) and intrapsychic (emotional). *Domestic Violence and Psychology* is divided into three parts accordingly, engaging qualitative data from interviews and quantitative data from surveys to illustrate these theoretical perspectives. Although many pro-feminist sociologists and activists firmly believe that any attempt to explain domestic violence potentially condones it, this book takes up the challenge to make a compelling case demonstrating how we need to widen understanding of the psychology of survivors and their intimate relationships if we are to defeat IPVA. The new edition has been updated to include the latest developments in IPVA research and practice, and in particular examines the impact of a violent and abusive family life on all members, including children. This is essential reading for students, academics and professionals interested in domestic abuse, as well as professionals and practitioners, including psychologists, social workers, the police, prison officers, probation staff, policy makers, and charity workers.

DOMESTIC VIOLENCE AND PSYCHOLOGY

CRITICAL PERSPECTIVES ON INTIMATE PARTNER VIOLENCE AND ABUSE

Routledge Revised edition of the author's *Domestic violence and psychology*, 2010.

RHETORIC AND COMMUNICATION PERSPECTIVES ON DOMESTIC VIOLENCE AND SEXUAL ASSAULT

POLICY AND PROTOCOL THROUGH DISCOURSE

Taylor & Francis This book brings rhetorical, legal, and professional communication perspectives to the discourse surrounding policy-making efforts within the United States around two types of violent crimes against women: domestic violence and sexual assault. The authors propose that such analysis adds to our understanding of rhetorical concepts such as kairos, risk perception, moral panic, genre analysis, and identity theory. Overall, the goal is to demonstrate how rhetorical, legal, and professional communication perspectives work together to illuminate public discourse and conflict in such complicated and ongoing dilemmas as how to aid victims of domestic violence and sexual assault, and how to manage the offenders of such crimes—social and cultural problems that continue to perplex the legal system and the social environment.

GENDERED PERSPECTIVES ON PREVENTING VIOLENT EXTREMISM

WOMEN AND 'PREVENT'

Policy Press The UK's 'Prevent' strategy aims to dissuade vulnerable groups from supporting terrorism, and women have been involved since its inception in 2006. Sam Andrews argues that women are still viewed within a traditional gendered framework as primarily peaceful and are mostly engaged as mothers, enlisted by Prevent to watch over and guide their families and communities. Drawing on interviews and case studies, this book reveals how Prevent goes beyond simple counter-terrorism messaging to fund a diverse array of projects, from support for victims of domestic violence to parenting courses, shaping wider engagement with women in society.

ENCYCLOPEDIA OF CRITICAL PSYCHOLOGY

Springer *Encyclopedia of Critical Psychology* is a comprehensive reference work and is the first reference work in English that comprehensively looks at psychological topics from critical as well as international points of view. Thus, it will appeal to all committed to a critical approach across the *Encyclopedia of Critical Psychology*, for alternative analyses of psychological events, processes, and practices. The *Encyclopedia of Critical Psychology* provides commentary from expert critical psychologists from around the globe who will compose the entries. The *Encyclopedia of Critical Psychology* will feature approximately 1,000 invited entries, organized in an easy to use A-Z format. The encyclopedia will be compiled under the direction of the editor who has published widely in the field of critical psychology and due to his international involvements is knowledgeable about the status of critical psychology around the world. The expert contributors will summarize current critical-psychological knowledge and discuss significant topics from a global perspective.

DECOLONIALITY AND EPISTEMIC JUSTICE IN CONTEMPORARY COMMUNITY PSYCHOLOGY

Springer Nature This book examines the ways in which decolonial theory has gained traction and influenced knowledge production, praxis and epistemic justice in various contemporary iterations of community psychology across the globe. With a notable Southern focus (although not exclusively so), the volume critically interrogates the biases in Western modernist thought in relation to community psychology, and to illuminate and consolidate current epistemic alternatives that contribute to the possibilities of emancipatory futures within community psychology. To this end, the volume includes contributions from community psychology theory and praxis across the globe that speak to standpoint approaches (e.g. critical race studies, queer theory, indigenous epistemologies) in which the experiences of the majority of the global population are more accurately reflected, address key social issues such as the on-going racialization of the globe, gender, class, poverty, xenophobia, sexuality, violence, diasporas, migrancy, environmental degradation, and transnationalism/globalisation, and embrace forms of knowledge production that involve the co-construction of new knowledges across the traditional binary of knowledge producers and consumers. This book is an engaging resource for scholars, researchers, practitioners, activists and advanced postgraduate students who are currently working within community psychology and cognate sub-disciplines within psychology more broadly. A secondary readership is those working in development studies, political science, community development and broader cognate disciplines within the social sciences, arts, and humanities.

