The book is a must read for any professional currently working in finance, any student studying the topic or anyone curious on how the future of finance will look like.**

Handbook of Corporate Finance

Empirical Corporate Finance

Elsevier **Judging by the sheer number of papers reviewed in this Handbook, the empirical analysis of firms' financing and investment decisions—empirical corporate finance—has become a dominant field in financial economics. The growing interest in everything “corporate is fueled by a healthy combination of fundamental theoretical developments and recent widespread access to large transactional data bases. A less scientific—but nevertheless important—source of inspiration is a growing awareness of the important social implications of corporate behavior and governance. This Handbook takes stock of the main empirical findings to date across an unprecedented spectrum of corporate finance issues, ranging from econometric methodology, to raising capital and capital structure choice, and to managerial incentives and corporate investment behavior. The surveys are written by leading empirical researchers that remain active in their respective areas of interest. With few exceptions, the writing style makes the chapters accessible to industry practitioners. For doctoral students and seasoned academics, the surveys offer dense roadmaps into the empirical research landscape and provide suggestions for future work. *The Handbooks in Finance series offers a broad group of outstanding volumes in various areas of finance *Each individual volume in the series should present an accurate self-contained survey of a sub-field of finance *The series is international in scope with contributions from field leaders the world over**

The Politics of Financial Risk, Audit and Regulation

A Case Study of HBOS

Routledge **The biggest corporate failure ever in British history occurred in 2008 with very little forewarning. The management of HBOS, a major national bank with a long history of prudence prior to the merger in 2001, were allowed to act incompetently. Auditors and regulators failed to act, ignoring a key senior whistleblower, and the ‘competitive’ stock market failed to spot management failure in time. This book is the first academic study of this collapse, uncovering some surprising evidence on the power and politics of large financial institutions. It details the processes and degrees to which financial challenge and regulation are undermined by this power. The research exposes a pro-active process of regulatory risk management by these institutions; the ease with which auditors and regulators can be captured; and how politicians and investors can be all too happy to hop on the stock market and management spin ride - with other people's money. The study questions the ideology and politics which supported and encouraged the management hubris, raising profound questions about the ‘politics’ of the academic disciplines of banking, finance and accounting today, and the theories they underpin. This account of management gone wrong is essential reading for students, researchers and professionals involved in banking, finance, credit infrastructure, economics and management studies.**

Fiscal Decentralization and Local Public Finance in Japan

Routledge **The intergovernmental fiscal issue is highly relevant given the worldwide movement toward more decentralized governance in both industrial and developing countries. Over the course of five decades Japan has developed a robust system of decentralized governance. This book investigates fiscal decentralization and local finance in Japan with a view to understanding how the process of decentralization has unfolded there and what the rest of the world can learn. The author sheds light on the drives leading up to a need for decentralization reform over the last decade and evaluates so-called ‘Trinity Reform’ implemented by the Koizumi administration during 2004-2006. Finally, the book considers the decentralization process in Asian developing countries and discusses what lessons might be drawn from Japanese experiences. This excellent study of an important subject area will be particularly useful for all those studying intergovernmental fiscal relations, public finance and public sector economics. It will also be of interest to specialist international organizations and policy makers who are involved in intergovernmental issues.**

Back to Basics

Economic Concepts Explained

International Monetary Fund This paper discusses about capitalism that is often thought of as an economic system in which private actors own and control property in accord with their interests, and demand and supply freely set prices in markets in a way that can serve the best interests of society. The essential feature of capitalism is the motive to make a profit. In a capitalist economy, capital assets—such as factories, mines, and railroads—can be privately owned and controlled, labor is purchased for money wages, capital gains accrue to private owners, and prices allocate capital and labor between competing uses. Although some form of capitalism is the basis for nearly all economies today, for much of the past century it was but one of two major approaches to economic organization. In the other, socialism, the state owns the means of production, and state-owned enterprises seek to maximize social good rather than profits.

Fundamental Principles of EU Law Against Money Laundering

Routledge This book critically analyses fundamental principles of EU law for the control of international economic crime. Discussing how the reporting system and the exchange of information are at the heart of the global anti-money laundering regime, the study also looks at the inferential force of financial intelligence in criminal proceedings and the responsibilities this places on prosecutors and criminals alike. The author closely examines the application of Article 8(2) of the European Court of Human Rights for the retention and movement of the fingerprints, cellular samples and DNA profiles of unconvicted persons, and argues the incompatibility with the ECHR, along with the effect of socially stigmatising unconvicted persons. The work concludes with exploring how financial regulation has, inter alia, shifted responsibility to businesses and financial institutions to become more transparent and accountable to financial regulators and tax authorities. This critical analysis is essential reading for law students and the Judicial Body, as well as financial crime investigators and regulators.

