A MICHIGAN SCHOOL MONEY PRIMER FOR POLICYMAKERS, SCHOOL OFFICIALS, MEDIA AND RESIDENTS

The system that finances Michigan's schools from kindergarten through 12th grade is a perennial topic of conversation among policymakers, parents, taxpayers and voters. A constructive discussion of this issue, however, requires a sound knowledge of the financial workings of Michigan's elementary and secondary school system. This knowledge is precisely what the authors have attempted to provide. While the Mackinac Center for Public Policy has developed numerous policy recommendations over the years, this primer is exclusively informational. This primer addresses the following: (1) how revenues are raised for Michigan's elementary and secondary public school system; (2) how money is distributed to education programs and school districts once it is collected by various taxing authorities; and (3) how districts budget monies to be spent on the various activities involved in operating schools and other educational programming. This book is arranged in four sections. The first--and the shortest--is "A Brief Overview of the Structure of Michigan's Public School System," which defines a few basic terms and sketches the main local, state and federal agencies involved in financing Michigan's public school system. This overview should help readers unfamiliar with Michigan's public school structure navigate the remainder of the book. The second, third and fourth sections are considerably longer than the first and cover the three areas: tax revenues, distribution of revenues and financial management of those revenues by school districts. Appended are: (1) U.S. Department of Education Spending in Michigan; (2) Summary of "Durant" Court Decisions; and (3) Guide to a New School Finance Electronic Module. An index is included. (Contains 29 graphs, 238 footnotes, and 410

endnotes, footnotes.) [This paper was written with the assistance of Glenda Rader, Darcy Marusich, Alison Taylor, Steve Zakem, John Schwartz, Thomas Moline, Charles Pisoni, Gary Start, Paul Soma, Tim Yeadon, Mary Ann Cleary, Douglas Newcombe, Vicki Duso, Clark Volz, Howard Heideman, Paul Brown, Phil Boone, Patrick Dillon, Jayne Klein, and Dianne Easterling.].

MAKING SUMMER COUNT

HOW SUMMER PROGRAMS CAN BOOST CHILDREN'S LEARNING

Rand Corporation **Despite long-term and ongoing efforts to close the achievement gap between disadvantaged and advantaged students, low-income students continue to perform at considerably lower levels than their higher-income peers in reading and mathematics. Research has shown that students' skills and knowledge often deteriorate during the summer months, with low-income students facing the largest losses. Instruction during the summer has the potential to stop these losses and propel students toward higher achievement. A review of the literature on summer learning loss and summer learning programs, coupled with data from ongoing programs offered by districts and private providers across the United States, demonstrates the potential of summer programs to improve achievement as well as the challenges in creating and maintaining such programs. School districts and summer programming providers can benefit from the existing research and lessons learned by other programs in terms of developing strategies to maximize program effectiveness and quality, student participation, and strategic partnerships and funding. Recommendations for providers and policymakers address ways to mitigate barriers by capitalizing on a range of funding sources, engaging in long-term planning to ensure adequate attendance and hiring, and demonstrating positive student outcomes.**

TEACHING CORE PRACTICES IN TEACHER EDUCATION

Core Practices in Education In *Teaching Core Practices in Teacher Education*, Pam Grossman and her colleagues advocate an approach to practice-based teacher education that identifies "core practices" of teaching and supports novice teachers in learning how to enact them competently. Examples of core practices include facilitating whole-class discussion, eliciting student thinking, and maintaining classroom norms. The contributors argue that teacher education needs to do more to help teachers master these professional skills, rather than simply emphasizing content knowledge. *Teaching Core Practices in Teacher Education* outlines a series of pedagogies that teacher educators can use to help preservice students develop these teaching skills. Pedagogies include representations of practice (ways to show what this skill looks like and break it down into its component parts) and approximations of practice (the ways preservice teachers can try these skills out as they learn). Vignettes throughout the book illustrate how core practices can be incorporated into the teacher education curriculum. The book draws on the work of a consortium of teacher educators from thirteen universities devoted to describing and enacting pedagogies to help novice teachers develop these core practices in support of ambitious and equitable instruction. Their aim is to support teacher educator learning across institutions, content domains, and grade levels. The book also addresses efforts to support teacher learning outside formal teacher education programs. Contributors Chandra L. Alston Andrea Bien Janet Carlson Ashley Cartun Katie A. HUMAN SECURITY

SOME REFLECTIONS

University of Toronto Press During his lifetime, W.E. Blatz was so much occupied with the development of the University of Toronto's Institute of Child Study that he was able to devote little time to writing. This is his first

book to appear in twenty-one years, and his first complete exposition of his famous Theory of Security. The Theory of Security is radically different from the theories promulgated by Freudian psychologists. Whereas Freudian personality theory is based on the notion of "unconscious," an entity that is only indirectly observable, the Theory of Security derives from the observation of the conscious state in all its manifestations. Dr. Blatz thus makes use of both empirical observations and the results of introspection, and, as might be expected, some of his conclusions run counter to those reached in much current psychological discussion. But proof of the forcible influence of the theory and its author may be found in the impressive number of books and articles already published by Dr. Blatz's associates at the Institute of Child Study, applying the theory to the practical problems of psychological observation and therapy. It is fitting that the man whose work has generated so much fruitful research by others in this field should at last have set down in book form the fundamental principles that guided them.

AT YPSILANTI, MICHIGAN, 1849-1899 (CLASSIC REPRINT)

Forgotten Books Excerpt from A History of the Michigan State Normal School (Now Normal College): At Ypsilanti, Michigan, 1849-1899 Francis W. Shearman became Superintendent of Public Instruction in January, 1849, and Mr. Comstock, who had previously been Superintendent, was made. Chairman of the committee on Education in the House of Representatives. Early in the session of the Legislature a bill was reported from this committee for establishing a normal school. This bill was zeal ously urged forward by Mr. Comstock, and others and finally became a law on the 28th of March. A supplementary act was passed which was approved on the 31st of March. At the next session of the Legislature these two acts were consolidated and amended by a new act, approved by the Governor March 25th, 1850. The normal school was organized and opened under the provision of this last act. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