CRITICAL LITERACIES IN ACTION

SOCIAL PERSPECTIVES AND TEACHING PRACTICES

BRILL *Critical Literacies in Action: Social Perspectives and Teaching Practices* asks how educators can become more experienced in order to truly support literacy, particularly for children of poverty or for those who have been labeled "at-risk". This is especially important in current times, since a literate individual is one who is more successfully able to situate him- or herself within a continuum of lifelong learning in order to fulfill personal goals and to participate fully within the wider societal context.

FOUNDATIONS OF COUPLES, MARRIAGE, AND FAMILY COUNSELING

John Wiley & Sons *Foundations of Couples, Marriage, and Family Counseling* A newly updated and practical approach to marriage, couples, and family counseling Now in its second edition, *Foundations of Couples, Marriage, and Family Counseling* delivers a comprehensive treatment of current theory, research, and real-life practice in family therapy. The text is fully aligned with the Council for Accreditation of Counseling and Related Educational Programs (CACREP) and Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE). It covers foundational and advanced topics of critical importance to student counselors and therapists seeking to work in family settings, including sexuality, trauma, divorce, domestic violence, addictions, filial play therapy, and the positioning of culture and context in family therapy. The new edition includes updated content in each chapter and entirely new chapters on assessments and helping families mitigate, adapt, and transition during crisis. This important book: Covers the basic knowledge and skills essential to students and practitioners of couples and family therapy Details the history, concepts, and techniques associated with crucial theories, and includes a new chapter on the most up to date assessment strategies Tackles contemporary issues and interventions in trauma, divorce, domestic violence, sexuality, and more At once comprehensive and concise, the Second Edition of *Foundations of Couples, Marriage, and Family Counseling* offers readers a guide to the complex and interconnected concepts required to support a full understanding of couples and family therapy.

A COMPREHENSIVE GUIDE TO CHILD CUSTODY EVALUATIONS: MENTAL HEALTH AND LEGAL PERSPECTIVES

Springer Science & Business Media Whether assessing general family functioning or specific areas of conflict, professionals preparing child custody evaluations require sound knowledge of three interrelated fields: up-to-date legal issues, psychological findings, and forensic procedures. This book covers these three essential areas to walk readers through the evaluation process clearly and concisely. It further provides a unique combination of legal guidelines with social science research.

RESTORATIVE RESPONSES TO SEXUAL VIOLENCE

LEGAL, SOCIAL AND THERAPEUTIC DIMENSIONS

Taylor & Francis Sexual violence, in all its forms, is a crime for which anecdotal accounts and scholarly reports suggest victims in their great majority do not receive adequate 'justice' or redress. The theory and practice of restorative justice is rapidly developing and offers some well-argued new avenues for dealings with crime in general. It has the potential to be extended to cases of sexual violence and a number of small scale programmes are already underway across the world. Restorative Responses to Sexual Violence examines this innovative justice paradigm in more depth in the particular context of sexual trauma and violence in order to establish the empirical realities of restorative justice approaches in cases of sexual violence, and considers how such approaches could be developed adequately in the future. This book is divided into two parts, each representing a key area of research and practice: theoretical and conceptual frameworks, and justice and therapeutic perspectives. This international collection brings together leading expert scholars and practitioners to offer both theoretical and practical perspectives on restorative justice and sexual violence. This book will be of interest to researchers in the field of law, criminology, psychology, social science, social work and psychotherapy, as well as practitioners in the fields of criminal justice, restorative justice and sex offender and victim trauma therapies.