Brazen: Big Banks, Swap Mania And The Fallout

World Scientific For nearly two decades, countless non-profits in the U.S. were forced to pay big banks enormous sums of money to settle or terminate bilateral contracts known as Interest Rate Swaps (IRSs). Officials at non-profits had entered into these costly contracts unaware that each contract has only one winner, and that big banks did not intend to be the losers. The effects of such monetary transfers have been catastrophic. Money-strapped non-profits had to dismiss schoolteachers, shut off water supply to thousands of poor households, and downsize many other essential public services. Local and state governments, public school districts, universities, hospitals and transit authorities from New York to Los Angeles have been among the largest hit. This book presents selected cases and highlights the lack of evidence that decision makers at non-profits had fully understood the terms and complexities of IRSs. The evident unequal bargaining power thus gives rise to the high likelihood of unconscionable contracting. Additionally, for terminating these contracts, big banks collected huge sums of money for services that had not been, and will never be, rendered. Accordingly, questions arise as to whether these termination payments are tantamount to unjust enrichment. Related Link(s)

The Finance Curse

How global finance is making us all poorer

Random House This is a book that none of us can afford to ignore - an agenda-setting, campaigning investigation that shows how global finance works for the few and not the many. **** A Financial Times Book of the Year **** 'Essential reading' YANIS VAROUFAKIS We need finance - but when finance grows too big it becomes a curse. The City of London is the single biggest drain on our resources, sucking talent out of every sphere, siphoning wealth and hoovering up government time. Yet to be 'competitive', we're told we must turn a blind eye to money laundering and appease big business with tax cuts. Tracing the curse back through economic history, Nicholas Shaxson uncovers how we got to this point. Moving from offshore tax havens to the bizarre industry of wealth management, he tells the explosive story of how finance established a stranglehold on society - and reveals how we can begin to break free. Access to finance for forest and farm producer organisations (FFPOs)

Food & Agriculture Org. Forest landscapes are inhabited by approximately 1.5 billion people. The aggregate gross annual value of these smallholder producers approaches US\$1.3 trillion. Adding value to that production, through financial investment, will be key to delivering the Sustainable Development Goals (SDGs). Therefore, access to finance is an important issue. The Forest and Farm Facility (FFF) commissioned this scoping paper to assess what might be done to improve access to finance. Organisation of forest and farm producers allows finance to be channelled toward value-added investments. But the motivation to form forest and farm producer organisations (FFPOs) varies with context, from the desire to secure resource rights for Indigenous peoples in the forest core, to the desire to strengthen economic scale efficiencies in periurban forest product processing industries. The scale and type of finance needs vary and span enabling investments (grants or concessional loans) through to asset investments (market-rate capital that requires a return). Access to finance for FFPOs requires tailored approaches. For FFPOs, enabling investments in four key areas are needed to create the conditions and necessary track record to attract asset investment: (i) secure commercial rights; (ii) strong organisation for scale; (iii) appropriate technical extension; and (iv) fair market access and business incubation. Enabling investments of this sort make FFPO businesses bankable and affords them access to finance.

Corporate Income Taxes under Pressure

Why Reform Is Needed and How It Could Be Designed

International Monetary Fund The book describes the difficulties of the current international corporate income tax system. It starts by describing its origins and how changes, such as the development of multinational enterprises and digitalization have created fundamental problems, not foreseen at its inception. These include tax competition—as governments try to attract tax bases through low tax rates or incentives, and profit shifting, as companies avoid tax by reporting profits in jurisdictions with lower tax rates. The book then discusses solutions, including both evolutionary changes to the current system and fundamental reform options. It covers both reform efforts already under way, for example under the Inclusive Framework at the OECD, and potential radical reform ideas developed by academics.

Dalhuisen on Transnational Comparative, Commercial, Financial and Trade Law Volume 3

