An Introduction to Accounting: Accountability in Organisations and Society takes a unique approach in embracing from the start the notion of accountability for the environment and sustainability in accounting; the structure, content and learning activities provide students with an understanding of accounting's pervasive and transformative role as a social practice and organisational driver. It shows that environments, ideas and values change; the interconnectivity of society; that the planet must be respected as a resource; and that people are affected/influenced by the information they receive and the way it is presented. It is emphasised that accounting and accountability are key aspects of every person's life and that the practice of accounting, while often being seen as very technical in nature, has many social implications. Learning accounting through the lens of sustainability and the environment embeds this perspective in students' minds so that in their careers they will actively seek and use accounting information to make decisions that take into consideration accountability for the environment. **Positive Accounting Theory Towards the Local Government's Integrated Accountability Framework A Critical Lesson from Socio-Environmental Issues in Indonesia** *Springer Nature* This book shows the growing phenomenon and the broad impact of socio-environmental conflicts in the grassroots communities—farmers, fishermen and urban poor—in Indonesia, as the effects of government's development strategies based on neoliberal and New Public Management (NPM) views without a clear accountability system or socio-environmental accountability practices and reports are becoming apparent. Inspired by the emancipatory socio-environmental accounting discourse, which focuses on the socio-local context in developing alternative models of accountability based on local views and people's aspirations, this book uses research methodology based on the principles put forth by Indonesian national hero and critical scholar Tan Malaka to develop a framework of integrated accountability for the local government. This book fills the present gap in English publications that analyse the intents and outcomes of the public management reforms in Indonesia with regard to socio-environmental issues, as a basis for further research at the international level as well as policymaking in Indonesia. As the Indonesian government has recently undertaken key structural and accounting reforms in the public sector, this book is a timely and valuable read for graduate students, researchers, and policymakers.

**Genomes and What to Make of Them** *University of Chicago Press* The announcement in 2003 that the Human Genome Project had completed its map of the entire human genome was heralded as a stunning scientific breakthrough: our first full picture of the basic building blocks of human life. Since then, boasts about the benefits—and warnings of the dangers—of genomics have remained front-page news, with everyone agreeing that genomics has the potential to radically alter life as we know it. For the nonscientist, the claims and counterclaims are dizzying—what does it really mean to understand the genome? Barry Barnes and John Dupré offer an answer to that question and much more in *Genomes and What to Make of Them*, a clear and lively account of the genomic revolution and its promise. The book opens with a brief history of the science of genetics and genomics, from Mendel to Watson and Crick and all the way up to Craig Venter; from there the authors delve into the use of genomics in determining evolutionary paths—and what it can tell us, for example, about how far we really have come from our ape ancestors. Barnes and Dupré then consider both the power and risks of genetics, from the economic potential of plant genomes to overblown claims that certain human genes can be directly tied to such traits as intelligence or homosexuality. Ultimately, the authors argue, we are now living with a new knowledge as powerful in its way as nuclear physics, and the stark choices that face us—between biological warfare and gene therapy, a new eugenics or a new agricultural revolution—will demand the full engagement of both scientists and citizens. Written in straightforward language but without denying the complexity of the issues, *Genomes and What to Make of Them* is both an up-to-date primer and a blueprint for the future.

"" "" **Corporate Social Irresponsibility A Challenging Concept** *Emerald Group Publishing* Corporate social responsibility (CSR) has become an increasingly heated topic since the 1980s. But there are severe limitations with the concept of CSR and the effectiveness of CSR practices. Addressing such limitations, this volume proposes that the concept of Corporate Social Irresponsibility (CSI) offers a better theoretical platform to avoid the vagueness, ambiguity, arbitrariness and mysticism of CSR. It challenges conventional modes of thinking, unveils the CSR mask of business practices and redirects public attention to the core issues of CSR. This collective work sets up an initial theoretical framework for the subject of CSI and examines the fundamental reasons for irresponsibility in and beyond a corporate context. Rooted in theory and practice it seeks to understand how boundaries of CSR and CSI have been constructed in society, and explores some systemic and structural issues of CSI in practice. **Contemporary Issues in Accounting The Current**