CHILD-TO-PARENT VIOLENCE: CHALLENGES AND PERSPECTIVES IN THE CURRENT SOCIETY

Frontiers Media SA

THE ENCYCLOPEDIA OF PEACE PSYCHOLOGY

John Wiley & Sons The Encyclopedia of Peace Psychology, available online through Wiley Online Library or as a three-volume print set, is a state-of-the-art resource featuring almost 300 entries contributed by leading international scholars that examine the psychological dimensions of peace and conflict studies. First reference work to focus exclusively on psychological analyses and perspectives on peace and conflict Cross-disciplinary, linking psychology to other social science disciplines Includes nearly 300 entries written and edited by leading scholars in the field from around the world Examines key concepts, theories, methods, issues, and practices that are defining this growing field in the 21st century Includes timely topics such as genocide, hate crimes, torture, terrorism, racism, child abuse, and more A valuable reference for psychologists, and scholars, students, and practitioners in peace and conflict studies An ALA 2013 Outstanding Reference Source

WORKING WITH VULNERABLE CHILDREN, YOUNG PEOPLE AND FAMILIES

Routledge The potential for early intervention to prevent social problems later in life has become the focus of much debate in recent years and finds itself at the centre of contemporary social policy. The meaning of 'vulnerability' - one of the key concepts in this drive - is examined in this book, as well as the relationship between vulnerability and the individual, communities and society. This book introduces students to a broad debate around what constitutes vulnerability and related concepts such as risk and resilience, and examines how vulnerability has been conceptualised by policy makers with a clear focus on early intervention. Adopting a case study approach, it opens with chapters examining the concept of vulnerability from sociological, psychological and social policy perspectives before looking at examples around disability, homelessness, leaving care, victims of violence, sexual abuse, prison, the Internet and drug use. Supporting students in engaging with and evaluating the conceptualisation and application of vulnerability in professional practice, this book is suitable for anyone either preparing for or currently working within the children's workforce, from social work and health care to education and youth work.

HANDBOOK OF CRITICAL PSYCHOLOGY

Routledge Choice Recommended Read Critical psychology has developed over time from different standpoints, and in different cultural contexts, embracing a variety of perspectives. This cutting-edge and comprehensive handbook values and reflects this diversity of approaches to critical psychology today, providing a definitive state-of-the-art account of the field and an opening to the lines of argument that will take it forward in the years to come. The individual chapters by leading and emerging scholars plot the development of a critical perspective on different elements of the host discipline of psychology. The book begins by systematically addressing each separate specialist area of psychology, before going on to consider how aspects of critical psychology transcend the divisions that mark the discipline. The final part of the volume explores the variety of cultural and political standpoints that have made critical psychology such a vibrant contested terrain of debate. The Handbook of Critical Psychology represents a key resource for researchers and practitioners across all relevant disciplines. It will be of particular interest to students and researchers in psychology, psychosocial studies, sociology, social anthropology and cultural studies, and to discourse analysts of different traditions, including those in critical linguistics and political theory.

PREVENTION SCIENCE IN SCHOOL SETTINGS

COMPLEX RELATIONSHIPS AND PROCESSES

Springer This straightforward volume makes a strong, practical, research-based case for integrating prevention programs into middle and high schools. Written by experts in prevention science and education, it examines educational goals and prevention of risky behaviors as parallel and complementary processes and provides evidence for health-promoting schools as a critical forum for student development. Chapters show the benefits of this collaboration, as instructors engage with prevention content, prevention scientists study schools and create interventions, and counselors develop and implement activities, resulting in improved academic, social, and health outcomes. Examples of successful prevention strategies address personal and public health issues as varied as substance abuse, dating violence, dropping out, and suicide. Among the topics covered: Engaging school leaders in prevention Developing school-based prevention curricula Scaling up evidence-based prevention interventions and practices Conducting prevention research and evaluation in schools Promoting a positive school climate and culture Reducing disruptive behavior, violence, and bullying Child and school psychologists, administrators, teachers, school counselors, and prevention specialists will find significant common ground in Prevention Science in School Settings. The breadth and depth of coverage point to new, multidisciplinary directions in health education, school climate/culture, and positive youth development.

CONCEPTS AND CASE STUDIES IN THREAT MANAGEMENT

CRC Press Professionalization has come to the field of threat management. It has developed a systematic theory unique to the field, recognized authorities have emerged, and it is finding its own ethical code of conduct. It is also beginning to grow its own culture, complete with a vocabulary of its own. Although the field has a way to go, it is well along th

INTERNATIONAL HANDBOOK OF THREAT ASSESSMENT

Oxford University Press International Handbook of Threat Assessment offers a definition of the foundations of threat assessment, systematically explores its fields of practice, and provides information and instruction on the best practices of threat assessment.