Financial Products, Financial Services and Financial Regulation

A&C Black This is the fifth edition of the leading work on transnational and comparative commercial and financial law, covering a wide range of complex topics in the modern law of international commerce, finance and trade. As a guide for students and practitioners it has proven to be unrivalled. Since the fourth edition, the work has been divided into three volumes, each of which can be used independently or as part of the complete work. Volume one covers the roots and foundations of private law; the different orientations and structure of civil and common law; the concept, forces, and theoretical basis of the transnationalisation of the law in the professional sphere; the autonomous sources of the new law merchant or modern *lex mercatoria*, its largely finance-driven impulses; and its relationship to domestic public policy and public order requirements. Volume two deals with transnational contract, movable and intangible property law. Volume three deals with financial products and financial services, with the structure and operation of modern commercial and investment banks, and with financial risk, stability and regulation, including the fall-out from the recent financial crisis and regulatory responses in the US and Europe. All three volumes may be purchased separately or as a single set. From the reviews of previous editions: "...synthesizes and integrates diverse bodies of law into a coherent and accessible account...remarkable in its scope and depth. It stands alone in its field not only due to its comprehensive coverage, but also its original methodology. Although it appears to be a weighty tome, in fact, in light of its scope, it is very concise. While providing a wealth of intensely practical information, its heart is highly conceptual and very ambitious...likely to become a classic text in its field." *American Journal of Comparative Law* "Dalhuisen's style is relaxed...what he writes convinces without the need for an excess of references to sources...a highly valuable contribution to the legal literature. It adopts a useful, modern approach to teaching the young generation of lawyers how to deal with the increasing internationalisation of law. It is also helpful to the practising lawyer and to legislators." *Uniform Law Review/Revue de Droit Uniforme* "this is a big book, with big themes and an author with the necessary experience to back them up. ... Full of insights as to the theories that underlie the rules governing contract, property and security, it is an important contribution to the law of international commerce and finance." *Law Quarterly Review* "...presents a very different case: that of a civilized and cultivated cosmopolitan legal scholar, with a keen sense of international commercial and financial practice, with an in-depth grounding in both comparative legal history and comparative law, combined with the ability to transcend conventional English black-letter law description with critical judgment towards institutional wisdom and intellectual fashions. ...a wide-ranging, historically and comparatively very deep and comprehensive commentary, but which is also very contemporary and forward-looking on many or most of the issues relevant in modern transnational commercial, contract and financial transactions..." *International and Comparative Law Quarterly*

Regulating Securitized Products

A Post Crisis Guide

Springer Securitization regulation remains, in the eyes of investors, banks, businesses, bureaucrats and politicians, one of the remaining unsolved puzzles of the post-Global Financial Crisis landscape. This book describes the key features of securitization, including the most common structures and their uses as well as the motivations of the participants in these markets. Important historical moments and case studies are frequently used to illustrate critical issues in the design and enforcement of regulation for securitized products. This work is intended to contextualize and contribute to the highly specialized debates between policymakers, regulators and the regulated financial intermediaries, setting out an agenda for discussion as well as providing some strongly held views on possible solutions. Written by an industry insider with over 20 years' experience in the markets, this book considers regulatory tools from all sides while avoiding common biases. It is a valuable source for not only regulators and policymakers, but also educators, students and researchers in financial regulation, financial engineering and investment management.

Local Public Finance and Economics

An International Perspective

Springer Nature Globalization and the information revolution have highlighted the catalytic role of local governments for improving economic and social outcomes at the local level as well as growing the national economy by enhancing international competitiveness. This comprehensive account of local public finance and economics brings together principles and better practices for improving quality and access of local public services provision. The volume covers assignment of responsibilities; jurisdictional design; local service delivery; local regulation; local self-financing options such as income, sales, property and environmental taxation, user charges and fees; infrastructure finance options; and higher order government financing of local governments. The treatment is non-technical and suitable for a wide variety of audiences including scholars, instructors, students, media, policy advisers and practitioners.

Emerging Markets from a Multidisciplinary Perspective

Challenges, Opportunities and Research Agenda

Springer This book examines prominent issues in the Emerging Markets (EM) from a variety of disciplines in order to make useful societal contributions through knowledge exchange. EMs offer enormous opportunities, but realizing them is both challenging and risky due to inherent uncertainties of such markets. EM's also have unique characteristics that makes them different from developed countries. This causes implications for both theory and practice. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. This book investigates problems specific to emerging markets, and identifies new theoretical constructs, hypotheses (re)development, and emphasizes institutional contexts. The chapters in this book establish new conceptual and theoretical paradigms from multidisciplinary perspectives concentrated in the areas of information systems, electronic government, and digital and social media matters. The book focuses on topics in these areas such as digital enterprises, sustainability, telemedicine, and Information Communication Technology (ICT) and surveys the potential challenges and opportunities that may arise. These concepts and topics covered in this book are vital for making the global economy more equitable and sustainable.

Soulful Corporations

A Values-Based Perspective on Corporate Social Responsibility

Springer Science & Business Media In the light of multiple corporate debacles, financial crises and environmental disasters across the globe, the need for corporate goals to transition from simply maximising shareholder wealth to optimising stakeholder welfare is being echoed in various quarters. This book makes a distinct contribution by looking at Corporate Social Responsibility (CSR) from a values-based perspective with a focus on providing a balance between corporate success and social well-being. The book emphasizes that corporations need to redefine their purposes to co-create long-term, sustainable and win-win solutions for multiple stakeholders through mutually-fulfilling and value-adding collaborative efforts. Through the ideal of 'A Soulful Corporation', the book proposes a new story where corporations, as associations of individuals, can identify their 'collective spirits' in terms of environmentally-aware, socially-inclusive and financially-rewarding missions. Some of the unique features of the book include: · A detailed study of the evolution of CSR from the ancient to contemporary times · Insights gained through empirical research and personal interviews with over 100 industry captains, CEOs, MDs and heads of the CSR function across companies and industries · Case studies on CSR practices and processes in leading Indian companies including the Tata Group, TVS Motor, HUL, Wipro, L&T, Bharat Petroleum, HDFC Bank, Birla Group, Reliance Industries and others. · Cases on unique social welfare projects in the areas of education, healthcare and drinking water supply · A 'Society and Local Community Welfare Framework' and a '12-point Agenda for Affirmative Action' that propose policy recommendations and provide corporations with a roadmap for their CSR journey in the light of the mandatory CSR spending introduced by the Government of India. The book has relevance to multiple stakeholders: students, academics, CSR researchers, policy-makers, industry captains, business managers and entrepreneurs.