**Developments in Accounting Beyond the Numbers** *Springer* The book explores the developing challenges and opportunities within the business and finance world which are likely to impact the accounting profession in the near future. It outlines a number of approaches to ensure that the accountants of the future are equipped with a useful awareness of some of the key topic areas that are quickly becoming a reality and helps bridge the gap between academia and practice. The chapters are standalone introductory pieces to provide useful précis of key topics and how they apply to the accounting profession in particular. It aims to deliver key readings on 'hot topics' not addressed in other texts which the accounting profession is tackling or are likely to tackle soon. Hence the book provides accounting students and researchers a solid grounding in a broad range of highly relevant non-technical accounting themes, looking at the bigger environment in which future accountants will be operating, involving considerations of strategic corporate governance issues and highlighting competences beyond the standard technical accounting skill sets. **Accounting and Corporate Reporting Today and Tomorrow** *BoD - Books on Demand* We have spent a great deal of time on the continued development of accounting and auditing standards, which are used as a primary component of corporate reporting, to reach today's financial reporting framework. However, is it possible to say that, currently, financial statements provide full and prompt disclosure? Or will they still be useful as a primary element with their current structures in corporate reporting? Undoubtedly, we are deeply concerned about these issues in recent times. This volume contains chapters to discuss the today's and tomorrow's accounting and corporate reporting phenomena in a comprehensive and multidimensional way. Therefore, this book is organized into six sections: "Achieving Sustainability through Corporate Reporting", "International Standardization", "Financial Reporting Quality", "Accounting Profession and Behavioral Aspects", "Public Sector Accounting and Reporting", and "Managerial Accounting". **A Handbook of Children and Young People's Participation Perspectives from Theory and Practice** *Routledge* A Handbook of Children and Young People's Participation brings together key thinkers and practitioners from diverse contexts across the globe to provide an authoritative overview of contemporary theory and practice around children's participation. Promoting the participation of children and young people - in decision-making and policy development, and as active contributors to everyday family and community life - has become a central part of policy and programme initiatives in both majority and minority worlds. This book presents the most useful recent work in children's participation as a resource for academics, students and practitioners in childhood studies, children's rights and welfare, child and family social work, youth and community work, governance, aid and development programmes. The book introduces key concepts and debates, and presents a rich collection of accounts of the diverse ways in which children's participation is understood and enacted around the world, interspersed with reflective commentaries from adults and young people. It concludes with a number of substantial theoretical contributions that aim to take forward our understanding of children's participation. The emphasis throughout the text is on learning from the complexity of children's participation in practice to improve our theoretical understanding, and on using those theoretical insights to challenge practice, with the aim of realising children's rights and citizenship more fully.

**Corporate Social Responsibility Reporting in China Evolution, Drivers and Prospects** *Routledge* In recent years, Corporate Social Responsibility (CSR) reporting in China has been experiencing a rapid development and the number of social reports issued by Chinese enterprises shows a sharp increasing trend. This book investigates the evolution of such reporting practice in the country and the reasons behind it. In addition, it also examines the reporting quantity and quality of Chinese enterprises by applying the GRI (Global Reporting Initiative) as an evaluation tool. In response to policy documents so as to obtain the government's recognition and to strive for more resources, state-owned enterprises, private enterprises and foreign-invested companies have made substantial efforts in social reporting in terms of quantity and coverage. However, it appears that there is still room for enhancing the quality of disclosure. The book also highlights the central government's economic, political and social roles in promoting, encouraging and controlling the development of CSR reporting.

**New Perspectives on Desistance Theoretical and Empirical Developments** *Springer* This book brings together a collection of emergent research that moves the debate on desistance beyond a general consideration of individual and social structural influences. The authors examine empirical developments which have implications for policy surrounding resettlement and re-offending, but also for punishment practices. Presenting thought-provoking theoretical advances and critiques, the editors challenge and enrich traditional understandings of desistance. A wide range of chapters explore how some criminal justice interventions hinder the desistance process, but also how alternative approaches may be more helpful in

promoting and supporting desistance. Thorough and diverse, this book will be of great interest to scholars of criminology and criminal justice, social policy, sociology and psychology, and of special interest to researchers and practitioners working with (ex-)offenders.

**Registries for Evaluating Patient Outcomes A User's Guide** *Government Printing Office* This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.