THE OXFORD HANDBOOK OF EVOLUTIONARY PERSPECTIVES ON VIOLENCE, HOMICIDE, AND WAR

Oxford University Press This volume synthesizes the theoretical and empirical work of leading scholars in the evolutionary sciences to produce an extensive and authoritative review of this literature.

UNDERSTANDING GENDER-BASED VIOLENCE

AN ESSENTIAL TEXTBOOK FOR NURSES, HEALTHCARE PROFESSIONALS AND SOCIAL WORKERS

Springer Nature This edited book brings together the voices and insights of survivors, practitioners, educators and researchers working to prevent and minimise the harms of gender-based violence, with a specific focus on equipping health professionals and social workers to support victim-survivors. Practitioners can, and often do, play a critical role supporting victim-survivors of gender-based violence; however, this work has historically been carried out by those in specialist roles and there remains gaps and inconsistencies in education and training for qualifying and post-qualified professionals. This book makes a valuable contribution to addressing these gaps. It provides practitioners with a comprehensive resource on contemporary debates and research in the field of gender-based violence. To support readers' learning, each chapter contains reflective exercises and draws clear links between research, theory and practice. The book is structured into four sections. The first section considers the 'rise' of gender-based violence in policy and practice, and questions to what extent this once marginalised perspective has become embedded in health and social work training and education. The second section of the book explores some of the expressions, contexts and implications of gender-based violence. Each chapter considers the role of health care professionals and social workers and invites the reader to reflect on their (potential) role in these areas. The third section of the collection focuses on one of the most common forms of gender-based violence that health and social work professionals are likely to encounter: physical, psychological, sexual and financial violence by an intimate partner, who may also be a parent. Finally, the fourth section showcases innovative responses to supporting victim-survivors and challenging systems that contribute to gender inequality. The intention of this book is to equip health care professionals and social workers with critical, practical and ethical resources to help them work with victim-survivors and, where possible, engage in transformative efforts to end the harms of gendered inequalities and violence.

VIOLENCE IN CONTEXT

CURRENT EVIDENCE ON RISK, PROTECTION, AND PREVENTION

OUP USA Public and academic interest in youth and community violence has grown with school shootings, horrific cases of child abuse, and reports of domestic abuse becoming regular news features. Research on interpersonal violence has had a corresponding progression, but there is a tendency by researchers to examine these issues at the individual level, rather than considering the micro- and macro-level causes, correlates, and outcomes for those affected directly and indirectly by violence. Edited by four leading violence researchers, Violence in Context takes the more systemic view, offering a critical appraisal of research and theory that focuses on violence in youth, families, and communities. Authors investigate the ways in which violence is defined and understood, how risk and protective factors promote and inhibit violence in the groups most responsible for the socialization of youth, and how violence and related behaviors differ by gender, race, and ethnicity. A rich analysis of the field familiarizes readers with some of the most compelling approaches to violence prevention, including interventions that begin at infancy with families at risk. Every chapter examines the latest research on violence prevention, with a goal of moving towards the multi-system, integrated intervention models and approaches that will incorporate the social context of violence across settings and population subgroups. The result is a valuable interdisciplinary book for scholars, practitioners, and students that provides a comprehensive overview of published studies, limitations of research findings, and a thoughtful discussion of the ways in which future research can build on what is currently known about the causes, consequences, and prevention of violence in different settings.

DISCOURSE, PEACE, AND CONFLICT

DISCURSIVE PSYCHOLOGY PERSPECTIVES

Springer This first-of-its-kind volume brings discursive psychology and peace psychology together in a compelling practical synthesis. An array of internationally-recognised contributors examine multiple dimensions of discourse—official and casual, speech, rhetoric, and text—in creating and maintaining conflict and building mediation and reconciliation. Examples of strategies for dealing with longstanding conflicts (the Middle East), significant flashpoints (the Charlie Hebdo case), and current heated disputes (the refugee 'crisis' in Europe) demonstrate discursive methods in context as they bridge theory with real life. This diversity of subject matter is matched by the range of discursive approaches applied to peace psychology concepts, methods, and practice. Among the topics covered: Discursive approaches to violence against women. The American gun control debate: a discursive analysis. Constructing peace and violence in the Palestinian-Israeli conflict. Discursive psychological research on refugees. Citizenship, social injustice, and the quest for a critical social psychology of peace. The emotional and political power of images of suffering: discursive psychology and the study of visual rhetoric. Discourse, Peace, and Conflict offers expansive ideas to scholars and practitioners in peace psychology, as well as those in related areas such as social psychology, political psychology, and community psychology with an interest in issues pertaining to peace and conflict.