Financial Engineering for Low-Income Households

SAGE Publishing India Financial Engineering for Low-Income Households is an edited compilation of articles that focus on using financial engineering—a multidisciplinary field that uses technical methods from the fields of finance, mathematics and economics—to design financial services for low-income households. The book aims to provide an understanding of the various risk-reward trade-offs facing low-income households and how principles of financial engineering can be best applied to understand and manage the complete suite of financial and non-financial assets, including human capital, insurance, annuities and loans. This compilation connects the fundamental concepts in finance and financial engineering with the relatively new field of financial services delivery to low-income households. Its applied nature will help the reader grasp the implications of theoretical principles in finance on practical product-design considerations. It has several illustrations, caselets, and exercises to facilitate learning and in order to develop a full understanding of the underlying concepts. The book will be a valuable tool for students and practitioners interested in the design and delivery of financial services to low-income households.

Sustainable Finance, Digitalization and the Role of Technology

Proceedings of The International Conference on Business and Technology (ICBT 2021)

Springer Nature This book constitutes the refereed proceedings of the International Conference on Business and Technology (ICBT2021) organized by EuroMid Academy of Business & Technology (EMABT), held in Istanbul, between 06-07 November 2021. Artificial Intelligence and Islamic Finance Practical Applications for Financial Risk Management

Routledge This book provides a systematic overview of the current trends in research relating to the use of artificial intelligence in Islamic financial institutions (IFIs), across all organization of Islamic cooperation (OIC) countries. Artificial Intelligence and Islamic Finance discusses current and potential applications of artificial intelligence (AI) for risk management in Islamic finance. It covers various techniques of risk management, encompassing asset and liability management risk, credit, market, operational, liquidity risk, as well as regulatory and Shariah risk compliance within the financial industry. The authors highlight AI's ability to combat financial crime such as monitoring trader recklessness, anti-fraud and anti-money laundering, and assert that the capacity of machine learning (ML) to examine large amounts of data allows for greater granular and profound analyses across a variety of Islamic financial products and services. The book concludes with practical limitations around data management policies, transparency, and lack of necessary skill sets within financial institutions. By adopting new methodological approaches steeped in an Islamic economic framework (e.g., analysing FinTech in the context of Shariah principles and Islamic values), it devises practical solutions and generates insightful knowledge, helping readers to understand and explore the role of technological enablers in the Islamic finance industry, such as RegTech and artificial intelligence, in providing better and Shariah-compliant services to customers through digital platforms. The book will attract a wide readership spanning Shariah scholars, academicians, and researchers as well as Islamic financial practitioners and policy makers.

Global Justice Activism and Policy Reform in Europe

Understanding when Change Happens

Routledge Civil society activism around issues of global justice has proliferated in Europe during the past two decades. Has such contestation and advocacy made a difference? This book examines whether and how the organizations, networks and campaigns involved have attained their policy objectives in the areas of debt relief, international trade, international taxation and corporate accountability. The analysis also considers the relationship between national and transnational activism. By comparing variations in the "activism-policy nexus" in France, Italy and the United Kingdom, it seeks to understand how such interaction and policy outcomes vary in different institutional and political contexts.

Managing Nonprofit Organizations in a Policy World

CQ Press If nonprofits influence policy, make policy, are affected by policy, and are subject to policy, then shouldn't every nonprofit manager fully understand the policy world in which they operate? In explicitly tying the policy realm to management skills, Shannon Vaughan and Shelly Arsneault's foundational book sheds new light on how nonprofit managers can better navigate policymaking and regulatory contexts to effectively lead their organizations. *Managing Nonprofit Organizations in a Policy World* provides a comprehensive overview of the nonprofit sector and the policy environment, with a focus on skills and strategies managers can use to advance the causes of their organizations. Abundant examples and rich case studies explore the complexity of the policy-nonprofit relationship and highlight both management challenges and successes. While coverage of the nuts-and-bolts is in here, what sets this book apart is tying everyday management to the broader view of how nonprofits can thrive within the policy ecosystem.