WORLD REPORT ON VIOLENCE AND HEALTH

This report is part of WHO's response to the 49th World Health Assembly held in 1996 which adopted a resolution declaring violence a major and growing public health problem across the world. It is aimed largely at researchers and practitioners including health care workers, social workers, educators and law enforcement officials.

CHILD DEVELOPMENT: AN ACTIVE LEARNING APPROACH

AN ACTIVE LEARNING APPROACH

SAGE Although the field of child and adolescent development seems to be an easy one in which to provide active learning opportunities to students, few textbooks currently exist that actually do this. Child Development: An Active Learning Approach includes the following key features: - Challenging Misconceptions: true/false or multiple choice tests are incorporated at the beginning of each chapter to specifically address topics that are sources of misunderstanding amongst students. - Activities with children and adolescents: 'hands-on' activities that complement the ideas of the text, as an integral part of the text, rather than as "add-ons" at the end of each chapter. - 'The journey of research' will introduce students to the process of research that leads from early findings to more refined outcomes through real-life examples - 'Test Yourself' sections include activities that cause students to reflect on an issue through their own experiences to bring about increased motivation and understanding of a specific topic. - The Instructor's Resource CD-ROM includes a computerized test bank, PowerPoint Slides, sample syllabi, suggested in-class learning activities, and homework assignments. - The Student Study Site includes interactive videos, self-quizzes, key term flashcards, SAGE journal articles with accompanying exercises, and web links with accompanying exercises.

CULTURALLY RESPONSIVE COGNITIVE BEHAVIOR THERAPY

PRACTICE AND SUPERVISION

American Psychological Association (APA) This volume shows mental health providers how to integrate cultural factors into cognitive behavior therapy (CBT). Contributing authors describe the application of CBT with clients of diverse cultures, and discusses how therapists can refine CBT to increase its effectiveness with clients from a variety of cultural backgrounds. They examine the unique characteristics of, and the use of CBT with various racial, ethnic, and religious minority groups in the United States including Latinx, Asian Americans, African Americans, American Indians, Alaska natives, Arabs, and Orthodox Jews. Strategies for using CBT with older adults, individuals with disabilities, and LGBTQ clients are also examined. A chapter on culturally responsive CBT clinical supervision closes this volume. This second edition includes fully-updated demographic information, a greater emphasis on culture-specific assessments, and a chapter on using CBT with clients of South Asian descent.

SILENCING THE SELF ACROSS CULTURES

DEPRESSION AND GENDER IN THE SOCIAL WORLD

Oxford University Press Offering new perspectives on social and psychological aspects of the complex dynamic of depression, the authors use Silencing the Self theory, which details the negative psychological effects when individuals silence themselves in close relationships and the importance of the social context in precipitating depression.

VIOLENCE AT WORK

International Labour Organization Violence at work, ranging from bullying and mobbing, to threats by psychologically unstable co-workers, sexual harassment and homicide, is increasing worldwide and has reached epidemic levels in some countries. This updated and revised edition looks at the full range of aggressive acts, offers new information on their occurrence and identifies occupations and situations at particular risk. It is organised in three sections: understanding violence at work; responding to violence at work; future action.

COMBATING VIOLENT EXTREMISM AND RADICALIZATION IN THE DIGITAL ERA

IGI Global Advances in digital technologies have provided ample positive impacts to modern society; however, in addition to such benefits, these innovations have inadvertently created a new venue for criminal activity to generate. Combating Violent Extremism and Radicalization in the Digital Era is an essential reference for the latest research on the utilization of online tools by terrorist organizations to communicate with and recruit potential extremists and examines effective countermeasures employed by law enforcement agencies to defend against such threats. Focusing on perspectives from the social and behavioral sciences, this book is a critical source for researchers, analysts, intelligence officers, and policy makers interested in preventive methods for online terrorist activities.

EBOOK: FACING DANGER IN THE HELPING PROFESSIONS: A SKILLED APPROACH

McGraw-Hill Education (UK) Dangerous behaviour is a very real threat to practitioners working across the helping professions, and one that many feel ill-equipped to adequately deal with. This innovative, accessible and theoretically informed book focuses on the types of dangerous behaviour that helping professionals are likely to encounter, and provides strategies and skills for dealing with these situations. The book's focus is on the immediate face-to-face management of interpersonal danger, and looks at ways in which helping professionals should implement good practice, while dealing with the moments of extreme stress, confusion, fear and anxiety that these situations give rise to.

SOCIAL WORK IN JUVENILE AND CRIMINAL JUSTICE SYSTEMS (4TH ED.)

Charles C Thomas Publisher Social Work in Juvenile and Criminal Justice Systems sets the standard of care for mental health treatment and the delivery of social services to crime victims, juvenile and adult offenders, and their families. The chapters, all authored by experts in the field and all committed to the mission of social justice, are written with the clear understanding that we cannot study criminal justice in a vacuum. Therefore, a major focus of the book is on the renewed growing sense of the profession's obligation to social justice. Each chapter interconnects with the various components of juvenile and criminal justice. Another prominent aspect of the book is that it is strength-based. It views those involved in the criminal and juvenile justice systems as individuals rather than inmates or criminals, each with unique positive talents and abilities. The book is divided into four sections. The first section discusses forensic social work, including crime and delinquency theories, trends, and ethical issues. The second section prepares social workers for practice in correctional institutions and explores crisis intervention with victims of violence, reentry of adult offenders in society, and aging in prison. The third section covers assessment and intervention in child sexual abuse, mental health and substance abuse, interpersonal violence and prevention, child welfare and juvenile justice. The final section presents an overview on social work in the twenty-first century, which includes restorative justice and the justice system, new ways of delivering justice, domestic violence, neighborhood revitalization, race and ethnicity, and social work practice with LGBTQ offenders. This book will be the best single source on social work in criminal justice settings and will prove to be an invaluable resource for the many professionals who have responsibility for formulating and carrying out the mandates of the criminal justice system.

CRIMINOLOGY

Oxford University Press CRIMINOLOGY. Thorough. Engaging. Distinctive. Criminology is a core, introductory textbook that takes students further. From the first chapter, students are encouraged to regard themselves as producers of criminological knowledge. Starting from the basics, the book takes students on a journey through the subject. This begins with what crime is and the theories that try to explain it, through society's response to crime, and ultimately to how to carry out independent research and plan first steps in a career. The critical, applied approach is emphasized through some of the many features that are integrated throughout the book. These include conversations with authentic voices from the field, compelling personal insights from the authors, and challenges to students to question assumptions, apply knowledge and critically reflect on their personal viewpoints. The ultimate goal behind Criminology is a bold, important, and ambitious one. Both student-focused and research engaged, the purpose of the book is to contribute towards producing the next generation of criminologists who are switched-on, excited, active, and - above all - critical. Online Resource Centre: Criminology is accompanied by an Online Resource Centre containing the following resources: * Selected further readings and web links * Over 100 multiple choice questions * Advice on 'decoding' academic articles * Numerous time-saving resources for teaching staff

UNDERSTANDING VIOLENCE AND ABUSE

AN ANTI-OPPRESSIVE PRACTICE PERSPECTIVE

Fernwood Publishing In Understanding Violence and Abuse, Heather Fraser and Kate Seymour examine violence and abuse from an anti-oppressive practice perspective and make connections between interpersonal violence and structural, institutional and cultural violence. Using case studies from Canada, the U.K., the U.S., Australia, Bangladesh, India and elsewhere, the authors discuss topics ranging from class oppression, street violence, white privilege, war, shame, Islamophobia and abuse in intimate relationships, as well as introduce the core tenets of anti-oppressive social work practice. They encourage readers to reflect upon hierarchies of identity and difference in relation to the ways in which violence and abuse are defined, understood and addressed. Further, they discuss several responses to violence using an anti-oppressive framework.

THE SAGE HANDBOOK OF DOMESTIC VIOLENCE

SAGE The field of Domestic Violence research has expanded considerably in the past decade and now includes work conducted by researchers in many different disciplines, notably political science, public health, law, psychology, sociology, criminology, anthropology, family studies, and medicine. The SAGE Handbook of Domestic Violence provides a rich overview of the most important theoretical and empirical work in the field, organized by relationship type. The handbook addresses three major areas of research on domestic violence: - Violence against partners - Violence against children - Violence against other family members. This Handbook is a unique and timely publication and a long awaited, valuable resource for the vast amount of Domestic Violence research centres and individual researchers across the globe.

PSYCHOLOGY AFTER THE CRISIS

SCIENTIFIC PARADIGMS AND POLITICAL DEBATE

Routledge Ian Parker has been a leading light in the fields of critical and discursive psychology for over 25 years. The Psychology After Critique series brings together for the first time his most important papers. Each volume in the series has been prepared by Ian Parker, features a newly written introduction and presents a focused overview of a key topic area. Psychology After the Crisis is the first volume in the series and addresses three important questions: What was the crisis in psychology and why does it continue now? How did debates regarding the traditional 'laboratory experiment' paradigm in psychology set the scene for discourse analysis? Why are these paradigm debates now crucial for understanding contemporary critical psychology? The first two chapters of the book describe the way critical psychology emerged in Britain during the 1970s, and introduce four key theoretical resources: Marxism, Feminism, Post-Structuralism and Psychoanalysis. The chapters which follow consider in depth the critical role of Marxist thinking as an analytic framework within psychology. Subsequent chapters explore the application and limitations of critical psychology for crucial topics such as psychotherapy, counselling and climate change. A final chapter presents an interview which reviews the main strands within critical psychology, and provides an accessible introduction to the series as a whole. Psychology After the Crisis is essential reading for students and researchers in psychology, sociology, social anthropology and cultural studies, and for discourse analysts of different traditions. It will also introduce key ideas and debates in critical psychology for undergraduates and postgraduate students across the social sciences.

FEELING THE HEAT: INTERNATIONAL PERSPECTIVES ON THE PREVENTION OF WILDFIRE IGNITION

Vernon Press In the context of climate change, world population growth and crashing ecological systems, wildfire is often a catastrophic and traumatic event. Its impact can include loss of life, life-changing injuries, long-term psychological stress; increases in domestic violence; destruction of properties, business and livestock; long-term housing insecurity; increased insurance premiums, fire-fighting, legal and health costs; as well as significant changes and species losses in the natural environment. In Australia, an average of 4,500 wildfires occur weekly. Yet how to prevent these wildfires, 85% of which are caused by human activities, has received extraordinarily little attention. The current approach to the prevention of arson can be summarised as small in scale, uncoordinated and rarely evaluated. 'Feeling the heat: International perspectives on the prevention of wildfire ignition' is the culmination of over a decade of research into wildfires and arson; taking an interdisciplinary approach to comprehensively understand the topic. This book reviews current international knowledge and presents new findings on political, spatial, psychological, socio-ecological and socio-economic risk factors. It argues that if we are to reverse the increasing occurrence and severity of wildfires, all prevention approaches must be utilised, broadening from heavy reliance on environmental modification. Such prevention measures range from the critical importance of reducing greenhouse gases to addressing the psychological and socio-economic drivers of arson. In particular, it calls for a coordinated and collaborative approach across sectors, including place-based, state and country coordination, as well as an international body. It will hold appeal for researchers and students from a range of disciplines and interests, government planners and policymakers, emergency services, counsellors and NGOs, and those in agriculture and forestry.

NEUROCOGNITIVE RISK ASSESSMENT FOR THE EARLY DETECTION OF VIOLENT EXTREMISTS

Springer This Brief provides a theoretical and conceptual development of a new Risk Assessment Toolbox (RAT) for the early detection of violent extremists. It is based on a neurocognitive perspective, conceptualized as 'neuroplasticity-in-action' arising from brain-based neural patterns expressed in mind-based cognitive pathways likely to form a mind-set of violent extremism. This neurocognitive-based Risk Assessment Toolbox (RAT) is comprised of two distinct components: a cognitive indicators instrument that serves as an early detection checklist for trained practitioners, and a software visualisation program. The Brief includes: A framework of contemporary approaches to the risk assessment of violence as well as the background context for the current research project on 'violent extremism' and its related concepts of 'terrorism' and 'radicalisation,' out of which the RAT was developed. A detailed overview of RAT and a pilot case study experiment to highlight the practical value and utility of this neurocognitive Risk Assessment Toolbox. Preliminary research findings of a study conducted with a sample of recognized experts (academics and practitioners) in several countries around the world, to fine tune and validate the risk parameters of the two components that constitute RAT (Risk Assessment Toolbox). The current stage of development of RAT as a practitioner-based system for the early detection of potentially violent extremists as well as its strategic intelligence implications for using a neurocognitive risk assessment approach to violent extremism is discussed. Research limitations and plans for future research studies. This work will be of interest to researchers in Criminology and Criminal Justice interested in studying violent extremism, terrorism and crime prevention and intervention and policing, as well as researchers in related fields of Forensic Psychology, Cognitive Neuroscience and Social Work or Social Intervention.

CANADIAN MATERNITY AND PEDIATRIC NURSING

Lippincott Williams & Wilkins Canadian Maternity and Pediatric Nursing prepares your students for safe and effective maternity and pediatric nursing practice. The content provides the student with essential information to care for women and their families, to assist them to make the right choices safely, intelligently, and with confidence.

CHILDREN'S NEEDS - PARENTING CAPACITY

CHILD ABUSE, PARENTAL MENTAL ILLNESS, LEARNING DISABILITY, SUBSTANCE MISUSE, AND DOMESTIC VIOLENCE

The Stationery Office This second edition of "Children's needs - parenting capacity" updates the original exploration of the research literature in the light of legal and policy changes in England and findings from more recent national and international research. The edition has also been expanded to cover parental learning disabilities and how it may impact on parenting and children's health and development. The findings show that these parenting issues affect children differently depending on their age and individual circumstances. While some children grow up apparently unscathed, others exhibit emotional and behavioural disorders. This knowledge can inform practitioners undertaking assessments of the needs of children and their families and effective service responses. This publication is essential reading for practitioners, managers and policy makers concerned with improving the outcomes for children and families who are experiencing such problems.

INTERNATIONAL HANDBOOK OF EARLY CHILDHOOD EDUCATION

Springer This international handbook gives a comprehensive overview of findings from longstanding and contemporary research, theory, and practices in early childhood education in the Northern and Southern hemispheres. The first volume of the handbook addresses theory, methodology, and the research activities and research needs of particular regions. The second volume examines in detail innovations and longstanding programs, curriculum and assessment, and conceptions and research into child, family and communities. The two volumes of this handbook address the current theory, methodologies and research needs of specific countries and provide insight into existing global similarities in early childhood practices. By paying special attention to what is happening in the larger world contexts, the volumes provide a representative overview of early childhood education practices and research, and redress the current North-South imbalance of published work on the subject.

UNDERSTANDING DERADICALIZATION

METHODS, TOOLS AND PROGRAMS FOR COUNTERING VIOLENT EXTREMISM

Taylor & Francis This book provides a comprehensive guide to the different aspects of deradicalization theories, programs and methods. It analyzes the practical and theoretical aspects of deradicalization programs and the methods being employed to bring extremists and terrorist back to a non-violent life. The book includes in-depth case studies on programs and former extremists, including interviews with former German neo-Nazis and families of Jihadists who have received deradicalization counselling. Using a coherent theory of radicalization and deradicalization, it integrates existing programs into a typology and methodology regarding the effects and concepts behind deradicalization. In addition, a current state of the art assessment of deradicalization programs around the world provides a collection of programs and landscapes worldwide. It thereby functions as a unique guide for practitioners and policymakers in need of evaluation or construction of such programs, as well as a resource pool for academics interested in research about deradicalization programs and processes. The major aim of this book is to consolidate the existing scholarship on deradicalization and to move the field forward by proposing a coherent theory of deradicalization, including ways to measure effectiveness, standard methods and procedures, different actors of such programs and cooperation on national and international level. In essence, this work enables the reader to identify how, when and why deradicalization programs work, how they can be built and structured, and to identify their limitations. This book will be of interest to students of radicalisation, counter-terrorism, radical Islam, criminology, security studies and IR.

ANGER, MADNESS, AND THE DAIMONIC

THE PSYCHOLOGICAL GENESIS OF VIOLENCE, EVIL, AND CREATIVITY

SUNY Press Explores the links between anger, rage, violence, evil, and creativity and describes a dynamic therapeutic approach that can help channel anger and violent impulses into constructive and creative activity.
